
We all know that as a man grows older and commences to realize his limitations, either as a money-maker or as a leader of men, it is increasingly difficult for him to say "No" to the insidious voice of the tempter who points out that he may, perhaps, have a little more of life's comfort or enjoyment by relaxing the discipline he had put upon himself when he was younger.

Then, too, although it may be an unkind thing to say, it is undoubtedly true that the extravagances of young people, of one's children, is in the United States responsible for not a few of the business failures that occur.

Requires Courage

It requires a higher degree of moral courage than most affectionate fathers possess to say to their daughters that they cannot have the new dress or give the entertainment they are so eager for; or that the son cannot have the new automobile or the vacation trip he is so anxious to take—because "Father hasn't got the money!"

It is an admission of incompetency or mediocrity on the part of the father, which he, poor man, is very reluctant to make to his own children. And while in most instances I would acquit the wives of the responsibility for the unwarrantable extravagances of which so many of our American men are guilty, I cannot acquit the children! However, their fathers are at least equally guilty with them, because of their unwillingness to tell the children the facts.

When it comes to a consideration of the causes of failure that are within the business itself, and due to what we might call its misconduct, I should probably name as the first the inability, or unwillingness, of a business man to divest himself of details and to trust to the judgment of others as his business grows larger.

The Linseed Oil Situation

Present Conditions Are Entirely the Results of Supply and Demand, Says Toronto Crusher, and Looks For Very Firm Markets

"LINSEED oil prices are high, but the whole situation is based absolutely on supply and demand," said M. Ransom, of the Canada Linseed Oil Company, to HARDWARE & METAL. "It is difficult to obtain supplies of seed, and I expect the markets to remain very firm until the new crop is in, and there may be little change even then. In my opinion buyers can make no mistake whatever in placing their orders now for half of their requirements at present prices, and taking a chance on the other half."

The rise in linseed oil prices has been one of the most spectacular of any commodity except turpentine. In spite of the high quotations there has been a steady demand not only at home, but for export, and many firms have been turning down export business because they have had all they can do to look after home markets.

Reports would indicate that United States consumers of linseed oil are in a much worse position than Canadians, owing to the fact that the crushers have been unable to depend upon getting supplies of seed from outside. Just how important outside supplies of flaxseed are to the American crushers may be gathered from the import figures given below.

The imports of seed from Canada have been as follows: 1914, 8,647,168 bushels; 1915, 6,629,860 bushels; 1916, 3,094,735 bushels; 1917, 7,014,523 bushels; 1918, 5,501,391 bushels.

Imports of seed from the Argentine were: 1915 3,927,542 bushels; 1916, 1,468,039 bushels; 1917, 5,209,441 bushels; 1918, 7,432,421 bushels.

The United States buyers had large orders placed in the Argentine for seed to meet its requirement for this year, but when the European buyers came into the market they offered such fancy prices that many of the South American exporters found it more profitable to cancel their contracts and pay the forfeits provided and send the goods overseas. This they have been doing right along, with the result that stocks at many American points are very low.

Canada buys very little flaxseed from the Argentine, and is in no way dependent upon that source of supply.

The 1918 crop of flaxseed at the latest estimates will not be more than 10,000,000 bushels. Early figures gave it as 13,000,000 bushels, but the long spell of hot, dry weather reduced this greatly. The normal requirements of American crushers are in the neighborhood of 15,000,000 bushels, and as they commenced buying wherever they could pick up supplies, prices started to climb, and have been reaching new high records for some weeks.

The market is in such a state now that it is very sensitive to every rumor and responds quickly, and generally upwards, as report after report of shortage comes in.

Not long ago the effects of the rising markets were shown in the all round advance made in paint prices.

As far as this year's Canadian crop is concerned, there is little doubt that it will be short. The best estimates apparently are at about 6,500,000 bushels.

With shortages of this kind in both the United States and Canada, and with overseas countries clamoring for supplies, those in close touch with the situation predict firm markets for some time.

The total amount of flaxseed required for home needs runs from about 2,500,000 to 3,000,000 bushels annually.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ONE of the most important changes made this week in its relation to conditions existing in the steel and iron markets is that of an advance in some quarters of 20c per 100 pounds in galvanized sheets. There are those in the trade who believe the market will show a general revision upward, while others again look for nothing more than a "levelling up" of existing prices, some declining, others perhaps showing a slight advance. The tendencies undoubtedly seem firm.

New prices have been named on carpet sweepers this week. Those with japanned finish advance $2.00 and nickel-plated finish $3.00 per dozen. Vacuum sweepers have also moved upward with quotations being made at levels $22 to $26 per dozen higher than those which have been in effect.

Ingot metals are strong and in some markets show advances. This is particularly true of tin and copper. The strength of copper is reflected in soldering coppers which are up another 8c per pound this week.

Boxwood rules, measuring tapes, cut hay baling wire, planes, shears and trimmers and sleighs have all joined the list which move to higher levels.

Oakum is reported very strong and higher prices are looked for at an early date. Wrought pipe seems slated for higher levels and difficulty is being experienced in securing sufficient skelp to maintain production.

MONTREAL MARKETS

MONTREAL, Aug. 21—Many advances have been made this week in various hardware lines and the changes are important. These, in brief, constitute increases for hay wire of the cut varieties, common door locks, Sterling slicers, tool sets, screwdrivers and chain and bench drills of Yankee make, these lines advancing about ten per cent. Expansive bits are up as well as the extra cutters for same. Chamois are advanced about 10 per cent. Injectors and grease cups, injectors and ejectors of Penberthy make are all higher. Carpet sweepers are advanced in price, effective August 20. Gun cleaners are higher to the tune of 15 per cent. Shears and scissors of Wiss' manufacture are higher in price. Copper and tin in ingot form are both higher. Black sheets advanced 10c per 100 pounds. One line of hoists is higher. Cocoa mats have been put on a new high basis. Brass middle butts and various other brass hinges are higher. Plug cutters, cement tools and spool wire are all higher.

The two declines of the week are confined to a few lines of old scrap and to wire solder. Trade is remarkably good for August.

Screwdrivers and Tool Sets Higher

Montreal

SCREWDRIVERS, TOOL SETS.—An advance has recently been made in some tools of "Yankee" manufacture. Net prices to the dealer on some of these are now available and are as follows: No. 10 screwdrivers, 2 in., $7.30; 4 in., $9.65; 6 in., $11.95; 8 in., $13.50; and 10 in., $16.15. Number 30 are quoted at $33.70 per doz.; 31, $45.25; 130, $38.50; and No. 20-1, $21.55. Tool sets No. 100 are quoted at $8.10 each.

Yankee drills, No. 41, are quoted at $29.25 per doz.; 42 at $23.10; 43 at $14.65, and 50 at $44.30.

Bench drills are quoted at $6.95 each for the No. 1455, and at 10.35 each for the 1555.

Chain drills, No. 1500, are $5.35, while Yankee vises, No. 990, are $2.95; 996 at $3.20; and 1993 at $8.35 each. Tap wrenches No. 250 are $1.75 each; 251, $2.20; and 1251, $2.90.

Hay Wire and Loop Ties on New Basis

Montreal.

HAY WIRE—A change has been made in the prices, f.o.b. Montreal, on cut hay wire and loop ties. The prices are as follows on "cut": No. 9 per cwt., $5.40; 10, $5.50; 11, $5.55; 12, $5.65; 13 and 13½, $5.75; 14, $5.95; 15, $6.15; and 16, $6.35.

"S" loop bale ties are somewhat higher, as follows: No. 12, $5.50; 13, $5.60; 13½, $5.70; 14, $5.75; 15, $5.95; and 16, $6.20.

Common Door Locks And Slicers Higher

Montreal.

LOCKS AND SLICERS.—Common door locks are higher. The ordinary rim style have advanced to $3 per dozen, net, while the price of porcelain and mineral knobs is now $2.75 per dozen.

Sterling slicers, No. 10, are priced at $2.60 each.

Advance Nearly 12% For Expansive Bits

Montreal

EXPANSIVE BITS.—An advance has been effected for expansive bits. This increase approximates between ten and twelve per cent. and is for Clarke's line. The present prices are: No. 1, per doz., $18.60, and No. 2, $27.00. Cutters for these are also advanced. The present prices for cutters are: No. 1 per doz., $3.10; No. 2, $4; No. 3, $5.50; No. 4, $6.25; and No. 5, $9.40. The increase of price for cutters is about 15 per cent.

Ten Per Cent. Advance on Chamois

Montreal.

CHAMOIS SKINS.—An advance of 10 per cent. on all grades of chamois skins

and all sizes is effective this week. This is due to the labor and shipping shortage. The demand is fairly brisk, with the larger sizes the best sellers, due to the automobilists demand for this commodity.

Injectors, Oil and Grease Cups Higher

Montreal.

INJECTORS, GREASE CUPS, ETC.—Various goods of Penberthy make are advanced, net list now applying and making the advance approximately 30 per cent. Quotations now are: Penberthy ejectors, 60 and 10 off list; Penberthy injectors, 60 per cent. off list; water gauges, 25 per cent. off list, or about 15 per cent. advance; Penberthy grease cups, Nos. 950 to 953, quoted at 40 per cent. off list; No. 954 at 30 per cent. off list, which is an increase of 15 per cent.; Penberthy oil cups, Nos. 300 to 303, at 5 per cent. off list, or about 15 per cent. upward; Penberthy oil cups, Nos. 304 and 305, 15 per cent. off list; Penberthy air cocks, lever and tee handle 40 and 2½ per cent. off list, or 20 per cent. advance over previous quotations.

Carpet Sweepers Are Marked Up

Montreal.

CARPET SWEEPERS.—The Bissell line of carpet sweepers has been advanced for several of the numbers. The list prices are marked higher under date of August 20 on Japanned, $2.00; and on nickelled, $3.00. Vacuum sweepers of this manufacture are quoted $22 to $26 per dozen above former figures. New prices are shown in current market quotations.

Gun Cleaners Higher; Shears and Snips Up

Montreal.

CLEANERS, SHEARS, SCISSORS.—Advanced prices are in effect on all lines of gun cleaners. The increases made are approximately 15 per cent.

Wiss line of shears and snips are advanced. This applies to the whole line of scissors as well and the increase is about 10 per cent. all through.

Various Brass Hinges Make a Big Advance

Montreal.

HINGES—Various increases have been made of late for brass hinges. The latest is that for wrought brass hinges, these being advanced from a former 7½ per cent. advance to the present advance of 25 per cent. on list. The change also applies to desk and shutter, narrow, middle and broad butts.

Hoists Are Higher; Cocoa Mats Advance

Montreal.

HOISTS AND MATS.—Higher prices are in effect for hoists of Burr manufacture. These are selling in the ordinary pattern as follows: No. 3, $1.90; No. 4, $3.60; No. 5, $4.50; No. 6, $5.60; No. 4½, $6.40; No. 5½, $7.75; and No. 6½, $9. For the roller-bearing patterns the following prices are now in effect: No. 3, $3.80; So 4, $5.60; and No. 5, $8.

New prices are out on cocoa mats and the line has increased to the extent of 10 per cent. Labor is one of the contributory reasons for this increase.

Plug Cutters and Cement Tools Go Up

Montreal.

CUTTERS, CEMENT TOOLS. — Advances have been made for plug cutters. The following prices apply for three ordinary stock sizes: Half inch, $6 per doz.; 9-16, $6.40; and 5-8, $6.80. These prices apply to Stearns' make.

Cement tools of the various shapes have also advanced. The increase is equal to about 20 per cent. over previous prices.

Various Spool Wire Is Moved Higher

Montreal.

SPOOL WIRE.—New high prices have been reached on various kinds of spool wire. The following prices apply: One ounce black, per gross, No. 28, $3.55; No. 34, $4.40; and tinned, No. 28, $4.40, and 34, $4.85. Soft brass wire on spools: No. 20 is quoted at $2.50 per doz. for ¼ lb. spools; 22, $2.85; and soft copper in relative sizes, $2.45 and $2.55.

Big Nail Sales Still Reported; Firm

Montreal.

NAILS AND WIRE.—Sales of wire nails still are heavy and there appears to be no diminution in the tonnage from week to week. The price basis is without change, but the undertone is firm and the tendency is that the basis will not lower. The keg price is still $4.75 and this applies, likewise, for cut nails.

There is little new in wire excepting that hay wire is a big seller. Smooth steel wire, No. 9, is quoted at $5 per cwt.

Seasonable Sales Reported For Rope

Montreal.

ROPE AND CORDAGE.—There has been little development in rope markets. Jobbers are buying what they need from the makers and retailers are doing likewise from the jobbers. The tendency is steady on manila and sisal, while soft fibres, as for some time, are very firm and still tending upward. The base prices are: Pure manila, per lb., 32c; Beaver or British manila, 28c, and sisal, 25c.

Stoves Soon Active; Wares Hold Firmly

Montreal.

STOVES AND WARES.—There has been a seasonable, though light movement of stoves and ranges. The same will greatly improve, doubtless, early next month, for shipment of booked orders, and of which many have been received, will begin in earnest. The undertone is firm and there is no indication now of reductions being made. The market is also steady and firm for various wares and the summer trade has been reasonably good.

No Extensive Sales Oil or Gasoline

Montreal.

COAL OIL, GASOLINE. — While August busines has been fair for these lines, there is not a heavy movement. The basis for coal oil holds without change at 21 to 24c per gallon, and that for gasoline of motor grade, 33c.

Good Sales Made Iron and Steel

Montreal.

IRON AND STEEL.—While the marketing of these products at this time of the year is not usually expected to be heavy, the outturn has been satisfactory for the past month. Mills are rolling steadily and some of them overtime. The undertone is quite firm, too, but no changes have been made in the price basis.

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	6 50
Spring steel	6 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond tool steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Black Sheets Up; Galvanized Hold

Montreal.

SHEETS AND PLATES—An advance of ten cents per 100 lbs. has been made for black sheets of all gauges from 18 and lighter. This is in direct and definite accord with the tendencies reported last week in HARDWARE AND METAL. The undertone is firm and no lower prices are likely at this time. There have been no recorded changes for galvanized sheets. Sales are reported good, and of some of the lighter gauges there is said to be a tax on available stocks.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$5 60	$6 25
12 gauge	5 55	6 20
14 gauge	5 60	6 35
16 gauge	5 70	6 50
18-20 gauge	....	6 35
22-24 gauge	....	6 40
26 gauge	6 45	6 50
28 gauge	6 75	7 00
GALVANIZED SHEETS—		
U.S. Standard—		
10¾ gauge	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00
English Standard—		
28 gauge	....	8 35
26 gauge	....	8 10
24 gauge	....	7 40

22 gauge	....	7 30
18 and 20 gauge	....	7 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Old Material List Records Declines

Montreal.

OLD MATERIALS.—In accordance with the quiescent state of trade here the prices for old scrap have weakened and lowered quotations are made this week on pipe scrap, stove plate, malleable scrap, and some of the other lines are tending to soften. The basis is well held for scrap copper and lead. Altogether there is not a great deal of movement and the condition seems to be that of a waiting one. It is probable that there may be an active market in a few weeks, when manufacturers will likely be in need of more supplies.

Dealers' Buying Prices—		
Pipe scrap, ton	....	8 00
Stove plate, ton	14 00	15 00

Heavy copper	0 17	0 18
Wrought iron, No. 1, per gr. ton	....	15 00
Malleable scrap (ton)	....	15 00

Lower Prices Now On Wire Solders

Montreal.

LEAD PRODUCTS.—The change of the week on lead products is but one and this is confined to wire solder. The decline recorded amounts to one and a quarter cents per pound, 40-60 being quoted at 36c, 45-55 at 38¾, and 50-55 at 41¼c per lb .

There is a fair sale for manufactured lines and the movement of solder and sheet lead and lead pipe is quite satisfactory, season considered.

Lead pipe	....	0 12½
Lead waste	....	0 13½
Note.—Lead pipe is subject to a discount of 10%.

Do., broken lots	....	0 18

Copper Firms Again; Tin Scores Advance

Montreal.

INGOT METALS.—The features of the week are those of a firming of the market for copper and also for tin. There is not a big movement, but there is a good promise in prospect.

COPPER.—In view of the possibility of export of copper to Germany being likely soon, interest centres around this ingot and there is anticipation of prices being advanced once export begins. The basis is somewhat firmer, locally, at 27c per pound.

TIN.—An advance of 2c per pound is made here this week and the tendency is firmer. It is pointed out that little tin is expected to be available from London before September, at the earliest.

LEAD.—This is somewhat firmer in prices, although the product is selling at 7½c per pound. The tendency is stronger.

ANTIMONY.—There is little change. Condition of the market is steady at an unchanged price of 10c per pound.

ALUMINUM.—The basis holds at 35c per pound with sales limited and interest small.

PIG IRON.—$50 per ton is the base price here for this. There has been a limited sale for the product.

TORONTO MARKETS

TORONTO, Aug. 21—Tendencies are decidedly firm and the markets this week reveal many lines quoted at higher levels. Carpet sweepers are up from $2.00 to $3.00 per dozen and vacuum sweepers are up from $22 to $26 per dozen. Boxwood rules and measuring tapes are higher with Wiss' shears and trimmers showing a 15 per cent. advance. Soldering coppers are up 8c per pound and ready roofing has advanced 10c per roll in some quarters. Some factors have increased their quotations on galvanized sheets 20c per 100 pounds.

Soldering Coppers Up Another 8c

Toronto.

SOLDERING COPPERS.—Another sharp advance has been recorded in soldering coppers this week, price moving up another 8c per pound, bringing the base price to 56c per pound. No change in the extras is reported.

Rules, Measuring Tapes Up 10 Per Cent.

Toronto.

RULES, MEASURING TAPES.—A ten per cent. advance has been shown in boxwood rules during the week, both Stanley and Lufkin lines being affected. Lufkin measuring tapes have also followed the upward trend and are being quoted at advanced figures.

Carpet Sweepers Register an Advance

Toronto.

CARPET SWEEPERS.—New prices named on Bissell carpet sweepers and vacuum sweepers show a substantial increase over figures formerly in effect. Carpet sweepers, japanned finish, are up $2.00 per dozen, and nickel-plated finish $3.00. Vacuum sweepers are up from $22.00 to $26.00 per dozen. The new prices adopted, which include these advances, are: American Queen, nickeled fittings, Cyco ball bearing, dozen, $51.00; Cub, jap., Cyco bearing, dozen, $108.00; Champion, nickeled fittings, dozen, $43.00; Champion, japanned, fittings, $36.00; Grand, nickeled, Cyco ball bearing, dozen, $64.00; Grand, japanned, Cyco ball bearing, dozen $57.00; Grand Rapids, nickeled, Cyco ball bearing, dozen, $48.00; Grand Rapids, japanned, Cyco ball bearing, $41.00; Parlor Queen, nickeled, Cyco ball bearing, dozen, $54.00; Princess, nickeled, Cyco ball bearing, dozen, $49.00; Standard, nickeled, fittings, dozen, $45.00; Standard, japanned, fittings, dozen, $38.00; Universal, nickeled, Cyco bearing, dozen, $46.00; Universal, japanned, Cyco bearing, $39.00.

SWEEPERS, VACUUM.— Grand Rapids, nickeled, dozen, $124.00; Household, japanned, dozen, $110.00; Superba, nickeled, dozen, $140.00.

Another Advance Made in Planes

Toronto.

PLANES.—Another advance has been recorded this week in Stanley Siegley planes, which are now quoted at prices showing an advance of ten per cent. over figures only recently named.

Shears, Trimmers, Up About 15 Per Cent.

Toronto.

SHEARS, TRIMMERS.—Quotations are just available on Wiss and Heinisch shears and trimmers, which show a substantial increase over former levels. A new list has been established which provides for a net advance aggregating 12½ to 15 per cent.

Slight Revision Made in Rifles

Toronto.

RIFLES.—A slight revision upward has been made in Winchester rifles, which are being quoted at an advance on the list of 27½ per cent. instead of an advance on list of 25 per cent., formerly effective.

Ten Per Cent. Advance in Sleighs

Toronto.

SLEIGHS.—New prices named in some quarters on sleighs this week show an advance over former figures amounting to about 10 per cent. Increased cost of lumber and mounting production fig-

ures are assigned as reasons for this change.

Waste Holds Firm; Oakum Very Strong

Toronto.

WASTE, OAKUM.—An active demand is in evidence on cotton waste, and the market remains steady with quite a firm undertone. Prices are unchanged at figures shown in current market quotations.

Oakum rules with decided strength, and it looks very much like higher figures on this product for the week; figures in current market quotations still hold good.

Roofing Rules With Firm Undertone

Toronto.

ROOFING.—A very firm market rules on ready roofing with some lines showing a further advance this week amounting to 10c per roll. Manufacturers report business excellent, and look for a continuation of the present satisfactory state of affairs.

Market Rules Unchanged Rope

Toronto.

CORDAGE.—No new developments are recorded this week in rope, prices holding steadily and business along fairly normal lines. The markets show some little unsteadiness, but it is felt present basis will be maintained for some little time. Quotations which are now ruling to the trade are: Pure manila, 32c per lb. base; Beaver manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25c per lb. base.

Good Trade in Stoves; Wares Moving

Toronto.

STOVES, WARES.—Activity is becoming more apparent in regard to the movement of stoves and volume of trade is reported very satisfactory. Prices are very firm.

Business on all lines of wares is reported good and the markets show a decidedly firm undertone. No immediate change, however, is contemplated.

Iron and Steel Bars Holding Unchanged

Toronto.

IRON AND STEEL.—No particularly new developments have entered into the situation on iron or steel bars. Trade is considered very fair and prices are ruling at unchanged levels as follows:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk iron	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Nails Moving Quite Freely; Wire Too

Toronto

NAILS, WIRE.—A fairly free movement of nails is reported, indicating that building is quite brisk and the market rules without change at levels considered very firm. Quotations ruling are for the wire nails, $4.70 per 100 pounds base, and cut, $4.75 per 100 pounds base.

A very good volume of business is reported in some lines of wire with firmness shown in the markets. Smooth steel wire is quoted at $5.00 per 100 pounds base, an unchanged figure.

Activity Shown in Oils, Gasoline Sales

Toronto

OILS, GASOLINE. — Activity continues to be the predominating feature in the situation relating to oils and gasoline. Lubricating oils are moving freely and maintain a steady position in the market. Gasoline sales are heavy with the quotation of 32c per gallon maintained. Coal oil shows no revision, prices ranging from 20½c to 23½c per gallon, according to grade.

Wrought Pipe Shows Strength; Tubes Firm

Toronto

WROUGHT PIPE, BOILER TUBES—Strength is prominent in the feeling on wrought pipe. Higher prices are being talked of and seem due to come almost any time. Difficulty in getting sufficient skelp to meet needs of production is being experienced and with trade good, it is indicated that it is not easy to take care of business offering.

Boiler tubes rule with a firm undertone, but show no actual change from prices given below:

	Per 100 feet	
BOILER TUBES—	**Seamless**	**Lapweld**
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	38 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Solder is Firm; Lead Products Hold

Toronto.

LEAD AND ZINC PRODUCTS.—Factors contributing to quotations ruling on solders, such as tin and lead, reveal increased strength. Whereas metal prices have shown no change this week the tendency seems upward again, and if higher prices result, solder will be influenced.

Lead products are unchanged. Business is considered very good and outlook promising. The market is very firm.

Lead pipe, list, per lb.	$0 12½
Lead waste pipe, list, per lb.	0 13½
Do., over 6 inches, list, per lb.	0 14½
Above subject to discount of 10%.

Zinc sheets, per lb.	0 17

Galvanized Sheets Register Advance

Toronto

SHEETS, PLATES.—An advance of 20c per 100 pounds is reported in some quarters on galvanized sheets, and the tendency of the market all through seems upward. Difficulty in getting prompt deliveries is being experienced. Business continues to be along broader lines.

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 60	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 00	$8 10
U.S. 28	7 40	7 60	7 70
U.S. 26	7 10	7 30	7 40
22 and 24	6 95	7 15	7 25
18 and 20	6 80	7 00	7 10
16	6 65	6 85	6 95
12 and 14	6 50	6 70	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Good Trade Noted In Corrugated Sheets

Toronto

CORRUGATED SHEETS.—There is a splendid trade reported in corrugated sheets and manufacturers indicate that owing to the slowing up of deliveries of sheets from the mills that they are compelled in some instances to substitute on sizes. However, this is a good healthy sign and indicates that building must be on the increase.

This is shown also in sales of eavestrough, conductor pipe and kindred lines, which are moving forward freely for both city and country trade.

Corrugated Sheets—	**Gal'zed**	**Painted**
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00

No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Trade Still Restricted in Scrap

Toronto.

OLD MATERIALS.—Trade is still within rather narrow channels, but the possibility of the settlement of many labor difficulties will, it is thought, open up the markets again. Prices show no change and trade is really marking time:

Firmer Tone Shown In Metal Markets

Toronto.

INGOT METALS. — Firmness again prevails practically all the way through and whereas no actual price changes have been recorded since last issue, there is no tendency towards an easier level.

COPPER.—A better feeling has developed and the market is well sustained. Prices show no change from last week's figure of 27c per pound.

TIN.—After a slight breathing spell, the market has assumed greater strength again and seems tending towards slightly higher figures. The price of 61c-62c per pound is an unchanged one, however.

SPELTER.—Sales are better and as a consequence the market is in a stronger position. Quotations locally range around 10c-10½c per pound, which figures are without change.

LEAD.—There is no change in the prices of 7c to 8c per pound being quoted, but a better feeling prevails in the market. Sales are very good and a firm undertone is noted.

ANTIMONY.—The position of this metal displays no particularly new development. Price holds around 10c to 11c per pound.

ALUMINUM.—A better volume of trade is shown and price remains steady at around 35c per pound.

LONDON MARKETS

LONDON, Ont., Aug. 21—Business all through this district continues excellent and there is every indication that the fall and winter trade is going to be a record-breaker. Merchants are now taking in goods required for their fall business. Prices continue firm and prospects are that advances will be shown in many lines. From the farming centres come reports that indicate splendid prosperity and large buying capacity. In the city itself building permits indicate unusual activity and besides the work under way architects are very busy with new projects.

Advance is Made in Colgate Shaving Soap

London, Ont.

COLGATE SHAVING SOAP.—Prices on this line have been advanced, and the new quotations are as follows: Large stick, rapid shave powder and shaving cream, all $4.35 per dozen.

Higher Quotations on Wyandotte Cleaner

London, Ont.

WYANDOTTE CLEANER. — Quotations on Wyandotte cleaner have been revised and the new figures are $18.50 per barrel of fifty 5-lb. bags; 38c per single sack.

Wood Side Ash Sifters Higher This Season

London, Ont.

ASH SIFTERS.—Common wood side ash sifters have been advanced, and the new prices are $3 per dozen. No change is shown in Banner at $3.20 each, and Rocker No. 1 at $4.75.

Cast Enamel Sinks Up About 5 Per Cent.

London, Ont.

CAST ENAMEL SINKS.—New and higher quotations on cast enamel sinks show that an advance of about 5 per cent. is in effect. The new prices are:

Inches.	Shipment. One.	Two	Three.
16 x 24, each	$5.17	$5.11	$5.05
18 x 30, each	5.87	5.81	5.75
18 x 36, each	....	10.01	9.95

Advance Expected in Butts and Hinges

London, Ont.

BUTTS AND HINGES, IMPLEMENT BRACKETS.—There has been a brisk demand for butts and hinges. Indications point to an advance in these goods shortly. Implement brackets have been advanced, the new prices being for the No. 31, $6.50 per dozen.

No Change Shown in Buck Saw Prices

London, Ont.

BUCK SAWS.—Buck saws are selling fairly well. Prices show no change, the quotations being: Happy Medium, $9.60 per dozen; Whiting Pride, $12; Prince Rupert, $15.30; No. 50, $15.30.

Cross-Cut Saws and Handles Steady

London, Ont.

CROSS-CUT SAWS, HANDLES.—Orders for winter are now being booked and prices show no change from the following: Champion, 57c ft. Philadelphia Lance, 57c ft.; Maple Leaf Lance, Premier, Racer, Simonds', 5 ft., $4.95 each; 5½ ft., $5.85; 6 ft., $6.60. Cross-cut saw handles are quoted as follows: No. 3, $5.30 per doz. pairs; No. 4, $4.05; No. 6½, $4.05; No. 6, $4.05; No. 5, $7.20; No. 20, $9.60.

Cattle Chains and Tie Out Chains Steady

London, Ont.

CATTLE CHAINS, TIE OUT CHAINS. —Cattle chains show no change from 20 per cent. off list. Tie out chains are quoted at 37½ per cent. off list.

Game Trap Orders Now Being Filled

London, Ont.

GAME TRAPS.—Book orders for game traps are now being shipped. Prices show no change, the quotations being:

Victor, with Chain—No. 0, $1.90 dozen; No. 1, $2.20; No. 1½, $3.30; No. 2, $4.60; No. 2½, $6.50; No. 3, $7.80.

Oneida Jump, with chain—No. 0, $2.50 dozen; No. 1, $2.95; No. 1½, $4.40; No. 2, $6.45.

Newhouse, with chain—No. 1, $5.00 dozen; No. 1½, $7.50; No. 2, $11.10; No. 3, $14.80; No. 4, $17.50.

No Changes in Apple Parer Prices

London, Ont.

APPLE PARERS.—Apple parers are now selling. Prices show no change and are as follows: Hudson, $14 per dozen; Little Star, $10.50 per dozen.

No Changes Made in Hand Sleighs

London, Ont.

HAND SLEIGHS.—Orders are now being taken for fall delivery for hand sleighs. Prices are unchanged, Canadian Buffalo make being 35 per cent. off list.

Prices of Skates Remain the Same

London, Ont.

SKATES.—Orders are now being taken for fall delivery and quotations are unchanged, Starr being 30 per cent. off list.

Oil Heaters Show No Change in Price

London, Ont.

OIL HEATERS.—Orders are now being taken for fall shipment. Prices are holding unchanged, the quotations being: Perfection, No. 525, $7.00; No. 530, $8.25; No. 630, $10.25, all each less 25 per cent.

Wiss Shears and Scissors Advanced

London, Ont.

WISS SHEARS AND SCISSORS.—Advances which approximate 12½ cent. are in effect on Wiss shears and scissors. The new list is less 33 1-3 per cent., and the net prices figured on some of the best sellers at this figure are:

Straight Japanned Shears—No. 36, $12.00 doz.; No. 36½, $12.80; No. 37, $13.67; No. 37½, $14.27; No. 38, $14.80; No. 38½, $15.80; No. 39, $18.80.

Straight N.P. Shears—No. 136, $13.67 dozen; No. 136½, $14.53; No. 137, $15.40; No. 137½,

$16.13; No. 138, $17.07; No. 138½, $17.93; No. 139, $21.47.

Wiss Tinner Snips are up about 12½ per cent. The new prices are: No. 8, $2.73 each; No. 9, $2.33; No. 10, $2.20; No. 12, $1.40.

Orders Being Taken For Snow Shovels

London, Ont.

SNOW SHOVELS.—Orders for fall shipment are now being taken for snow shovels. Quotations are as follows: Prince or No. 20, $7.88; Queen or No. 30, $8.75; King or No. 40, $10.50; Moose or No. 50, $13.16; Furnace Scoops, $8.75 per dozen.

Lace Leather is Revised Upwards

London, Ont.

LACE LEATHER.—New and higher prices are now in effect on lace leather, the quotations being, cut, $2.40 per pound; sides, $2.00 per pound.

Ten Per Cent. Jump in Cheap Rim Locks

London, Ont.

RIM LOCKS.—Cheap rim locks have been advanced ten per cent., the new quotations being $3.00 per dozen.

Mortise Knobs Are Up Ten Per Cent.

London, Ont.

MORTISE KNOBS.—Jet and porcelain rim and mortise knobs are up ten per cent., the quotations being $2.75 per dozen.

Household Scales Show an Advance

London, Ont.

HOUSEHOLD SCALES. — Renfrew 30-pound household scales are higher, the new price being $5.25 each, stamping included.

Ten Per Cent. Rise in Price of Valves

London, Ont.

VALVES.—New prices on valves are approximately ten per cent. higher on globe, angle and check valves. Standard are 14 per cent. off list and Jenkins pattern 12 per cent. off list.

No Changes Shown in Price of Rope

London, Ont.

ROPE.—There is a fair demand for rope. Prices are unchanged, the quotations being: Pure manila, 32c base per pound; British, 28c; New Zealand hemp, 28c; sisal, 25c.

Glass Sales Brisk; Putty Prices Firm

London, Ont.

GLASS, PUTTY.—Glass sales are showing great improvement as merchants are stocking up for the fall trade. Prices are as follows: Single Diamond, 25%, double Diamond 25%, and Cut Lights 10%.

Putty is selling well. Prices show no change from the following: Standard, 100 lb. drums, $6.80 per 100 lbs.; 25 lb. drums, $7.05 per 25 lbs.; Pure, 100 lbs., $9.30 per 100 lbs.; 25 lb. drums, $99.55 per 25 lbs.

Turpentine Prices Are Holding Firm

London, Ont.

TURPENTINE.—There is a good sale for turpentine. Prices are holding steady at the following quotations: 1 barrel lots, $2.40 per Imperial gallon; 2-4 barrel lots, $2.39 per Imperial gallon; 5 gallon lots, $2.50 per Imperial gallon.

No Changes Shown in Linseed Oil Prices

London, Ont.

LINSEED OIL.—There is fair activity in the linseed oil trade. Prices are unchanged and are as follows:

	Raw.	Boiled.
1 to 2 barrels, gal.	$3.22	$3.25
3 to 5 barrels, gal.	3.21	3.24
6 to 9 barrels, gal.	3.19	3.22

Less barrels add 10 cents a gallon.

WINNIPEG MARKETS

WINNIPEG, Aug. 21—Price changes during the week, while not very numerous, include several lines which will be of interest to the hardware trade, such as railroad spikes, ship spikes, Canada plates and cotton rope, all of which show declines, while solder, copper rivets, alarm clocks, soldering coppers and hemp ropes show advances.

Hardware markets in general show a very firm trend and higher prices are being quoted at the present time on many lines of shelf hardware, with no indications of lower prices for some time to come.

Business is reported good in all lines, while crop reports have been more encouraging of late and good business is looked for in all lines this fall.

Wood Alcohol is Up 25c a Gallon

Winnipeg.

WOOD ALCOHOL.—Prices on wood alcohol have taken a big jump during the week, moving up 25c per gallon over former prices, with indication of even higher prices in the near future. To-day's ruling prices are given herewith: 1 gallon and five gallon lots, $2.50 gallon. plus the usual extras for containers.

Reduction is Made in Railroad Spikes

Winnipeg.

RAILROAD SPIKES.—Prices on railroad spikes have been revised to lower levels during the week, showing a reduction of approximately 50c per 100 pounds. New prices being as follows: 5-16 x 2½ inch, $7.45; ⅜ x 3 inch, $6.75; ⅜ x 3½ inch, $6.75; ½ x 4½ inch, $6.45; ½ x 5 inch, $6.45 per 100 pounds.

Copper Rivets Show 20 Per Cent. Advance

Winnipeg.

COPPER RIVETS.—Of late the copper market has shown much activity, prices advancing rapidly with the result that new prices have been announced on copper rivets, which show an advance of approximately 20% over former quotations. New ruling prices on the various lines are as follows: Copper rivets and burrs, assorted, No. 8, 62c; No. 10, 67c pound. Copper rivets only, No. 7, 55c; No. 8, 56c; No. 10, 60c; No. 12, 65c pound. Copper burrs only, No. 7, 55c; No. 8, 56c; No. 10, 60c; No. 12, 65c pound.

Ship Spikes Also Register a Decline

Winnipeg.

SHIP SPIKES.—Ship or boat spikes are also reduced during the week. The following being to-day's ruling prices on the various sizes: ¼ x 4 inch, $8.30; ¼ x 6 inch,, $8.00; 5-16 x 6 inch., $7.65; ⅜ x 6 inch., $7.40; ⅜ x 7 inch., $7.40; ½ x 8 to 12 inch., $7.20; ⅝ x 8 to 12 inch., $7.20; ¾ x 8 to 12 inch, $7.20 100 pounds.

Canada Plates Down Fifty Cents a Box

Winnipeg.

CANADA PLATES.—Following further factory reductions, new prices have been issued during the week on Canada Plate, showing a general reduction of 50c per box on both half and full polished, making to-day's selling prices as follows: half polished, $8.75 box; full polished, $9.00 box.

Solder Moves Up Two Cents a Pound

Winnipeg.

SOLDER.—Further advances in the tin market is responsible for the recent advance in the price of solder, which moves up 2c per pound, and the market is reported as very firm, and even higher prices would not be surprising. To-day's market price is given herewith: Half and half solder, full boxes, 37c pound; less than boxes, 38c pound.

Alarm Clocks Are Revised Upwards

Winnipeg.

ALARM CLOCKS.—Due to increased cost of production and labor troubles, factories have been compelled to advance prices on alarm clocks, which move up from 10 to 12½ per cent. over former quotations, and are quoted to-day as follows: Alarm clocks, Big Ben, $3.35 each; Baby Ben, $3.35 each; Sleepmeter, $2.00 each; Lookout, $1.90 each; American, $1.50 each. Pocket Ben watches are also revised on the same schedule as the clocks, the new price being $1.50 each.

Soldering Coppers Show an Advance

Winnipeg.

SOLDERING COPPERS.—Soldering coppers show further advances during the week, due to the advancing copper market, and new prices now ruling are given as follows: ¾ pound, 62c; 1 pound, 61c; 1½ pounds, 58c; 2 pounds, 57c; 2½ pounds, 56c; 3 pounds, 55c per pound.

Linseed Oil Prices Are Holding Firmly

Winnipeg.

LINSEED OIL—Linseed oil prices still hold firm at former prices, and no immediate change is anticipated as it is thought prices will show little change until further crop reports are received on the flax crops. To-day's prices are confirmed as follows: Raw linseed oil, $3.10 gallon. Boiled linseed oil, $3.13 gallon in single barrel lots.

Cotton Rope Prices Are Moving Upwards

Winnipeg.

COTTON ROPE.—Higher prices have just been announced on cotton rope, following the recent strength showing in cotton prices, and from present indications even higher prices would not be surprising. To-day's prices are given as follows: Cotton rope, 3-16 inch, 72c pound; ¼ pound and over, 71c pound.

Rope Prices Down From 2 to 2½ Cents

Winnipeg.

ROPE.—Owing to heavy stocks of rope, showing a general reduction of both manfactured and raw materials lower prices have been announced on from 2 to 2½c per pound, making to-day's selling prices as follows: Pure manila rope 34c base per pound; sisal rope, 26c base; British manila and African hemp rope 29¼c base; lath yarn 26c base.

Turpentine Prices Show No Change

Winnipeg.

TURPENTINE.—Turpentine prices show no change during the week, while the demand at to-day's prices, which are the highest ever recorded, is not heavy, stocks are reported adequate to care for the present demand. To-day's prices are given as follows: Barrel lots, $2.70 gallon; ½ barrels, $2.73 gallon; 5 gallon lots, $2.75 gallon; 1 gallon lots, $2.75 gallon, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Aug. 21—A much more conservative spirit is shown by both buyers and sellers, owing to recent unsettling developments, chiefly in connection with labor. The increased labor unrest makes it questionable whether manufacturing operations can be maintained at all points. The steel producers are less concerned over their own labor outlook than over the outlook of their customers. There is a possibility of a strike in the steel industry, but the prospect is very far from a probability. At the Detroit convention, over a year ago, the American Federation of Labor decided upon an aggressive policy of attempting to unionize the steel industry. At the Atlantic City convention last June the reports admitted that little success had attended the efforts, but since then the federation has been striving more earnestly. The information gathered by steel producers indicates that up to date nothing by way of organization has been accomplished that would make it feasible to attempt a strike. While the steel makers are very painstaking in gathering information, they admit that the possibilities of there being a strike may be greater than their information indicates.

Much more concern, however, is felt regarding the future operations of the steel industry's customers. There are involved three general classes of steel consumers, the railroads, the ordinary manufacturing consumers and those who might engage in large construction jobs of an investment character, such as factories, hotel and office buildings, power plants, bridges and the like.

As to the railroads, the demands of the brotherhoods for the Plumb plan of tripartite control obviously serve to make the future of the railroads still more uncertain, that such a radical and unpopular plan would really be adopted is improbable, but the time when the railroads will be placed in a settled position and thereby be able to engage in work of rehabilitation and expansion is placed farther in the future. In normally good times the railroads take, in one form or another, from 15 to 25 per cent. of the steel industry's output, and after a period of several years of particularly stringent economy they might be expected to take more, but now they are taking practically no steel and they will take no tonnage of consequence until their position is assured. The attitude of labor disclosed in the past fortnight defers the time when the steel industry can expect the railroads to be large customers.

As to ordinary manufacturing consumers, there are some strikes, and possibilities of others, and each strike temporarily deprives the steel industry of a customer.

It has become a generally accepted view that when there is a full normal demand for steel at least half the tonnage passes into works of permanent construction, classifiable as investments. Such construction requires favorable prospects for its inception. The investor must be assured that he would not save much money, in first cost, by waiting a year or two, and he certainly must be assured that if the job were undertaken, labor and materials would be continuously available until completion, for until completion the money spent is earning nothing. The increased labor unrest now manifest is observed to be having a discouraging influence upon investors. An evidence of this is the rate at which contracts for fabricated steel work are being placed. This business was growing very nicely in the second quarter of the year, promising eventual establishment of a rate of buying equal to the capacity of the fabricating shops, but in the past week or two the contracting has been distinctly lighter than formerly.

Presumably, as a result of these developments there is now a much more conservative spirit throughout the iron and steel trade. Producers are less willing to enter into contracts, fearing they may have trouble in making deliveries, while buyers are still less willing to make contracts. The volume of strictly new buying is much lighter than a month ago, but the volume of shipping orders, made up chiefly of specifications on old contracts, is heavy and is easily in excess of the rate at which material is being shipped.

Merely from the viewpoint of the business that the steel industry does not get the situation and prospects appear far from favorable, but from another angle this makes the situation all the more favorable, because with all these defects in the market situation there is a large demand for steel. The mills are operating at about 80 per cent. of capacity and no one seems to doubt but that the material made and shipped is going directly into consumption. With many buyers, particularly the railroads and investors, not represented, or, but poorly represented in the market, the volume of tonnage taken by others is large, much larger than anyone would have expected. With only a moderate volume of additional business the steel industry would be operating at capacity.

It is now fairly well established that there will be no advances in the important finished steel products this year, unless there should be a wage advance, which at the present time seems improbable. The only reason it seems

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, August 21.—Paint markets are all decidedly strong this week. There is a maintained price for linseed oil, but the supplies are very short and there are few quoting at all. Turpentine continues to rule firm and there are no barrel quotations available at all. Supplies are decidedly low. White lead in oil is active but without change of any kind in the price, while putty rules with a firm undertone. Mixed paint is still a big seller. There have been advances this week for both bluestone and red lead.

Little Oil Supply; Basis Holds Here

Montreal.

LINSEED OIL.—There has been very little new in the way of development this week. Supplies of seed are still short and this is responsible for the fact that few are naming any prices at all. The seed market is a purely speculative one, and until new crop seed is to be had it is a question if much recession from the present high prices can be anticipated. The sales, at present, are light.

Raw—	Imp. Gal.
1 to 4 barrels	$3 05
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$3 07½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

At Two-fifty Gallon Turpentine is Held

Montreal

TURPENTINE.—In view of the fact that the demand for turpentine has been rather limited, the passing of it out to the trade in five gallon lots has sufficed to take care of what demand there is. At the same time there will likely be a bigger demand later, and if supplies are not forthcoming in larger quantities it is not unlikely that some hardship will be worked. The basis is still held as quoted last week—$2.50 per gallon for small lots.

Turpentine—	Imp. Gal.
1 to 4 barrels	....
Small lots	2 50

(Packages extra.)

Putty is Seller on Unchanged Basis

Montreal.

PUTTY.—There has been a good sale for putty, considering the season of the year. Prices are naturally firm but are unchanged. When there is any revision, which will probably come when the paint men take up the matter of costs on the new price basis for oil, it will certainly be upward.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead Demand Absorbs Supplies

Montreal.

WHITE LEAD IN OIL.—The demand for white lead in oil has certainly been brisk, and one manufacturer stated this week that the output was practically taken up and that even more could be disposed of. There has been a considerable export, it is understood, besides the domestic demand. Prices are decidedly firm and the prospect is strongly one of increases being made effective. Standard lead is selling at $15.50 per 100 lbs. for 5-ton lots, at $16 for ton lots, and at $16.35 per 100 lbs. for smaller quantities.

1919 *a Big Season For Paint Business*

Montreal.

PAINTS AND SPECIALTIES.—This has been a remarkably active selling season for all prepared paints and specialties. The remarkable thing is that activity continues and it is the man who has the goods and who is energetic in his selling policy that is getting the trade. The tendencies are all decidedly firm and no declines may be anticipated here.

Bluestone is Higher; So Also Red Lead

Montreal.

BLUESTONE AND RED LEAD.—Advanced prices are in effect for bluestone. This is increased 1c per pound to 12c. Red lead is higher. This is advanced to $12 per cwt. in casks, and the differentials are advanced accordingly. The reason for the increase is traceable to the high prices obtaining for copper, the base from which this commodity comes.

TORONTO

TORONTO, Aug. 21—Fluctuations in the price of flaxseed during the week have had no effect whatever on the linseed oil market so far and prices are holding firmly. Quotations range from $3.20 to $3.27 per gallon for raw and $3.22½ to $3.30 for boiled. Turpentine prices are also holding unchanged at $2.40 per Imperial gallon, although the market is a strong one. Shellac prices show a general tendency to advance owing to scarcity of supplies. Heavy shipments of window glass are being made from the United States to Europe, and a general advance in prices is expected before long.

Turpentine Prices Remain Unchanged

Toronto

TURPENTINE.—Reports from the Southern markets state that demands continue to far exceed supplies, and while no price changes are noted, this is due, it is expected, to the fact that the Germans are not yet able to buy because the necessary credits are not arranged. Importers are looking for prices to advance as soon as this matter is fixed up. One importer stated to HARDWARE AND METAL that in his opinion consumers have nothing to gain by holding off buying as conditions are all against their securing any cheaper turpentine. Supplies locally are more plentiful this week as a result of the arrival of some cars which had been held up owing to strikes. Quotations show no change from the $2.40 per Imperial gallon figure. Another factor in keeping the price up is the rate of exchange against Canada. This rose from 3½ per cent. yesterday to 4⅛ per cent. to-day. The rosin market continues very firm and little change is expected owing to the large shipments being called for overseas. Turpentine quotations are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$2 40
2 to 5 barrels (barrel included)	2 39
5 gallon lots	2 50

No Change Made in Linseed Oil Prices

Toronto.

LINSEED OIL.—While there are no changes yet in linseed oil, some crushers are looking for slightly easier prices very shortly. The demand continues good. Crushers are still experiencing difficulty in obtaining shipments of seed but are getting enough through to keep

them going nicely. While crushers are looking for slightly lower prices than the record figures that have been reached lately, there is no indication, it is stated, of any material reduction for some time. Quotations are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 20	$3 27
3 to 5 barrels, gal.	3 19	3 26
10 barrels and over	3 17	3 24
	Boiled	
1 to 2 barrels, gal.	3 22½	3 30
3 to 5 barrels, gal.	3 21½	3 29
10 barrels and over	3 19½	3 27

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Paint Manufacturers Continue Very Busy

Toronto.

MIXED PAINTS.—Trade continues active in prepared paints, and orders continue to come in steadily. No changes in prices are looked for by manufacturers for some time.

No Change Shown In White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—Quotations show no change, the prices being: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Advance Expected in Window Glass Prices

Toronto.

WINDOW GLASS, PUTTY.—While there seems to be nothing definite as to when window glass prices will advance, it is generally expected that higher quotations will become effective before long. Very heavy shipments are being made to overseas points by American manufacturers, and as the home demand has been showing a steady increase supplies may not be sufficient to take care of the trade. Higher costs of production are also a factor in the situation. Putty prices show no change and are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$ 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 80
Do., 25 lb. iron	6 45	6 70	7 05
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 70

NO CHANGES YET ON PAINT MATERIALS

HARDWARE AND METAL has been pointing out, and consistently, too, the strong likelihood of paint and other materials advancing still more. Reference has been made, in particular, to the strength of white lead in oil. Increases would perhaps have been made effective before this time had it not been for the fact that the season is fast approaching when prices are usually considered for the season to come. That is to say, price schedules for the spring months are usually considered and frequently adopted in the fall of the year.

With oil at over $3 per gallon, and turpentine well over the $2.25 mark, the paint manufacturer is, so to speak, between the devil and the deep sea, when he comes to consider revisions of prices. He is operating under a decidedly unique combination of prices that are most unusual, to say the least. How long he can continue to sell on the present basis with these two commodities ruling so high, is hard to determine.

At the present time there is a big sale for white lead in oil and also for prepared paints. The season has been a busy one, and the total gallonage sold has been very great in the aggregate. There no doubt but that the merchant who has been going after trade has made good. It is not a time to anticipate declines in these goods. Labor cost increases alone, to say nothing of the shortage existing on a great many commodities of an important nature, makes it difficult to see anything ahead but advances for paints and basic materials. Changes, as stated heretofore, will probably have to come before many weeks. The holiday season, with absence from business of many of the principals, has been a factor in delaying the consideration of revisions.

BIG SHIPMENT OF ROSIN

More than 30,000 barrels of rosin, valued at more than $1,500,000, are piled on the docks at New Orleans awaiting boats to carry it overseas. The accumulation, which is the largest in the history of the port, is consigned mostly to Glasgow and London and other of the larger cities, on the continent, to be used in the manufacture of soaps. It is stated that a soap shortage exists in most countries of Europe, and especially in Germany, where the supply almost has been exhausted.

Sheffield the Cutlery Capital of the British Empire

SOME interesting details regarding the manufacture of table cutlery and pocket knives are given in a booklet entitled "Sheffield, the Cutlery Capital of the British Empire," issued by the city council of Sheffield, England. The booklet says in part:

"Table and pocket knives, scissors and razors, are amongst the most familiar objects of daily life; therefore, as the source of such articles, Sheffield appeals to the popular imagination. Good cutlery connotes good steel. Various theories have been advanced to account for the concentration of this important industry in a single centre. Sheffield possessed peculiar advantages over other districts, such as the availability of raw materials, including rock suitable for grindstones, whilst the numerous hill streams, by supplying water power to drive grinding wheels, both quickened and cheapened output. Besides this the water is said to contain properties valuable for hardening and tempering steel.

"Sheffield cutlery enjoys a special reputation as far back as the 13th century. The Sheffield Company of Cutlers was established in 1624 and the rapid rise of the business caused many bitter controversies with the cutlers of London. By 1840, Sheffield held the field without rivals, and ever since has retained the monopoly.

"The invention of the pocket or spring knife marked an epoch of first magnitude in the industry. It made a distinct revolution in the trade. The ordinary user of a good pen knife can have little conception of the vast amount of detailed and careful labor which has been expended upon its manufacture. For example, in the case of a four-bladed knife, after all the parts have been assembled on the cutler's bench, there remain no fewer than 154 distinct operations to go through, every one calling for great dexterity and care.

"The wonderful variety of patterns in pen knives cannot have escaped notice, but few could imagine how great the actual number is. No maker seems able to give a reliable estimate of the figure, but it must run into scores of thousands. At one establishment alone more than 10,000 different patterns had been produced prior to the outbreak of the war, and the average number kept regularly in stock by the firm was about 2,000. The public taste differs in every land, one might almost say in every district, and buyers are ever craving for novelty.

"Among the developments of recent years, and one which has added very considerably to the volume of trade, is the manufacture of cheap table knives and forks forged out of steel in a single piece by machinery, and also ground by machinery. Machinery has also been perfected capable of both forging and grinding the finest grades of razors, practically eliminating the need of skilled labor. As a result, the razor trade today is many times greater than before the summer of 1914, and is still expanding. There existed in the minds of some people a foolish notion that in the past the Sheffield makers sent their best hollow blades to Germany to be ground. The idea is, of course, an absurd myth.

"Sheffield is identified with the most important introduction into the cutlery in at least a century, stainless or rust-proof steel. This was discovered by an eminent Sheffield metallurgist. The success of the new knife was instantaneous. It took the public by storm, particularly in the United States and in the Colonies, where people appear to be ever on the lookout for methods of lightening household tasks. This discovery has given Sheffield trade a renewal of fame which has greatly enhanced the city's prosperity."

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

"Save the Surface and you save all" Paint & Varnish

MARTIN

100% PURE PAINT

SENOUR and VARNISHES

The Distinction of a MARTIN-SENOUR Dealer Agency

To be participating in the sale of 100% Pure Paint which has a larger gallonage distribution than any other brand of prepared paint in Canada.

To be counted among the largest number of dealers handling any individual line of paint in Canada.

To be able to provide your customers with the fullest measure of value obtainable in paints and varnishes, thus assuring repeat sales, increased business and larger profits.

To have the full benefit of the very best sales help and co-operation which is offered.

To reap the sure return from advertising and sales-promotion work which is wisely planned to create business and truly make MARTIN-SENOUR products the easiest and most profitable to sell.

To be identified with the pioneers in the making of Pure Paint, but still first in the estimation of Canadian Paint and Varnish Consumers.

Value, the best salesman, keeps MARTIN-SENOUR dealer-agents busy.

A post card today will bring you detailed information covering this distinctive dealer agency plan.

Satisfaction
By the Pint, Quart or Gallon

"Hillcrest" Varnish Stain

On a par with any of the best high-grade varnish stains on the market. Dries hard in twelve hours with a durable gloss. Will give a handsome imitation of natural wood.

Carriage Varnish Paint

Spendid material for finishing carriages, automobiles, porch furniture, etc. Made in seven standard shades. Dries with a hard, durable finish, high gloss.

Hillcrest Paints and Varnishes

"Hillcrest" Aluminum Paint

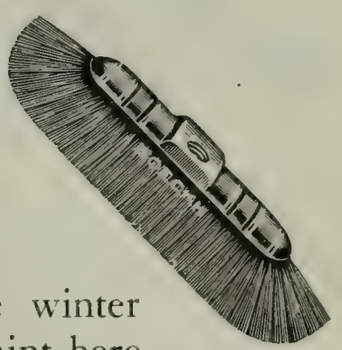
Has been tested out thoroughly and proven without doubt the best on the market. Covers well and gives a bright, silvery finish to range boilers, pipes, radiators, etc.

Pearcy's Prepared Paints

One of the oldest and most reliable prepared paints on the market today. Has been giving satisfaction for over 40 years. Forty select shades.

The "Hillcrest" line means success to the merchant who handles it. There is nothing problematical about it—it's proved, demonstrated—"cinched"—been done by merchants who are glad now. Right prices and right goods.

We have an ideal city delivery for "Hillcrest" Paints, Varnishes, and paint and varnish specialties; delivery on short notice anywhere in Toronto.



Send a trial order or ask for our representative to call.

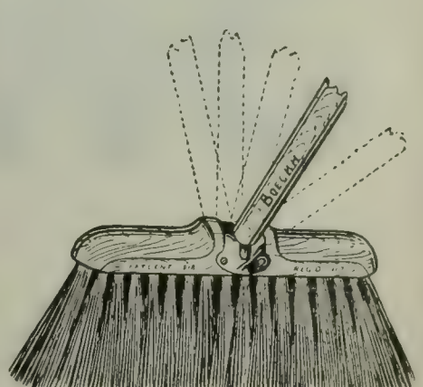
BRUSH SUGGESTIONS THAT PAY WELL

The holiday season will soon be over, folks will be coming home to houses that have been closed for various periods—cleaning and painting will be in order. Besides, preparation for the winter months will be necessary. A coat of paint here and there means protection against the ravages of snow and frost. Are you anticipating the demand there will be for household and paint brushes? How is your stock of

BOECKH'S

Rubber-Set Painters' and Household



BRUSHES

A window display of these well-known and popular brushes, with a few timely suggestions, will enable you to reap the benefit of increased sales.

Boeckh's Brushes are well-known to you for their high quality of material and workmanship, and only require a slight effort to sell. Their excellent wearing qualities, with Bristles, Rubber-Set — that can't come out, and moderate prices make them the most desirable brushes on the market.

Write us for Dealer Aids and Display Cards—they are yours for the asking.

SHERWIN

PAINTS &

Are You One of The Thousands of S-W Dealers?

THE Sherwin-Williams Agency is the opportunity for the live dealer in paints and varnishes.

Do you make the most of this opportunity? If you are the right man, you will make big strides with the S-W line, for the goods are the standard by which other paints and varnishes are judged.

The prices and profits are based on honest value and worthy service. The advertising and selling helps are outstandingly superior to any competitor's.

The attitude of the buying public is more favorable to Sherwin-Williams Products than to any other paints and varnishes made.

These are reasons why you should consider the S-W Agency.

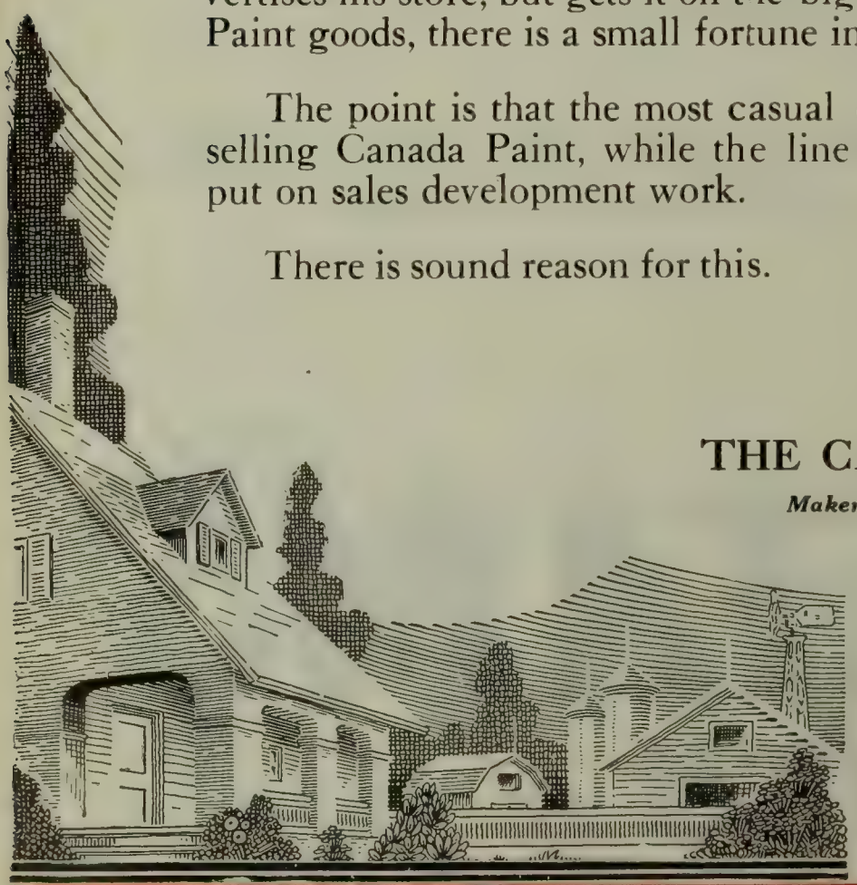
CANADA

CANADA Paint is one of the easiest selling propositions any paint dealer could want.



For the dealer who is too busy to take much time to push paint sales, it is a steady seller.

For the dealer who used window, counter, and shelf display, and gives wise suggestions to his customers, Canada Paint is his big profit-maker.

For the dealer with vision, who not only works in and advertises his store, but gets it on the big jobs, supplying Canada Paint goods, there is a small fortune in it.

The point is that the most casual dealer will make money selling Canada Paint, while the line will back up any effort put on sales development work.

There is sound reason for this.

Calgary Halifax

PAINT

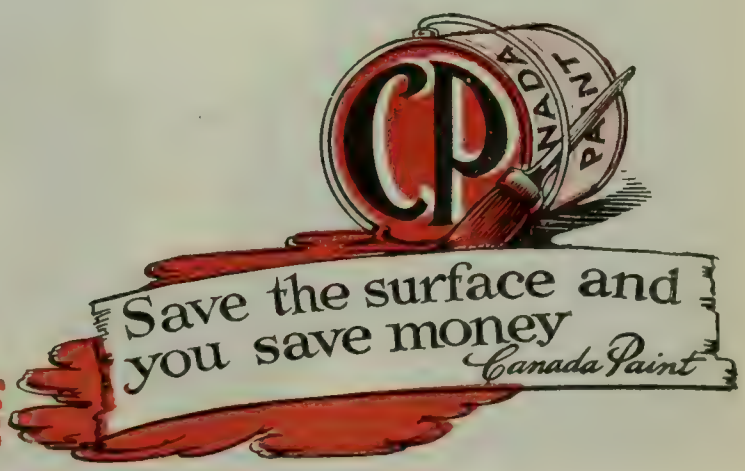
IF you sell a paint or varnish you are not SURE of, you never know when it is going to ruin your business instead of building it greater.

Perhaps two years after you sold such paint it shows its defects, and YOU are condemned in the eyes of your customer.

Now when you sell Canada Paint, which has fifty years' consumer satisfaction back of it, you can depend on it giving perfect service, not for one or two but from four to six years.

With Canada Paint you have a line which is already partly sold before it gets on your shelves, because of the Dominion-wide advertising and the accumulated consumer goodwill and neighbourly recommendation that so often is the deciding factor.

You can meet every need with Canada Paint goods—House finishes, Barn Paints, Varnish Stains, Enamels, Varnishes and Colors for every purpose.



We will be pleased to place the C. P. Agency before you. A post card will receive our immediate attention.

Quality Products

Famed from Coast to Coast

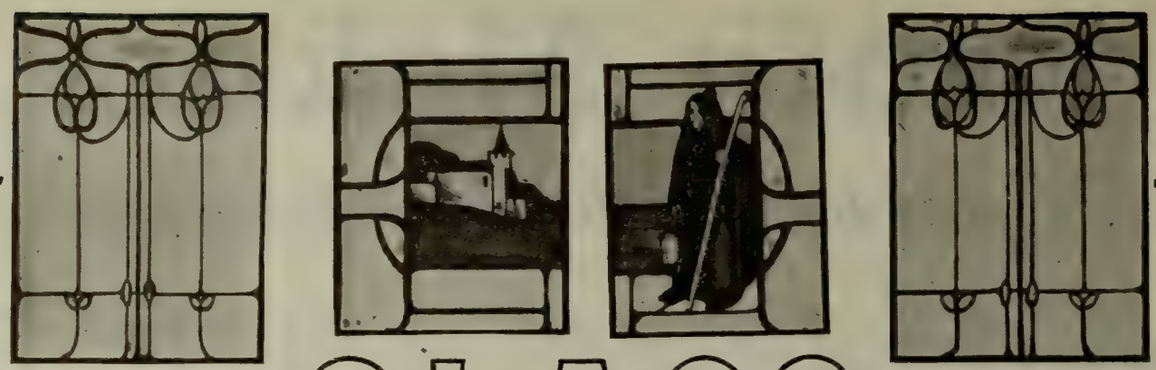
The famous Glidden Green Label is known from one end of the Dominion to the other. It is known to represent quality in the highest degree.

Call and see us at our exhibit in the Process Building at the Canadian National Exhibition, August 23rd to September 6th.

Profit Makers

Attract Worth-While Business

They sell quickly, they give you profitable turnover, they reduce overhead, they draw trade to your store, they are business builders. That's what you can expect from all products under the Glidden label—products that are known for quality throughout the Dominion.



To associate your store with the name Glidden is a worth-while business asset. It is assurance of a very real service for your customers as well as yourself. While it furnishes true paint and varnish value it is supplying that dependable value in a list of products that cover practically every need.

Jap-a-lac provides the full assortment of Household Finishes. Glidden Varnishes and Enamels serve both the painter and the householder, while the Glidden Paint and Varnish Specialties provide a complete line of Endurance materials for both home and industrial uses.

The Fall always brings house renovating needs. If you do not carry Glidden lines it will pay you to write for literature, prices and merchandising plan.

JENKINS BROS.

Standard Pattern Iron Body Globe Valve Screwed with Yoke.

For use under steam service there are no valves quite as satisfactory as

JENKINS BROS.

Globe and Angle Valves
Fitted with Jenkins' No. 119 Discs

The composition of the disc is very hard, but becomes tough and flexible in service when under steam pressure.

It shows remarkable freedom from cracking and flaking and unrivalled durability in working steam pressures up to 150 pounds.

Rotary Ash Sifter

"Canada" Rotary Ash Sifter

For these days of coal shortage, Davidson's Rotary Ash Sifter is just the thing. Solves the fuel problem. Separates the ashes from the cinders quickly and efficiently, without any clogging.

Moreover, you can recommend Davidson's Sifters to your customers on the score of cleanliness. Note the enclosed working parts—it means freedom from the smothering dust of the old-fashioned sifter. Easy to operate, and free from mechanical difficulties.

Davidson's Sifters are neat in appearance, and made rustproof by galvanizing after being assembled.

Don't Say Yes or No *before* You read this folder

HERE is a plan, the purpose of which is to increase the sale of Eveready Daylo cases, batteries and bulbs by active, sustained co-operation with Eveready dealers. It costs you nothing to be a beneficiary under this plan—nothing except your assured interest and co-operation. We ask for this because, frankly, without it the success of this plan cannot include you.

The plan contemplates three years of continuous advertising and merchandising effort exerted through every month of the year and REDOUBLED at those seasons when sales show a tendency to lag behind.

It is a plan for bringing a steadily increasing sales pressure to bear on the users of Eveready Daylo by the natural and sound means of showing them more ways to use it and by showing them how to get a maximum of service and satisfaction from Eveready TUNGSTEN Batteries and Eveready MAZDA Lamps.

You can enter now or later but the dealers who enlist now will have a RUNNING START on those who hesitate.

Send in YOUR application blank now. See opposite page.

EVEREADY 3 year plan

EVEREADY 3 year plan

TEAM WORK APPLICATION

CANADIAN NATIONAL CARBON COMPANY, LIMITED,
Dept. No. 213,
Toronto, Ontario, Canada.
Gentlemen:

You can count on my co-operation. I am greatly interested in your seasonable campaigns for increasing my business in Eveready Daylo, Eveready Tungsten Batteries and Eveready Mazda Bulbs.

Please send me by prepaid express the Eveready Changeable Window Display, together with your latest printed matter and other sales helps; also send me advance information and the new display cards for the window display piece and other special materials as fast as issued for each special sales campaign. It is understood that these will reach me hereafter **automatically, without special request on my part.**

In consideration of this special co-operation I agree, if accepted as a member of the Eveready TEAM WORKERS:

1. To carry and maintain an ample stock of Eveready Daylo cases and Tungsten Batteries, and to make every effort to promote and increase the sales of the Eveready Daylo cases and Tungsten Batteries;

2. To display the Eveready line in adequate space in regular showcase in a prominent location in the store, and to keep the goods in a clean, attractive and saleable condition;

3. To display in the showcase with the goods suitable display card or cards furnished by the Canadian National Carbon Company, Limited, so that the public may identify the Eveready Daylo line at sight;

4. To make good and continuous use of the Eveready display materials and sales helps provided;

5. To make special window and store displays in connection with Special Selling and Seasonable Campaigns being advertised by Canadian National Carbon Company, Limited, for which due notice has been given, using Eveready display materials furnished for that purpose;

6. To see that all store salesmen are familiar with the various Daylo types and cases, and the various sizes and styles of batteries for same; also with general and seasonable Daylo uses, and with special selling features furnished by Canadian National Carbon Company, Limited, for Special campaigns;

7. To feature the Eveready Daylo line in our own local advertising as far as possible.

This arrangement may be cancelled by either party at any time by written notice.

Banfield

For Your Customers— These Fixtures

In yours and almost every other business, the middle class and working people are usually the best class of customers, because they represent in every community a vast majority of the population.

To all this great body of customers, Banfield Lighting Fixtures appeal.

For these people want good-looking fixtures; durable, dependable ones — and they want them at a reasonable price.

Banfield Lighting Fixtures have all these sales-producing qualities.

They are a medium-grade line, artistic, dependable and moderately priced. The range of designs is complete enough to meet your very demand. In every respect you and your customers will like Banfield Lighting Fixtures.

W.H.Banfield & Sons Limited

Lighting Fixtures

For You— This Service

Besides making eminently satisfactory Lighting Fixtures, we also provide for our Dealers an unparalleled service.

In addition to our mammoth production, we carry on hand at all times a big stock of fixtures ready for immediate shipment to our Dealers.

Shipping delays and disappointments are thus reduced to a minimum, as your order is taken care of the instant it is received.

By individually boxing all fixtures, their finish is securely preserved, they are convenient for handling, and neat for stocking.

No detail, in fact, is overlooked to make Banfield Lighting Fixtures a profitable line for Dealers to handle.

If you are not a Banfield Dealer send for new pocket-size catalogue and other interesting information.

What Is the Thor

Thor

Electric Washers
Vacuum Cleaners
Electric Ironers

Sell The Entire

Name Worth to You?

JOBBERS — Dealers — Central Stations — Have you ever stopped to think just what the Thor Name is worth to you as a business asset?

Consider These Facts—The first cylinder type electric washing machine placed on the market bore the name Thor. This was 13 years ago. Ever since that time the name Thor has stood for *Quality Labor-Saving Products*.

Starting with the Washing Machine the Thor Line has grown in 1-2-3 style until now the Dealer or Central Station can market the Big Three "Home Electric Labor-Savers"—The Washing Machine— Ironing Machine — Vacuum Cleaner — all backed and branded with a prestige name—THOR.

In other Words the Thor Dealer is selling TRIED Products—Products the name of which is known the country over and endorsed by more than a million users.

And more than this, the Thor Dealer is backed to the limit by Hurley SERVICE and CO-OPERATION and the immense Hurley Manufacturing facilities which are even to-day being greatly enlarged to take care of the increasing demand for Thor Products.

To you who have not already had a slice of Thor Profits, Ask the *Thor Dealer why he won't quit.*

Don't wait any longer

Handle the Right Washing Machine and Good Profits Will Result

IS the line of Washing Machines you now handle paying you as much as it should? If this is not a "live" department — you should make a thorough investigation; as the scarcity of help is rapidly increasing the sales of Washing Machines—and with the right line you can do a big business. Perhaps your line is too limited—or perhaps you are selling a Washer which women have not been educated through advertising to know as the best.

When you handle "1900" Washers, you have a complete line. It includes Washers that operate by Hand, Engine Power, Water and Electric Motor. You need never miss a sale through not having a Washer at a style and price suitable for any customer. For over twenty years we have been manufacturing home laundry equipment—and each of our styles is unequalled in its class.

Gold Medal awarded to our "Cataract"

Our "1900" Cataract Electric Washer was awarded Gold Medal at the Panama Pacific Exposition in competition with all the well-known Washers.

It has a frame made of steel with heavy iron base—its tub of heavy copper, plated on the inside and polished and lacquered. It is equipped with Electric Wringer.

"1900" Agitator Electric Washer

The simplicity as well as the rigidity of our "1900" Agitator Electric makes a strong appeal to every prospect. The tub is made of white cedar—and the working parts are entirely enclosed. It is equipped with Electric Wringer.

"1900" Washers Strongly Advertised

Extensively advertised, "1900" Washers are compelling the interest of women from Coast to Coast. Women everywhere have heard of "1900" Washers—and a demonstration from a local dealer will close the sale.

The liberal return as the result of every sale is by no means the only reason that makes this exclusive representation welcome. There is prestige and pleasure in selling "the best on the market."

Write to-day—and investigate this famous line of Washing Machines

When in Toronto call at our Factory and see these Machines being made

BANNER ASH SIFTERS

TRADE MARK REG.

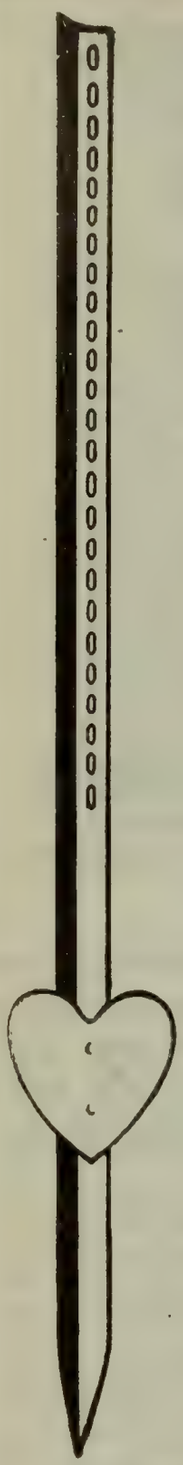
7 Reasons why the Burrowes Patent Dust Proof No. 1 Banner Ash Sifter is more satisfactory for household use than any other Ash Sifter on the market.

1. The easy rocker motion almost eliminates work. Sifts quick and clean.
2. A coarse screen with a finer one below sifting by the same operation saves one-quarter more fuel with no extra effort.
3. The only sifter with a closed scuttle. Cinders transferred without dust.
4. All parts made to fit tight. The large lid is on hinges and can be closed quickly.
5. Large space for ashes to spread and sift freely, which is absolutely necessary.
6. Convenient height. No reaching. The long handle prevents stooping.
7. The Sifter is made to last many years. Screens easily renewed. Fire, rust and dustproof.

Mr. Dealer: Has any other Ash Sifter so many good talking points?

Size 12 x 24 x 25 in. high

6 Reasons why the Burrowes Patented No. 2 Banner Ash Sifter is the best low priced ash sifter on the market.



1. Easy rocker motion. Perfect balance. All weight carried by the pressed steel rockers.
2. Eliminates dusty, back-breaking shaking or lifting.
3. The ashes spread freely in the large sifting tray.
4. The rocking or gravitating motion sifts quickly.
5. Practically dustproof, as all parts are made to fit tight.
6. Its simplicity appeals to all as the common-sense ash sifter.

In three parts—lid, sifting tray and ash or garbage can, reinforced to stand the rough usage of the garbage man. Size 12 x 18 x 24 in. high. Packed two together.

The Burrowes Mfg. Company, Toronto

ALL JOBBERS

They'll Sell Well and They'll Pay a Good Profit

We offer the Hardware Trade an opportunity of adding a new line on which good money may be made—our Steel Fence Posts have many evident advantages—and our list prices for them are in most localities such that they can easily be sold in competition with Cedar Posts.

Besides, we can furnish you with plenty of arguments whereby it may be shown conclusively that the Cedar Post is as much of a "back number" as a snake-fence.

There's a good dealer discount on

PRESTON Steel Posts

you can make satisfactory profit on every sale—and the sales will be easily made and numerous.

Your customers will not be able to resist these features:

1. **Easy to drive**—which means a great saving over cedar posts, in cost of installation.
2. **Never rot, break, burn or buckle**—therefore, economical as to cost of upkeep—cheapest of all posts in the long run.
3. **Lightning proof** — because the steel "grounds" the wire —therefore, safest for stock.
4. **Neat in appearance** — and never out of alignment — adding greatly to the value of property.

Write for particulars and prices: and we will explain how this can be made one of the most profitable lines in your store.

Established By Actual Service

Examine These Photographs

This Diamond Reflex Plug was taken from a five-ton Packard truck where it gave perfect satisfaction. Notice absence of carbon on wire, porcelain and working parts. This Packard was one of 58 trucks notoriously hard on plugs.

They hauled sand, gravel and coal—strenuous work. No plug could be found to stand up to the work.

Diamond Reflex was installed and proved efficient.

Proved in actual service, widely advertised, and satisfactory to users, they are profitable, quick-turnover investments for the dealer.

Send a postcard to-day for catalog and prices.

Royal Canadian Specialties

HAMILTON WHIP COMPANY

HAMILTON, CANADA

Endorsed By Every Dairyman

The Reliable Churn is backed by advertising in nearly every Farm Journal in Canada.

Designed With Common Sense

This line of churns is constantly increasing in popularity. The reason is sound. In designing we stuck to the old, reliable principle of the "stick and dash" churn; but we modernized it, improved it, and practically built this line around the old principle tested through centuries.

It has proved right. These churns are endorsed by every experienced user (over 100,000).

It sells on a five-year guarantee and sells pretty often and profitably for the dealer.

THE DOMINION LINSEED OIL COMPANY, LIMITED

THE DOMINION LINSEED OIL CO., LIMITED.

MANUFACTURERS OF

PURE LINSEED OIL, OIL CAKE & MEAL.

PRESIDENT'S OFFICE: BADEN, ONTARIO August 23rd 1919

To The Trade:-

The passage of fifty-five years does not bulk very large in the retrospect of history, and yet to Canada this lapse of years compassed by the life-time of a man or Canadian business institution, has meant the growth from a small and struggling colony into nationhood.

In 1864, three years before Confederation, the first "Livingston" plant was established at Baden. Behind the establishment of this plant were ideals which have been faithfully adhered to through all the years - 55 of them to be exact. Material growth may not be the truest sign of greatness, but it is tangible evidence that is indicative of many things. We believe that the growth of our business, from a humble beginning to its present status covering the entire Dominion, and extending even to foreign countries, may be attributed in no small degree to the open hand policy inaugurated in Baden 55 years ago, to produce an honest product worthy of our highest ideals.

Our plants at Baden, Ont., Montreal, Que., the new plant at St. Boniface, Man., and our sales office at Toronto are desirous of continuing to do business with old and new customers on the fair and open basis which has always characterized our Company.

We desire at this time to express our appreciation of good will and patronage of our many customers, and to assure them that in the future the high ideals of our Company will be adhered to in an effort to merit the continued friendship and patronage of old and new customers.

Yours very truly,

James Livingston

President.

A Million Cars Behind

THE statement made recently at a gathering of American automobile manufacturers that the firms are now more than one million cars behind in their orders indicates, as nothing else can, the outlook for business in auto accessories. Despite the fact that the auto makers have been building extensions to their plants and placing orders for huge quantities of new machinery they cannot begin to keep up with their orders. When it is considered that only a few years ago the cars in America could easily be numbered in the hundreds and that now there are more than five million in daily use, it will be seen what an enormous industry this has grown to be. It is growing now more rapidly than ever and the tractor business just now is where the auto business was ten years ago. Look ahead another ten years and try to figure out how many autos and how many tractors will be in use then. Every auto that is turned out and every tractor, too, has to have accessories and supplies. Figure out what an enormous business the auto accessory and supply business is now and then try and estimate what it is going to be. The hardware dealers who have been handling auto accessories are going into the business more and more extensively each year as they find a demand that is steadily increasing, that carries a good profit and is a nice business to handle. For some time past the number of cars in use in Canada has been doubling every two years and from present indications this figure will be increased at the end of the next two-year period, if the manufacturers can supply the goods. There are now, it is estimated, over 300,000 autos and trucks in daily use in Canada. City dwellers are buying cars fast, but for every car sold in the cities, two are being sold to the farmers. There is little doubt that the auto is here to stay. It is filling a definite and very important place in the everyday life of people and also in the business world. It has proved its worth, and city dwellers, business men and farmers are buying them because they get real returns in service. The few hardware dealers who are not handling auto accessories may find it to their profit to consider carefully not only the present situation, but the future possibilities for business. In many hardware stores the auto accessories department has come to be one of the most important in the business. The merchants are finding that it is not a business that comes and goes, but that there is a call for accessories the year round. Many have found, especially those who ventured into the business cautiously, making a small start at first and feeling their way carefully, that there was a steady and insistent call for more goods than they were handling. They were forced to meet this demand and before they knew it had developed a flourishing department that not only paid well, but was an excellent feeder very often for other departments. Other merchants realizing the possibilities which exist, have, through intelligent and progressive methods worked up tremendous turnovers in supplies for motor car owners. The opportunity exists in every section of Canada. Hundreds of hardware merchants are cashing in on this business. Are you getting your share out of it? A certain amount of the trade will come to you, but the big things come only to the men who go out after them. In this issue you will find advertisements featuring many profitable motor accessory lines.

A QUALITY PERENNIAL

¶ If you motor all the year round you have an excellent opportunity of knowing the meaning of "day-by-day service from Dunlop Tires."

¶ If you motor between Spring and Fall only, you have an excellent opportunity of knowing right now why so many other motorists use Dunlop Tires all the time.

¶ The "Two Hands" Line consists of:

Dunlop Cord—"Traction" and "Ribbed."

Dunlop Fabric—"Traction," "Special," "Ribbed," "Clipper," "Plain."

Dunlop Offers You

A High-Grade and Representative Line-Up of Garden Hose

"HERCULES" —A high-grade, two-ply, seamless, braided fabric hose with a specially tough, corrugated rubber cover. Is particularly suitable for garden and florists' work, or in any capacity where the demands are exceedingly exacting. A special feature of this hose is that it is manufactured in 500-foot lengths, which allows the cutting of any length required without waste. Will not kink.

"DUNLOP" —As its name would indicate, this hose is an Extra Special high-grade one—a super hose, in fact, designed to withstand most severe usage. Is of different construction to "Hercules," but equally as efficient.

"PEERLESS" and "PEERLESS FLORIST" —So good that it is regularly considered as first-grade in garden hose. Is a thoroughly substantial hose and widely popular, especially for florists' and greenhouse work. Has an extra heavy, durable cover and will render highly satisfactory service at all times.

"RELIANCE" —Is a general favorite and well suited to ordinary garden and lawn duty. This grade is practically in the same class as "Peerless" excepting that it is slightly lighter in weight and costs less to buy. Is representative of the same careful workmanship as the other lines above-mentioned.

"BANNER" —Represents what is commonly known as sheeting construction. Will give a splendid account of itself in light work, and is good value at the price. Reliable for lawn and garden use.

"KANT KINK" —A splendid and special type of hose with a very effective protective covering. Shows its class in any capacity where there is necessarily considerable banging round, and the possibility of the hose being trampled on.

Our representative will call on you in ample time to take care of your fall booking requirements. It will pay you to reserve the placing of your orders until you have considered carefully the samples he will show you and the very attractive prices he will submit to you.

"In big demand,
Preventing squeaks,
It fits your hand
And never leaks."

Sell This Can for Sure Action

It is heavier than most oilers and with hardest usage will give everlasting service.

It pumps. Right to the last drop action is certain and the push of your thumb brings oil.

Don't leak. This objectionable feature overcome by our own process in rolling bottom to body. Spouts are tight clinched, seam soldered.

Heavily coppered, polished and lacquer dipped, Clasco Oil Cans are well finished and the quick choice of quality buyers.

Say Clasco to your Jobber and sell the can with this mark on bottom.

ADAMSON

THE COMPLETE LINE OF VULCANIZERS

Money Makers for the Dealer

MODEL "E" $1.50
5-Minute Vulcanizer
Uses Adamson Dry Fuel or gasoline. Repairs tube punctures permanently in 5 minues.

MODEL "T" $2.50
For ordinary repairs on inner tubes.

MODEL "U" $3.50
Repairs tubes and cases. Mends tread cuts and small blow-outs.

Write for Adamson store displays and dealer helps

DEALERS:

There's an Adamson for every kind of tube and casing repair that a motorist can make. You needn't miss a single sale when you stock the Adamson line.

The high price of tires and tubes and the nation-wide demand for Conservation will practically double the number of Adamson users—now over a million.

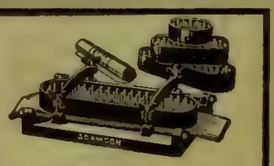
To show Adamsons is to sell them. Every motorist knows they are easiest to use, quick and sure in results, and make the strongest possible repair.

Adamsons cost least to buy and operate; any model will use common gasoline—always dependable and easy to get.

STOP THAT LEAK

Tread cuts and surface injuries admit moisture and sand into the fabric to rot and weaken it, causing blow-outs and short mileage.
—Sell Adamsons to repair such injuries in a few minutes time, while the tire remains on the wheel.

Practically every motorist wants an outfit to vulcanize his own tube punctures and blow-outs.—Sell him the dependable Adamson to make quick and lasting repairs—at home or on the road—without the use of cement.



For quick sales and no dead stock carry Adamson Vulcanizers and Repair Gum.

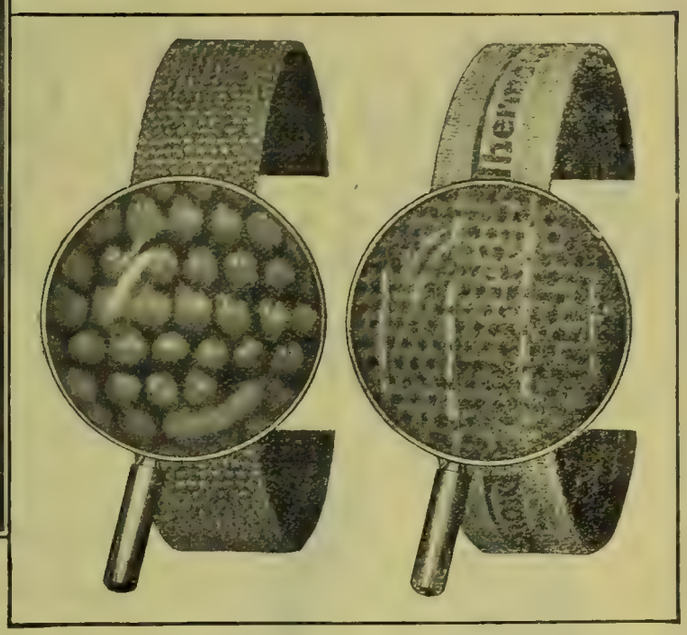
Sold by all Jobbers

ADAMSON MANUFACTURING CO.
HAMILTON, CANADA

We also make Adamson Brake Shoes, lined and unlined and Cut Outs for Ford Cars

Money Savers for the Motorist

MODEL "S" $17.00
For private garages and repair shops. Mends cases and tubes.



ADAMSON REPAIR GUM
Essential for best results with any portable vulcanizer. Perfect adhesion without use of cement.

One of the giant double-deck hydraulic presses which compresses Thermoid Brake Lining under 2000 pounds pressure per square inch at 320° F.

Ordinary Woven Lining

Notice the loosely woven texture.

Wears down quickly and unevenly.

Loses its gripping power as it wears.

Thermoid Hydraulic Compressed Brake Lining

Notice the compact texture.

Wears down slowly.

Gives uniform gripping surface until worn wafer thin.

A hydraulic compressed brake lining

THERMOID Brake Lining, in addition to being made of tightly woven asbestos fabric, is also folded, stitched and *hydraulic compressed.*

These extra processes make Thermoid a better brake lining. The hydraulic pressure fuses the plies of *Grapnalized* fabric into one solid piece.

The solidarity of Thermoid Brake Lining produced by subjecting it to 2,000 lbs. pressure for an hour, makes Thermoid—

1. Wear down uniformly.
2. Wear much longer than woven linings which are only one ply.
3. Have a better wearing surface; i. e., co-efficient of friction.

The 100% lining

Hydraulic compression is only one of the processes by which Thermoid is made 100% efficient.

Thermoid contains *40% more material* by actual weight than woven brake lining and is *Grapnalized;* an exclusive process making it impervious to gasoline, oil, water, dust, etc. No other brake lining is *Grapnalized* or can be.

Thermoid has proved best by test not only in scientific laboratories but in actual use. The Fifth Avenue (New York) busses, carrying 30,000,000 passengers a year through the thickest traffic in the world and making thousands of stops a day, are lined with Thermoid.

The opportunity for Thermoid dealers

Motorists are awake to the imperative need of good brakes. Our advertising campaigns are urging motorists to go to their dealers and have their brakes inspected. Police officials throughout the country are supporting the brake inspection movement—the sales next year promise to be phenomenal.

You should get your share of this great market—there is a big, profitable, permanent business in store for every dealer who handles Thermoid. It is the best known and fastest selling lining there is. It will build good-will for you by giving your customers lasting service.

Every foot of Thermoid that you will sell is backed by the *guarantee: Thermoid will make good —or WE WILL.*

Royal Oak Tires Build Business

It is impossible to get a tire proposition more paying than the Royal Oak.

It is impossible to make a better tire, or to handle one.

Royal Oaks sell well. People like them and want them, because they do deliver extra mileage. They are a real tough treaded tire made to deliver service.

Royal Oaks pay you a profit—the kind you want. They satisfy customers, they "repeat," and there is a mighty good margin on every sale.

Dealers are invited to send for this proposition. Get it now while the season is good. Royal Oaks are honestly made in a big way to be worthy of your representation. Send for complete information to-day.

K. & S. TIRES

On The Wheels of Trade

Selling a K & S Tire to a wide-awake purchaser is about the softest job that's likely to fall to your lot. You turn it over and say, "Yes, sir! This tire is GUARANTEED for 7,000 miles on light cars (or 6,000 miles on heavy)—the highest guarantee of any tire made in Canada."

And after thinking it over, he'll come across quickly. This sounds like a fable, but it's honest-to-goodness fact.

Hundreds of Hardware men have found that
K. & S. TIRES
keep the wheels of trade running smoothly.

They possess so many talking points—so many claims that we're ready to prove. And there's a handsome profit to you that makes them well worth selling. Write for particulars, to-day.

We have still some exclusive territory open for responsible dealers, so act quickly before it is all gone.

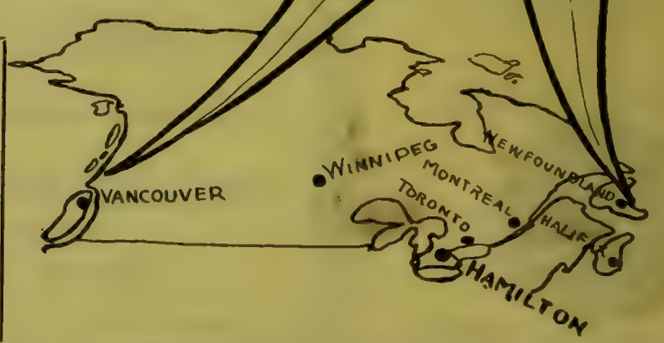
WILSON SERVICE

From Coast to Coast

Since its beginning less than three years ago, our business has grown to such proportions that it has recently been found necessary to move into a much larger warehouse. Our new home is situated in the heart of Hamilton's business district, and is probably the largest warehouse in Canada devoted to the wholesale distribution of AUTO SUPPLIES EXCLUSIVELY.



The exceptional success of the Wilson Auto Specialties Company is due simply to our policy of giving our customers not only prompt and accurate service at all times, but more value for their money than they can obtain elsewhere.

No matter in what part of Canada you are located, "Wilson Six Hour Service" will save you time and money.

Our new catalogue—a regular encyclopedia of Auto Supplies—is just off the press and should be in the hands of every progressive dealer and garage man. If you are not already on our mailing list, fill in the coupon below and mail it to-day. It will pay you!

Wilson Auto Specialties Co.

HAMILTON - ONTARIO

Wilson Auto Specialties Co.,
Hamilton, Ont.

Gentlemen:—
I am a dealer in Auto Supplies and would like to have your new complete catalogue (No. 10) and Dealers' Net Price List.

Name .....

Address .....

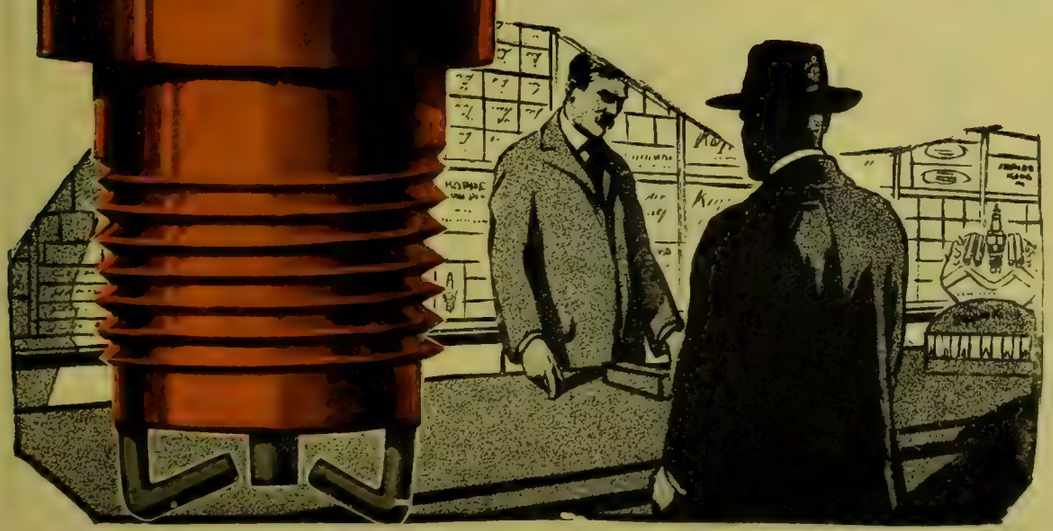
Province .....

Catalogue No. 10 for "Hardware and Metal."
Catalogue No. 11 for "Motor Trade."

The

Kopper King

A heavy coating of copper over the heavy steel prevents carbon-fouling and short-circuiting. The copper-covered asbestos gasket cushions the porcelain, protecting it from the smashing, hammer-like blows of the exploding gas mixture. The firing points of Monel metal are anti-fouling. Seven sizes to fit any motor.



SHARP SPARKS

SHARP co-operation does not stop in the shipping room. We treat your distribution and consumer problems as we do our own. Our latest business-getter for dealers is a series of ready-to-print advertisements in electrotype form, suitable for use in newspaper or on mailing cards. They are furnished free to Sharp Dealers and link up their names with a spark plug of continent-wide reputation. Another feature is the attractive display carton for your counter. It holds ten Sharp Spark Plugs packed in neat cartons and places the plug within the customer's reach for instant attention and examination.

THE SHARP SPARK PLUG CO.

CANADIAN GENERAL ELECTRIC CO., LTD., Distributors
Toronto, Montreal, Halifax, Ottawa, London, Calgary, Winnipeg, Vancouver, Nelson, Cobalt.

The

Goliath

A massive, heavy-duty plug for hard usage and strenuous service in pleasure car or truck. The extra large shell is of heavy blued steel with firing points of meteor wire. The porcelain, of finest Cornish Kaolin, is fired at a temperature of 2,600° Fahrenheit, insuring greatest possible freedom from insulation troubles.

Champion

Dependable Spark Plugs

Have satisfaction, service and economy "built in." That is why Champions are factory equipment on four out of every five gasoline motors and engines in use and why they offer the greatest sales possibilities to the dealer.

These "built in" qualities are due to the superiority of our 3450 Insulators which have a far greater breakage resistance to shock, vibration and sudden temperature changes than our best previous insulator.

And to our patented, asbestos lined gasket construction which absorbs expansion from heat and prevents compression leaks.

Every type of Champion sold is backed by our guarantee of "Absolute satisfaction to the user or full repair or replacement will be made."

Build your Champion sales on these facts and on the comprehensive plan of advertising that is being carried on for your benefit. It means bigger accessory business and more profits for you.

Look over your stock to-day and order from your jobber the Champions you need.

Ford Specialties That Are In Great Demand

The increase in the number of Ford cars this year will surely bring about a corresponding increase in the demand for equipment and supplies.

The Hyslop line of Ford Equipment which is popular with motorists everywhere offers dealers a splendid opportunity to increase their business—to get a good, substantial profit and make quick turnovers.

Below are a few of the hundreds of Ford Car Equipment Specialties taken from our 208 page catalogue. These will attract car owners and prove splendid business getters for dealers.

17-inch Tilting Steering Wheel

No. 4559.

This 17-inch wheel gives greater leverage and consequently makes steering easier. It also provides a means of easy entrance and exit from either side. To enter, just tilt the wheel and walk in; then after you are seated, bring the wheel to its natural position, where it locks automatically. When leaving, tilt the wheel and walk out in comfort. Ebony finish.

Replaces regular Ford steering wheel without any mechanical changes.

No. 4559—**Price,** with plain rim.... **$6.00**

No. 4560—**Price,** with corrugated rim **7.50**

Square Aluminum Heel Rest

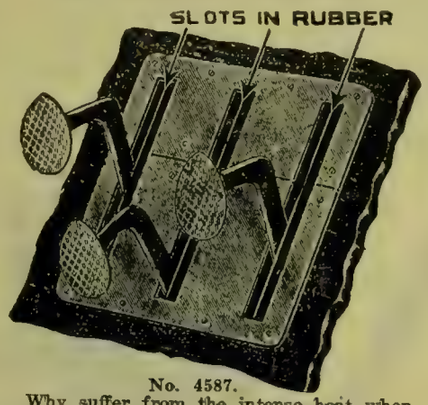
Made of a special extra heavy, tough pyramid aluminum and finished in beautiful white satin finish.

The Heel Rest is placed on the heel boards close to the pedals, preventing unsightly holes being worn in the floor covering by the heels of the boot while using pedals. Easily attached with small screws and are furnished already drilled for this purpose.

No. 4589—**Price,** size 10½ x 6 inches **$0.90**

Rear View Mirror

No. 4568



Attaches to any Ford Windsheld.

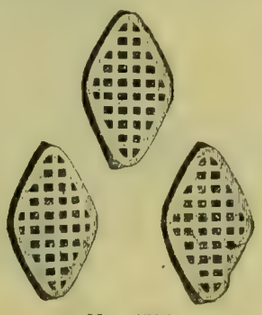
Enables the driver to observe approaching vehicles from the rear without turning the head.

The clamp on the 12-inch. arm attaches to any Ford windshield. The wing nut adjustment permits mirror to be set at any desired angle and will not jar loose. 4-inch convex lens. Black satin finish. An ornament to any car.

No. 4568—**Price** **$1.20**

All Weather Protector

No. 4587.



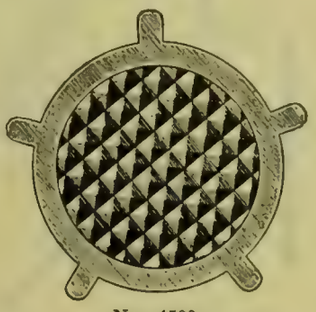
Why suffer from the intense heat when you can avoid it by equipping your car with the All Weather Protector, made especially for the Ford Cars and for so small an expense? Made to fit all Fords.

It is equally effective for winter use, as it prevents cold air from rushing up through the pedal slots.

Finished in black japan with full instructions for attaching.

No. 4587—**Price** **$2.25**

Hyslop Rubber Pedal Grips



No. 4585.

Metal pedals—with their hard, icy-smooth, slippery surfaces—are always uncomfortable and unsafe.

Hyslop Rubber Pedal Grips give a feeling of security. Just slip them over the pedals, no fitting of any kind required. They act as cushions, absorb vibration and prevent feet slipping off the pedals.

No. 4585—**Price,** per set of 3..... **$0.50**

No. 4588.

Round Aluminum Heel Plates

Placed directly back of the three pedals. Prevent wearing unsightly holes in floor covering, or for covering up holes already there. Size, 5 in. round. Prongs are inserted in rubber floor mat.

No. 4588—**Price,** per pair..... **$0.75**

DEALERS: Big profits can be made handling the complete line of Hyslop's Automotive Equipment and Supplies. Order by catalogue number.

See our display at the Hyslop Booth in the Transportation Building at the Canadian National Exhibition, Aug. 23rd to Sept. 6, 1919.

While in the city, do not fail to visit our headquarters, and you will see one of the largest and most up-to-date Automotive Equipment and Supply Houses in Canada. Our salesmen will be on hand to conduct you through our premises, and you will observe the magnitude of our stock and the facilities at our disposal for giving prompt attention to all orders for Equipment and Supplies.

Send for our new 208 page catalogue if you have not already received a copy.

The Liberty Bell

"A Signal that Warns but does not Offend"

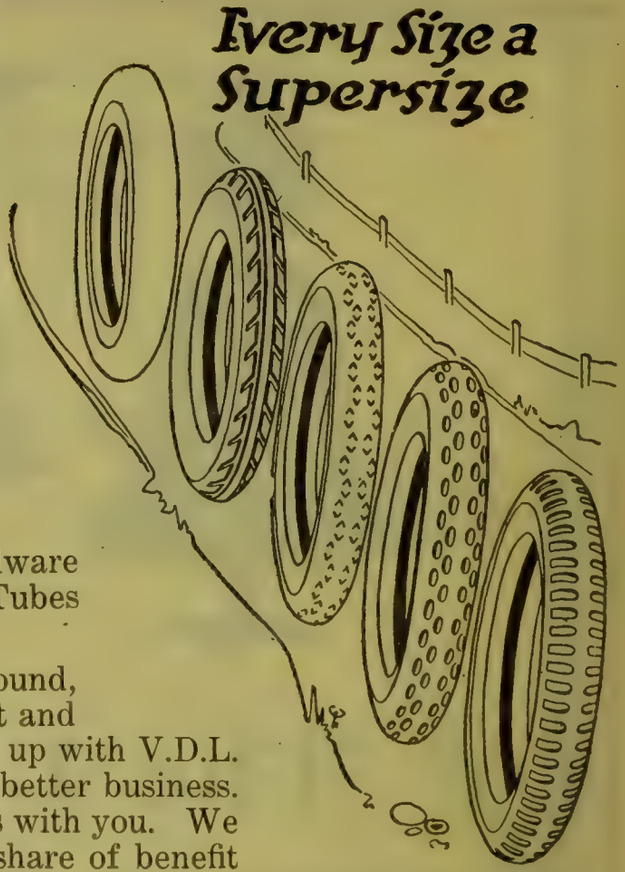
Observation of the ordinary courtesies of the road is the duty of every motorist. One of the most glaring discourtesies is the use of screeching, offensive warning signals. The LIBERTY BELL is a signal that gives forth a compelling warning signal in silvery tones which command attention, but do not offend. The bell-like tone is a welcome relief from the noise of the ordinary horn. On cars of the better kind, the LIBERTY BELL adds that final note of distinction.

Its Silvery Tone Commands Attention

Because the sound given by the LIBERTY BELL is so different from any other signal it at once commands attention and respect. In the heaviest traffic the LIBERTY BELL dominates every other warning signal. A special model is made which includes a **red light,** which flashes every time the bell rings. This model is invaluable for night driving. **It reaches the eye and the ear at the same time.** The LIBERTY BELL is an ornament as well as a utility. It improves the appearance of any car. It can be mounted in a few minutes by anyone.

The LIBERTY BELL is provided with suitable attachments for mounting on the cowl, side or front of car, windshield or on a rod between the lamps. **We recommend the windshield attachment.** The LIBERTY BELL may be had with a light at top, an ornament or perfectly plain.

ASK YOUR DEALER TO SHOW YOU THE LIBERTY BELL. Dealers should get in touch with us. The LIBERTY BELL is sure to replace many of the old-fashioned horns. We have an interesting proposition.



The Bunyan Manufacturing Co., Inc.

9805 MADISON AVE. CLEVELAND, OHIO

V D L TIRES

AT THE CANADIAN NATIONAL EXHIBITION

TORONTO

A cordial invitation is extended to all Hardware Dealers to visit the display of V.D.L. Tires and Tubes at the Canadian National Exhibition, Toronto.

V.D.L. Tires and Tubes are marketed under a sound, progressive business policy—backed by consistent and intelligent advertising that enables dealers to link up with V.D.L. Products, thus deriving the benefit of bigger and better business. Come and see us—we are keen on talking business with you. We have a really live line and want you to derive a share of benefit from it.

V.D.L. Tires and Tubes are making a name for themselves through sheer merit,—quality and excellence of workmanship.

Each V.D.L. Tire and Tube is hand made by skilled Canadian workers, from the very finest of material procurable.

V.D.L. Tires are adjusted on a basis of 5000 miles, and seldom is it that this figure is not considerably outdistanced.

You will be interested in the only 30 x 3½ Clincher Cord Tire made in Canada which is a V.D.L. Special.

V.D.L. Tires are made in all sizes, Cords and Fabrics in four distinct treads.

V. D. L. GUARD **V. D. L. TOURING**
V. D. L. VACUUM **V. D. L. ARROW**

V.D.L. Tubes are superior to anything you have ever been offered and make ideal mates to the dependable V.D.L. Tires.

TORONTO - CANADA

Mr. Dealer are you selling "GASTINE" yet?

Our dealers' proposition is proving profitable to the live dealers everywhere. Big Consumers' Advertising Campaign just started.

"GASTINE"

increases vaporization - removes carbon

On actual engine tests, using a 24 horse power, four cylinder automobile motor, gasoline containing GASTINE according to directions gave 16.7% more power with 11% less fuel consumption than untreated gasoline. With equal fuel consumption this would mean over 31% more power and consequently an increase of more than 31% in mileage. After making the tests, the cylinders showed an oily surface with no evidence of carbon which was present before the tests were made.

I have examined many compounds of this kind, and from my experience GASTINE is the only one which possesses all of the desirable features with none of the defects.

Respectfully,
(Sgd) WALTER H. FLOOD.

"GASTINE" comes in packages of 100 tablets which sell at $1.25.

WE WANT LIVE DEALERS.
There's a liberal discount. Write us.

The National Ford Owners' Club of New York, Inc.
Issue their certificate No. 878 testifying that their Research Dept. has tested Gastine, endorses and recommends its use to all owners of Ford automobiles.
Instead of 20 miles per gallon you get 25 or over —and no carbon.

The British Munition Department say:
"Gastine" Tablets have been submitted to a committee of experts who advise in these matters and on their recommendation a research was made which showed that "Gastine" brought about the removal of carbon and resulted in gasoline economy.

Can you afford not to sell "GASTINE"?

32 Calibre Hammer Regular Grip

Three Little Words That Mean Big Sales

"Hammer the Hammer," the three words that mean Iver Johnson revolvers, probably carry more selling power than any other three words ever used.

Every day, people walk into stores where IverJohnsons are sold and ask for the "Hammer the Hammer" revolver. Perhaps they have forgotten who makes it, probably they don't know of the other excellent features of the revolver—but they **do** know it is the revolver than can't go off by accident, and they want it.

If you want a share of this business, if it is worth a few minutes of your time to close such sales, deliver a revolver that stays sold and gives a full measure of satisfaction—write for catalogue and complete dealer information.

Stock the entire line—22, 32, 32 special and 38 calibres, Hammer and Hammerless models with Regular, Perfect Rubber, and Western Walnut grips.

Why not stock Iver Johnson shotguns, too? Then you can capitalize on the entire Iver Johnson line of firearms. Perhaps you will be interested in Iver Johnson bicycles and motorcycles, too. Write for full information.

IVER JOHNSON
SAFETY—AUTOMATIC REVOLVERS

"The Safe Revolver to Sell"

Sells To Every Car Owner

Whether he drives a Packard or a Ford, every motorist needs the Locktite Auto-New-Matic Patcher.

Locktite offers millions of car owners a complete tube repairing Patcher for emergencies on the road. It also makes possible the repairing of spare tubes at home—thus effecting a big saving in time and money. Every repair made with Locktite is permanent.

Any size repair—puncture or blow-out — is made easy with the Locktite. You don't need fire or special tools.

How It Works

First place the tube around the container—as shown in the picture, Clean and roughen the surface around the hole with emery, apply cement. Then press on the patch firmly — and the tube is ready to go into casing.

No waiting for the patch to set. The hotter the road, the tighter it holds.

What It Contains

The Locktite Patcher container serves as a cylinder around which the tube is placed and repaired. A clamp holds the tube tightly in position —no buckling.

The emery top of the container—strong, canvas-back patching sheet — gasoline swab — tube buffer and cement furnish the complete Patcher—ready for all tire troubles.

HERE'S A MONEY-MA OPPORTUNITY FOR DEALERS

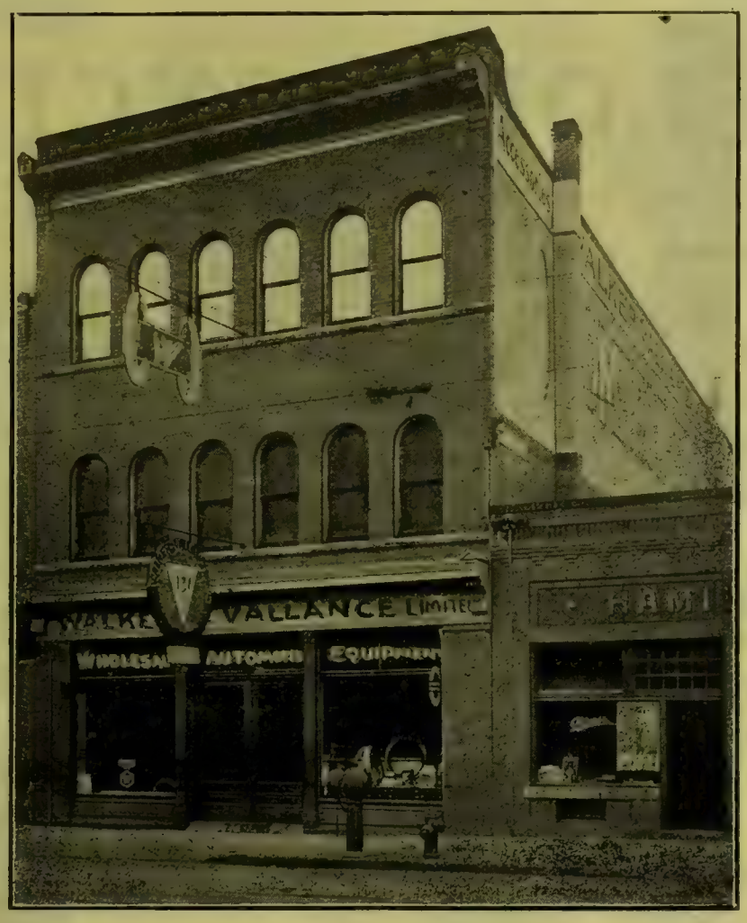
The Locktite Auto-New-Matic Patcher is actually selling.

Thousands of owners swear by Locktite. They are spreading the good news about Locktite, and our broad advertising is increasing the demand.

Are you in position to supply motorists with this new method of making a hard job easy?

Remember that it requires but little shelf-room — requires no service — sells like a lamp or spark plug, and the profit is quick and generous.

A few of the Patchers displayed on your counter will sell themselves.



Write for our dealer proposition.

Special size is made for garages and repair shops.

HYSLOP BROTHERS LIMITED - TORONTO

Dayton Airless Tires

are just what motorists have been hoping for

For the past seven years these tires have proven our claims and backed up every statement we have made and in almost every case far exceeding our mileage guarantee of 10,000 miles. (Seldom a Dayton Airless Tire goes less than 20,000 to 30,000 miles when not overloaded and wheels kept in line). There is no chance for road delays from tire trouble. All these are removed with the elimination of air pressure. Dayton Airless Tires ride as easy as any pneumatic tire properly inflated.

We want dealers in every locality to sell Dayton Airless Tires. If you have a car send for a set, and prove them for yourself. **They're backed by an absolute guarantee of satisfaction.**

Dayton Airless Tires are being used exclusively by some of the largest firms in Canada. Write for full particulars, **prices, etc. Ask for our dealer proposition.**

Dayton Airless Tire Co.

346 Yonge Street

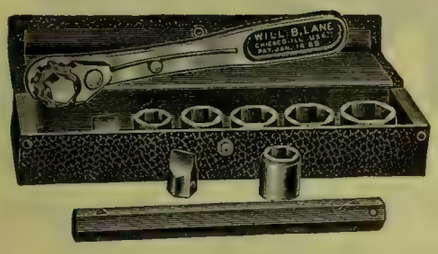
Toronto

SIZES

30" x 3½", 31" x 4"

Facts About Dayton Airless

Live, resilient rubber piers absorb all jars and jolts. They are set at proper intervals and squeeze down when an obstacle is run over.



Five layers of toughest fabric, securely bound together by rubber, form a perfect bridge over the rubber piers.

Five more layers of loosely woven fabric correspond to the carcass of a pneumatic tire.

These loosely woven layers of fabric securely bind all the layers of fabric to the tread.

The tread is much thicker than a pneumatic tire tread and it is very tough and very flexible.

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅝ inch bolt. Put up in strong leatherette case. Weight, 18 ounces.

The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

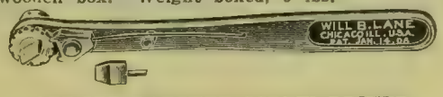
All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by

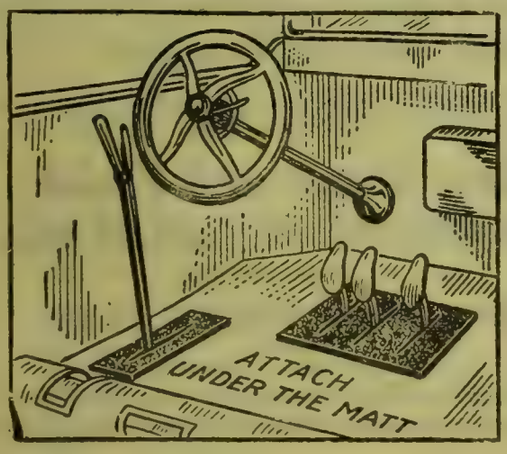
WILL B. LANE



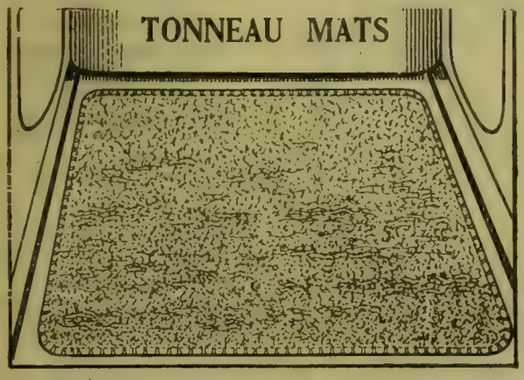
180 N. Dearborn St.

CHICAGO, ILL.

SUPER-UNIQUE SET



Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.



OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

ALL WEATHER FOOT PROTECTOR SETS

Sell All The Year Round

These Foot Protection Sets are a welcome addition to the car. In winter they prevent cold air coming through the pedals and brake, adding much to the comfort while driving.

In summer they prevent warm air, laden with oil and dust, from coming through. These pedal openings when unprotected are a source of much dust in the car in summer.

The Tonneau Mats are an attractive addition to the car. They are made of heavy, grey Ventiplex woven material to fit Ford cars. The edge is whipped. Size 28" x 30".

The demand for these useful articles means a harvest of dollars to dealers.

MARBLE'S SIGHTS SELL-AT-SIGHT

We're advertising our sights heavily this year, so stock, display and push them. You'll have no trouble in getting all the trade in your locality with the famous Marble line of sights because they have a reputation for quality and accuracy. And remember, that all Marble goods are fully guaranteed—also we are ready and anxious to help make you an authority on gun sights.

No. 1

Write For Special Sight Circular

showing entire line with beads illustrated in colors. It will give you just the information you need when ordering sights.

No. 1—Marble's Flexible Rear Sight

One of the sights that have made the name Marble famous. Used by thousands and thousands of sportsmen—its friends are legion. Stem is not rigid, but is held by a strong spring in base. Does not break when struck. Springs permit sight to give and instantly brings it back to correct shooting position. This is the perfect rear sight to use with Marble's V-M front sight. List Price.....$3.30

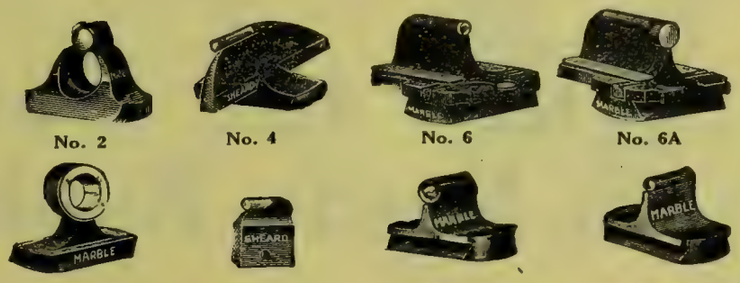
Note.—When ordering sights, always mention make, model and calibre of rifle they are intended to fit.

No. 2—Marble's Improved Front Sight. Ivory or gold bead, 1/16 3/32 or 1/8 in. Fine for running or snap shots. Used by many professionals who do fancy shooting. Lis t Price.....$1.10

No. 3—Marble's V-M Front Sight. Gold face and gold-lined aperture. Many experts prefer it to a bead sight. List Price $1.65

No. 4—Sheard Front Sight. Gold bead. Shows up well in dark timber—will not blur. Shows same color on all objects. Type shown is for rifle. Also made for many revolvers. List Price $1.65

No. 5—Special Sheard Sight for Winchester 1894 carbines. List Price $1.65



No. 6—Marble's Duplex Sight. Combines "fine and coarse" sights in one. Make snapshots sure shots. The ⅛-in. white enameled bead folds down when the 1/16-in. gold bead is being used. List Price $1.65

No. 6A—Marble's Duplex Sight. Showing enameled bead in use.

No. 7—Marble's Standard Front Sight with ⅛-in. ivory or gold bead. Can also be furnished with 1/16 or 3/32-in. bead. List Price $1.10

No. 7A—Marble's Standard Front Sight with 1/16-in. gold or ivory bead. Can also be furnished with 3/32 or ⅛-in. bead. List Price $1.10

Above prices are list. Liberal discounts to dealers. Order from your jobber.

Every Ford or Chevrolet your store is a mighty

CHAPMAN

Ball Thrust Bearings for Rear Axle of Ford or Chevrolet Cars.

The plain flat washers used at the left side of the Ford or Chevrolet 490 differential become worn, due to the heavy thrust pressure of the driving mechanism allowing gears to shift away from each other, causing tooth wear, breakage and noisy gears.

The **CHAPMAN DIFFERENTIAL THRUST BEARING** is an exact replacement for this washer, no change in axle necessary. It has twenty husky steel balls which take the pressure on a rolling, frictionless surface, holding the gears always in perfect mesh, reducing friction and noise to a minimum and eliminating waste power.

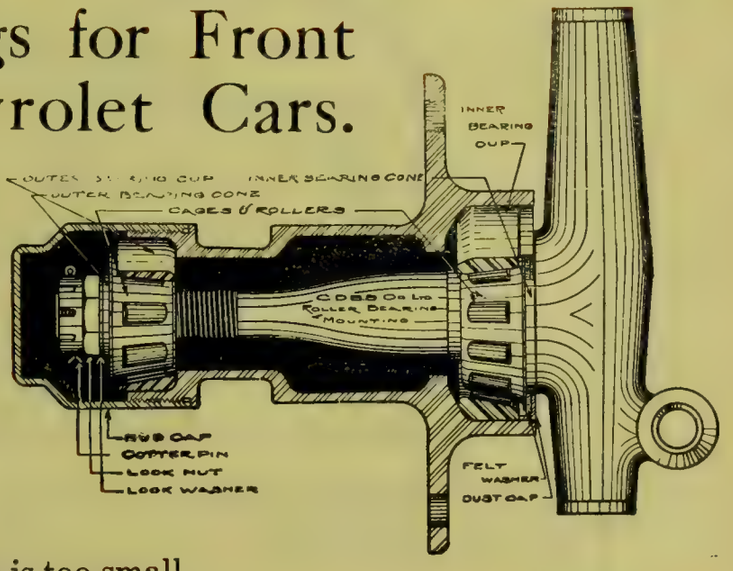
MADE IN CANADA

Every Ford and Chevrolet 490 in your community is a gilt edge prospect for this line. The economy argument alone will turn sales for you.

Exhibit at "Fx."
See Our Display in Machinery Hall

Our Advertising Campaign is creating business. Why not cash in? Send for further information and dealer proposition.

The Chapman Double Bearing Co.



Makers of High-Grade Ball and Roller

490 that stops in front of good prospect for

BEARINGS

Chapman Roller Bearings for Front Hub of Ford or Chevrolet Cars.

Have you ever seen the front wheel of a Ford or Chevrolet fall off or run out of alignment? When you do, examine it and you will discover that the cup and cone bearings are worn out. It's a weakness in these cars because the hub is too small to accommodate the proper size bearing.

Why not order a stock of CHAPMAN ROLLER BEARINGS and make the Fords and Chevrolets in your vicinity as safe as a dollar? They eliminate the greatest source of danger in driving either of these two cars by preventing friction.

CHAPMAN ROLLER BEARINGS are made of the highest grade material and workmanship throughout—hardened steel tapered rollers, adjustable, withstand the stocks and thrust from turning corners.

They're an exact replacement for Ford and Chevrolet 490 front wheel bearings. No change needed, easily installed.

Look into this proposition. We want dealers in every locality. Our advertising is reaching every car owner and garage man.

Now is the time to act to benefit by this sales-getting campaign.

ARMCO
AMERICAN
ARMCO
INGOT IRON

ITS MANY USES

Armco Iron Enameled Products

Leading manufacturers of stoves, refrigerators, kitchen cabinets, table tops, and other enameled specialties use Armco Iron exclusively as the enameling base because its *purity and evenness* and freedom from gases make possible smooth, beautiful enameled surfaces that are remarkably free from scales, scars, spots, pinholes or other defects.

Armco Iron Welding Material

Armco Iron makes a uniform weld because it is *pure and even.* It welds more quickly, more smoothly and more strongly than any other material. It is used extensively for making repairs on steel castings for industrial and marine construction; in railroad construction and repair shops for welding cracks in locomotive fire-boxes, welding in place new side-sheets, repairing worn engine wheels; in the manufacture of iron and steel barrels, grave vaults, pressure tanks, and innumerable other products; for making various welded articles. Several leading manufacturers use Armco Iron polished sheets for stoves, welded throughout.

Armco Iron as Electrical Conductor

Armco Iron has high electrical conductivity because of its *purity and evenness.* It can be successfully and economically used for telephone wire, telegraph wire, cable wire, bond wire and high and low tension transmission wire.

Armco Iron also has low residual magnetism and high permeability. It takes hold and lets go of its magnetization more rapidly than any kindred material. Hence it can be utilized in the manufacture of magnet cores for motors for all kinds of small electric machines, and for pole-pieces for self-starting motors.

Armco Iron Building Products

When the building market is normally active, there is a steady demand for *pure, even,* rust-resisting, weather-defying Armco Iron. It takes the form of many metal building products, including roofing, lath, window frames and sashes, skylights, grills, ventilator-ducts, "gutters," cornices and conductor-pipes. Armco Iron insures long service. Its unusual *purity and evenness* allow it to take on an extremely pure galvanized coating free from contaminating and weakening impurities.

Armco Iron for Railroad Purposes

Armco Iron is widely utilized in the construction of hopper cars, polished boiler jackets, coal-chutes, water tanks, culverts, oil storage tanks, metal passenger, freight and mine cars, smoke-stacks, third rails, car roofing, boiler tubes, fences, tie-plates, equalizer bars, metal lath, window frames and ventilating ducts. Here again its *purity and evenness* are of immense advantage.

Armco Iron Culverts and Flumes

Armco Iron culverts are certain to figure prominently in the vast highway program of both state and nation. Practically 75% of all metal culverts built to-day, are built of rust-resisting Armco Iron, and they are giving complete satisfaction—meeting severe and important drainage service in every part of the country. The great irrigation problems of the far West also call for a vast use of Armco Iron flumes. Their use gives 100% irrigation efficiency.

Our laboratory services are at the disposal of all manufacturers whose metallurgical problems lie within our particular field. Printed data and information specifically applied to your needs will be sent on request.

The trade mark ARMCO carries the assurance that iron, bearing that mark, is manufactured by The American Rolling Mill Company, with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Wilmington, Del. U.S.A.

DU PONT

GOLDEN OPPORTUNITIES EXIST

Hundreds of hardware merchants throughout the provinces of the Dominion, and located in centres of greatly varying characteristics have made huge successes of selling auto accessory lines. It is always found that where this line of goods is not carried, it is because the matter has received no detailed consideration, but sufficient investigation early proved to the merchants who are now carrying this line with profit that with the general favor of both the buying public and the manufacturer there was little reason for expecting anything different to the result which has been achieved. The present rapid development of the automobile industry is providing golden opportunities for wide-awake merchants.

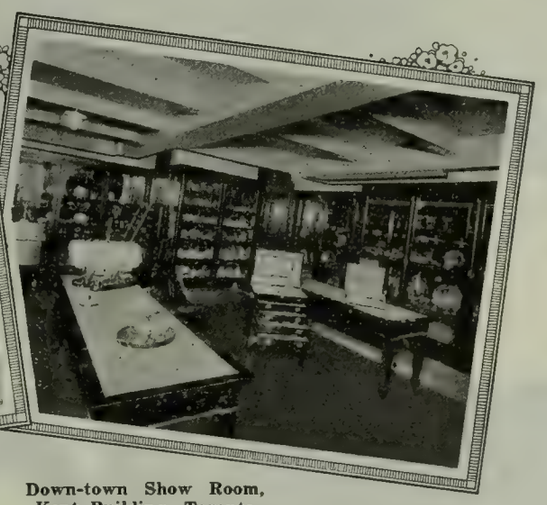
1881 (R) ROGERS (R) A1

Thirty-eight Years Service

In 1881 the foundations of one of the oldest and best-known Silverware Houses in Canada were laid. From this date the Toronto Silver Plate Company, Limited, continued in business until 1914, when Canadian Wm. A. Rogers Limited purchased the business, and immediately enlarged the Factory to include a thoroughly modern Flatware Department. This is, in brief, our history.

We believe that dealers are more interested in present day Service than in past history, so we shall illustrate on the following page our present Factory buildings and the Service we can give you.

Our Silverware Factory on King Street West, Toronto, contains three distinct departments—Flatware, Britannia Metal Hollow Ware, Nickel Silver Hollow Ware. With these three branches of the Silverware industry combined under one management and in one group of buildings, the filling of assorted orders is quickly and easily accomplished.



A large staff of competent Silversmiths, many of whom learned their trade in the factories of Sheffield and Birmingham, ensures that quality of craftsmanship which alone will bear the test of time.

CANADIAN WM. A. ROGERS LIMITED

'HEIRLOOM' PLATE

Silverware Factory, Toronto.

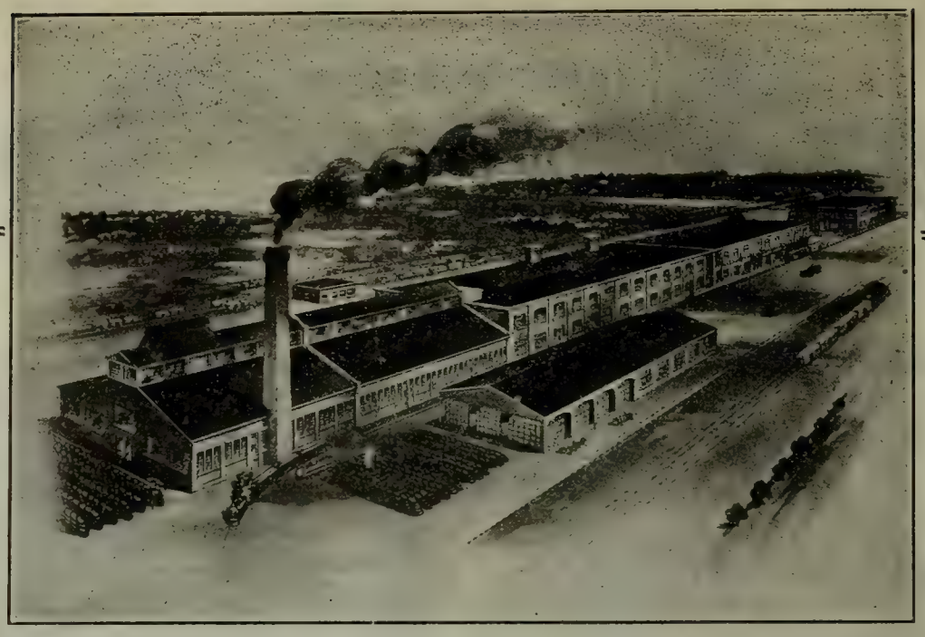
Down-town Show Room, Kent Building, Toronto.

One of the oldest landmarks on King Street West, Toronto, is the ivy-clad Factory of Canadian Wm. A. Rogers Limited. The illustration shows the front elevation only of the Factory, which extends through the block to the next street north.

For the convenience of out-of-town customers, a showroom is maintained downtown in the Kent Building, corner of Yonge and Richmond Streets. Dealers are cordially invited to call and inspect the complete range of Silverware always on display.

In the oval is a view of the Factory of Wm. A. Rogers Limited, Niagara Falls, New York. The Executive Offices of this Company, as well as Canadian Wm. A. Rogers Limited, are located in Toronto.

There are many examples of American firms coming to Canada to develop their lines of business.



There are too few examples of Canadians going to the United States for the same purpose.

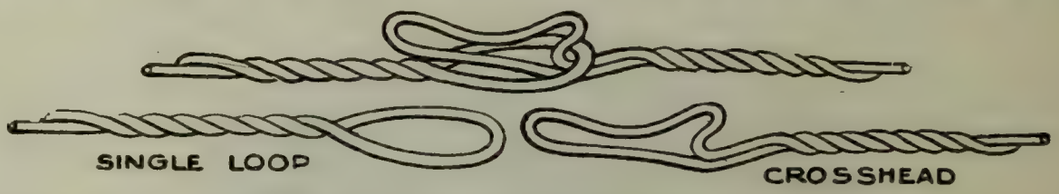
Wm. A. Rogers Limited, with its four Factories and its Sales Offices in New York, Chicago and San Francisco, is a notable example of what Canadian enterprise can accomplish.

Mr. S. J. Moore, of Toronto, is President of both Companies.

Factory of Wm. A. Rogers, Limited, Niagara Falls, N.Y.

Be sure to see our Exhibit, at the Canadian National Exhibition

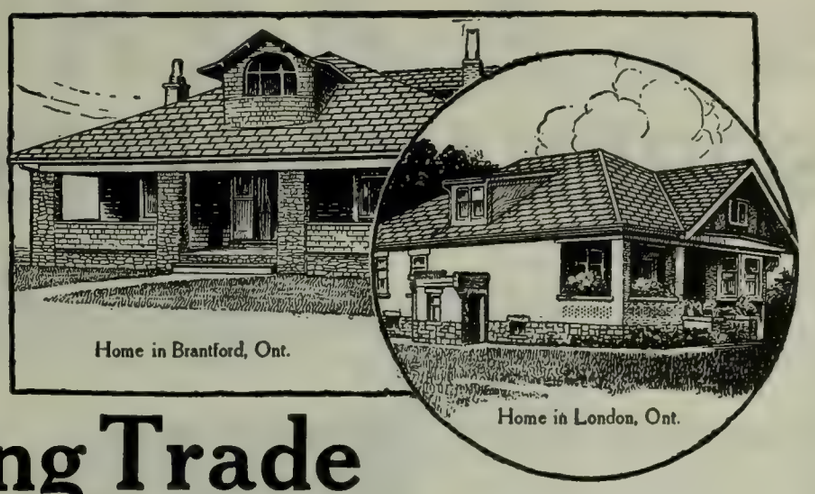
Complete Showing of our line on view in the Industrial Building



Manufacturers of

Nails, Wire and Wire Bale-Ties

Our specialty is the production of superior Bale-Ties and Special Hay Baling Wire, made from genuine Bessemer stock. A stronger and better wire at ordinary cost.



We also manufacture Wire Nails, Fence Staples, Fine Wire, Bright Annealed and Liquor Finished.

We should be glad to hear from dealers who are not now stocking Laidlaw goods. Write to-day and let us show you that there is money for you in this line.

The Laidlaw Bale-Tie Company, Limited, Hamilton, Ont.

Get A Larger Share of the Roofing Trade

The building trade is active and consequently the Prepared Roofing Industry is prosperous to-day.

But the real building activity will not reach its height until next year or the year following, because building was almost at a standstill during the war and it will take some time for the brick yards, stone quarries, contractors, bricklayers, masons, carpenters, etc., to get back into their stride.

The big roofing business of the future will be done in prepared roofing, and the increasing popularity of

Brantford Asphalt Slates

indicates that this style of roofing will be the big seller for homes, schools, churches and other buildings requiring an artistic, permanent, fire-resistant **slanting roof.**

Hardware dealers who feature Brantford Asphalt Slates, along with our other lines, and go after business energetically will be able to sell more prepared roofing during the next two years than they've sold during the last five. Our own output of Asphalt Slates to-day is four times that of three years ago, which shows that the demand is greatly increasing.

Have you seen the Brantford Asphalt SLAB Slate which is FOUR STANDARD size Asphalt Slates in one? The newest idea in roofing. Saves time, labor and nails in laying. It is selling fast and bound to be a big producer of business for our dealers.

Write for booklets and samples of our different lines. The Brantford Line is complete—a roofing for every purpose.

Brantford Roofing Co. Limited

Head Office and Factory, Brantford, Canada.

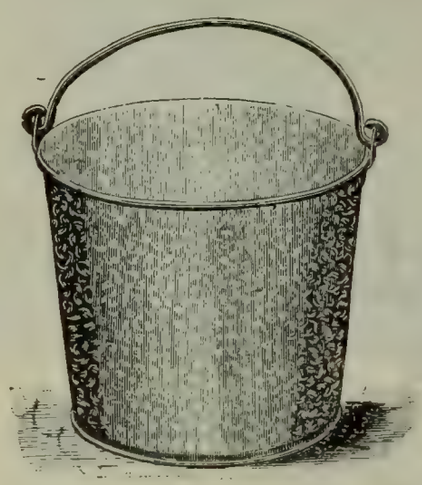
SOREN HOUSEHOLD GOODS

at Toronto Exhibition



Daisy Ash Sifter

This well-known, popular sifter has long been noted for its efficiency. Built to give satisfaction.

Dustless Sifting

With the Daisy Ash Sifter your customers won't have to put on overalls to sift the ashes. Note the common sense way it's enclosed.

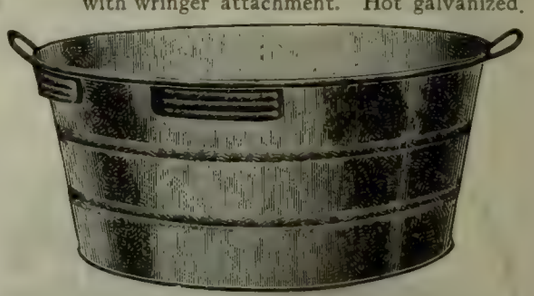
Examine This Exhibit of Good Sellers in the Stove Building

while you are at the National Exhibition. Among these articles which everybody uses you'll find many of benefit to your store. They have a universal market, the Soren name is a good backing, and they are good profit producers.

Galvanized Iron Pails

These galvanized iron pails of straight pattern and standard weight have strong bails and a good top and bottom rim insuring them against dents and other damage.

A Catalog for You



illustrating the Soren Bros.' line of dependable, salable goods and containing a full list of prices. A postcard brings it.

Nestable Wash Boilers

These unusually good nesting wash boilers heve pit copper bottom, flat covers and stationary wood handles.

Wash Tub

A durable wash tub with strong, drop handles and a heavily wired rim. The bottoms are corrugated and the tub is fitted with wringer attachment. Hot galvanized.

Another BISHOPRIC STUCCO BOARD Home

More and more are home-owners building with stucco, because of its economy, strength and durability.

This photograph shows the residence being built by Superintendent J. H. W. Bower, of the Military Hospitals Commission, at Sunnyside and Fentiman Avenues, Ottawa.

Bishopric Stucco Board was used on all interior outside walls as a background for plaster; Bishopric Sheathing was used in place of lumber on outside walls on studs—then furred with 1 x 2 furring strips and stucco board and cement stucco applied, giving a double air space, increasing the warmth and durability of the building, yet not increasing to any great extent the cost.

Every Hardware Dealer—who does any business at all with Architects, Builders and Contractors—can handle Bishopric Products to advantage.

Write us for samples and prices.

NORCROSS *GARDEN CULTIVATORS*

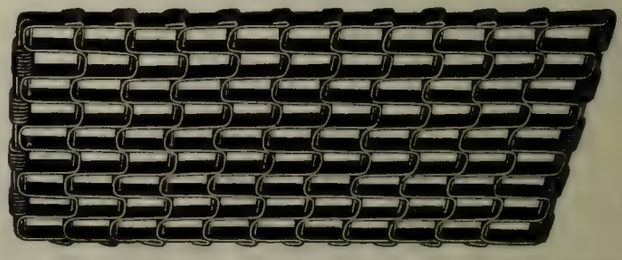
Have Revolutionized Gardening

These simple, inexpensive little implements do more and better work than the old fashioned hoe, with decidedly less labor. They work the soil closer to plants without injuring their roots or foliage than any other type of tool known.

Suited to both men and women. Come in three sizes: 5 prong and 3 prong sizes with 4 foot handles, and the Midget (for flowers) with a 9 inch handle. **Quality the very best throughout**—detachable steel prongs, malleable head, finest quality handles. The sharp tapering shovels pulverize the ground thoroughly from one to five inches deep and leave it loose, level and untrampled.

More than a million in use in America—thousands are being exported. No garden is too large or small for the profitable use of a "Norcross."

Factory Representatives:



Eastern Canada:
Richardson & Bureau, Montreal.

"ANTHES" FOR

ANTHES TANK HEATER
CAST IRON—SELF-SINKING

The superior features of "Anthes" Tank Heaters will be appreciated by your customer whether Farmer, Stockraiser or Rancher.

The "Anthes" Tank Heater is very substantially made, and neat in appearance, being of high-grade cast iron throughout.

It is constructed like an airtight stove, the draught being outside of the main body. The entire top is removable, making a large opening for firing, and the grate and ash pan are easily removed for cleaning.

Will burn any kind of fuel. It is furnished with one length of pipe fitted with spark arrester.

You will find this a popular line and a quick seller.

Two sizes:

Dia.	Height	Weight
12 in.	22 in.	120 lbs.
14 in.	24 in.	150 lbs.

ANTHES FEED COOKER

Essential Line—Good Profit

Essential to your customers who have stock to feed. The cauldrons of the "Anthes" Cast Iron Feed Cookers are of high grade cast iron, uniform in thickness, smoothly finished inside and out. They come in 20, 30, 40, 50, 60 and 75 gallon sizes. Imperial measure conforming with the law.

In the 20 to 60 gallon sizes the jackets are of 16 gauge sheet steel. In the 75 gallon size of 14 gauge steel reinforced at the bottom with a heavy band of iron.

'NEW STORES FOR OLD' AND

Double the Business

The Duluth Furnished store is different; it's the most cheerful place in town; cheerful because the owner knows he's "increasing sales and cutting costs"; customers are proud of the Duluth Furnished store.

When you put in Duluth Furniture, you save the time of your clerks, making fewer necessary; you simplify sales-work making cheaper, or less experienced, help available; your storage space is increased with no increase of rent; and your "turn-over" is increased with no additional capital.

Which would *you* rather do? Buy in a store where they have to take down, unwrap, and show you half their stock before you can make a selection, or walk in a Duluth Furnished store and select immediately the article wanted from a well displayed stock?

A few visits to the first kind of store would drive you to the mail order catalogue where you could at least find a *picture* of what you wanted, wouldn't it?

Write for "Cutting Costs and Increasing Sales."

The "Match-O-Lite" Lamp

(Trade Mark)

Makes its own gas from gasoline or best quality of coal oil. Can be kept in order with little attention and gives a beautiful light.

Note cut showing how to light by holding two matches under generating ring.

A spirit lighting generator of larger size tube is also supplied with this lamp, ensuring a good light in case gasoline or coal oil is not of best quality.

Price $8.75

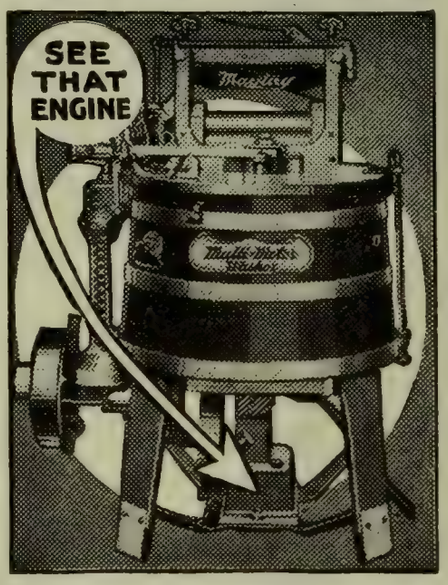
52 GERTIE STREET - WINNIPEG

The MAYTAG

One-Horse Gasoline Engine

This is not only the lightest and simplest Gasoline Engine on the market, but at the same time the most powerful.

A Sample Engine on exhibitions in your store will prove that it is a ready seller, as it fills a long-felt want. The profit will please you.



We furnish the engine, which is an air-cooled, two-cycle, a set of sealed batteries, a coil, one gallon of Maytag special lubricating oil, everything, ready to go.

WARRANTED IN EVERY PARTICULAR

For pumping, running, fanning mill, separators and other light work, it has no equal. No trouble to pick it up and carry it from place to place.

Maytag Multi-Motor Washer with Swinging Reversible Wringer

What the Maytag Multi-Motor Washer Will Do

It operates the washer and wringer. It will operate the sewing machine, churn, cream separator, or any other small machine that does not require more than ½ h.-p. WASH-DAY, and that is WORK-DAY, changed into PLAY-DAY. Good-bye backache, headache, nerve wreck! No woman need bend over the wash tub, as her grandmother did, nor turn the old-style washer, as her mother did, if she has a MAYTAG MULTI-MOTOR.

There is a Maytag for every need — Electric, Power-driven Multi-Motor and Hand. Thousands have been sold in Canada, and the demand is increasing.

Dealers are protected with our exclusive contract. Write for particulars.

A MAYTAG Contract will make you money

DUTCH BRAND PRODUCTS

2 in 1 Cut Filler

ONE OF OUR BIGGEST SELLERS

Motorists use Dutch Brand 2 in 1 Cut Filler for filling small cuts, bruises and gashes in casings. This heavy, liquid rubber prevents formation of sand and water pockets.

Easily applied; dries quickly.

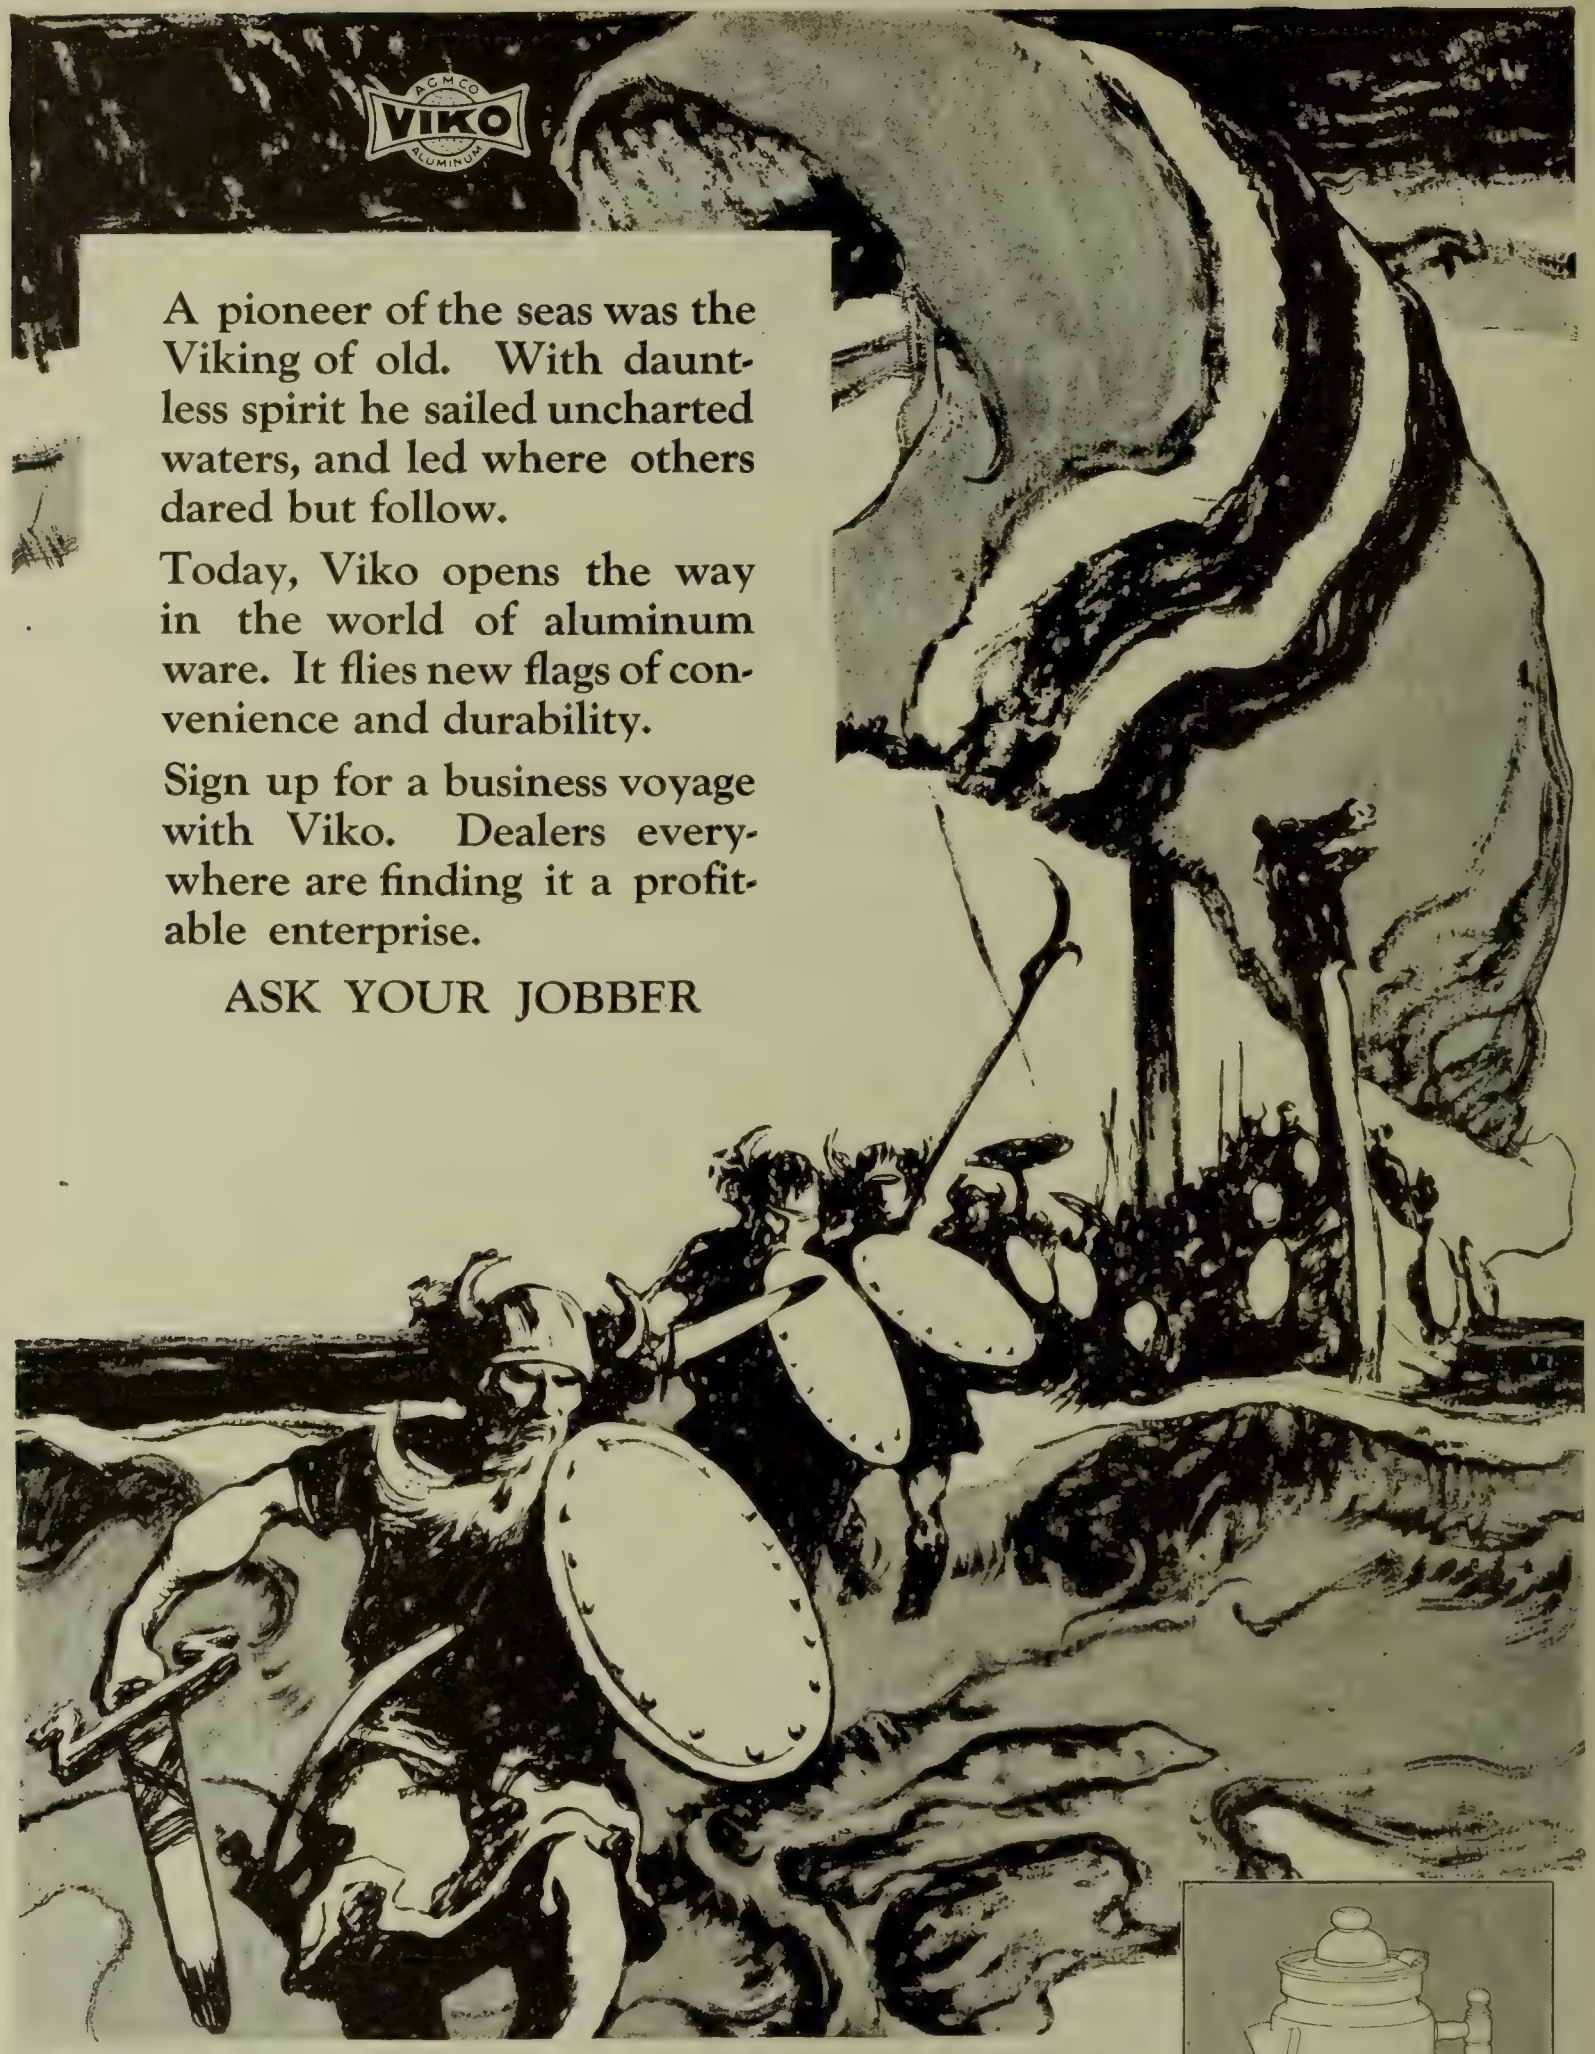
One dozen tubes in attractive cartons—a real "Sales Help."

Through your jobber, or write us.

Fine Shelf Goods For Hardware Merchants

Our lines cover many needs of automobiles, bicycles, trucks, tractors and airplanes. Some of these money makers are Auto and Cycle Patching Cement, Vulcanizing Cement, Radiator-Seal Compound, Valve Grinding Compound, Gasket Shellac—Tire Talc, Tire Fluid, Friction Tape, etc.

"Keeping Down the Upkeep" Keeps Sales Up



We want you to have this little book telling about our products. If you are not already selling Dutch Brand products we'd like you to know about them.
Situated at Chicago we are able to serve Canada promptly to the East or West.
We have splendid equipment for turning out goods; modern buildings, methods and appliances; we maintain a high standard; we advertise extensively, and take care of the trade.

Chamois Skins

We have a Chamois for EVERY purpose, and while we do not guarantee complete and immediate delivery OF ALL SIZES, this owing to present heavy demands and shortage of raw material, we are nevertheless supplying many sizes on receipt of order.

Short sizes ordered are being supplied in date of rotation, and as such sizes are received from the factory.

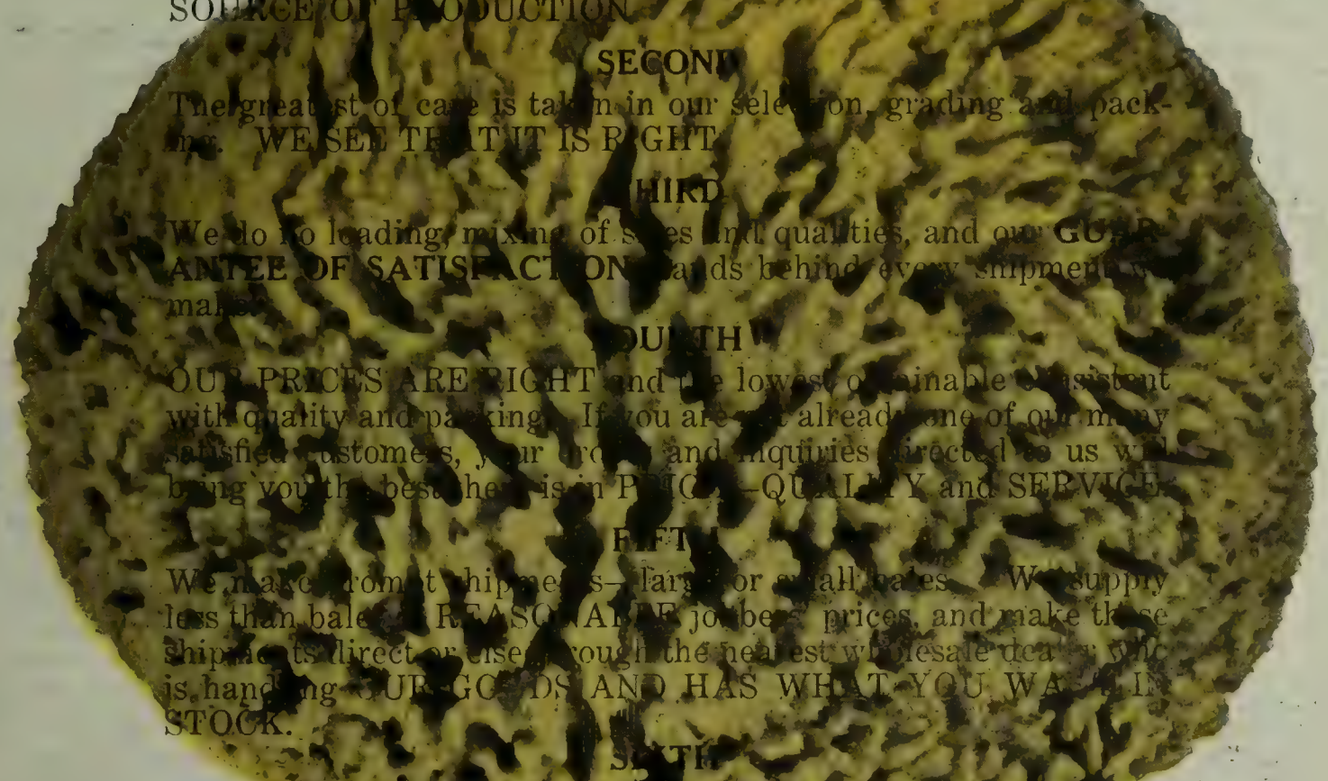
Prices and prompt information regarding deliveries supplied on request. Chamois Skins are now more difficult to obtain than at any time during the past two years. This condition is likely to last for some time, and prices are likely to be higher.

(We Represent the Largest Chamois Factory in the World)

EVANS & CO., LIMITED

CORISTINE BUILDING, MONTREAL

SPONGES



British West Indian (Nassau) - Florida and Cuban

FOR AUTO, CARRIAGE, PAINTER, BOAT, HORSE AND HOUSEHOLD

Six Reasons why your orders and inquiries should be sent to us:

FIRST

We are direct buyers at the leading fisheries—Nassau, Bahamas and Tarpon Springs, Florida. We are also exporters, making direct shipments from the British West Indies or from bonded warehouse, Montreal, to many parts of the world. Whether your orders are large or small we are the nearest you can get to the SOURCE OF PRODUCTION.

SECOND

The greatest of care is taken in our selection, grading and packing. WE SEE THAT IT IS RIGHT.

THIRD

We do no leading, mixing of sizes and qualities, and our GUARANTEE OF SATISFACTION stands behind every shipment we make.

FOURTH

OUR PRICES ARE RIGHT and the lowest obtainable consistent with quality and packing. If you are not already one of our many satisfied customers, your orders and inquiries directed to us will bring you the best there is in PRICE—QUALITY and SERVICE.

FIFTH

We make prompt shipments—large or small lots. We supply less than bale lots at REASONABLE jobbers' prices, and make these shipments direct or else through the nearest wholesale dealer who is handling OUR GOODS AND HAS WHAT YOU WANT IN STOCK.

SIXTH

We are a Canadian firm—employing Canadian capital—soliciting Canadian business ON OUR MERITS and offering Canadian buyers advantage in price—goods and service over all foreign competitors.

Makes the World Run Smooth

HARRIS METAL

Wherever hard work and speed are found, there Harris Metal has a duty to perform. Harris Metal in such a bearing means the elimination of worry and anxiety; it means a saving of valuable shafting and other parts. The length of time in which machinery can be hopelessly damaged by faulty bearings is astonishing and the damage—appalling; Harris Metal prevents it.

Canada Metal Company's Babbitt, Solder, Harris Heavy Pressure Metal, Lead Pipe, Sheet Lead and all ingot metals, are ready for prompt shipment to the dealer who appdeciates handling a reliable, salable and profitable line.

Barrett Fast Selling Specialties for Farm and Home Trade

ON this page you will find brief descriptions of several popular Barrett Specialties. They are all fast sellers. If you don't carry all four of them you are overlooking good sales opportunities.

The name "Barrett" is recognized everywhere as standing for quality, and when you sell a customer these Specialties you can do so with the knowledge that they will give satisfaction.

We mention below some of the main selling points of each. Read them over. Perhaps you can sell *more* by suggesting the different uses to your customers.

Barrett ELASTIGUM

For Repairing Leaks Everywhere

BARRETT Elastigum is an elastic, waterproof cement that spreads freely and adheres tenaciously to wood, metal, stone, brick or concrete. It can be used on wet or dry work and is always ready, without heating or mixing. It dries slowly, and makes a permanent, elastic joint that will not crack or pull away but always remains tight, in the hottest or coldest weather.

Used as a damp-course under sills or wall plates, it prevents seepage and protects the woodwork. As a water-tight cement for cellars, party walls, cisterns and structures of brick, stone or concrete it has no equal. Used also in place of putty for glazing, stopping cracks, stuffing cornices, building up "plastic" slate roofs, and as a stopping or cement for flashings, which it renders permanently waterproof as no other cement can do.

Put up in airtight cans of 5 lbs.; also in drums and barrels.

CREONOID

LICE DESTROYER AND COW SPRAY

BARRETT Creonoid protects live stock. It is an up-to-date, antiseptic, preparation made from coal-tar, the source of many of the wonderful modern remedies.

Effective for spraying cattle, horses, hogs and disinfecting chicken houses and stables against lice, vermin, flies, etc.

Remind your customers that Creonoid is cheap enough to use freely. Tell them to spray their larger animals often, and to paint or spray all perches, stalls, floors, walls, etc., in hen roosts, barns, pig pens and stables. They will soon see the difference in egg and milk production and in the health of their animals.

Put up in airtight cans of 1, 5 and 10 gallons, and in barrels and half barrels.

Everjet Elastic Paint

Protects Exposed Surfaces

BARRETT Everjet is a tough, elastic, glossy-black, carbon paint of wonderful durability; a paint that will add years of service to exposed surfaces—metal, wood, brick, concrete, ready-roofing, etc. It is proof against all weather influences and acids, gases, steam vapors, etc.

For lengthening the life of steel or iron work, farm machinery and implements, metal roofings, in short, for any metal surface whatsoever—Everjet is unequalled. It will not blister or crack off, but forms a perfect elastic coating which expands and contracts with the metal under any variation of temperature.

Put up in airtight cans of 1 gallon (12 cans to a case) and 5 and 10 gallons. Also in barrels of 40 gallons and in half barrels.

Barrett Nox-Aer-Leek

Cuts Coal Bills

BARRETT Nox-Aer-Leek is a plastic cement of elastic bitumen fused with non-drying oils and asbestos fiber, for making exterior walls of boiler settings and kilns airtight and moisture-proof.

Actual tests have proved that it saves money on fuel bills and increases boiler efficiency by keeping out the excess air that, leaking in through crevices in brick and mortar, causes improper combustion and a consequent wasting of fuel, heat and power.

Some of the largest users of power in the country are using Nox-Aer-Leek and they are saving from 3 to 30% on their fuel bills. Your factory customers *need* this valuable product, with the cost of coal at its present high level, and the shortage that is predicted this winter.

Shipments are made in barrels of about 550 pounds and in half barrels of about 300 pounds.

The Washer That Sells Itself

Easy To Sell

If you put a "Red Star" on the floor on your store, you will be surprised to find how readily it will sell.

There is a great demand for washing machines, owing to the scarcity of help. The neat design and attractive finish of the Red Star attracts your customer, and once she tries the lever and finds how easily it operates it will not take her long to decide that she wants one.

Pleases Your Customers

The Red Star gives the best possible satisfaction in actual use. The solid, cast iron bed plate on which all the working parts depend is not affected by warping of the tub. The two sets of ball bearings and the spiral machine cut gears make the Red Star easy to operate and noiseless in action. Your customer will appreciate, too, being able to lift the dolly before she raises the lid. This enables her to free the dolly from the weight of the clothes.

No More "Blue Monday"

Only a slight push is needed to start the Red Star and it takes very little pressure to keep it running.

No more standing over a steaming tub! The hot, soapy water is sent swirling through the clothes, thoroughly cleaning them with very little work.

Easy To Store

The Red Star is shipped in a crate with all the working parts inside the tub. It is the work of only a minute or two to assemble it.

In the crate, it takes up very little space in your storeroom or warehouse and is thoroughly protected until it is needed.

Write to our nearest Branch for illustrated circular.

On the Farm
No Horse Can be Spared

There are casualties on the farm. Who can afford a horse or man as casualty in farming work? The loss of a horse and the consequent loss of time and attention of a man pulls down efficiency. TAPATCO Horse Collar Pads increase efficiency, insure against horse casualties—no bruised, galled and chafed shoulders.

We have recently added a new feature, which is one of the greatest improvements that has been made in the manufacture of Sweat Pads since they have been on the market, viz:—our new patented staple and felt reinforcing device for attaching the hooks to the Pads. This prevents the hooks from pulling off easily—even where the fabric has been weakened by long use. This form of attachment is found only on Pads manufactured by us.

TAPATCO Cotton Gloves on the farm, in the garden, barn or garage, prevent human casualties by the sore-hand route. In Band-top, Knit Wrist and Gauntlet; light, medium and heavy weight. Jersey Gloves and Mitts in Oxford, Tan and Slate. The leather-faced glove is a winner.

Your customers know these things about TAPATCO. Are you prepared to supply the demand? To harvest the profits? Order through your jobber.

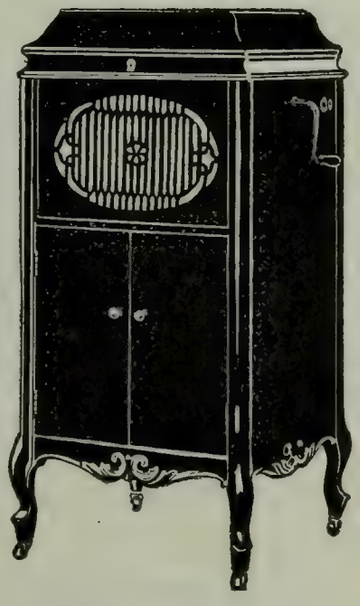
The Brunswick
ALL PHONOGRAPHS IN ONE

The ONLY Phonograph DESIGNED To Play ALL Records CORRECTLY

When you start to sell a Brunswick you can prove by your customer's own sense of hearing that this instrument plays every make of record exactly as it should be played.



Place any make of record on the turntable, and show your customer how, without attachments or extras, the Brunswick plays it with the exact weight, proper diaphragm and correct needle.

The Ultona

—an exclusive Brunswick invention—plays a very important part in phonograph sales. It carries the Diamond Point, the Permanent Jewel Point and the steel needle holder ALWAYS in position, ready, at the mere turn of a hand, to play each make of record. Then, in the tone arm is the WEIGHT ADJUSTMENT that gives the exact weight for each record and prevents all possibility of injury to any make of record. This is a selling point of exceptional value and found only on the Brunswick.

The All-wood Oval Tone Chamber

In this Brunswick feature you have another most convincing selling point. The complete absence of all metal in its construction results in the elimination of harsh metallic notes. This is no mere assertion. It is a fact that you can prove to every customer by actual demonstration. This tone-chamber combines with the Ultona to give the perfect method of reproduction. It is the method that makes the Brunswick the one truly universal phonograph.

Progressive dealers everywhere are adding the Brunswick as a line that can be depended upon for permanent business development.

Increase Your Phonograph Sales This Fall

The Brunswick will help you do it. Now is the time to secure an agency. Write to-night for our dealers' proposition.

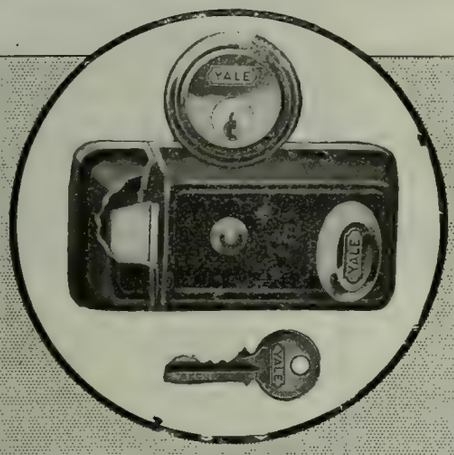
TRADE YALE MARK

Half sold before delivery

THE merchant handling Yale products knows that his stock is half sold before delivery.



Extensive advertising keeps "Yale" continuously before his customers, creating constant demand and quick, easy sales.

And the customer *knows* he will be satisfied when he sees the trade-mark on the product.

Yale Night Latches, Padlocks, Door Closers and Builders' Hardware are made at our factory in St. Catharines, Ontario.

"The trade-mark Yale helps make the sale."

When at Toronto Exhibition, You are Invited to

Call at Bicycle Headquarters

North End of Transportation Building, Toronto Exhibition, or at Head Office and Factory, Weston

THE C.C.M. factory has for some time past been running on a peace basis. All orders are being filled on time. Orders for accessories are also being promptly shipped from a complete and carefully selected stock.

If you can arrange to visit the Weston plant you will see for yourself that we are in a position to extend the best possible service to all our customers.

The C.C.M. branches in Montreal, Winnipeg and Vancouver are also prepared to extend the same first-class service.

The Principal C. C. M. nameplates are:
Massey
Gendron
Columbia
Ivanhoe
Perfect
Cleveland
Brantford

Carry the Files that Sell best

A standard tool with a reputation for reliability means profit to dealer as well as to manufacturer.

That is why it is in your interest to stock Famous Five Files.

Their merits are known to workman and employer; and their reputation rests on half a century of leadership in their line.

Accurate grinding and cutting, scientific hardening, and rigid testing go into every one of the Famous Five Files.

They are:

KEARNEY & FOOT

"ACME" SHEARS AND SCISSORS ARE STANDARD

For Low-Priced Cutlery

Canadian Buyers Can Increase Their Shears and Scissors Sales by Adding Our Numbers to Their Stock.

We are the leading and largest Scissor makers in the world, producing about 35,000 pairs daily.

"ACME" BRANDS, famous for their strength and durability, and with their specially hardened cutting edges, are being maintained to the high standards of quality and finish we have established.

Realizing the importance of prompt service to orders, we are now in a position, on account of improved manufacturing facilities, to give all Canadian orders special service.

Our Canadian representative at Toronto will be pleased to show our samples to you, or have his traveller call on you.

We would esteem it a favor to demonstrate through a trial order the excellent goods we furnish and their fast selling ability.

Have you seen our new No. 5 Catalogue? Let us mail one to you.

FILES

"They Cut Faster and Wear Longer"

Manufactured from best clay crucible cast steel exclusively, and processed throughout by expert workmen, these brands have become the standard of the Dominion.

We believe in Canada's future, and we intend to maintain Ingersoll supremacy. To that end we have equipped a modern file factory at Ingersoll with 90,000 square feet of floor space devoted entirely to the production of CANADA'S FINEST FILES.

Ingersoll Files mean satisfied customers and build business for your store. You take no risk with them—they are sold on an absolute guarantee of "Make good" or "Money back." Made in Canada by Canadian capital, and Canadian labor, and sold wherever good hardware can be purchased.

The Most Popular Ratchet Combination

The "Keystone" Reversible Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities. It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed, preventing dust and grit from clogging up mechanism.

"KEYSTONE" Drilling Post or "OLD MAN"

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts—the time-saving brace.

"Keystone" tools are known the world over for high quality. Sell them for profit and prestige. Let us know if your jobber can't supply you.

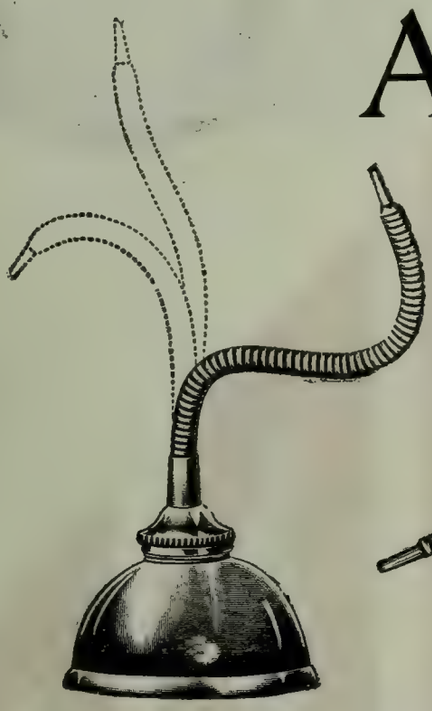
Galvanized Wire and Woven Wire Fencing.
Steel Tube Fence Posts, Farm Gates, etc.

WOODSTOCK ONTARIO

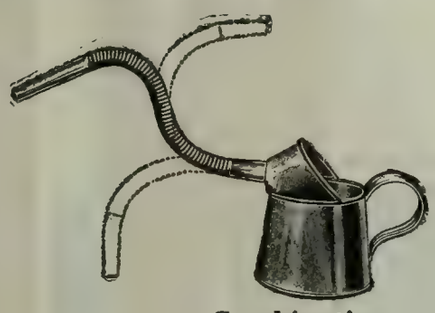
HAVE YOU FIGURED IT OUT IN THIS WAY?



A salesman running to and from a cash office or register fifty times in a day requires, in the average, say, fifteen seconds each way. Detention at office for change making, thirty seconds, or sixty seconds for change of each sale, making thus fifty minutes lost time for each salesman. Had you our Cash Carriers, this time, needlessly consumed, could be devoted to further the sale of goods, or to the performance of other duties highly necessary at busy periods when the services of your selling staff is most valuable.

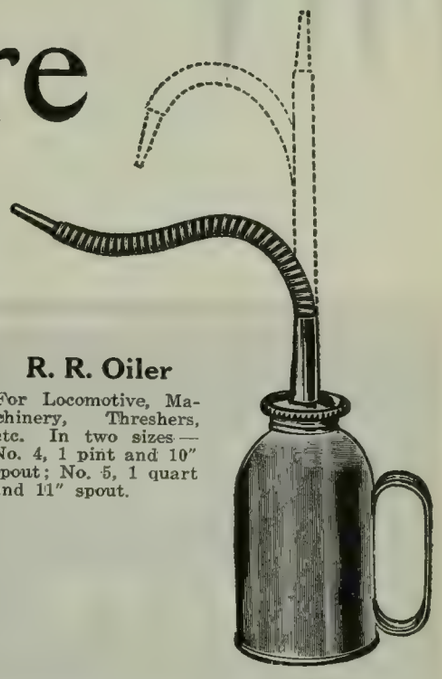
Do not forget to write for that circular which explains all.

GIPE-HAZARD STORE SERVICE CO., LTD.,
113 Sumach Street
Toronto, Ontario, Canada



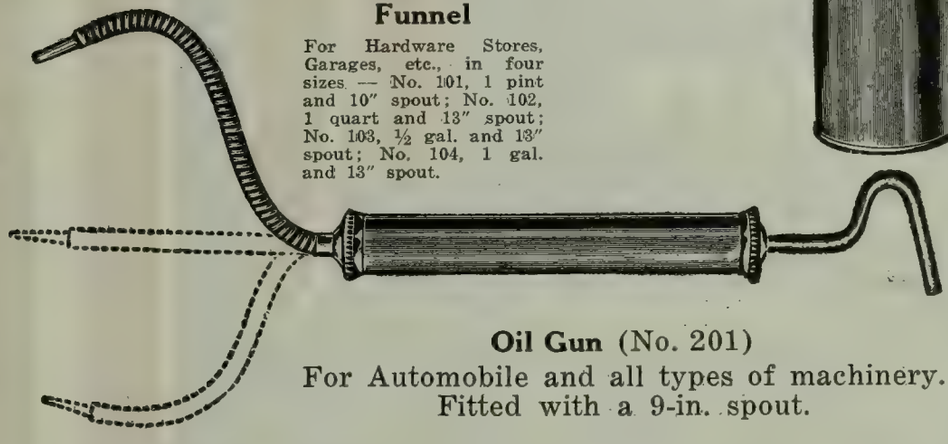
Subscription price of HARDWARE AND METAL is $3 per year or less than six cents per issue.

Reaches Anywhere



General Purpose Oiler

Made with steel spring bottom, in three sizes—No. 1, 1-3 pint; No. 2, ½ pint and No. 3, 1 pint. A 7" spout to each.



Combination Filler and Funnel

For Hardware Stores, Garages, etc., in four sizes — No. 101, 1 pint and 10" spout; No. 102, 1 quart and 13" spout; No. 103, ½ gal. and 13" spout; No. 104, 1 gal. and 13" spout.

R. R. Oiler

For Locomotive, Machinery, Threshers, etc. In two sizes — No. 4, 1 pint and 10" spout; No. 5, 1 quart and 11" spout.

Oil Gun (No. 201)
For Automobile and all types of machinery. Fitted with a 9-in. spout.

Why the All-Way Oiler Sells

The All-Way Oiler reaches anywhere by means of a flexible spout that may be bent to suit any place that must be reached. In using the ordinary oiler much oil is lost in attempting to reach awkwardly situated oil holes. The saving of oil from this feature reduces oil bills 50%. All-Way Oilers have a special cleaning device at the end of the spout which insures their being always ready for use.

Always a demand for All-Way Oilers. There is good profit in selling them.

If your jobber cannot supply you, write.

Your Customer Will Stay Satisfied if You Install a *"SOVEREIGN" BOILER*

It adds materially to one's reputation to have their work well spoken of. No disturbing circumstances arise after a "Sovereign" has been properly installed and in a majority of cases customers insist that the "Sovereign" is their choice because others have found it all that could be desired. See to it that you are well informed on the outstanding features that go to make the "Sovereign" so greatly in demand.

We have ready for your request many helpful booklets and printed matter that will prove profitable and certainly most informing.

PILOT
Superior Pipeless

A furnace with no network of pipes! Only one opening to be cut in the floor. Easy and inexpensive to install. It takes cold air from the house—not the cellar, thus keeping fresh, warm, moist air in circulation. Moist air means freedom from colds, cough and sore throats. It keeps the floors warm so that children can play on them safely. Leaves the cellar cool for storage.

The Pilot Superior Pipeless burns hard coal, soft coal, coke, wood or natural gas. The construction with inner and outer casings and asbestos linings means cold kept out and warmth kept in.

The "Delight" Electric Washer and Wringer turns Monday into "Funday"

This Beautiful Machine grows in popularity daily and the demand for it often taxes our rate of production. It has the great advantages of the high priced machines, yet can be sold at a price which makes it within the reach of nearly all customers and produces "Delight" profits for the dealer. It makes friends on sight and adds to the dealer's reputation for quality goods.

Put one on exhibition. Ask us about it.

EXCELSIOR

Wood Packing

Rankin Excelsior is carefully made under alert supervision. Always free from chips and foreign matter, it offers the most reliable packing available to-day for jobbers and manufacturers.

Excelsior is the ideal packing because of its resiliency and other qualities derived from the wood. It has more life and spring than other materials.

QUALITY SERVICE

THE DENNIS WIRE AND IRON WORKS CO. LIMITED.
LONDON.
CANADA.

Many a Hardwareman makes extra money

easily and quickly by taking good-sized orders for DENNIS products in his community!

PERHAPS it is the town hall or a school or factory which requires a fire escape—maybe a store or private residence, or hotel, or apartment house needs a marquise, some wire window guards, iron fence or railing—possibly a factory that needs wire machinery guards or a sky sign—sometimes a bank or office requires brass or bronze grillwork, counter railing, cages, wickets, etc., or a complete wired enclosure—or a church is in the market for brass furnishings, memorial tablets or railing—in every town there are dozens of orders to be picked up by live, wide-awake merchants. We assist with estimates, specifications and blueprints. You need carry no stock to engage in this profitable business, and it works in well with your regular line. Write us for folders and particulars to-day.

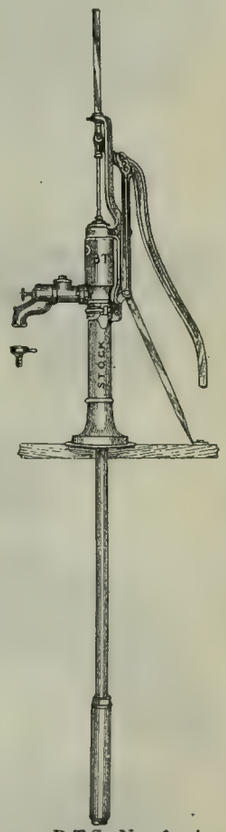
Faultless Caster Company

Evansville **Indiana**

Send For Catalog "G"

R.T.S. No. 3—A splendid pump for Domestic use. Iron Standard, Force or Lift, Hand or Power with 3½ x 12 Brass-lined Cylinder. Six and eight inch stroke.

R.T.S. No. 2—A light strong lift pump for hand use. Steel pipe standard, with 3½x10 Iron Cylinder. Seven inch stroke.



Good Pumps, Low Prices Prompt Shipment

You can make money selling BT Ready-To-Ship Pumps.

There are no better pumps on the market. All the cylinders have brass valve seats. All the handle pins are large, cross heads are malleable iron, not cast. The cast iron standards are all fitted with patented clip so that connection between spout head and suction pipe can easily be exposed. Every part is built solidly with large waterways. Wood handles are fitted into box-shaped socket which does not allow them to loosen. The prices are the lowest on the market for pumps of this quality. By cutting out unnecessary varieties and concentrating on our seven R.T.S. Pumps we have been able to cut labor and other factory costs. When your customer needs a pump, he needs it immediately. He can't go without water. As the name implies, BT Ready-To-Ship Pumps are in stock at all times, ready to go forward by first train. They come ready to go in the well.

R.T.S. No. 5—A large capacity stock pump. Will pump up to 2,000 gal. per hour. Force or lift. Hand or power. Has 5x12 Iron Cylinder. Six, eight and ten inch strokes.

R.T.S. No. 6—A splendid pump for two-way delivery. Patented cock spout. Choice of three cylinders. Heavy iron handle. Six, eight and ten inch stroke.

Easy to Sell

They are beautifully finished. Because they are always in stock the paint gets time to harden thoroughly.

You do not need to carry a large stock of dozens of different varieties. Our seven R.T.S. Pumps cover 90 per cent. of our large well pump trade. There are seven different pumps each supplied with the clyinders it needs to make it suit the work it has to do. By means of our seven R.T.S. Pumps you can meet the well pump demand of your territory—And, if you want a pump with every improvement at the lowest possible price, by the first possible train—

SEND FOR A BT "READY-TO-SHIP"

A copy of our 24-page, beautifully illustrated booklet "7 Pumps That Take the Place of 700" will cheerfully be sent you, if you will drop a card to our nearest branch.

B.S.A. GUNS

SELLING TO THE PUBLIC

We are now living in an age when shooting has become a universal pastime.

Almost every town can boast of its own rifle club or clubs. Thousands of members of these clubs possess their own rifles, but thousands more are purchasers in the immediate future.

The B. S. A. Co., Ltd., have specialized for the last 60 years in the production and manufacture of firearms. This long experience and enormous manufacturing facilities enable the Company to produce rifles and inexpensive shot guns of the highest quality and workmanship for every purpose for all kinds of small and large game shooting and for long and short range target practice.

A WONDERFUL NEW LINE
NEW B.S.A. TWELVE BORE SHOT GUN

B. S. A. Rifles and Shot Guns are in constant demand and will have an even greater sale with the co-operation of those dealers who are alive to the possibilities.

Interested and enterprising dealers should ask for B.S.A. catalogues and terms.

PEERLESS PERFECTION

A Road Side Fence That Beautifies The Country Side

Canada helped to win a great peace victory. It's up to us to make Canada a beautiful place to live. Our boy from over there must have it so.

Peerless-Perfection Fencing for All Purposes

There is scarcely a fence requirement that we cannot fill directly from our stock, no matter whether it be farm, poultry or ornamental fencing. We carry the largest stock of fencing and gates carried by any one company in the Dominion.

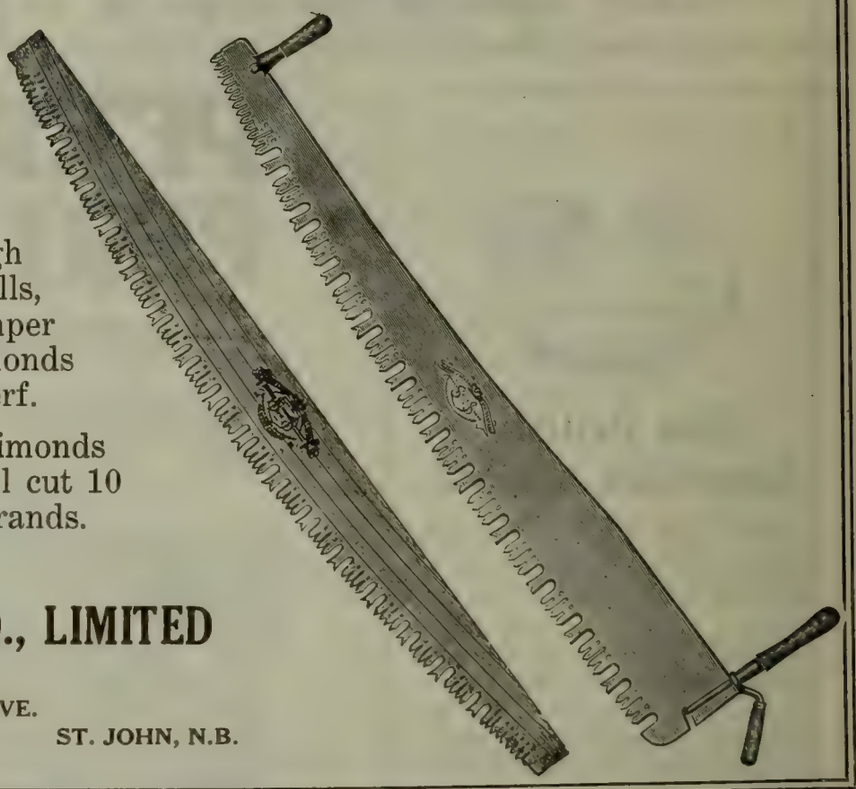
Every Rod Fully Guaranteed

PEERLESS Fencing is well known for its non-rusting qualities. Many of our customers have testified to this fact. Examine any piece of PEERLESS Fence in your neighborhood. Compare it with fences of any other make. You will find little or no rust on the PEERLESS. The longer you can protect a fence from rust just that much longer will it continue to stand up and do business. Send for our literature and learn about this high grade fence. Address either office and it will be promptly sent.

PEERLESS THE ALL AROUND FENCE

THE BANWELL-HOXIE WIRE FENCE CO., Ltd.

Winnipeg, Man. **Hamilton, Ont.**



The subscribers to HARDWARE AND METAL include the largest buyers of hardware in Canada. The circulation of our paper is national, and covers Canada from coast to coast.

SIMONDS SAWS

Simonds Crescent Ground Cross-Cut Saws are the fastest cutters known. Not only do they saw fast, but they also run easy and wear exceptionally well.

Supported by an exceptionally tough steel, manufactured in our own mills, they hold their cutting edge and temper longer than the ordinary saw. Simonds cross-cut saws do not bind in the kerf.

Most lumbermen know that a Simonds Crescent Ground Cross-Cut Saw will cut 10 per cent. more timber than other brands.

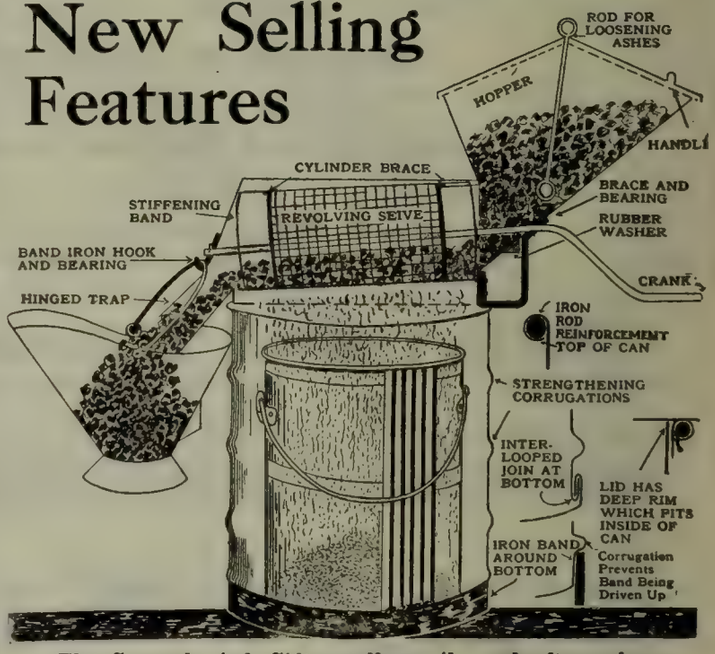
A TRADEMARK THAT SELLS THE GOODS



When you see "Canada" on an Ash Sifter or a Garbage Can it means—the best that money and experience can make.

It simplifies selling and makes it far easier when you can point to the trade-mark "Canada" on the goods. Ask your jobber.

J. SAMUELS

275 Queen St. W. - TORONTO

New Selling Features

The Samuels Ash Sifter sells easily and often when you point out these "pulling" features—fine screen saves more fine cinders; small can or pail can be placed inside the waste can to catch all screenings, which can then be more easily removed. It means longer life for the Samuels Sifter—protection from the ashman's abuse. Satisfaction, sales and profits. Ask your jobber.

J. SAMUELS 275 Queen Street West **Toronto**

Works While You Are Busy

This "King Cutter" card display stand on your counter brings in the sales while you are busy with other customers. They come; they see; they buy—you have only to ring up the sales. You ring them up pretty often. "King Cutter" Razor Paste puts all the razors in town in tip-top shape. Ask your jobber.

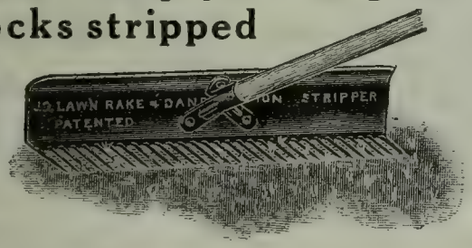
"Once Upon a Time"

An automobile broke down in front of a Hardware Store. While the lightning flashed and the water gurgled along the curb, the owner slogged around in his wet boots and found he had no tools with him. The Hardware Man sold him a wrench, in a few minutes a screw driver and another style of wrench. And then, gently and tactfully—for the car-owner was miserable—he pointed a moral about preparedness; and he sold that auto driver about fifty dollars' worth of tools. HE HAD THE RIGHT TOOLS.

Are you prepared? Have you got a line, like Bemis & Call, that you could stand and watch him use with confidence that he would buy more?



WRITE FOR PRICES

Dandelions simply can't grow with stocks stripped

There's no more of that back-breaking dandelion digging when the

J. D. Lawn Rake and Dandelion Stripper

is used regularly. It, besides stripping the dandelions cleans all dead grass, sticks, stones, etc. away from the roots of the grass thus ensuring healthy growth. Now is the time to push the J.D. **Write for particulars.**

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

VERY EASY TO PUT ON

Your customers will like CHASE BELT COUPLERS—they're so easy to put on—a hammer and pincers are the only tools needed.
And once on they stay and hold and enable the belt to run smoothly and easily—none of the belt material is removed in riveting.
You'll like the way they sell and the profit.

Write for Booklet. It gives full particulars.

The Little Things---That Make the Car Complete

Stanwood Products

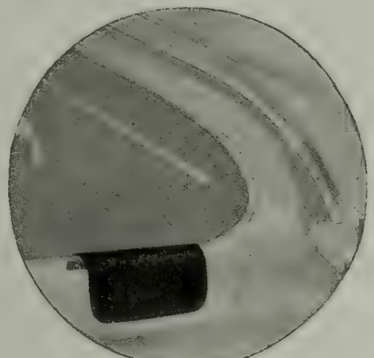
Stanwood Safety Step Plates

Stanwood Safety Step Plate

For automobile running boards assure safety. They add to car refinement and keep the car clean. This device will not mat down or discolor and is very quickly applied. Pat. May 30, 1916, Feb. 19, 1918.

Type B, $3.75 List Type C, $2.25 List Special Ford, $2.25 List

Stanwood Conformable Hand Pan for Automobile Doors



An exceedingly ductile metallic sheet is enclosed between the front and back leather sections of the pad, insuring through pressure of the hand, perfect comformity of the pad to the contour of the door.

Positively will not curl by usage, or strong air pressure. Prevents finger marking af the door, especially after car has been polished.

Made up of leather in various grains, such as long, seal, pebbled, smooth, pigskin and patent. Priced from $1.35 to $2.70 List. Size 4¼ x7 ¼ in.

Accelerator Foot Rest

Hand Pad for Doors
Patented 3-19-18

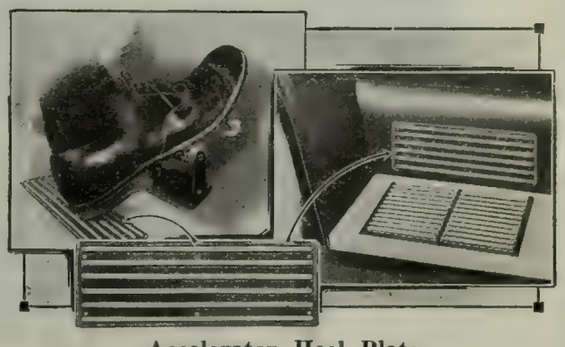
Stanwood Adjustable Accelerator Foot Rest

Patents Pending

A reliable safety device to prevent *unintentional* rapid acceleration when driving over uneven crossings or rough roads. Relieves the foot from constant tension. Permits delicate advancement or retarding of accelerator.

Made with an indented rubber roller vulcanized to a steel tube, revolving on a steel spindle riveted to the uprights. The pressed steel uprights and base sections are engaged by graduated indentations, insuring stability. These parts are sherardized and polished to prevent rusting.

Important Note—The graduated indentations make our Foot Rest easily adjustable to various heights and positions. This feature makes it fit your usual driving position.



Price $2.25 List

Stanwood Accelerator Heel Plate

A perforated metal plate entirely covered with rubber and provided with a series of longitudinal ribs firmly moulded to the metal plate. Size of plate 4 in. wide, 11½ in. long.

The accelerator Plate furnishes a stable position for the heel when operating the pedal. Prevents wearing a hole in the floor covering of the car and is also used as a toe and heel guard on the running board shield as shown.

$1.20 List

Accelerator Heel Plate
Patented May 30, 1916 and Feb. 19, 1918

Stanwood Equipment Company, 307 Plymouth Ct., Chicago

"Best Because It's Liquidless"

"Never Wears or Needs Repairs"

Jobson Liquidless Door Check

Guaranteed for Five Years

The Reasons Why it Has Great Sales

Jobson Liquidless Door Check cannot freeze—contains no oil or other liquid; closes doors with quiet, smooth action in varying temperatures without adjustment; the resistance is low—opened easily by a child; there is no operating cost; easily adjusted for speed, and heavy draughts; once set, it requires no attention; compact and light, it is also neat in appearance.

The Jobson never corrodes or sticks. It is guaranteed in writing for five years against defects in material or workmanship.

Selling Features in its Construction

The alignment bearing is extra long and well supported; pistons are machined and fitted to cylinders, preventing air leakage; the expanding friction brake is on the automobile internal expanding brake principle; thermoid brake lining is of toughest Canadian asbestos and wire; clock spring type of spring—tempered steel; dry lubricant is used for all parts—no oiling required. Every check is actually tested on a door before leaving the factory. Sell a little higher, but yield more profit and satisfaction. Manufactured by

The Liquidless Door Check Company

564 W. Randolph Street

CHICAGO

Cleola

A Grand Opera Model, equipped with KRASCO motor

Piano finished mahogany, 50 inches high by 23 inches square, Cleola is attractive in appearance and effective in results.

From the violin wood tone chamber to the wonderful Krasco motor the up-to-the-minute features reflect design with supremacy for its object. Cleola plays all records, and by the touch of a key a Tone Modifier amplifies or modifies the volume of sound.

You'll be proud to sell Cleola and pleased with the profit. Cleola is guaranteed.

40 MUNICIPALITIES BUILDING HOUSES

400 Dwellings Are Now in Course of Erection in Ontario.

The number of municipalities in the Province now operating under the Ontario Housing Act has grown to 74, and includes 17 cities, 35 towns, 14 villages and 10 townships. About 40 municipalities are actually building houses. Over 1,200 plans have been approved by the director, Mr. J. A. Ellis, and over 400 houses are in the course of construction.

The village of New Toronto has let contracts for over 50 houses. They are building a six-roomed solid brick house for $3,000. It is probable that Windsor will erect the largest number of houses this year of any municipality in the Province.

Travelling inspectors were appointed recently, and they are visiting the various municipalities which are erecting houses. Seven of the nine inspectors are returned soldiers.

Reprint from Toronto Daily

— building's on

During the first few weeks of the year there was much talk of the proposed housing scheme, but action was lacking, owing to many reasons chief among which was the uncertainty of the price of building materials.

To-day, building's on with a rush, not only by the various municipalities but by contractors and private owners — no more waiting for the drop in hardware, lumber, glass, etc., for they realize that houses must be built at any cost.

With buildings going up rapidly, glass will be needed in large quantities and needed quickly.—Are you prepared to meet this demand with a fully assorted stock of sizes in

To cut down the cost per cut

A Matter of Teeth

The efficiency of a hack saw blade depends almost entirely upon the rake, the "set," and the pitch or number of teeth to the inch.

There's no overhanging "hook" to the teeth on a Starrett blade. With proper adjustment of weight or pressure, they'll cut just as fast on the last cut as on the first. The teeth are uniform in shape, "set" and spacing. That's why every blade in a box of Starrett saws cuts alike.

Starrett Hack Saws are made in varying pitches or number of teeth to the inch, from 10 to 32, according to the work they are intended for.

Different kinds and shapes of metal need different blades for economical cutting. Get Starrett blades, use them according to the Starrett Hack Saw Chart and watch your cost per cut decrease. Write for Catalog No. 21 "MA"; it's free.

Williams' Superior Drop-Forged Wrenches

WHEREVER wrenches are used, particularly in exacting production requiring hard and continuous service, Williams' Wrenches are preferred.

Through constant and systematic effort, during nearly half a century, to produce only the best, Williams' Drop-Forged Wrenches have been so developed that today their superiority is generally conceded. There's a strong, dependable Williams' Wrench, standard in design and size, for every recognized trade need. Every one of the 40 patterns in about 1000 sizes, with openings from 3/16 to 7⅝", carries the Williams' guarantee of service.

Specify "Williams' Wrenches" and get superior quality. Ask for a copy of our Wrench Booklet.

Trusty Foundation Stones

Just as the master builder selects only the strongest stones for the masonry of his foundation walls, so you should select the tires that will build your tire business on the sound foundation of "satisfaction." You can't hope to build a lasting business on a quicksand of disappointed customers. Quality, Strength and Endurance in a tire are essential, and only with tires that possess these qualities can you build a permanent tire business.

MALTESE CROSS TIRES

are mechanically perfect and will exceed the demands of even your hard-to-please customer. Remember all customers are boosters for you when satisfied. Decide to-day to feature in your store, "The Tires That Give Satisfaction"—Maltese Cross Tires.

First Choice

With Garage Owners

The 805 and 806 Garage Door Sets are opened and closed with ease. One door opens independently, permitting ready entrance at all times without opening the whole set of doors. This pleasing door set saves space and time in opening. It slides and folds along the wall out of the way.

Set No. 805 includes — No. 29 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4x4 inch jap. No. 505 T.P. Butts; 1 only No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. No. 806 is the same except that the Latch is No. 27. All bolts and screws packed in the "Unusual National Way," japan finished. Catalogue and prices for a postcard.

And a Bright Future for Sales

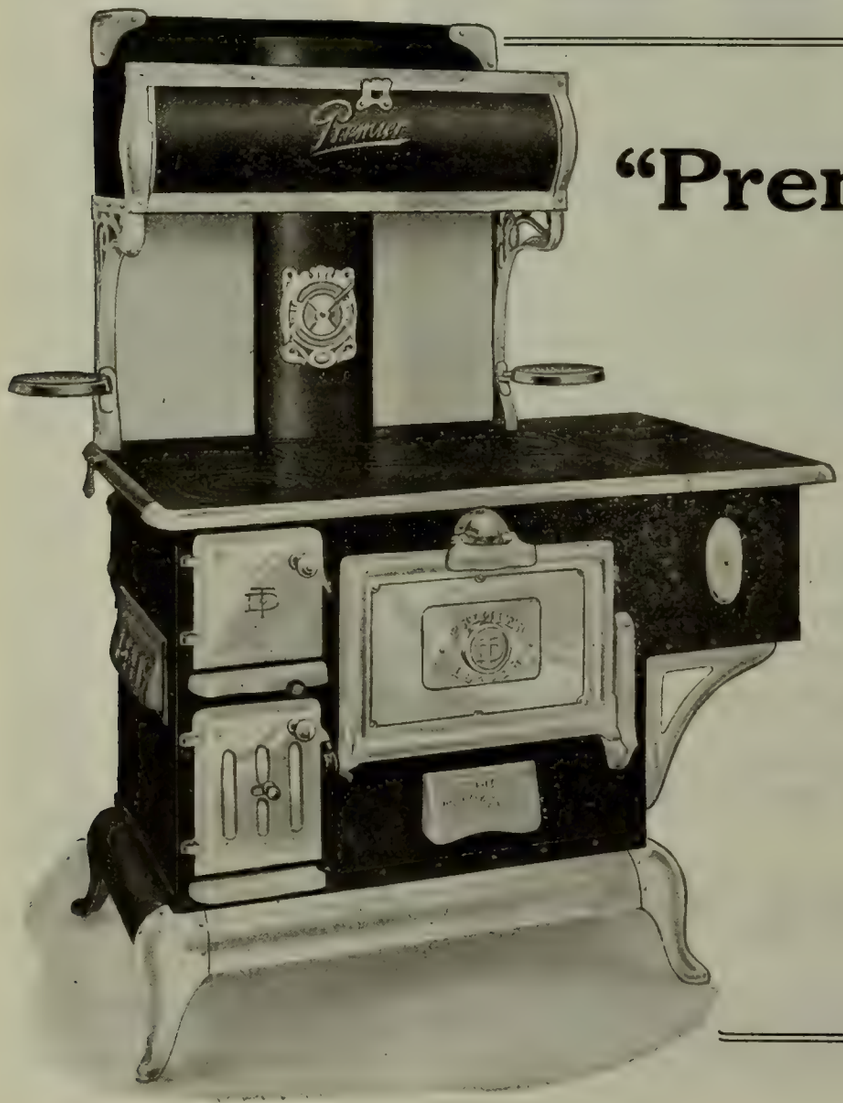
The well known fact that most automobile factories are unable to produce cars fast enough to supply the demand is a promising indication of the field for future business.

The host of purchasers are chiefly owners of garages; this handsome door set wins them on sight.

National Mfg. Co., Sterling, Ill.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.



The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

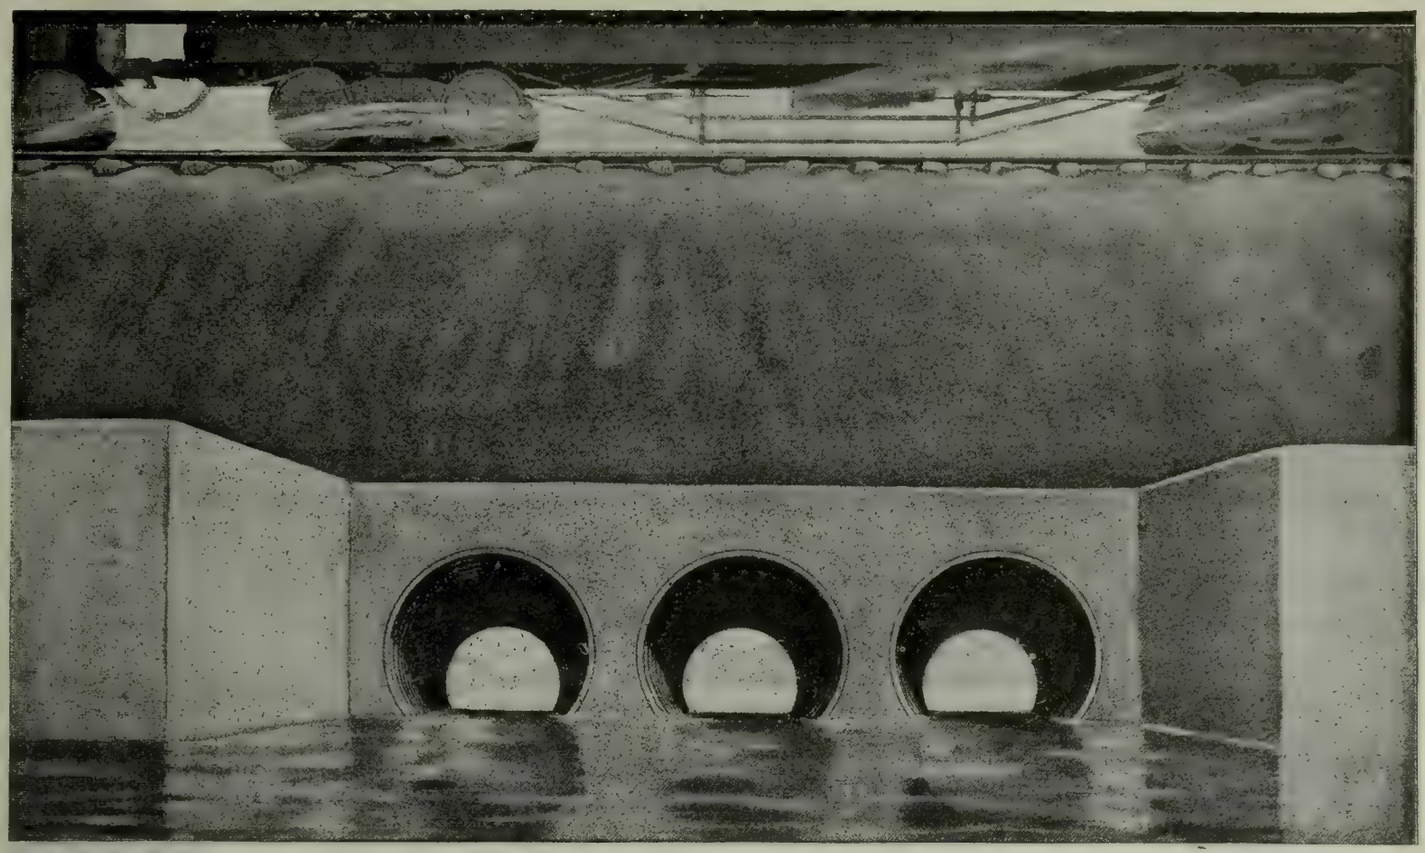
The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

Canada Steel Goods Company, Limited
HAMILTON, ONTARIO

Why the

"Premier" Ranges



Sell

Its appearance, its conformity and its value appeal to the buyer.
The nickeling is just sufficient to give it a bright, attractive appearance.
The conformation is attractive.
The value is there on account of the material used, and the skilled workmanship put on it.

The oven, fireplace, warming closet and reservoirs (either right or left), receive expert attention, and everything is RIGHT. It is a repeater. Try them.

Permanent Culvert Construction For Railroads or Highways

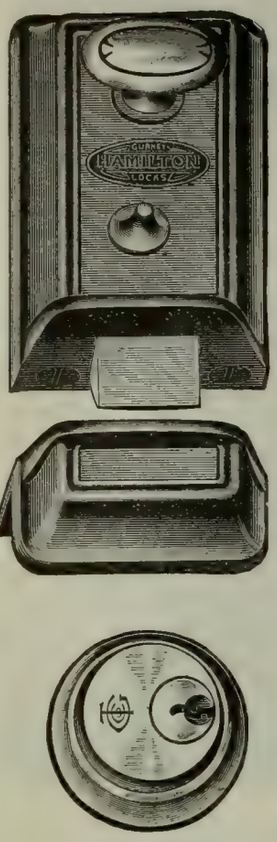
The three culverts shown above replaced a wooden trestle on a Canadian railway.

They form a permanent, effective construction. The same culverts are proving their worth under practically all Canadian railways.

PEDLAR'S "PERFECT" TONCAN METAL CULVERTS

These culverts are sufficiently strong for any load: The corrugations grip the ground, the culvert cannot be injured by freezing, thawing, jars or vibration and—

Since these culverts are of Toncan Metal, they will last indefinitely—because Toncan Metal resists rust.



Why not install these long-lived, trouble-free, economical Toncan Metal Culverts to replace failing culverts, trestles and bridges?

Write us today for "Culvert Folder 32

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

The Opinion of the Dealers

Ottawa, May 3rd, 1919.

The Beach Foundry Co., Limited,
Ottawa, Can.

Gentlemen,—I have been selling your Composite since last September and have sold over 50 during that time. My customers are well pleased and speak very highly of them being first-class bakers and cookers, also great heaters, taking so little room; also where the water section is attached it gives any amount of hot water.

Now I might say that I am delighted with it as a seller and expect to sell at least 150 of them and perhaps more during this season. My customers recommend them, and I notice the Composite is getting more talked of every day, which does a great deal in helping to sell them. Wish you every success.

I remain, yours truly,
JOHN LIVINGSTON.

Tweed, Ont., May 1st, 1919.

The Beach Foundry Co., Limited,
Ottawa, Can.

Gentlemen,—We take pleasure in expressing our satisfaction in handling your Composite stove. This stove is something entirely new and in our opinion fills a long felt want in combining a Heater and Cookstove.

We sold a number of these stoves last fall and each of our customers expressed their satisfaction.

We are looking forward to a much larger sale of these stoves the coming autumn.

Yours respectfully,
TWEED HARDWARE CO.,
F. S. Roth.

The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I am enclosing you cheque in payment for the Composite Stove.

Your salesman told me to try the Composite before settling. When I did not sell it at once, I had it taken into my own house and it has given the very best of satisfaction.

I would not sell it for twice the amount if I could not get another, as my wife uses it altogether. She has discarded our big range.

Yours truly,
L. BEATTY, Dealer.

The Opinion of the Users

Walkerton, Ont., Jan. 31, 1919.

The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I must say since using the Maple Leaf Composite I would not trade it for the range I have in which costs us $100.00.

I can get oven hot and cakes or buns baked in fifteen minutes from closing oven.

I am pleased with my Composite, and another thing, it burns less coal than the range.

Yours respectfully,
MRS. C. SMITH.

Brackley, Queen's Co., P.E.I.,
The Beach Foundry Co., Limited, Feb. 17th, 1919.
Ottawa, Can.

Dear Sirs,—I must say that the Composite stove is the best thing I ever struck in that line of goods. Besides being a perfect baker it is the best heater I ever saw.

I think I can save the price in coal in one winter, and have twice the comfort I had with the old style range.

Yours truly,
JERRY JACKSON.

Prescott, Ont., R.R. No. 3,
The Beach Foundry Co., Limited, Feb. 20th, 1919.
Ottawa, Can.

Dear Sirs,—We have enjoyed the Composite more so far than any heater or range we have ever owned. We have had no trouble whatever with it.

It is a perfect baker in every way. Every visitor admires it. It uses less coal and takes such small floor space.

Yours truly,
MRS. JAS. MORROW.

Hagersville, Ont., Feb. 5, 1919.

The Beach Foundry Co., Limited,
Ottawa, Can.

Dear Sirs,—I am very pleased with the Composite. It is a very economical stove. As a good heater it is about the best I ever had, and it does the heating on very little coal.

As to baking, why nothing can surpass it.

Yours truly,
W. J. ALWARD.

Watches and Clocks

MEHASCO

We have built up a large trade in this line owing to the fact that in these particular goods the merchant appreciates service. The popular priced watch that sells for $1.75 carries the following guarantee. They are guaranteed to be running right and keeping good time when you sell them to the customer. If they cannot be adjusted or fail to give satisfaction, in say one week's time, the customer can return the watch and have it replaced, and we in return replace it free of charge to the dealer. But the customer cannot use his watch until it is worn shabby and then have it replaced. We will have it repaired for him if he wishes at a slight charge. On clocks the guarantee is two years, and if they do not keep good time for that period we will have them repaired free of charge provided they are not abused.

Enamelware Sales Are Always Popular

Housewives Are Always Interested in These Lines and Many Dealers Are Finding Enamelware One of Their "Best Sellers"—Good Store and Window Display Backed by Timely Advertising Keeps Stock Turning Over

ENAMELWARE is regarded by many hardware men as among their "best sellers" and from statements made by various dealers they are not only handling more goods, but find little difficulty in turning their stock from three to five times each year. Properly displayed in the store and properly advertised enamelware is proving itself not only an all-year-round seller but an easy seller, the dealers state.

"A good specialty like enamelware is worth pushing," said one hardware man to HARDWARE AND METAL, "and we find that by showing a little enterprise we can create a constant demand. I would say that our sales have doubled in three years and we figure on turning our stock four times."

Uses Display Tables

This merchant, whose store is in a small but hustling Ontario city, attributes his success to display tables, window displays and regular advertising. He keeps displays of enamelware out on tables all the time. No matter who enters his store, they know he has a good stock of enamelware for them to make a selection from. He states that very frequently people who come in for some entirely different line, walk over to the display tables and pick out one or more articles and bring them over and say, "I will take this, too; just wrap it up with the other things."

"When they see the goods they remember that they are in need of it and buy it right there," he said. "This has happened so often that it has proved to us the value of keeping the goods out where customers can see them. Sales of this kind, especially on busy days, such as Saturdays, almost always are with us, save a lot of time and sales effort."

Women Like Them

Another dealer whose store is located in a country town stated that nothing in his store aroused more interest, month in and month out, the year round with farmers' wives, than his display tables of enamelware. It is a common thing, he stated, for him to fill the tables with various lines and before night have them almost cleared, especially on market days.

"I think I am safe in saying," he said, "that every woman in certain sections of the township buys all her enamelware here. I have found it good business to put on special sales occasionally. They watch for sales and I turn over a lot of goods. I have not found that it affects the regular business, as our turnover is increasing each year. We always get prompt results from our advertising and among the most satisfactory returns we have are those from our sales of enamelware. We frequently put in a window display of these goods and invariably get excellent results. The goods are no

Here is a fall display of house-wares featuring enamel preserving kettles and other lines that has a real sales "pull." Note the prominent prices and the neat but effective arrangement of the stock. Some dealers adopt the plan of marking each individual piece as well as using the price cards.

sooner in the window than people start asking for the things."

Sends Out Circulars

Another hardware man who because of his location does most of his advertising by circulars, regularly features enamelware, making a special appeal to the women of his district.

An announcement like the following will bring them to his store in scores:

EXCEPTIONAL OPPORTUNITY!

Good News for Mrs. Housekeeper

We are offering at special prices, which will mean a real saving of money for you on Saturday only,

1,000 PIECES

QUALITY ENAMELWARE

Here is your chance to complete your supply of cooking and other utensils at prices which are very attractive. Come early and get your pick of these quality goods.

Below he usually gives a list of many of the lines offered, with the prices shown in large type.

Puts in a Window

This dealer also puts in a window display two or three days before the special and uses display cards to draw attention to the "special" and to the prices. Cards bearing such inscriptions as "Thrifty Housekeepers Will Not Let a Chance Like This Pass," "All First-class Stock—No Seconds," "Save Money by Buying on Saturday," and so on, help stir up interest and get the people in the neighborhood talking about the goods.

This dealer has in the centre of his store a good sized, double-decker display stand, which all the year round is kept filled with enamelware. He states that it has helped him sell a lot of goods and has been productive of excellent results at all times.

Go Well Together

This dealer does a big trade with workingmen, his store being located in a factory section and somewhat away from other stores. He has found that enamelware and cheap dishes make an excellent combination and one for which there is a steady call. He aims by frequent specials and by the use of circulars to constantly keep before the people of his territory that they can not only get all their hardware needs, but enamelware and dishes at his store. He says that the plan is working out splendidly and that many women buy all their supplies from him and frequently tell other women friends who live in distant parts of the city about the values that are to be obtained at the "special sales."

Looks Well in Store

Unquestionably a number of display tables of enamelware, nicely arranged about a store, or a section with enamelware showing in neat rows on the shelves, has a distinct sales "pull" and therefore a real value in dollars and cents. Given a little stimulation by such effective methods as advertising and window displays a stock of this kind will pay well and will sell easily.

It is always a good idea to keep in mind that enamelware makes desirable and very useful wedding presents, and that much of it is also sold at Christmas time for gifts. Many dealers plan special drives in these goods during June and December in addition to their regular displays and "specials" and make out lists of goods, containing special combinations, which are offered. In this way they often dispose of a number of pieces of houseware suitable for the bride who is just getting started housekeeping or for the housewife whose kitchen needs replenishing.

This enamelware display right up at the front in the retail hardware store of the Dunlop Co., Ltd., at Pembroke, Ont., has resulted in their sales of enamelware and tinware being largely increased. The stock is kept in spotless condition, and makes a most attractive showing. Frequent window displays are used.

Linseed Oil and Substitutes

Investigation by Department of Trade and Commerce Will Furnish Material for Standardization of Oil if This Becomes Necessary

"LINSEED Oil and Substitutes," is the title of a bulletin issued by the Food and Drug Laboratory of the Department of Trade and Commerce based on reports of F. C. Collier, public analyst. The bulletin points out that the recorded determinations will furnish material for the standardization of linseed oil, should such a step become necessary.

The department inspectors procured 144 samples purchased under the designation of raw linseed oil, boiled linseed oil, linseed oil and paint oil compound or substitute.

Considerable Variation

The bulletin points out that oils from different sources show considerable variation in quality, the oils produced on the shores of the Baltic being most highly prized. Linseed oil is often contaminated with the oil from foreign seeds which are accidentally gathered in harvesting the crop.

Linseed oil is principally composed of the glycerides of unsaturated fatty acids such as isolinolenic acid, linolenic acid, linolic acid and oleic acid.

Its Chief Value

The value of linseed oil as a vehicle for paint pigments is chiefly dependent upon its property of "drying." This somewhat misleading term is used to describe the change which takes place on exposure to the atmosphere whereby the previously liquid oil is converted into a tough transparent solid. It has been shown that the "drying" of linseed oil is principally due to its power of absorbing about 18 per cent. of its weight of oxygen with the formation of the complex solid called "linoxyn." Though the process is mainly one of oxidation, the liberation of small quantities of formaldehyde, carbon dioxide, and formic acid, during the drying indicates that a number of subsidiary reactions are taking place. The nature of these complicated chemical changes has not yet been explained, but it is probable that when they are fully understood they may elucidate some of the problems that confront the user of this oil.

Peculiar Properties

Another property possessed by linseed oil is that of combining with certain pigments with the production of an insoluble soap. It is claimed by some authorities that basic lead carbonate owes some of its value as a paint material to the intimate mechanical union between pigment and vehicle promoted by the formation of this soap. No such compound is formed when inert fillers such as asbestine or china clay are substituted for white lead.

A large proportion of the raw linseed oil manufactured is used in the preparation of the "boiled oil" of commerce. It was found that if linseed oil was heated at a temperature of from 300° to 500° F. the rapidity with which it afterwards solidified was greatly accelerated. If small quantities of certain salts of lead or manganese were incorporated a similar result was attained.

Solidifies Rapidly

A film of oil thus treated will solidify in from 7 to 12 hours, while the raw oil requires 48 to 72 hours for "setting." The boiling of the oil also sets free the "mucilage" which is removed in the process. For this reason a boiled oil which deposits an excessive amount of "foots" on standing is looked upon with suspicion. The foots tend to make a paint "tacky," slow drying, and less durable. Each manufacturer has his own method of preparing boiled oil, the details of which are carefully guarded. The following are the chief varieties of boiled oil on the market:

Kettle Boiled Oil

Formerly this was the only class of boiled oil in use. It is prepared by heating the oil to about 500° F. and stirring in at the same time oxides of lead or manganese or other driers. The boiling has to be very carefully conducted to avoid overheating the oil and damaging its quality. Though slightly darker than oil prepared at a lower temperature, it is of the highest quality, and commands a slightly higher price than ordinary boiled oil.

Ordinary Boiled Oil

This oil is prepared by heating it in steam jacketed tanks with the addition of the requisite driers. On account of the lower temperature used in its preparation, it is lighter in color than kettle-boiled oil. A very large percentage of the boiled oil of commerce is made by this process.

Another class of "boiled oil" is perpared by simply adding a drier dissolved in a solvent such as benzine to a raw oil without heating. It is contended by those who make it that their product is just as good as kettle boiled oil. Most users of linseed oil regard this "bunghold oil," as it is styled, as either fraudulent or decidedly inferior in quality to oil prepared by heating.

Accelerate Drying

The driers used in the preparation of boiled oil are usually salts of lead or manganese. The exact manner in which they accelerate the oxidation of the oil is not fully known, but it is believed that they act as catalysers, that is, they assist the oil to take up oxygen without themselves undergoing permanent alteration. It is assumed that when suspended in oil or paint they unite with atmospheric oxygen to form unstable highly oxygenated bodies which hand over their excess oxygen to the oil and are themselves reduced to their original condition. This cycle is then repeated indefinitely until the oil reaches its final state of oxidation. The following are some of the well-known driers: Litharge, red lead, lead linoleate, lead resinate, manganese borate, manganese dioxide, manganese linoleate and manganese resinate.

May Be Modified

Each of these driers possesses its particular properties, so that an intelligent selection of them will enable a manufacturer to modify the drying qualities of his oil. "Soluble" driers are salts or organic acids which are soluble in linseed oil or turpentine. Solutions in either or both of those solvents are known as "liquid" driers or "terebines."

Adulterants and Substitutes

The high price commanded by the best quality of linseed has resulted in an extensive search being made for a cheaper oil to take its place. So far this investigation has been abortive, though it has ben found that certain cheaper oils may be employed where wearing qualities or finish are of little importance. The oils most commonly used as adulterants of linseed are the following:

Rosin oil. Mineral oils such as benzine, kerosene, or lubricating oil. Fish oils. China wood oil. Soya bean oil. Corn oil, and hemp or rape oil.

The cheapest and most common adulterants are the mineral oils. These are usually lighter in weight than linseed and therefore reduce the specific gravity of the mixture. Rosin oil is frequently added to compensate for this reduction.

Fish oils are frequently used in the preparation of smokestack paints, but as they give off disagreeable odours and cause darkening, they cannot be used for interior work.

Little Permanence

The most objectionable linseed oil substitutes are those consisting of solutions of rosin in hydrocarbon oils with which are mixed tar oil and rosin oil. Such vehicles possess little permanence. Other substitutes are obtained by dissolving metallic resinates in tar oil or petroleum.

Rosin oil is commonly employed as a substitute, but it remains sticky and dries very slowly and if used in a paint will damage even a subsequent coat.

China wood oil has recently become prominent as a linseed oil substitute. The crude oil dries very rapidly forming

an opaque wax-like film without elasticity. When heated to 350° F. the oil polymerizes to an insoluble jelly which cannot be softened. With suitable treatment the oil can be used to a certain extent in varnish making.

Delays Hardening

Corn oil is sometimes used as an adulterant of linseed oil, but as it is a semi-drying oil, its use to any considerable extent would delay hardening of the oil film considerably.

Soya bean oil is a semi-drying oil which is regarded by some manufacturers as a partial substitute for linseed oil, though it does not possess the power of drying rapidly, which makes linseed oil such a valuable paint vehicle.

A consideration of the facts cited above will indicate that there is at present no oil on the market at a reasonable price which could replace linseed oil entirely with complete satisfaction to the user. For general purposes the addition of any of the substitutes named above to linseed oil will only serve to diminish its value.

Standards For Oil

Standards for linseed oil are not laid down in the Adulteration Act of Canada. The fourth schedule of the Act requires, however, that white lead in oil shall be made with pure linseed oil.

If linseed oil were sold as a drug the standards for this article as promulgated in the B. P. 1898 would be legal.

A search of the literature on the subject reveals the fact that the constants for linseed oil given by different authors vary somewhat. This is hardly surprising when the varying conditions under which the oil is produced are taken into account.

The following specifications were adopted by the American Society for Testing Materials for Linseed Oil from North American Seed:

Raw Linseed Oil (1914)

	Maximum.	Minimum
Specific Gravity at 15°C	0.936	0.932
Specific Gravity at 25°C	0.931	0.927
Acid Number	6.00	
Saponification Number	195.0	189.0
Unsaponifiable Matter	1.50	
Refractive Index at 25°C.....	1.4805	1.4790
Iodine Number (Hanus)		.178

Boiled Linseed Oil

	Maximum.	Minimum
Specific Gravity at 15°C.....	0.945	0.937
Acid Number	.8	
Saponification Number	195.	189.
Unsaponifiable Matter, p.c.....	1.50	
Refractive Index at 25°C.....	1.484	1.479
Iodine Number (Hanus)		.178
Ash, per cent.	0.7	0.2
Manganese, per cent.		0.003
Calcium, per cent.	0.3	
Lead, per cent.		0.1

How Hardware Dealers Are Going After the Good Trade to be Had in Handling Electrical Irons

A VERY large percentage of the electric irons sold in Canada are being handled through the hardware stores. Dealers are unanimously of the opinion that the best way to boost sales is by advertising and window displays. In spite of the fact that electricity is now available in hundreds of cities, towns and villages, there are any number of homes in which there are, for one reason and another, no electric irons. It is hard to understand just why this is the case, because any woman who has ever used an electric iron becomes instantly and permanently a booster for it. There are few inventions in recent years which are more thoroughly appreciated by the housewife than a good electric iron. Thousands of women have found them convenient to operate, all that can be desired in efficiency and extremely economical. Added to this they are handsome in appearance. All these are big talking points for a salesman and also for use in preparing advertising copy. Many dealers find that referring a prospective buyer to half a dozen women whom she knows, and getting her to ask them about theif irons, is an effective way of convincing her and making her a customer. Other dealers, when they get what they regard as a real prospect, ask to be allowed to send an iron to her home for trial for a couple of weeks.

"My experience is that the irons never come back," said one dealer to HARDWARE AND METAL. "After being used once or twice the irons sell themselves and the women, when they see how much time and trouble they can save, to say nothing of wood or coal, which they had to use by the old methods, would not part with them. This question of the cost of operation is really an important matter with many women. We usually direct special attention to it in our sales talk and show them how economical electric irons are. It is surprising the number of women who have the idea, until they find out different, that not only electric irons, but other electrical equipment, is expensive to operate.

"Another point about which we often find there is ignorance is the heating ability of the iron. A great many women get the idea that electric irons are slow to heat, and even when they find how quickly an iron gets hot there seems to be some question as to whether it will hold its heat while in operation. The best way we find of dispelling all these notions is to let the woman take the iron home and test it out for herself. We tell her that if it is not absolutely all that we say it is, to send it back. We find that standing behind our goods in this way is often the deciding factor. Few women who are really interested in an electric iron can ask for a fairer test than for us to let them take the iron to their own homes and use it and then send it back if it does not make good. Of course, it is good business for us, because the irons never come back and we can always refer some other woman who is doubtful to women who are using our irons, and they are really boosters for them."

One thing we have found helps a whole lot in selling electrical goods of any kind and the same thing applies to any merchandise and that is to know about the goods we are offering. The dealer who cannot explain the various essential points about this or that line is not in a position to make the most of them. His sales talk cannot carry the conviction that it would if he knew exactly what the goods will do, what they cost to operate, and so on."

Probably in no line of goods on the market to-day are more attractive sales helps given than are furnished by many of the manufacturers of electrical goods. Many dealers make most effective use of these in connection with their window displays. Displays of this kind backed by advertising featuring the many good points of electrical irons, will produce results.

BIG DEMAND FOR HOUSEHOLD GOODS

The settlement of the coal strikes in England was particularly welcome from the standpoint of firms manufacturing hardware goods. Discussing the situation the Hardware Trade Journal says:

"The coal crisis caused a good deal of anxiety in the Birmingham area, and already increased stringency in fuel supplies has made its influence felt. Consignments have not for some months past been adequate, and the development of reconstruction plant has been hindered. The unfortunate thing is that plant should be idle while there is a hungry market. Some of the enamelled hollow-ware firms have severely felt the pinch, and at one establishment only one furnace is going out of five. The demand for aluminum is exceptionally keen, but it is pointed out that these wares, while affording relief to ironmongers, cannot replace many vessels required for use on the open fire. Under normal conditions there is a promise of an exceptional boom in British hardware production, and it is therefore greatly to be regretted that labor and fuel difficulties should come at a time when by reason of the keen demand it is necessary to import largely from the United States. 'A very severe blow has been struck at our overseas trade,' emphasized a Birmingham manufacturer. 'One may hope that Labor may see its mistake before it is too late.'"

The Glidden Company, Cleveland, Ohio, have begun the erection of a four-storey grinding building to cost $50,000. The company will also erect in the very near future a two-storey building to be used for the treating of Oriental oils.

Good Show Cards Bring Business

Show Card Writing an Important Branch of Advertising — Practical Discussion of Many Important Features

By ROBERT T. D. EDWARDS

MANY times the writer has been asked by prospective card-writers how long it would take to learn the business. If that question were answered correctly you might say anywhere from one to ten years or longer. That might be a surprising answer to many, but it must be remembered that you are never through learning.

Modern card-writing is not merely the correct forming of letters and figures arranged on cardboard to make a readable sign. When you have accomplished that much you are just in the "baby class." Card-writing is now an important branch of advertising and one that necessitates more study than just the mere printing of the cards.

The layout or the arrangement of the wordings is just as important as the correct formation of the letters. It is also just as important to make sure that all words are spelled correctly. The phrasings of the cards must be selected with great care. They should be worded just as carefully as the advertising man selects his headings. These wordings should tell something of an interesting nature about the goods they are illustrating.

The grammar should be carefully watched as errors here tend to reflect on the store.

Careful Attention

Window cards should be given careful attention, especially the selection of the phrasings. These should be of such character as to tell the busy passerby something about the merchandise that will interest him or her at the first glance. When we can do that we are making our window cards bring in the dollars and that is what we are after.

Arrangement of cards both in the window and interior of the store is important. You often see window cards placed tightly against the window-pane. This is a mistake. They should be set back and placed in an artistic manner to harmonize with the way the rest of the window is trimmed.

SEASONABLE SHOW-CARDS

Fall Painting Has Its Advantages—Ask Us About Them.
Our Stock of Stoves and Ranges Now Complete.
Ready For the Fall Shooting? —Get Your Gun and Rifle Here.
Our Electric Washing Machines Are Always in Season.
Our Automobile Lap Rugs Keep Away the Evening Chill.
Hunting Clothing For the Fall Season.

We Have the Materials For Finishing Your House.
The Best in Mechanics' Tools Always.

Each card should be set out separately from stands, figures or drapes. Never lean a card up against a well-gowned figure. Nothing looks worse.

The popular method is to stand the card in front of a small "T" stand away from any other part of the display.

Care should be taken with interior store cards. Don't have a whole lot of mixed sizes of cards on the same counter. Keep to uniform sizes as much as possible and keep them straight in their holders. They should be kept clean and the type used on them should be of a uniform size and style.

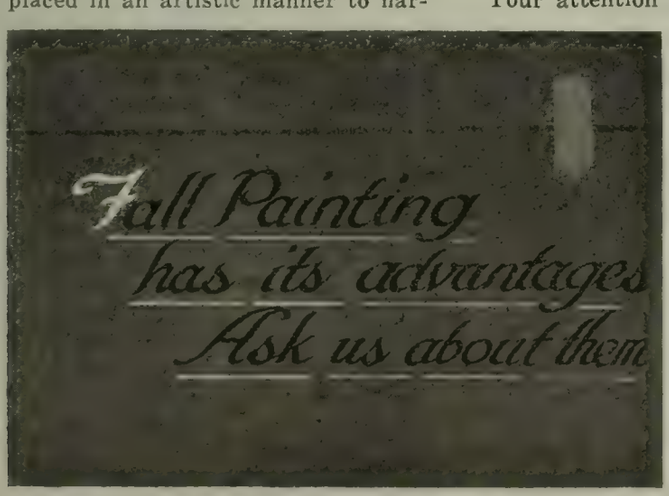
Many good examples of correctly lettered and spaced cards may be seen in the better class stores and many good ideas may be gleaned from them.

Two Model Cards

Your attention is called to the reproductions of show cards on this page. The darker card is of a mottled surface with a semi-script lettering of brush stroke formation. This is a simple type of letter to make and is very speedy. The band across the top of the card is of a dark green and the shield is of a lighter shade of green. This combination may be changed if desired.

The lighter colored card shows more brush stroke lettering, which can be formed very quickly. The conventional floral designs at both sides are of red and green, with a white outline.

Show card writers' opaque colors are used on both these cards.



MOTOR EXPORTS INCREASING

The remarkable growth in the use of automobiles in the United States during the last seven years has been equaled by the increase of automobile exports in the same period. In 1912 registration statistics showed 1,000,000 cars in use in the United States; in 1918 the number had grown to 5,900,000. From 1912 to 1918 the value of automobile exports from the United States rose from $25,657,294 to $110,138,831. The highest point in this trade was reached in 1916, when shipments were worth over $120,000,000 and consisted principally of motor trucks for war uses. Notwithstanding the restrictions imposed by the United States Government during the war, exports during the fiscal year 1917 amounted to $118,377,047, in 1918 to $110,138,831, and during the first nine months of the 1919 fiscal year, to $75,800,000.

Painting the Dome

A thrifty old lady of Hull,
Whose intellect seemed rather dull,
When reading at night,
To economize light,
Put luminous paint on her skull.

—Punch

Putting "Pep" into Advertising

There is a Big Difference Between "Advertising" and "Publicity"—Real Advertising is the Greatest Business-Building Force Yet Discovered — Keep Your Copy Newsy and Full of Interest to the Buying Public

SOMEBODY has said that trying to run a business without advertising like winking at a girl in the dark, you know what you are doing but nobody else does. There is a whole lot of truth in this statement. The man who invests his money in a stock of goods today and then waits for people to come in and buy them may eventually dispose of them. But if he lets the people in his vicinity know that he has got in his stock and tells them all about what he has to offer, there is absolutely no question that his goods will move and keep moving, just in proportion to the advertising he does. Advertisements that are full of "pep" and have a real message to the buying public are not only read with keen interest, but have a real value in attracting buyers. Nothing that has yet been discovered will bring more business than advertising.

Value of Advertising

Remember that there is a tremendous difference between "advertising" and "publicity." Advertising is the life-blood of modern business. It has enabled those who use its forces intelligently to build, and build, and keep on building, an ever-expanding business. The great buying public, and that includes practically everybody, is interested in your message if you have got something of real interest to tell them. People will always read a well-written, catchy ad., while they will almost invariably pass over an uninteresting ad. with a mere glance. Some business men succeed in keeping thousands of people constantly on the look-out for their advertisements and they do it by keeping them interested. The people want to see "what So and So is advertising to-day." Ads. of this kind are always worth studying. They are worked out along certain definite lines and they produce certain definite results, the most important of which is bringing a constant stream of business.

A Big Difference

One of the greatest differences between "advertising" and "publicity" may be shown very simply. A great many business men had the idea that if they used a very small space in their local paper and used it only occasionally they were advertising. Everyone has seen and can see even yet little one-inch spaces inserted maybe once a month, maybe once every three months, something along this line, "John Smith, Hardware, 66 King Street." The writer has often asked these men about insertions of this kind, what results they got and what results they expected, and what they thought about advertising. Their replies bear a remarkable similarity. In general they will tell you that their idea is to keep their name before the public. Some of them will even tell you that all they put the notice in for was because they felt it their duty to help support the home paper. Many of them will tell you that their "advertising" has not produced any very startling results.

Have a Lot to Learn

These chaps have a whole lot to learn. To start with they haven't one idea of what real "advertising" is. They think because they buy space to the extent of $5 or $10 in a year that they are doing something. It is true that their effort, small as it is, is better than no publicity at all, but real "advertising" is as much bigger and better as the modern express train is ahead of the old-time stage coach. No man should expect to spend $5 or $10 a year for a bare announcement of his firm location, and business, and expect to build up a trade that will force him to erect a bigger shop. The men who have built up enormous businesses by advertising are the men who have used space and have used it consistently. They have of course spent money, but they have taken in many times more than they paid out. These men did not try to move a Mogul engine with a toothpick.

Must Be Persistent

Advertising to be successful must be persistent. It is no use putting in an ad. two or three times a year. The firms that get results are those which keep their message constantly before the public. They never give people a chance to forget either the firm or what it has to offer and they make their messages so attractive that people look for them and are disappointed if they do not see them.

It takes time and care to look after "advertising," but the results are worth many times the efforts. Advertisements to "pull" must be varied. You may tell about the same line of merchandise each time, but you can inject into the ad. matter that will carry a wide appeal to the buying public in general.

How They Do It

There are different ways of doing this. Some firms adopt the plan of telling people about their goods, how they are made and what they will do and all about them. This is a very popular form of advertisement. Most people like to read about equipment and what it will do and how it is made and so on. Other firms adopt the plan of using attractive cuts, quoting prices and giving a short, snappy description. Ads. of this kind nearly always reach the people interested in buying at once and bring them to the store to ask for further information. Then it is up to the salesman to close the deal. Advertising of this kind has produced some splendid results. Another very effective method of producing sales is to feature some single line in each advertisement. For instance, washing machines may be advertised. In this case an illustration of a fine washing machine is shown. Along with it is an advertising talk about its great value in the home, the

ADVERTISING AND A WOMAN

There was a man in our town
Who wasn't wondrous wise,
He thought that he could build up trade
And never advertise.

He never told his wife a thing
About his business, and,
Of course, as she was ignorant,
She couldn't lend a hand.

One evening when he came back home
His wife, a keen expert
In bargains, showed what she had bought
At prices cheap as dirt.

At once he saw that they were goods
From his competitor,
And with a gurgling cry of rage,
His voice arose for war.

"Now, John," she said in soothing tones,
When he had fired his shot,
"How should I know that these here goods
Were like what you have got?"

"I saw the advertisement in
The cars and thought that I
Could save you quite a little sum
On what I had to buy.

"And so I bought this lot of goods,
Like everybody buys,
With ordinary business sense,
From firms that advertise.

"If you had goods like these to sell,
You never told me so,
And as you kept it to yourself
How ever could I know?"

There is a man in our town,
Some wiser than he was.
But never do his ads. announce
His wife to be the cause.

—W. J. L., in *Fame.*

Reproduction of an ad. run recently by Lacroix Bros. & Co., Ltd., Prince Albert, Sask. The use of cuts, descriptive matter and quoting of prices are all employed, which serve to strengthen the sales force of the ad. very materially.

service it will give, cost of operation and so on.

Like Illustrations

It is a good plan to use illustrations, but care should be taken to see that good cuts are secured. Everyone who is interested in the goods advertised likes to see a picture of what it is like. It is remarkable how people will carry in their minds pictures they have seen of goods advertised. It impresses them. If the price is given they almost invariably remember both the goods and the price. Any number of firms state that they have people come in from all parts of the country and ask for this or for that artisle which was advertised at such and such a price. If poor cuts are used the effect of a good ad. is spoiled, as the illustration is likely to turn out a mere blot instead of a sharp, clear representation of an article of merchandise.

Retailers are going after business on mechanics' tools aggressively, and the above ad. of this London, Ont., firm is just an example of how the building trades are being catered to. This is trade which was rather small during the war period of restricted building.

One of the big advantages of advertising is in the wide territory that is covered, and covered thoroughly. Advertising works night and day. It never stops. Your ad. will be read by the man in the city or town, it will be read by the farmer's wife miles out in the country, and by buyers over a wide area. If the message is well written and newsy they will read it with interest. If it contains nothing but mere words the chances are they will merely glance at it and pass on to some ad. more interesting.

Each and every hardware merchant who is located in towns and cities back of which are extensive farming communities should pay special attention to the messages they send out. The farmers are becoming big buyers of anything that will make their homes better. There is an enormous field in the farming districts for the sale of modern conveniences, household equipment, water pumping plants and other lines. The farmers have the money to buy these things and they are buying them as never before and the dealer who stocks these goods and then lets the people know where they can get them is laying the foundation for some real business.

Pays to Be Aggressive

It always pays to be aggressive and never more so than in advertising. The buying public likes the merchant who shows that he is alive and has a real message for them. They will come to his shop and will talk about it to their friends, and come back again and again. This is why some of the firms who have not been afraid to advertise generously have reaped such rich rewards. These firms appreciate fully the value of having people look for their ads., of having them come to their stores regularly and of having them talk about the washing machine they bought from Jones, the electric iron they saw in his window or other things.

If you are going to advertise do it systematically. Set aside a definite amount of money each year for advertising and then see that your copy is changed regularly, and that each advertisement that goes in has something of interest. Remember that if you let the same ad. appear day after day, or week after week the effect on the buying public is somewhat the same as if you get apple sauce and bread and butter for breakfast, dinner and supper all through the week. Naturally you would lose interest in bread and butter and apple sauce, in fact, you would get sore at not having any change. The public is the same. You may tell them about the same things each time, but tell them in a different way.

This shows an ad. recently run by the Saskatoon Hardware Co., Ltd., Saskatoon, Sask. Good space is used constantly by this firm, who indicate that results are apparent from their advertising.

EDITORIAL COMMENT

OUR readers, and particularly those personally acquainted with Col. J. B. Maclean, President of the Maclean Publishing Co., will learn with deep regret and heartfelt sympathy of the sudden death on August 17, of his son and only child Hector, aged sixteen years.

Hector was on a camping trip with Upper Canada College boys and was taken suddenly ill with acute indigestion. He was rushed in to Temiskaming, where medical attention was secured, but they were unable to save his life.

CASH discounts are a dealer's first profit and one that he is always sure of.

If you toot your little tooter
And then lay away your horn,
Within a week there's not a soul
Will know that you were born.

* * * *

IT LOOKS as if a lot of people these days want ten hours' pay for spending six hours in doing four hours' work.

* * * *

HOW long do you think goodwill will stand if left to itself? Stop advertising and you are forgotten.

* * * *

GOODS that remain on your shelves are retarding profits.

* * * *

COURTESY costs nothing and is an invaluable help in building up business.

* * * *

A SALESMAN who has enthusiasm and can impart it to a customer usually has the sale clinched.

* * * *

MANY a young man has found that concern for his employer's interests is one of the most powerful levers for raising himself to a better position.

* * * *

EVEN an untidy and careless person is not favorably impressed by an untidy store or a neglected window.

* * * *

THE MERCHANT who relies upon advertising that is past to bring results all the time is like a man who thinks his last meal will sustain him forever.

* * * *

IT IS not the hour at which a man arises in the morning that makes him rich; it is what he does after he arises.

MANY a merchant has found that granting indiscriminate credit has meant giving away a lot of his profits.

* * * *

KEEP your finger on the pulse of trade, give the public credit for knowing what it wants and shape your course accordingly.

THE TORONTO EXHIBITION

ANY merchant who is located near enough to Toronto to make it feasible for him to visit the Canadian National Exhibition should certainly not fail to do so. Not only will he be present at the best of a long series of successful exhibits that is made the more notable this year by the collection of war trophies gathered from all the great theatres of the war, but he will be aided in his own business by being brought into contact with a limitless array of hardware lines. There are a thousand and one ways in which a visit to the Exhibition will broaden his outlook, and anything that does that will be a material assistance in making him a better merchant.

THE LESSON OF 1919

ONE of the things 1919 will be remembered for by retailers all over Canada is the lesson it has taught regarding the necessity of having faith in the stability and soundness of conditions in the Dominion. Manufacturers as well as retailers have had this lesson impressed upon them many times recently when orders poured in and they were unable to fill them because they did not have the stock. The man who was prepared to handle it has had all the business he could take care of and at excellent profits. Their experience this summer has proven both to manufacturers and dealers that paint may be sold all through the summer and fall as well as in the spring, provided the dealer will go after the trade. The dealer who had impressed in his mind the idea that spring was the only time paint could be sold and as soon as the spring season was advanced took out his window displays and ceased to talk paint naturally did not sell very much. This year many firms changed their methods and they have been talking paint right through the summer and are still talking it. More than this, they are backing their talk by advertising and by window displays and what is the result? From all parts of the country comes the same story, "Our paint sales this year

are the best on record." Manufacturers say the same thing. Some of them are wondering at it, but at the same time they have seen what can be done and have learned something that may be turned to good account in the days to come. What applies to paint, applies to all other lines of goods. The trade is there if the dealer will go after it. But if he sits down and waits for it to come to him, he will get only a mere fraction of what is available. Many dealers lost a lot of real good profit this year because they were doubting Thomases. They feared that business was going to the bow wows and that this would happen and that would happen if they put in a normal stock. What really happened was that they were caught short and are still being caught short and the chap who had faith in things got the trade and made the money.

AN UNJUST ACCUSATION

EVERY retailer in the United States is watching with the keenest interest the developments of President Wilson's plans aimed to bring down the cost of living. When the President, in his address before Congress recently, declared that "all goods should be plainly marked with the price at which they left the hands of the producer," in doing this he gives his approval to a plan which was originally fostered by the I.W.W. and which was known as the "Arizona plan." It caused some stir, especially in the State in which it was tried, and was regarded in many quarters as distinctly revolutionary and impracticable. In addition to making the remarks referred to above, President Wilson declared that "the retailers are in large part responsible for exorbitant prices." This is a serious charge to make, especially by a man whose business experience is, to put it mildly, very limited. The retailer occupies an important and very essential position in the general economic scheme. Many of the retailers put in hours that are a lot longer than those of most people. Speaking of them as a body, it may be said that they serve the public well and faithfully. Any person is entitled to a fair return for their time and labor and while there may be instances of profiteering here and there, it is not fair to charge the thousands of men who are in business as a class of profiteers. If President Wilson's plan or the Arizona plan was to go into general effect endless inconvenience would be caused to the public and additional increases in cost. The latest reports indicate that there is little chance of the measure being adopted.

RAISE IN GAS RATES

IN many parts of the country the rates for gas, both natural and artificial, are to be increased on September 1. Difficulty in obtaining supplies and higher costs of operation are blamed for the advance in natural gas. The coal situation is given as a reason for increasing the cost of artificial gas, also higher wages paid to employees. As might be expected, the general public is giving fuel problems a little more than particular attention just now and this offers the hardware dealer an opportunity for putting forth his best efforts. Oil burning equipment promises to be more popular than ever and many dealers are featuring it strongly in their advertising matter and by timely window and store displays. Electrical equipment for heating and cooking is also to the fore and indications point to large sales of these lines by hardware dealers. Sales of cook stoves and ranges are likely, it is stated, to be excellent. With 50,000 Canadian boys home with brides from overseas, and hundreds of other people who have been "doubling up" resuming housekeeping, there is a big market for all kinds of heating and cooking equipment. High prices for wood and coal and difficulty in obtaining them are causing people, especially those who reside in the cities, to seek other kinds of fuel. The dealer who studies carefully the needs of the buyers in his district and then stocks accordingly, and lets the people know he has the goods, has every reason to expect a splendid turnover.

READ OTHER FIRMS' ADS.

EVERY man who is in business should advertise and every man who advertises should make it his business to read as many of the ads. of other firms as possible. He will be surprised how many good suggestions he will obtain which he may adopt with profit in arranging his own copy. Some of the larger firms, the department stores especially, have their copy prepared by men whose salaries run into large figures. It is their business to produce ads. which will sell goods and that they do their work well is shown by the turnover of these firms. An advertisement to be effective need not cover a whole page and quantities of display type. It is more what is said and the way it is said that counts. Hardware dealers and others by comparing their own advertisements with those of others can obtain extremely valuable suggestions. By a little study and attention they can apply the principles that high salaried advertising writers apply in the advertising copy of the firms they work for. They can take all that is good in their work and adapt it to their own needs. In doing this they will get a much broader outlook on the possibilities of advertising and will also find it a most interesting occupation. Very often he will find also that he will be constantly increasing his own knowledge about the goods he handles and that there are any number of points which he never thought of which are real talking points in selling. These can be used not alone in the advertisement, but over the counter and in the store. The more any dealer knows about his goods the better he will be able to see.

British Preferential Tariff Not Likely to Interfere With Export Trade in Hardware Goods

AS far as the information available indicates, the only hardware lines affected by the British preferential tariff rates which go into effect on September 1, are motor spirits, on which there is a reduction of one-sixth, clocks and watches, motor cars and bicycles and musical instruments, on which there is a reduction of one-third.

Premier Lloyd George has announced that special measures will be taken to prevent dumping and to protect British key industries.

According to the bulletin issued by the Canadian Department of Trade and Commerce at Ottawa, a cable received from the Canadian High Commissioner says:

"Customs regulations just published states that to enable goods obtain benefit preferential tariff at least twenty-five per cent. of total value must be result of labor within British Empire. Section eight, sub-section two, of Finance Act reads as follows: Where the Board of Trade is satisfied as respects any class of goods to which the preferential rates apply that those articles are to a considerable extent manufactured in the British Empire from material which is not wholly grown or produced in the Empire, the Board may by order direct that the preferential rate shall be charged only in respect of such proportion of those goods as corresponds to the proportion of dutiable material used in their manufacture which is shown to have been grown or produced in the Empire. In connection with this customs regulation says no part of such goods shall be deemed manufactured in British Empire unless at least five per cent. of total value of goods is result of labor within Empire. Value shall be cost to manufacturer at factory and shall include value containers and other forms interior packing ordinarily sold with article when sold retail. In calculating proportion of value resulting from labor within Empire there may be included under head of labor the cost to manufacturer of materials purely Empire origin entering into composition of article. Inquired Board Trade to-day, who say their regulation sixty per cent. labor and material admissible under general license as cabled you twenty-ninth July remains in force for the present."

This may have important results on the exports of automobiles made in Canada by American branch factories to England. One result of the former import regulations was to cause American firms to spend many millions of dollars in this country in new plants to take care of this business. It is likely that they will have to add to these plants even more in order to comply with the regulations requiring the percentage of work done in the Empire.

It is generally expected that as far as other hardware lines are concerned that Britain will be a large buyer of Canadian goods. Some Canadian firms have been doing a splendid export business, and as far as they have been advised at the present time this will not be interfered with by the new tariff. On the contrary, it may be stimulated.

HOW BRITISH FIRMS ARE GOING AFTER EXPORT BUSINESS

At a recent meeting of British manufacturers the president of the Board of Trade was asked if he could state the object of his department in holding an exhibition of a great variety of brushes of recent Japanese manufacture; whether it was for the purpose of encouraging the importation into this country of Japanese manufacturers; and to whom an invitation to inspect such goods had been sent?

Sir A. Steel-Maitland stated that the object of the Department of Overseas Trade in holding exhibitions of samples of foreign manufactures is to inform United Kingdom manufacturers producing similar classes of goods as to developments which have taken place in foreign industries, and to enable them to examine specimens of foreign products which compete with their goods in overseas markets. Invitations to inspect samples of foreign manufactures are issued only to United Kingdom manufacturers of similar goods.

Has Jobber Right to Sell at Retail?

By JOHN A. FRAZER, Sales Manager Lewis Bros., Limited

THE question is continually arising, Why does the jobber sometimes sell at retail? It is a problem confronting the jobber constantly, and without the co-operation of the retailer himself the evil will more or less continue.

One of the greatest and most frequent causes of this complaint comes from the looseness of certain retailers in issuing orders on his wholesalers. For instance, we will assume that John Smith has been given an order on the wholesale for goods that he requires and which he wants to select personally. This is taken to the jobber and duly filled. Frequently the jobber does not know this man at all, but it is his duty, of course, to honor the order of the retail dealer in the regular way, whatever the want may be.

So much for the first order. He comes again and may have an order. But he comes in sooner or later without an order, and, going to the salesman who has served him, he soon establishes his identity and secures what he wants. In many cases we have found that this has caused trouble, and only recently a customer called, by telephone, and stated that a certain man was on his way to our office to make a purchase, having told the retailer that he could buy from us. The retailer explained the whole situation; I thanked him for the information, and gave instructions that this customer, when he arrived, be referred to me. This was done and I was able to speak with this man and settle the question definitely, whereby he secured no more goods.

There is a solution to the practising of this evil, which is, very largely, in the hands of the merchant. If he has a regular order form, this ought always to be used. The small order pad is a useful little thing, and when numbered it enables the dealer to check up an invoice, the jobber putting the order number on each invoice, if there be a numbered order on file.

The jobber wishes to correct any evil that may exist in this respect, and, with the right dealer co-operation can be accomplished. Willing and pleased as he is to handle all orders, small or large, the personal selection of goods, and particularly if they be asked for by one unversed in the lines being selected, takes a great deal of time from one who may be wanted at his desk to attend to important telephone calls or regular customers. As far as we are concerned we have specially requested our salesmen to make sure that orders are from bona fide dealers, and so avoid any misunderstanding.

It does happen, sometimes, that requests come in from people who are isolated, and who have access to no accredited dealer. They have even sent for catalogues, and we have had to reply that as ours is a purely jobbing enterprise we cannot sell them. In a recent case of this kind the writer stated that there was no near source of supply and that the nearest dealers, in any case, had asked excessively high prices for what he wanted. This may have been a real complaint, or it may not, but the hardware merchants will always be protected. If it is necessary to sell direct to anyone because of such a circumstance as the foregoing, we will, of course, forward a credit note to the dealer, who may be purchasing from us in that district, if there be one.

With care in the issuing of orders and such assistance as the merchant may be able to lend, there will be little difficulty in reducing any evil that may have existed in the past in the foregoing respect.

The Canadian Damascus Manufacturing Co., Ltd., capital $40,000, head office, Toronto, plans to manufacture and deal in paints, oils, soaps and greases.

Seaman Eaton Flooring Co., Ltd., capital $40.000, head office Toronto, plans to manufacture and deal in flooring and builders' supplies.

American Retailers Alarmed When President Supports Arizona Plan

RETAILERS all over the United States who thought the "Arizona plan," mentioned in previous issues of HARDWARE AND METAL, had received its quietus, have been startled and alarmed at the action of President Wilson in giving his support to the plan.

Discussing the President's attitude, the "Retail Public Ledger" of Philadelphia says:

"Great hardship will be worked on the retailers of the country if the suggestion recently made by President Wilson in his address on the high cost of living should be enacted into law.

Would Cause Trouble

"The President advocated that manufacturers should publish the cost of manufacture and the price received for articles turned out by them. He further advocated compelling wholesalers to state the purchase and sale prices of the commodities which they handle. While this may seem a sane solution of alleged profiteering on the part of some retailers of the country, it can be seen that this suggestion, if enacted into law, would cause endless inconvenience and dispute between the retailer and his customer.

Says It Is Impracticable

"It may be said in this connection that very many members of Congress in both the Senate and the House have denounced this suggestion of the President's as impracticable.

"The whole high cost of living problem which Congress is now tackling is very much wrapped up with the local situation, both because the cost of living in Washington is said to be as high or higher than any other city in the country, and also because the President has suggested that legislation be tried out in Washington as an experiment.

"In this connection a Bill is now being drawn up by the corporation council of the District of Columbia, which is to be presented to Congress when completed. The Bill is along the lines of the recommendations made by the President in his recent address that manufacturers and wholesalers be required to stamp on all articles the cost and sale prices."

Blames Retailers

President Wilson in his address to Congress said in part:

"There can be little doubt that retailers are in part—sometimes in large part—responsible for exorbitant prices, and it is quite practicable for the Government to supply the public with full information as to the prices at which the retailers buy and as to the costs of transportation they pay, in order that it may be known just what margin of profit they are demanding. Opinion and concerted action on the part of the purchasers can probably do the rest.

"I would also recommend that it be required that all goods destined for interstate commerce should in every case where their form of package makes it possible, be plainly marked with the price at which they left the hands of the producer."

Did Not Work Well

President Wilson's advocacy of the branding of all packaged goods with their wholesale prices recalls the "Arizona plan," tried out in that state last fall with disastrous results.

This scheme, fostered by Governor Hunt as a political expedient to strike back at certain interests which opposed his election, provided "that all articles sold at retail shall bear in plain figures the cost and sale price of each article so that no confusion or error can arise in any interpretation of the cost and sale price of each unit of sale."

Promulgation of the order gave rise to an immediate storm of protest from virtually every business organization in the state. Merchants who attended a conference over the matter claimed that to arbitrarily term the cost at mill, plus freight, the cost price of an article would be unfair, because it ignores the cost of all service rendered by the merchant. They pointed out that in many districts of Arizona it costs 33 1-3 per cent. to do business, and that therefore an article which cost $10 at the mill, plus twenty-five cents freight, would have to sell at $20 or more to make a reasonable profit—whereas to mark the cost of the article at $10.25 and the selling price at $20 would lead the purchaser to believe that the retailer was a profiteer of the worst kind.

John Bull Corners the World's Supply of Pale Resin

JOHN Bull has "put one over" on the world in regard to resin, and in discussing the situation at present and the outlook for the future the "Southern Lumber Journal" says:

"It has always been the impression of Americans that the English were slow thinkers in a business way, but it is evident that they have stolen a march on the American consumers of resin and that the latter are very likely to have to do without pale grades in the near future. The statement was made early this week that English buyers had purchased virtually all of the Gulf production and that it was to be shipped to the United Kingdom as fast as vessels are available. There is no question but what the pale grades have assumed a serious aspect, as a result of these purchases, to the American consumer. It is now but a question of weeks until he will be dependent entirely upon the British buyers for whatever stocks of pales he will need.

Ready for Shipment

More than 30,000 barrels of resin are now tied up on the docks in the city of New Orleans awaiting the sailing of United States Shipping Board vessels for ports in Europe. This resin represents a value of $1,300,000 and is the largest amount of resin ever gathered together for shipment at one time in the history of the New Orleans port. The strike now on affects only vessels of the United States Shipping Board. Many thousands of barrels have already left New Orleans ports during the last two or three weeks for Glasgow and Liverpool aboard English vessels. No figures are available to show the amount but the shipments will exceed the 30,000 barrels tied up. It is also understood that bookings have been made since the latter part of June for the shipment of 200,000 barrels through the port of New Orleans. The actual status of these bookings will not be known until the resins have been shipped.

Is A World Scarcity

That there is a scarcity of resin in the world is proven by the fact that prices are being paid to-day which were never paid before and which but a short time ago would have been considered out of all reason. The whole market is right at the top—and by the top is meant the top not only of the movement, but the top of all advances resin has ever seen. The price is now about three times what it was three years ago, and is higher than the greatest bulls dreamed of when they were talking high prices at the beginning of the crop year. There may be a jumping off place some time, but just now it is not possible to say when it will come. Europe needs a great deal of resin, so does South America and so does Japan, to say nothing of domestic needs. That the crop is going to be a small one is admitted by everyone. Yet, in spite of all the bullish features, the advance has been so rapid and has gone so far that under more normal conditions the price would prevent active buying. This does not seem to be the case now, however. There is a little resale goods coming out, but as a rule holders want the top price for every barrel they are willing to let go of. The advance has gone so far that the trade is beginning to wonder if there is any level which would check consumption."

P. Goulet, Montmartre, Sask., has purchased new and larger premises in which he plans later to locate his hardware business.

The partnership between Reggen & Spencer, roofers, Toronto, has been dissolved.

EVENTS IN THE TRADE

Business Changes

Speers, Alberta.—Joseph McRae, hardware, is succeeded by Thomas Kerr.

Elmvale, Ont.—E. Knapp has purchased the hardware business of George E. Roe.

Minnedosa, Manitoba.—K. C. Olmstead has purchased the hardware business of Olmstead & Clark.

Teulon, Manitoba.—Woods, Ltd., have purchased the hardware business of George A. Elliott.

Wadena, Sask.—Paul Feifer has purchased the hardware business of Anderson & Anderson.

Obituaries

The death occurred at St. Catharines, Ont., of L. R. Grimshaw, treasurer of the Canadian Crocker, Wheeler Co.

Charles Emile Delorme, a well-known and respected hardware merchant of Montreal, passed away on the 24th inst., the funeral taking place Wednesday of this week from his residence, 20 Bishop Street. A large number of the wholesale and retail hardware merchants attended.

Fire Losses

A. E. Latimer, hardware dealer, sustained a loss in a fire which swept six business places at Strome, Alberta.

Personals

J. H. Robertson, hardware merchant, Chester, Ont., was a Toronto visitor this week.

Geo. Rice, hardware merchant of Whitby, Ont., spent a few days in Toronto this week.

A. J. Collins, formerly with the Burk's Falls Hardware Co., Burk's Falls, Ont., has accepted a position with C. D. Cutts, hardware merchant, Toronto.

Roy Stafford, of the Stafford hardware, Belleville, Ont., is in Toronto this week. Mr. Stafford was a contestant in the trap shooting tournament at the Toronto Exhibition.

Trade Notes

The Toronto Weatherstrip Co. has been registered at Toronto.

Hussereau & Co., plumbers, has been registered at Montreal.

Automobile Batteries and Engineering has been registered at Montreal.

Strong's Chemical Works at Montreal has been acquired by the Sta-Brite Mfg. Co., Ltd.

Le Cora Aux Trois Poilus, manufacturers of varnish, has been registered at Montreal.

The Ibex Tire & Rubber Company, capitalized at $300,000, plans to locate at Oshawa, Ont.

J. H. Jacques & Sons, Quebec, wholesale leather and harness, has been registered.

The Canadian Machinery and Wax Co. has been registered at Montreal by Louis H. Veronneau.

The Standard Non-Skid Tire Chain Co. has been registered at Granby, Quebec, by Alphonse J. Monty.

McMadden & Davis have purchased the harness business of Hugh McGillivray at Pense, Saskatchewan.

The partnership between Stuart & Darragh, sporting goods, Ottawa, has been dissolved and the business is being continued by James A. Stuart.

C. W. Gimby & Son, hardware, Cabri, Saskatchewan, have closed their branch store at Shackleton, Sask.

The Canada Western Cordage Company, capitalized at $300,000, plans to equip a plant at New Westminster, B.C.

The employees of the Steel Company of Canada, at Hamilton, Ont., have been granted a ten per cent. increase in their wages.

George Wade has been appointed manager of the auto accessories department of the Vokes Hardware Co., Ltd., Toronto, succeeding W. Dean, who has left to take the position of city traveller for the Canada Sales Co., of Toronto.

Montreal News

H. C. Bonney, manager of the Barrett Co., Limited, is in Worcester this week.

R. A. Catlin, of the Corbin Cabinet Lock Co., Ltd., was in town this week.

Mr. Falles, of the New Haven Clock Co., Toronto, was in Montreal this week.

J. E. Pilon, representative of Lewis Bros., Ltd., for the Gaspe coast, was in Montreal this week.

Mr. Shay, representing the Goodell Pratt Company, was in Montreal this week.

W. A. Kribs, of the Kribs Washing Machine Co., of Hespeler, Ont., was in Montreal this week.

W. W. Ingersoll, vice-president and manager of the Dougall Varnish Co., Ltd., Montreal, is spending his vacation at St. Albans Bay, Vermont.

W. H. Bailey, representing the Co-Operative Wholesale Society of England, who is passing through Canada on his way to Japan on a buying tour, was in Montreal this week.

H. Scheimer, president of the New Standard Hardware Works, Mount Joy, Pa., was in Montreal this week calling on their Eastern Canada representatives, Messrs. Richardson & Bureau.

Mr. Smith, the recently appointed general sales manager for Canada of the Beaver Board Co., Buffalo, was in Montreal this week, and it is announced through the trade that this company will have a string of twelve representatives in various sections of the country so that the trade will be systematically called upon.

F. I. Spielman, president of Spielman Agencies, 15 St. Alexander Street, Montreal, has just returned from a successful trip to England, where he interviewed the principal firms he represents, i.e., British Aluminium Co., Griffiths Brothers & Co., British Ever-Ready Co., and other firms who expect to ship to Canada in a big way as soon as present conditions change.

Incorporations

Eureka Pattern and Manufacturing Co., Ltd., head office Toronto, capital $40,000, plans to manufacture castings.

Harry Alexander, Ltd., capital $40,000, head office Toronto, plans to manufacture and deal in electrical supplies and equipment.

Mead Universal Co., Ltd., capital $350,000, head office Toronto, plans to manufacture and deal in automobiles and motor vehicles.

Canadian Sander Manufacturing Co., Ltd., capital $200,000, head office Brockville, Ont., plans to manufacture and deal in builders' and mill supplies, hardware and machinery.

Consolidated Iron and Steel Corporation, Ltd., capital $8,000,000, head office Toronto, plans to carry on a general business in iron and steel manufacture.

British Minerals Corporation, Ltd., capital $300,000, head office Montreal, plans to carry on general development work, also smelting and treating of ores.

Auto Indicator Sales Company, of Eastern Canada, Ltd., capital $25,000, head office Montreal, plans to manufacture and deal in steam, electric, and gasoline driven vehicles.

Security Devices, Ltd., capital $25,000, head office, Ottawa plans to manufacture and deal in locks and security devices.

British Foundation Ovens, Ltd., capital $15,000,000, head office Montreal, plans to carry on the general business of iron masters, tin plate makers, and manufacturers of iron and steel goods.

Mustikon, Ltd., capital $250,000, head office Toronto, plans to manufacture and deal in automobiles, auto accessories and rubber goods.

British Refractories Ltd., capital $3,000,000, head office Montreal, plans to manufacture and deal in bricks, tiles, paints, fertilizers, sewer pipes and building materials.

Canadian Oliver Chilled Plow Works, Ltd., capital $20,000, head office Regina, Sask., plans to manufacture and deal in implements.

Connaught Motor Sales Co., Ltd., capital $60,000, head office Hamilton, Ont., plans to manufacture and deal in motor trucks and vehicles.

Shine-O Products, Ltd., capital $40,000, head office Hamilton, Ont., plans to manufacture and deal in polishes and dressings.

The Fibre Packing Co. of Canada, Ltd., capital $100,000, head office Walkerville, Ont., plans to manufacture and deal in fibre, fibre board and fibre containers.

INCREASING CAPITAL STOCK

The Gurney Foundry Co., Ltd., of Toronto, is increasing its capital stock from $750,000 to $2,000,000. It was stated to HARDWARE AND METAL that this is to provide for future expansion of the business.

BIG STEEL PLANT FOR GODERICH

According to press dispatches from Goderich, Ont., arrangements have been completed by which the Lake Huron Steel Corporation acquired a site of 250 acres on which it is proposed to erect a plant costing $8,000,000. More than $2,000,000 will be expended, it is stated, in the next twelve months and electric furnaces and complete modern equipment for steel making will be installed.

WALL BOARD FACTORY BURNED—LOSS $200,000

Ottawa.—The Bishorpric Wall Board Company's factory at Brookfield, Gloucester township, was completely destroyed by fire yesterday afternoon, entailing a loss between $175,000 and $200,000. Three freight cars, two C.P.R. and one G.T.R., on a siding at the factory, were also burned.

VOKES HARDWARE PICNIC

The second annual outing of the employees of the Vokes Hardware Co., Ltd., 40 Queen Street E., Toronto, held at Pine Hill Grove on Saturday afternoon, was a most successful affair in every way. The picnic party motored out to the grove in twenty autos, and on arrival a programme of sports was run off. The events were keenly contested and furnished a lot of fun for the onlookers. A feature of the afternoon was a ball game between the Vokes Hardware nine and a team from the Toronto Lock Co. A silver cup was offered as a trophy for the winner and the silverware is now resting in the Vokes store as their players figured in the swat statistics a great deal oftener than their opponents, the final score being 12 to 6. James Blue, manager of the Vokes Hardware Co., Ltd., officiated as umpire.

Says Opportunity For Trade With Brazil

ACCORDING to Sir William Garthwaite, Bart., managing director of the Marine Navigation of Canada and holder of extensive interests in Brazil, there is a splendid opportunity for Canadians to develop trade with Brazil. Sir William, while in Montreal, stated that during the war period Brazil starved for agricultural and electrical machinery, metals, merchandise, etc. It has immense purchasing power for these commodities and wishes to extend its commercial relations with Canada, as the Brazilian very much appreciates the commercial man who will offer him a square deal. During the war Brazilian merchants complained that many goods purchased abroad from unaccustomed sources were not of the quality and kind which they had been accustomed to purchase heretofore.

Canadians must not labor under the delusion that Brazilians are a semi-civilized race, said Sir William. On the contrary they are very keen commercial men, exceedingly intelligent, and follow with the greatest interest the latest improvements in manufacturing methods.

One peculiarity about Brazil, common to South American countries, he said, is that the importer is accustomed to receive extended credits, rather longer than Canadian manufacturers are accustomed to grant. The immense business done in South America prior to the war by European firms, and the immense influence they had in the country, were entirely built up on this system of granting long credits to responsible firms and individuals, which enabled them to keep large stocks of standard commodities in the country.

BRITISH CEMENT MERGER LIKELY

It is officially announced that the question of closer union of the Associated Portland Cement Manufacturers and the British Portland Cement Manufacturers, has practically been decided upon, subject to confirmation.

This amalgamation, if carried through, will involve a scheme of joint management, which should result in a substantial reduction of expenses, and a readjustment of share capital.

The present issued capital of the two companies is:—

Associated Portland Cement Manufacturers	£4,207,040
British Portland Cement Manufacturers	2,552,622

SPACE IS AVAILABLE

Ottawa.—Canadian exporters are missing opportunities to ship goods abroad on account of cabled reports to the effect that all the steamer space has been commandeered by the British Ministry of Shipping. Exporters are advised by the Canadian Trade Commission that the shipping situation is by no means so unfavorable, and that steamship companies on this side are not receiving applications for all the space available. The proper procedure would be for prospective exporters to make enquires themselves at the offices of the steamship companies in Canada.

BRITISH ELECTRIC MERGER

The English Electric Co., Ltd., which has just been formed in England, with a capital of $25,000,000, will control five important companies:

The Coventry Ordnance Works, Ltd.; Messrs. Dick, Kerr & Co., Ltd.; The Phœnix Dynamo Manufacturing Co., Ltd.; The United Electric Car Co., Ltd.; Messrs. Williams & Robinson, Ltd.

All these enterprises have been engaged in the production of electric apparatus of different kinds, and the works of most of them were greatly enlarged and extended during the war, when they were engaged in the production of war material.

The Coventry Ordnance Works, Ltd., which are located at Coventry, and also at Scotstoun on the Clyde, were originally laid down for the production of heavy armament, but are in every way suitable for the manufacture of electrical machinery and accessories.

The factories of Messrs. Dick, Kerr & Co., Ltd., and the United Electric Car Works, are at Preston, in Lancashire, and turn out a variety of apparatus, including the production of 5,000,000 metallic filament lamps, annually.

The Phœnix Dynamo Works are at Bradford, Yorkshire, and their present output is standard motors, together with apparatus pertaining thereto.

Messrs. Willans & Robinson, Ltd., factories, which are at Rugby, are arranged and equipped for the production of steam turbines of intermediate size, condensers of all kinds, and internal combustion engines of the Diesel type.

EITHER WAY IT TURNED OUT, THE PUBLIC WON

San Diego, Cal.—In March, following the killing of a bandit in the foothills of the Sierra Madre range in Southern California, there was quite a bit of digging for the buried treasure which the residents thought the bandit had hidden.

A hardware man in one of the foothill towns put some garden tools and spades in his window—also a clipping of the newspaper article that started the trouble. This card was also displayed:

> Get your outfit here to dig for the Dale Jones $30,000 treasure. It will come in handy in your garden if you don't find the swag.—Retail Public Ledger.

NEW PLAN ADOPTED IN ENGLAND FOR SELLING BELTING

The Ironmonger, of London, England, says:

"Hitherto it has been the English custom to sell leather belting chiefly by weight, and where sold by measurement leather belting has usually been sold without any specified thickness. Both of these systems are obviously open to objection from a buyer's point of view, and both have such weak points compared with some of the Continental systems that the Federation of Leather Belting Manufacturers of the United Kingdom have decided that after September 1 no leather belting shall be sold except on the basis of the new national price list which quotes for all widths of belting per foot, with thicknesses specified according to the customers' requirements and the purpose for which the belting is intended. Copies of the new list are being circulated to all buyers in the kingdom, and the Federation feels that the change will be welcomed by buyers, who will in future know exactly what their belting is going to cost them and exactly what is going to be supplied for the money. It has long been an anomaly that all other classes of belting have been sold by measurement, with thicknesses or plies specified. The change is being made by the Federation entirely in buyers' interests, and with a view to bringing the leather belting trade of the United Kingdom into line with modern methods."

HAVE YOU TRIED THIS?

Here is a plan which a merchant in a Western town has found effective as a means of keeping trade from going to mail order houses.

When he first started to sell cream separators one of the first things he did was to order a sixty-dollar "mail order" separator.

In due time the box containing the machine arrived. The merchant, however, did not open it. Not a nail was pulled, and the box was left on the floor near his own stock of separators. When customers of the merchant began dickering over the prices of the merchant's machines, and mentioned, in contrast, the price of the mail order machine he was ready for them.

"Why," asked one prospect for a separator, "should I pay you $100 for a separator when I can send East and get a — separator for $60?"

"Oh, you want the — separator, do you?" responded the merchant. "Well, I carry that, too. I'l be glad to sell it to you."

"Where is it? Let's have a look at it," answered the prospect.

"It's right there in that box," said the dealer.

"Open her up. Let me see whether I want it or not."

"No," said the merchant. "It will stay in that box till its sold. Isn't that exactly the way you buy from the mail order houses? Don't you pay your money before you ever open the box? I'll sell the separator to you on the same terms. That's fair, isn't it?"

The prospect saw the point. This incident has happened a good many times since. The box is still unopened. But it has proved as profitable an investment as the merchant has made in a long time.

CANADA'S ROSIN PURCHASES

In connection with the shortage of rosin and the tremendous increase in prices during the past few weeks the official figures as obtained from the United States Customs department show that Canada is a heavy buyer of rosin. In 1914 the importations amounted to 77,064 barrels of 280 pounds each. In 1915 the imports were slightly lower, and fell to 74,113 barrels. Then came the demand for more shells and the opening of munitions plants, and the imports of rosin jumped to 120,146 barrels. In 1917 the peak was reached, as many of the munition plants were not only buying for their immediate requirements, but for months ahead in order to have the goods on hand and not risk delays in shipments. The imports for 1917 totalled 172,576 barrels. The figures for 1918 were 129,070 barrels.

Before the war Germany was the biggest buyer of rosin, and in 1914 purchased from the United States 799,185 barrels.

CANADA'S PAINT IMPORTS

Official figures show that the imports of paints and varnishes into Canada from the United States for the month of June, totalled 22,710 gallons of mixed paints valued at $40,784, and 7,428 gallons of varnishes valued at $22,955. During the month there was imported also 1,027,000 pounds of zinc oxide valued at $91,657. During the same period the island of Newfoundland imported from American firms 2365 gallons of mixed American firms 2,365, and 1,264 gallons of varnish valued at $2,623. American firms sent to British India 2,117 gallons of mixed paint valued at $6,777, and 7,781 gallons of varnish valued at $18,825, and 100,621 pounds of zinc oxide valued at $9,472.

Are Profits a Crime?

WHERE is the venerable Chamber of Commerce of the State of New York, where is the comparatively recently begotten Chamber of Commerce of the United States, where are all the commercial and industrial bodies in this broad land that should raise their voices against the fast growing heresy that profits are a crime? When William Jennings Bryan wanted to make the people of this country believe that a bimetallic system of money was preferable to the gold standard, business men all over the land constituted themselves missionaries to overcome the heathen. Yet the silver-tongued Nebraskan's agitation for the double money standard was not one-tenth as insidious as is the doctrine regarding profits which is now being fostered by those whose income is fixed in the form of salaries or wages.

The suggestion that all articles leave the producer's hands with his selling price plainly marked on them, bears within its make-up germs far more dangerous to the body economic than all the Plumb bills that could be devised. If the retailer's or distributor's profit is to be regulated by publicity or by statute law, the next step must be regulation of the producer's profit. Could industry be laid low by chains and fetters more damning than such a process of proscribing profits?

Oh, this only refers to foodstuffs and necessities of life? What are necessities of life? The hook from which the butcher suspends a carcass is certainly essential to his business and the cost of that hook enters fully as much into the price at which he sells his chops, as does the cost of the meat itself. Therefore the hook must have the cost price stamped on it. And, by virtue of the hook being a life necessity, the iron from which it is made becomes such and the ore that goes into the latter, ditto. Ergo, the iron should be cost-marked and so should the ore.

When the wage earner insists upon a 25 per cent. bulge in his pay envelope, he is loudly acclaimed as a benefactor of the Nation with sufficient backbone to "get his." When his employer passes this increased cost on to the consumer, he becomes a profiteer.

It would seem that the time has come when business bodies all over the country should speak out and speak out loud. A law compelling producers to mark all goods with their cost proce to the retailer, is the first step toward putting all profit into convict's stripes. The utmost vigilance on the part of the country's merchants, manufacturers, and bankers is necessary lest in the hectic scramble for nostrums against the high cost of living the fundamental rights of business be not overturned. There is only one road out of the tremendous wastage the war has caused and it is marked: economy and thrift. Fantastic and therefore pernicious schemes and a still further aumented army of Government employes will not lead out of the darkness.—The "Daily Metal Reporter."

Merchant and Farmer are Teammates

How the Merchant Can Help the Farmer, and the Farmer the Merchant, and Both Aid in Building Up the Community in Which They Live—Some Interesting Viewpoints on a Very Vital Question

An address by Fred C. Middleton of the Social Service Council of Manitoba, delivered at the recent R. M. A. Convention at Brandon, Man.

FRED C. MIDDLETON, secretary of the Community Organization Department of the Social Service Council of Manitoba, dealing with the important and interesting question, "Merchant and Farmer—Community Team Mates," said:

Hopkins Moorehouse, in his very interesting book, "Deep Furrows," faces the question as to whether continued co-operation among farmers in the buying of household and farm supplies does not mean that the country retailer will be forced out of business. He maintains that such a result would be disastrous. "The country retailer," he says, "is pulling on the other end of the whiffletree with the farmer for community progress. Each is necessary to the other, and it is a vital matter if the co-operation of the farmer is going to kill off a teammate."

Team-mates! How true that is. Yet how little of team-work is actually done in most rural communities by merchant and farmer; how much of misunderstanding, suspicion and ill-will there seems to be, and what serious results are following such lack of team-work! The depopulation of the towns and villages in Manitoba has been going on for at least ten years—and that in spite of the fact that the area of land under cultivation and the number of resident farmers have increased. And, of course, the cities have increased their population, until to-day in an admittedly rural country we have 56 per cent. of our people living in four cities. The attractiveness of the social life of the rural centres suffers accordingly.

But what connection is there between depleted towns and villages and lack of co-operation between these community teammates, the merchant and farmer? A very intimate connection. The people move into the cities not only because of the attraction of the "bright lights," but because they get employment there. Now, it is evident that the city should be the transportation junction, the manufacturing centre, and the wholesale distributing point for the country, but it is not at all necessary that so much of the retail business of the country should be done in the city as is being done. It is the fact that so much of the retail business of the local community is done through city retailers that is forcing population out of the country town. Figures for the fiscal year ending March, 1917, show that in ten towns in Manitoba, none of which have a population of over 300, no less than $400,000 of business was done through the money order department of the Post Office. If we add a similar amount for the orders sent through banks and express companies we have the surprising total of almost one million dollars' worth of the retail business of the community transacted in the city instead of through the local merchant, an average of $100,000 per year for each little town. What a boost it would give the population of these towns if that million dollars of business were done at home, and what an impetus it would give to the place as a social centre!

Well, who is to blame for this state of affairs? Why does not more community business flow through community channels? The merchant is partly to blame. First, his business methods are often out of date and inefficient, especially in the matter of buying, bookkeeping, advertising, and displaying of goods. A recent survey conducted by a member of the University Extension Department revealed the fact that out of 591 merchants passed in review, no less than 80 per cent. were judged inefficient. Such merchants cannot expect "home loyalty" to overlook inefficiency. Second, the merchants, again, have not yet learned to co-operate with each other, and hence it is small wonder that they do not co-operate with the farmer. It is true that co-operative buying has been started on a small scale by some Manitoba merchants, but in too many places it is still the rule for three local merchants to each get in one-third of a carload of goods by local freight, instead of clubbing together and securing the advantage of carload lots. More co-operative buying must be done, too, by the wholesalers who supply these retailers. The mail order house buys the whole product of a factory—why should not two or three jobbers co-operate and do the same? If they did it would allow their retailers to compete with the mail order house in price. A third fault of some merchants is their unwillingness to meet the farmer half-way. Carload lots of apples, twine, salt, sugar, etc., could often be handled through the local merchant if he was willing to unbend a little. Many farmers will agree with H. W. Wood, president of the United Farmers of Alberta, in the following statement: "The local merchant gives us a local distribution service, a service which has to be given. . . If he will co-operate with us to put his business on a legitimate basis we are willing to quit trying to do business ourselves, for we want to farm, not to go into business."

But of these two team-mates for community progress, the merchant is not the only one to blame—the farmer also stands condemned at least on three counts. First, he is still very much of an individualist and is not yet willing to fully co-operate with his fellow-farmers. A case in point was the attempt made last fall to control the wages of harvest help. A maximum of $5 per day was agreed upon—but how did it work? Well, it did not work at all. What was the trouble, the outrageous demand of the harvesters? No, the failure of the farmers to stand together. I personally secured two men for a farmer friend and sent them out to Neepawa, engaged at $5 per day, but they never reached there. Why? Well, at some place along the line a farmer met that train and something like the following dialogue occurred between him and the Galicians I had sent out: "Where you go?" "I go Neepawa." "How much you get?" "Five dollars a day." "I give you five-fifty." "All right, mister, I work for you." Small wonder that such a farmer fails to co-operate with his local merchant; for mark you, it was the farmer, not the Galician who was to blame for that rise in wages. Second, the farmer is not fair, either, in the comparison he makes between local prices and those he receives through carload or mail order shipments. He wants to buy a dollar's worth of goods at carload prices and fails too often to add to mail order prices the cost of stamp, money order and freight. In the third place the farmer stands condemned because he often uses the merchant as a convenience for rush orders and fall credit, and sends out his cash to the city retailer.

So, partly because the merchant is to blame and partly because the farmer is to blame, community business fails to flow through community channels. As a result stores close up, people move out, and social life stagnates. No wonder under such conditions young people press into the cities. Can conditions be improved? Can the gulf be bridged between these two essential factors in rural life? I believe they can.

In the first place, the merchants must measure up to the demand for efficiency and service; more of them must take advantage of the salesmanship and other courses being provided by their own association and the university; they must stop "knocking" the mail order houses and copy their efficient methods; they must buy co-operatively and see that their jobbers buy co-operatively. If it is true, for instance, that a mail order house can sell retail at a lower price than the local merchants can buy wholesale, there is something wrong somewhere; and I fancy it is not with the mail order house, but with the local merchants and their jobbers. Finally, they must establish more cordial relationships between themselves and their customers. There must be some "get-together" agency through which farmer and merchant can learn to understand each other better and acknowledge their mutual inter-dependence.

Such a medium I believe will be found in the Community Club, which is a neighborhood organization through which farmers and merchants, and, indeed, all sections of the community, may learn the art of living together in the spirit of the second commandment and the golden rule. To love your neighbor as yourself, to do unto others as you would that they should do to you—that is the challenge that comes to you to-day. To sympathetically co-operate and unselfishly serve—that is the call of the new day.

The Community Club provides the medium through which this call may be answered, through which this challenge may be accepted. It is an organization that takes in the whole community, the basis of membership being citizenship. There are usually many other organizations in the town and district, but they are all sectional. The Board of Trade takes in the retail merchants and other business men, but excludes anyone else. The Grain Growers' Association takes in farmers only; the Home Economics Society takes in women only: the lodges recognize only initiated members who have taken the degrees and whose dues are paid up ;the churches appeal to those only who are members or adherents of their particular denomination. And so it goes—every one of these organizations, from its very nature, sectional; and, indeed, consciously or unconsciously, each acts as a divisive element. We seek to overcome this defect, and a glance at the picture of the community wheel will illustrate how we propose to do it. There are eight spokes in this wheel, representing eight factors in the average community. Hitherto these organizations have worked along parallel lines, each seeking to carry on their own work without much thought of their relation each to the other, or to the community as a whole. The Community Club movement seeks to have them move along concentric lines, all working toward a common centre, the good of the community. It seeks to remind the farmer, the school teacher, the merchant, the preacher, that while they may have a special work to do through their own organization, they are a part of the whole community, and must share in the community tasks.

The general work of the club is outlined in the duties suggested for the five standing committees—Public Forum, Better Business, Public Health, Young People, and Recreation. If these committees do their work properly the whole community will soon learn to "think together, work together, and play together," which is the slogan of the club. You will be particularly interested in the work suggested for the Better Business Committee. I will read that as it appears in the suggested constitution:

"This committee shall be composed of farmers and business men and shall take under review the following:

"(a) Local marketing conditions and possible improvements; good roads campaign.

"(b) The wisdom of establishing a flour mill, a creamery, a market garden, or any other local enterprise.

"(c) Better methods of buying and selling by the local merchants.

"(d) Better methods of fire protection.

"(e) Sympathetic co-operation between the farmers and merchants of the community.

"(f) Better credit facilities for farmers by local banks.

"(g) Helping men on rented farms to become owners."

Many of the suggestions outlined here have been attempted before, but the trouble has been that the attempt has not been made by farmers and merchants together.

That it is possible to get these teammates pulling together is shown by a reference to the personnel of the executive committees of fourteen out of the twenty-five clubs for which I have data. In these fourteen clubs there are eighteen farmers, fifteen merchants, eight preachers, eight bankers, six school teachers and three editors among the officers.

Team-mates? Yes, the farmer and merchant can be such, they ought to be such and here is a medium through which they may learn to become such.

Opportunities Being Lost Through Failure to Get Most Out of Advertising

RETAIL merchants in attendance at the Brandon convention of the Manitoba Association were thoroughly awakened to what they are missing by failure of Canadian manufacturers and jobbers to assist them with selling helps.

The jolt was administered by F. H. Mann, president of the North Dakota Retail Merchants' Association, who electrified his auditors with a talk on advertising in which he described the excellent co-operation being furnished merchants in the United States. He exhibited a great many posters that were being furnished to merchants across the line to be mailed to their customers, and to be used for window and store display. Practically all of these posters were printed in two or three colors and were so attractive in design and general make-up as to furnish a strong buying appeal.

Holding up a very classy poster put out by McDonald Bros., of Minneapolis, showing some striking illustrations of enamelware, Mr. Mann said: "This poster was originally designed to sell the merchant. When the firm sent one to me I was so struck with it that when I went down to the big city the following week I visited the firm and I told them that their poster had quite convinced me as to the merits of their goods, but what I was most interested in was how I was going to let my customers know about it. I suggested to them that they print 2,500 of the circulars with my name and the retail price upon them and furnish them to me at cost price. I promised to take two crates of their goods if they would do that. They said they had never done it before, but the idea caught them and I got the circulars. I featured the goods in the window with the posters prominently displayed; used a mat they gave me to advertise in the newspaper, and sent out the 2,500 circulars to my mailing list. We cleaned out the two crates very quickly, and I sent in my order for more. It was an education to that firm, and they immediately began to work this selling idea with other merchants. I bought 25 sets of dishes from another firm under the same arrangement of being furnished with handsome posters for mailing with such success that the scheme was immediately put into effect in the suburbs of Minneapolis, with the result that the merchants there purchased posters to the value of $1,200."

Mr. Mann went in to tell about the mailing list he has established for boys and girls, and in this connection exhibited another fine poster furnished by an eastern firm illustrating wooden things on wheels, such as kiddie cars, wagons, etc. When the boys got these posters, he said, they simply worried the old man until he came down and bought one of those carts. A boy thinks he is a real little man when he gets a personal letter from our store.

The speaker went on to display posters on sweaters, hardware and groceries sent out as selling aids by manufacturers and told of the cuts supplied free to merchants for newspaper advertising. He showed one circular illustrating a line of goods known as "Little Togs" for children, which he said brought in big returns. All of these circulars bear the printed name of the Mann store and the retail prices plainly marked. The impression given the customer was that these handsome circulars showed typical enterprise on the part of the store. There was nothing to indicate that they had been prepared by the manufacturer or jobber.

One large wholesale grocer produced and sent out to the merchant hundreds of four-page folders in July of each year bearing the inscription, "Harvest and Threshing Season Wants." The folder was printed on chrome colored paper, and carried a picture of a harvesting scene. It also carried the merchant's name, and a detailed list of goods marked at retail prices.

"There is not a town of 100 population in Western Canada where modern merchandising methods cannot be established," said Mr. Mann. "If they haven't got a newspaper they can mail out their advertising. I am a booster for the newspaper. It is the greatest business-getter we have, and I cannot understand why so many merchants are losing the wonderful opportunities afforded through this medium. I have a newspaper friend in a small town in North Dakota whose paper comes to me regularly, and one day I sat down and wrote him. I said, 'Charlie, for goodness sake take that big ad. off your front page that hasn't been changed for the last four months. If you don't it will ruin your business.'"

Mr. Mann showed a copy of the ad. referred to and published in a June issue of the paper. It read, "Our new spring stock is arriving every day, come in and make your selection." "That ad.," he said, "has been running since last March. It is a pure waste of space; I suppose the merchant is running it from philanthropic motives to help the paper.

"I am a strong believer in sales," said the speaker. "They liven up the store and they liven up the paper, for we advertise to the limit." He showed a number of two-page spreads that were used. In one of these sales this summer their Saturday receipts were $4,800. The mailing list is used to send announcements of these sales to hundreds of farmers, and mention is made of the fact in both ads. and circulars that an orchestra will be provided for the special occasion, with coffee and cake in the basement free of charge. One two-column spread on groceries bore the caption, 'No Profiteering Here.'"

Mention was made of the price cards used by the firm, all of them bearing the firm's name across the top. Mr. Mann also showed samples of several other kinds of advertising features, such as the advertisements on envelopes and labels.

The point was made that the advertisement must be backed up by properly decorated windows, and by dressing up the whole store, with the goods on sale placed out in the open bearing price-tags.

Finally Mr. Mann told how he was sold by the Western Union Telegraph Company on a scheme to advertise by wire. He was on his way to a Duluth convention, when a porter came through the train calling his name. A yellow telegram was handed to him, and he had visions of trouble. The telegram contained a specimen ad. for his firm, signed with his own name. He announced that this fall, when it is time to buy furs, he is going to send out telegrams to 100 of his best customers.

"We are in a fight for business," he said, in conclusion, "and we must get out and fight. There is no use to talk and holler about the mail order houses getting the business. The only way to do is go them one better and go after the business stronger than they do. You are on the ground and you have the advantage."

Advance is Made in Prices of Bevelled and Polished Plate Glass

For the First Time in Twenty-One Years Quotations Change—Higher Wages Being Paid Workmen—Ten Per Cent. Advance Also in Windshield Glass

DUE entirely, it is stated, to increases made in wage scales, advances in the price of plate glass for desk tops, door plates and similar purposes have gone into effect. This is the first time in twenty-one years that these prices have been changed. The new quotations are as follows: Bevelling 1½ in., 2½ cents per lineal inch; 1¼ in., 2 cents; 1 in., 1½ cents. Polishing edges 1½ cents per inch for ordinary sizes; grinding edges ¾ of a cent.

An advance which will approximate 10 per cent. has been made in wind shield glass. The new prices on odd lights up to twelve are 10 per cent off, and on twelve plates or more, 10 and 10.

There has been a heavy demand for glass for automobiles this season, and at the present rate of ordering it is expected the business may break all records.

THE CLERKS DEPARTMENT

Ringling Brothers Divided Work, But They Always Stuck Together

World's Greatest Showmen Were Sons of a Harness Maker and None Had Had Any Experience in or Knowledge of the Business—How They Worked Together and Won Out

RINGLING Brothers started their business career by giving shows in barns when they were children. There were seven brothers in all. They were sons of a harness maker at McGregor, Iowa, and none had any knowledge or experience in the show business.

From the very first it was team work that brought them success. They worked hard and each bore his share of all the work to be done. One of the most remarkable features of their work is the manner in which they have divided it, the result being that each brother has developed along entirely different lines.

John Ringling, who is the route agent for the shows, tells in the American Magazine of the career of the seven brothers as follows:

Team work and strict attention to every detail of the circus business has been the key to the success of the Ringling Brothers; that, and hard work, common honesty, and a close study of what the public wants, comprise all the trade secrets we have to reveal.

If there is anything in our lives or in our business that might help others, I am willing to tell it. What we know we have learned from others, and I am willing to give them back the benefit. Our education has been in the school of experience and necessity, and in the primary grades we had stern teachers. Perhaps it is well to explain that the older brothers educated the younger. Whatever credit is due probably consists in the fact that we had common sense enough to profit by the experience of all, rather than of one.

No Definite Plan

I do not know that in the beginning we had any theories or philosophy, or even any very definite plan. We lived in a small town, and had few opportunities to study amusements; yet I cannot recall when we were not giving shows or practising for them, trying to learn everything, from musical turns to equestrian acts. We held shows in barns, in tents, and vacant rooms. We worked hard at music, learning to play, after a fashion, upon every instrument we could acquire, as our first idea of entertainment was the concert. We had no real musical education, but "picked it up." However, love of music was inherent, and two of my brothers, Charles and Alf T., became accomplished musicians in later life.

Started Concerts

We started out as a concert troupe of boys, going to neighboring towns. All five of us played in the orchestra, four playing while the other in turn ascended the stage and did some act, such as juggling, tumbling, or singing. We called it the "Classic Concert Company," but soon changed it to "Ringling Brothers Comedy Concert Co." Even that early we discovered that there is something in a name, and that the public's chief desire is to be amused rather than uplifted.

Our big ambition was to own a circus, with beautiful horses. We loved horses in childhood. Circus paraphernalia, however, is expensive, and we were several years in acquiring sufficient apparatus and stock to start with a road show. Meantime we were working hard, being compelled to learn not only the acts but also the business part of such an enterprise—and the business part proved the harder; it is surprising to me, in looking backward, to recall the confidence with which we tackled anything and did it.

Franklin Was Right

We learned that Franklin was right when he said that if you want a thing done well do it yourself. We tried hiring professional agents, and the result at first was not happy. We discovered the importance of team work and that the hired agents would not pull together the way we brothers did. We learned that life is give and take, and that giving really is the bigger part.

In forty years, Ringling Brothers never have quarreled except that they have had some fine, old, brotherly rows over matters of policy, not one of which ever left a bad feeling, because we understood that each was thinking and working for the interests of all.

How They Worked

One thing which we agreed upon early was that majority rule should not prevail in all cases. We never believed that any three should ever force their dictates upon two. Often, if only one held out for an idea to which the other four were opposed, we would argue and try to convince that one; but if he insisted, we agreed to try his plan. The verdict usually was: "All right. We think you're wrong, but if you insist we'll try it."

If the plan succeeded we gave him the credit, and if it failed we said nothing about it. Not all have succeeded, but some of the biggest improvements and advances we have made have been the result of trying out some idea which, at first, the majority opposed.

Honesty Best Policy

The first big question we encountered was that of honesty. This may sound odd, but remember that we were green country boys going into a business which, at any time, was notorious. The grafter and pickpocket were parts of circus life. Many shows carried organized bands of such criminals to prey upon the people, and clashes between circus and towns-people were frequent. We determined from the first upon two policies—strict honesty, decent behavior and neatness; in fact, we spent a large part of our small capital for neat uniforms. Being honest was a matter of conviction rather than of policy. I doubt whether we realized the commercial worth of honesty and good reputation, but we all hated crooks and were determined to keep the show clean.

We were growing, accumulating stock and equipment and enlarging our traveling territory, producing a clean, high-class one-night circus, five of us taking active part in the performance or the management.

Growing Steadily

We had grown large enough for the big circuses to notice us, but we had no idea what a storm of opposition our stand for honesty would bring upon us. The grafters came to join the show, and we drove them off the lots. They started to fight us and had the aid of some of the great circuses. We were branded as "The Sunday-school Show." The big circuses attacked our routes, sent crews to harass us, and the grafters spread hand-bills over towns, headed, "When thieves fall out," declaring that we were opposing them because they refused to pay us a larger share of their loot.

Valuable Advertising

We capitalized their opposition and discovered that it was one of the most valuable bits of advertising we ever had. We discovered that we were getting a better class of workers with the show, more loyalty from them, and better work and appearance. Also, we discovered that we were welcome to play return engagements, and that our reputation for honesty made us welcome in opposition territory, where other shows were not liked because of their grafting methods. In other words, it worked out with us just as it does in any business.

The show was growing to be a large enterprise, and while at first we were jacks-of-all trades, able to do almost anything, from leading the band to doing an equestrian act, it became necessary to specialize and divide the work. We were some time adjusting ourselves and learning which of us was best fitted for certain departments. It may seem a large problem, yet with us it was simple; each of us took over the line of work he liked best; and it succeeded, because any man does better when he likes his work.

Had Complete Control

This specialization, of course, developed along different lines. Each assumed absolute control of his own department, and the others neither questioned nor criticized, unless asked for an opinion.

If I may be pardoned for seeming boastful, I should like to say that, in my opinion, Al was the greatest producing showman the world ever has known. He knew instinctively what the public would like or dislike, and his big success was in his ability to choose good features. In our earlier days, before we could afford to pay for the high-class attractions, we were, of course, handicapped, especially in the face of bitter and relentless opposition by the richer shows. Al clung to the idea of neat-

ness, clean performances and fast movement. In the circus business he had the idea of speed and "pep" which George M. Cohan brought into the theatres. With a dozen rather mediocre acts, by proper staging, by "doubling," and keeping the action fast and continuous, he made the show appear better than some of those which cost twice as much to stage. He invented, brightened up, and developed some of the most successful features known to the circus.

Knew His Business

It is a joke among the youngsters who love to try to "kid" us old fellows that, because of long experience in routing, I can put my hand out of a car window at night, feel the air, and say, "Six and a half miles from Abilene," while Al frequently was known to inquire what city we were in after the tents were up. There is truth in the joke. Each man concentrated upon his own words and "kept off" the others; consequently each man dug in and learned his own work thoroughly. My training was largely in routing, and in the old opposition days, when shows fought for territory, and when the big fellows tried to starve us out, knowledge of railroads and routes was a big help. I learned my geography that way; and Charles still insists that I am able to name the counties of any state in the United States, and, if a county is named, to name the county seat, the road leading to it, and the license fee.

Full of Thrills

In what we refer to as the "opposition" days, circus life was full of thrills. It was real warfare against powerful enemies, a fight for existence on our part. After we began to grow and develop our new policy of honesty and clean shows, the big fellows fought us hard, routing their larger shows over our territory, destroying our billing, and carrying on a "campaign of frightfulness." Charles had charge of "opposition," and as a tactician he seldom was beaten.

A Constant Fight

One of their favorite means of "knocking" was to slip into our parade a "perambulator," a wagon with large signs announcing that we were a nice little show, but to wait for the big show next week. It was a constant fight to prevent the perambulator from getting into our parade, and Charles was a genius at such prevention. Once he quietly spread the word over a town that he would give a five-dollar gold piece for each nut off the perambulator; when it started to join our parade that perambulator fell to pieces like the one-horse shay. On another occasion some of the men greased saws, and sawed its timbers, so that at the first heavy jolt it collapsed in a heap. Another time, the opposition hid the wagon out in the country. Charles learned which road it would take, and fixed a bucket of green paint with a hose and force pump under a bridge. When the wagon started to cross it our men pumped and squirted paint until all the lettering was obliterated.

Got Little Results

Incidentally, such unfair fighting never profited the opposition to any great extent. In fact, it aroused sentiment in our favor. It is a question in my mind now whether it would not have been better policy to permit the perambulator to parade with us, and rely upon the sense of fair play of the American public. It is hard to see it in that light, however, when you are fighting for existence.

This experience had its effect upon us: When Ringling Brothers came to be the big show, we went to the other extreme and decided that it was best for ourselves and for the good of the entire business to encourage every circus that was clean and inclined to follow our policy of honest dealing with the public. We even aided in supplying them with acts, and in rearranging routing so that we would not conflict seriously to their detriment, and, in return, many of them helped us by developing new acts and by lifting the standard of the business.

Lure of the Circus

The psychology of the circus really is simple: Our appeal is to the elemental instincts, to the child that is in every man. What they call "the lure of the circus" is merely the great, unexpressed yearning of every human being to be young again. The circus is a drop of water from Ponce de Leon's spring. It takes people back to childhood for two hours, and makes them boys and girls again, makes them forget as nothing else will do. This fact accounts for many seemingly contradictory features of the circus. The humorists make fun of the man who borrows a small boy to take to the circus; to us in the business this is not funny. We see two things in it—the universal protest against growing old and the desire to give pleasure to others. A man or a woman enjoys the circus because the child enjoys it. Their great pleasure is in giving the child pleasure. The great pleasure of a circus man is that he gives pleasure to others.

Back to Childhood

Men and women approach a circus in the spirit of throwing away age, and becoming the child for an hour or two. You never see men dress up to go to a circus; they put on their old clothes. Many of them would pay ten dollars for the privilege of crawling under the canvas; they are coming to revive childhood memories and pleasures. The grown man is our best press agent and publicity man; the supposedly sedate head of the house is the first to see the circus posters. The first thing, when he reaches home, he tells the kiddies tha tthe circus is coming to town; he tells them of the circuses he saw when he was a boy; how he crawled out of the bedroom window, shinned down the porch pillar, and went out to the junction to meet the circus train; how he carried water to the elephants to get in; how he crawled under the canvas one time.

That man is going to the circus, and he is going to take the kiddies—his own or someone else's. and he is going because the circus, of all forms of amusement, appeals to the elemental in man. I have been asked what things appeal to people in different parts of the country. The answer is that what appeals to the public in New York strikes just as close to the hearts of the people of Oklahoma.

Like Same Things

Among our best patrons are the Chinese and the Indians, and they are pleased by the same things. The negro of the South enjoys the clowns; he shows the child mind most clearly. The Indian and Chinese appear stolid and do not express their emotions; but deeds of skill and horses appeal to them most. I remember one experience with Indians in Oklahoma. One of the rich chiefs reserved seats for his entire tribe, and he hired every vehicle in the town to haul them to the circus. He even got the town hearse, placed a rocking chair inside, and, sitting in the chair, led the procession, which outrivaled ours.

In recent years, I have been asked often whether the circus will be modernized, whether the universal use of the automobile will change it. It never will be changed to any great extent, because men and women will always long to be young again. There is as much chance of Mother Goose or Andersen's Fairy Tales going out of style as of the circus altering greatly. If we desired to change it, the people would not permit it.

Clowns, elephants, pretty ladies in fluffy gowns riding white horses. That is the circus.

Boy Gets Excited

You are not convinced? Watch a father when he breaks the news to his little son that the circus is coming. He takes him on his knee and tells the news. The boy is excited. He wants to hear all about the circus. What does his father tell him he will see?

Clowns. That is first. The elephants—g-r-e-a-t big elephants. Pretty ladies riding white horses.

So while there are children, the circus will be clowns, elephants, and pretty ladies on white horses. We may bring in other attractions—the thrillers, the pomp and parades, the amazing feats of skill and daring to please others; but without clowns, elephants, and pretty ladies on white horses it would not be the circus, or the real American amusement.

All Like Elephants

The elephants, of course, are the great animal attraction. It is because they are big, and bigness appeals to the child mind; they are bigger to a child than they are to a grown person, largely, I think, because a boy three feet tall, looking up at the huge animal, sees it at an angle that makes it appear larger than it really is. Elephants excite a kind of awed admiration; tigers, the sense of smoothness, stealth; lions, the respect of majesty.

The chief interest in animals, after the elephants, is in the sea lions, which arouse amazed admiration by their seemingly human intelligence. Just what the psychology of this appeal of the sea lion to the human is I am uncertain—surprise and amazement, I believe. We know, however, that the seals are great centres of interest, and that people never grow tired of watching their tricks. Monkeys are and always will be the chief attraction to the children and to human beings with the child type of mind. It is much the same appeal as that of a baby.

Horses Always Popular

As to horses, there exists in the human mind a love and admiration for the horse that is almost beyond comprehension. There is some psychic connection between the human and the equine animal, which is perhaps inherited. I have found but one class lacking in this love of the horse, and they are a certain people in New York; upon inquiry I learned that in their native land the horse is practically unknown. Quite recently, a returned officer of artillery in whose command were many of these people, informed me that they would as lief go into a cage of lions as into a corral filled with horses. Not knowing the horse, they fear it.

It is largely because of this universal love of horses that Ringling Brothers have opposed the idea of motorizing the circus. Looking further, we know that, within a short time, the horse will be almost as much of a curiosity to the public as the giraffe was a generation ago. Do you realize how few of the new generation ever have seen a four or six-horse team? Our circus horses, which, of course, are selected with the greatest care, are almost as much of an attraction, either in a city or in the country, as are the rare animals collected from all over the world to form the educational feature of the shows.

Want Human Interest

Besides that, we do not believe that people want to see machinery in motion when they come to a circus. They want the "human interest." If they love machinery, they will go to a mechanical exhibit. They want to see a big, sweaty, brawny men performing feats, whether of strength or of skill and daring; the crowds which watch the erection of the big "top" would be disappointed if the poles and canvas were to be lifted by machinery; they gather to watch and admire the skill and strength of men.

People come to a circus in a mood different from that in which they approach any other amusement, possibly excepting base-

ball; circus crowds are proverbially the best-natured in the world, for men and women who come to a circus leave all care and worry at home. They are kids again—excited, good-natured, seeking a chance to laugh either at the show or at each other. All the jostling, the rough handling, the pushing, the jamming, and discomforts are part of the day's fun. They are kids again, and no kid objects to being jostled or jammed in a crowd. They will scramble at the ticket wagon, fight to reach the entrance, laugh at torn clothes and wilted collars. If the doorkeeper grabs a man and shoves him down the right passage, he does not get mad. At a theatre he would want to fight; but at a circus he grins. It is because he is playing boy again for a few hours.

The Great Objective

In the performance you will discover; if you analyze the acts, that in practically everything the circus man is playing to this child-interest in grown people. We understand that men and women are there to forget care, and therefore strive to avoid anything that might tend to suggest anything unpleasant or bring back any sorrowful memories. No act that might suggest accident or injury is permitted.

You may recall that for years the circuses strove to secure the most exciting "thrillers." It was said that the nearer a man or woman came to breaking his or her neck the higher the salary. Now you may observe that, to a great extent, the dangerous and seemingly dangerous acts have been cut out. This is because we discovered that at the climax of such acts four out of five of the women and children turned away their faces and refused to look.

Are a Clan Apart

Showmen, whether performers or employees, are a clan apart from all others. We believe they are broader, more liberal and freer than the average American, and we know that they are intensely American. This is partly due to the rough outdoor life, the hard work, and the absence of temptations to a softer life. Partly, too, it is due to the broadening effect of meeting and seeing hundreds of thousands of people, and unconsciously studying life in many localities. Morally, circus people are perhaps the cleanest class in the world, probably for the same reasons. The life they lead brings them into close, almost family, relations, the boys and girls marry young, and one generation trains the next in the acts.

No False Pride

One thing which perhaps would surprise the outsider is the entire absence of any false pride. Their pride in their work is remarkable; but there are no false ideas. This may be partly the results of the old training, when everyone "doubled in brass." They learned to help one another, to do any work that was necessary. The highest paid artist feels not the slightest hesitation about helping with the canvas, or doing any other work, if it is for the good of the show. In a way, a circus becomes a sort of commune, each member trying to help the other. I have seen a man, ballet master of the Metropolitan Opera in winter, but with us in summer, jump into a mud-hole and put his shoulder to the wheel of a mired wagon. Ernie Clark, who perhaps is the greatest aerialist ever developed, head of a family of remarkable performers, hold hoops for the equestrians to leap through. Our highest-paid publicity men do not hesitate to seize stickers or paste pots and work as bill-posters, if an emergency demands such work.

Extremely Loyal

Part of this is the result of tradition and training; but we feel, also, that much of it is loyalty to the organization and to us. Our men and women are extremely loyal, and this is probably due to the fact that we have kept close to them, and are sincerely interested in them and their welfare. In fact, I think that a great bulk of all labor troubles could be eliminated if employers kept closer in contact with their workers. Employers should have an interest in those associated with them, and when workers feel that the boss really likes them, and is concerned with their welfare, misunderstandings are avoided.

The respect of the trouper for women is almost beyond belief. It is much of the same spirit that is seen in the Western outdoor man, and probably is the result of knowing so few women intimately. If you were to take the finest lady in the land on to a circus lot and introduce her, say, to a boss hostler in rough clothes, and perhaps dirty, he would greet her with a deference and a dignity that would impress her because of its realness.

May I be pardoned for speaking thus of our people? But I feel justified in doing so, because I admire them and know what they are.

Of Vital Importance

The business end of a circus is, of course, vital. The expenses are extremely heavy, especially in these days of high cost. Every detail must be carefully watched; minutes count in huge sums, and efficiency is at a premium in every department. I have heard it remarked that there is a great leakage and extravagance. One expert declared that we waste thousands of dollars on telegrams alone. The truth is that what he calls leakage is not wastage. We have a habit of sending long telegrams running into hundreds of words. It is expensive, but not waste. We send such telegrams to save time and delays. Our business is in constant motion. But beyond saving time, our object is to avoid mistakes. The average person who sends a telegram counts words, and often skeletonizes to save pennies. He takes the risk of not making clear his meaning. We send letters by wire, and if we avoid one such mistake a year it pays.

A Good Policy

Another point we long ago settled upon is that, whenever one of the Ringlings employs a person, none of the others will discharge him for any reason. The man who hired him is entirely responsible, and must deal with the situation himself. The acceptance of such complete responsibility has been a good thing for each of us, causing us to exercise more care than perhaps we would have done otherwise; and it certainly has avoided any chances of clashes of authority.

Further than that, we never permit personal likes or dislikes to enter into business relations with our employees. I am conscious that we have violated this in permitting personal likes to control our moves sometimes; but dislikes do not count. If a man is efficient, is valuable to the organization, and considered the best person available for a certain position, he holds the job.

Insist on Honesty

I have spoken elsewhere of our policy of honest dealing with the public, and perhaps some may criticize the statements, and argue that we are not strictly honest in our advertising, especially on billboards. Such a charge would be unwarranted. We insist upon honesty, and never have—nor ever shall—advertised any attraction that is not shown. But, you may charge, the billboards exaggerate. That is true, and there is a very simple reason for this: The public likes and demands such exaggeration, and the flamboyant language of the posters fill this demand.

Unique Language

The language of the circus poster is unique. Originally it was the result of opposition shows, striving to outdo one another in startling announcements. Charles, who is the greatest scholar in the family, and an authority on words, created a new vocabulary and the style caught public fancy. We understand now, although we did not at the time, that we had struck upon the child-appeal in another form. All children, and all primitive minds, love big words, and love exaggeration. The boy who sees four dogs in the backyard invariably says there are a thousand dogs out there. When he offers to bet, he always wants to bet a hundred million billion dollars. He is not striving to deceive, but to express bigness in his own way.

The circus posters do the same thing: there is no effort to deceive the public—but to express the hugeness of everything in figures that carry the idea. If we have fifty elephants, and say a hundred, it pleases rather than offends. On circus day, everybody wants to think and talk in big figures, because on circus day we are boys and girls again, and we want to believe that there are a hundred million trillion elephants in the parade, and a billion funny clowns, and the whole bushels and bushels of beautiful ladies on white horses.

"SHARPEN YOUR SAFETIES ON A HIGH-C NOTE!"

Hale Does It That Way and He Says That It Works

Cleveland, O.—"Clear as a bell" is a phrase that copy-writers for phonographs have been partial to for some time past — but "sharp as a razor" is a simile that they would never dare use, lest some grand opera singer secure a little free publicity through the medium of a libel suit.

Claude C. Hale, a local hardware man, hasn't the least objection, however, to leaping in where advertising angels fear to tread, for he has made the discovery that "High-C" records make exceptionally good honing surfaces for razors.

One day recently Hale had the misfortune to break his regular machine for sharpening safety razor blades and, as luck would have it, a customer came in a few minutes later with a bunch of blades that he "just had to have sharpened that afternoon," for he was headed vacation-ward.

Hale didn't say a word, but he did a lot of thinking. Then the hunch struck him: Why not try the blades on the phonograph? So he slipped on a grand opera record, held the bit of steel against the revolving disc and let 'er run. When the record had made about as many revolutions as Mexico stages every hour—a couple of dozen, to be precise—Hale removed the blade and tested it against his thumb-nail. "Fine!" he exclaimed, "That's better than I could have done with my regular machine."

Now he's getting a lot of publicity for his advertisements announcing that he "sharpens safety razor blades in high C—every one guaranteed to give a Galli-Curci shave." He doesn't mention, however, whether the use of a blade so sharpened will reproduce the notes of the original record.—"Retail Public Ledger."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

BOTTLE CAPPING MACHINE

The Use-A-Septic bottle-capping machine, manufactured by the Aseptic Manufacturing Co., Davenport, Iowa, will, it is claimed, cap any sized bottle neatly, quickly, and effectively. It is stated that it is of simple design and very easily operated. For capping bottles

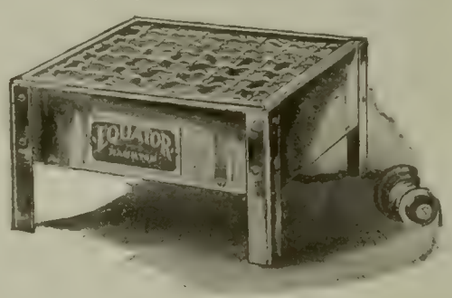
Bottle Capping Machine

containing home brew, catsup, grape juice, or beverages in the home, it is stated that the Use-A-Septic capping machine is invaluable and that it will eliminate inconveniences such as broken bottles, bruised hands, leaky corks, etc. The machine will cap either pint or quart bottles.

WRENCH SET

The Sexto wrench set, it is stated, is a set of distinctively thin wrenches made for special purposes, and all made of steel 1-10th of an inch thick. The set consists of six double-end wrenches, giving twelve different sizes. It is stated that they will be found handy for adjusting magnetos, valve tappets, generator parts and other bolts and nuts found on autos. They may also be used for motor cycles, bicycles, sewing machines and other purposes. It is

Sexto Wrench



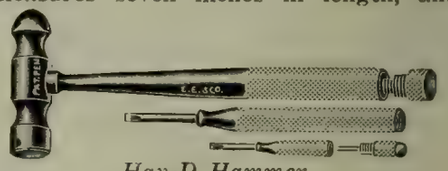
stated that they are highly polished and nickel-plated all over and are very handsome in appearance. The smallest wrench is 2½ in. long and the largest 4½ in. A knurled head thumbscrew holds the wrenches together when they are not in use. Sexto wrenches are manufactured by E. Edelmann & Co., 341 East Ohio Street, Chicago.

DOOR CHECK

The Jobson liquidless door check, manufactured by the Liquidless Door Check Company, 564 Randolph Street, Chicago, contains no oil or liquid, and it is claimed, closes doors with quiet, smooth action in varying temperatures without readjustment. The resistance, it is stated, is low, and it is claimed it may be easily opened by a child. It is also claimed that it is compact and light, and that once it is set it requires no attention. The Jobson, it is stated, never corrodes or sticks. The alignment bearing, it is stated, is extra long and well supported, and the pistons are machined and fitted to cylinders, preventing air leakage. The expanding friction brake, it is stated, is on the automobile internal expanding brake principle. Dry lubricant is used for all parts, and it is stated that no oil is required.

TOASTER STOVE

The "Equator" toaster stove manufactured by the Equator Mfg. Co., of Hamilton, Ont., is operated electrically, 5 amperes 110 volts, and will, it is stated, boil, toast, fry, roast, stew, etc. Ordin-



Equator Toaster Stove

ary cooking utensils may be used, and it is claimed that the "Equator" is as efficient and reliable as the highest priced stoves procurable. "Equator" heating units, it is stated, are exchangeable and are made from the highest grade nickel chromium resistance wire. The whole stove, it is stated, is substantially built of steel and finished in polished nickel. The stove, it is claimed, gives a great heat economically and is approved by the Hydro-Electric Power Commission of Ontario.

HAMMER

The "Han-D" hammer, manufactured by E. Edelmann & Co., 341 East Ohio St., Chicago, is useful, it is stated, around the automobile, in the garage, and in the workshop. It is stated that it is nickel-plated and polished all over, measures seven inches in length, and

Han-D Hammer

weighs ten ounces. The three screwdrivers which are nested inside of the handle, are, it is claimed, good serviceable screwdrivers, with blades of high-grade tool steel, and all parts polished and nickel-plated. The outfit, it is stated, is very useful and practical around the home for making small repairs and adjustments.

SOLDERS FOR ALUMINIUM

Discussing solders for aluminium, the Technical Supplement to the "Review of the Foreign Press" says:

All metals or combinations of metals used for soldering aluminium are electrolytically electro-negative. A solder joint is therefore rapidly attacked and disintegrated when exposed to moisture. (2) Joints should not be made by soldering unless they are protected by paint or varnish or unless they are so heavy that corrosion and disintegration near the exposed surface would be of little consequence. (3) Solders are best applied without flux after preliminary cleaning and tinning of the surfaces. Suggested ranges of composition for the solder are as follows: Tin-zinc solders, tin, remainder; zinc, 15-50 per cent. Tin-zinc-aluminium solders, tin, remainder; zinc, 8-15 per cent.; aluminium, 5-12 per cent. (4) The higher the temperature at which the tinning is done, the better the adhesion of the tinned layer. Perfect union between solder and aluminium is very difficult to obtain. (5) The joint between tinned surfaces may be made by ordinary methods and with ordinary soft solder. Only the tinning mixture need be special for aluminium. (6) There is no reason why a good solder for aluminium need be brittle, as several commercial varieties are. (7) The tensile strength of a good aluminium solder is about 7,000 lbs. per sq. in., the strength of a joint depending upon the type and upon the workmanship. Much dependence should not be placed on strength of the joint.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ONE of the most important changes in some time is that announced this week on harvest tools. A new discount has been issued which provides for a net advance of about 7½ per cent. over former levels. The new price is immediately effective and applies, it is understood, on booked orders for next season. Higher prices on wood handles along with advanced production costs, due to increased wages for labor, are factors contributing to this change.

Kindred lines affected include scythes, which are up 75c per dozen, reaping hooks up 25c per dozen and hay knives which are up 75c per dozen.

A general revision upward is apparent also this week in hinges and butts. Light, heavy and corrugated tee and strap hinges have advanced and similar results are shown in quotations prevailing on wrought steel butts, both plain and plated.

Turpentine is again to the fore this week and advances in the markets to the south have been rapid. The net advance for the week in the south is 17c per wine gallon and locally 10c per Imperial gallon. Outside interests are again active buyers and that new record levels will be reached seems quite possible. Supplies are none too plentifud and jobbers generally are confining their sales to five-gallon lots.

Linseed oil shows little change during the week, though some factors report a slight decrease. Lower priced seed has not brought about a corresponding decline for the reason that there is little or no seed available. The feeling prevails that before the new crop of seed is harvested, there may be a distinct shortage result.

Pipe fittings have joined the list of goods to reach higher levels, new prices being issued on malleable and cast lines. Wrought pipe is firmly held and so are boiler tubes. There is some slight talk of a higher range of prices on bars though no change has actually been made.

Leather belting has undergone a further revision upward in new discounts just named, which is a reflection of the strength in the market for this class of goods.

MONTREAL MARKETS

MONTREAL, Aug. 28—There are many changes in the prices on staples this week, with a good, steady stream of orders reported on most lines. All the manufacturers and jobbers are optimistic as to fall trade conditions and there seems to be little or no chance of any decreases being made. Money seems free and easy, and cash sales plentiful among the trade with accounts coming in fairly well and a lot of discounts being taken advantage of.

Most of the increases run from five to fifteen per cent. with no outstanding feature other than the change on harvest tools, which are higher for 1920.

The retail dealer in Montreal seems satisfied that there will be no great falling off in prices for Christmas goods and is buying plentifully for his needs and stocks.

Blacksmiths' Tools Register an Advance

Montreal.

BLACKSMITHS' TOOLS.—An increase in the prices of blacksmiths' tools is shown this week, the Vaughan and Bushnell line being the one particularly affected by this change.

Hinges, Rules, Levels Climb Ten Per Cent.

Montreal.

HINGES, RULES, LEVELS.—These lines are up 10 per cent. This change will include, it is said, all of the Stanley Works line and the Lufkin line. This price is effective right away.

Pipe Fittings Show Further Advance

Montreal.

PIPE FITTINGS.—Malleable and cast fittings including unions, flanges, plugs, bushings, etc, have undergone a further revision in price this week, though new quotations named are not yet available. The new quotations will provide for an advance.

Hinges, Hasps Revised Upward

Montreal

HINGES, HASPS. — Revised prices have been issued by the manufacturers on light tee and strap, heavy tee and strap, and corrugated tee and strap hinges this week. The new quotations made to the trade should be available in another week or ten days, and will show advances. Hasps have been revised upwards also.

New Prices Announced Freezers and Choppers

Montreal.

FREEZERS, CHOPPERS.—On orders for freezers for 1920 an advance on the list is being quoted, which will show an advance of upwards of 10 per cent. The Enterprise line of food choppers are quoted, new prices to-day being: No. 5, $45; No. 10, $70; No. 12, $65. All parts are up from 5 to 15 per cent.

Harvest Tool Prices For 1920 Announced

Montreal.

HARVEST TOOLS. — The new

schedule of prices on all harvest tools for 1920 show an increase of about 7½ per cent. on all lines with one or two exceptions, which run up to 15 per cent. Scythes, reaping hooks and hay knives have also moved to higher levels along with the various lines of harvest tools.

Cordage Situation Remains Steady

Montreal.

CORDAGE.—The manufacturers state to HARDWARE AND METAL that the sales are steady and the prices firm, although jute is excitable among the raw materials but nothing to affect the prices as quoted last week. The holiday season breaking in has caused no other fluctuation. The prices holding are: Pure manila per pound, 32c; beaver or British manila, 28c, and sisal 25c.

Building Papers and Materials Firm

Montreal.

BUILDING PAPERS.—Manufacturers report a steady amount of business with prices remaining firm. No immediate reduction is looked for; a fair amount of construction is in prospect.

Most Steel Lines Hold Firm, Good Market

Montreal.

IRON AND STEEL.—The manufacturers report an active market with plenty of offerings of raw materials and the prices hold firmly at last week's levels. The following prices maintained:

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond tool steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Galvanized and Black Sheets Remain Same

Montreal.

GALVANIZED AND BLACK SHEETS.—The sale is a little heavier, due to the trade anticipating another increase. All prices remain the same with a slight upward tendency in English standards, but the jobbers are not quoting higher at time of going to press. An advance of a cent or two in these lines, it is indicated, may be looked for next week.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$5 50	$6 25
12 gauge	5 55	6 20
14 gauge	5 60	6 35
16 gauge	5 70	6 50
18-20 gauge	....	6 35
22-24 gauge	....	6 40
26 gauge	6 45	6 50
23 gauge	6 75	7 00
GALVANIZED SHEETS—		
U.S. Standard—		
10¾ gauge	$8 35	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00
English Standard—		
28 gauge	....	8 35
26 gauge	....	8 10
24 gauge	....	7 40
22 gauge	....	7 30
18 and 20 gauge	....	7 00

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Prices Remain Unchanged

Montreal

LEAD PRODUCTS.—The prices show such little change that the manufacturers announce same prices at time of going to press, but slight changes are looked for from time to time.

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	15%
Lead wool, lb.	0 13
Lead sheets, 3 to 3½ lbs., sq., ft., lb.	0 12½
Lead sheets, 4 to 8 lbs., sq. ft.	0 09½
Cut sheets ¾c lb. extra, and cut sheets to size, 1c lb. extra.	
Solder, guaranteed, lb.	0 37
Solder, strictly, lb.	0 32¼
Strictly, commercial, lb.	0 31½
Solder, wiping, lb.	0 29½
Solder wire (8 gauge)—	
40/60	0 56
45-55	0 38¾
50-50	0 41¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Old Materials Slow; Steady Prices

Montreal

OLD MATERIALS.—The dealers report but little trading with prices firm. The outlook for the fall is just a little doubtful with an increase in prices remote. If demands stiffen to any appreciable extent then a cent or two would very likely cover the change. The following prices remain unchanged:

Dealers' Buying Prices—		
Pipe scrap, ton	....	8 00
Stove plate, ton	14 00	15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08
Overshoes, lumbermen's rubber boots	....	0 05
Overshoes, etc. (trimmed)	0 05	0 06
Bicycle tires	....	0 03½
Automobile tires	....	0 04
Yellow brass	0 09	0 10
Red brass	0 15	0 16
Light brass	0 07½	0 08½
Scrap zinc	0 05½	0 06
Light copper	....	0 15
Heavy copper	0 17	0 18
Wrought iron, No. 1, per gr. ton	....	15 00
Malleable scrap (ton)	....	15 00

Metals Show Little Change This Week

Montreal.

INGOT METALS.—The various lines are steady enough for this time of year and the quotations show but little fluctuation.

COPPER.—Sales are fair at 26c per pound, with supplies to take care of demand.

TIN.—A slight downward tendency is noted and this metal is quoted at 60c. No shortages in stocks noted, with but fair demand.

SPELTER.—More or less dead tone to the trading in this metal with prices running around 10c a pound.

ANTIMONY.—No change in the prices which are 10c to 11c, with quiet tone to the trading. Supplies hold good and satisfaction expressed among jobbers.

LEAD.—The trading is increasing a little on this metal with the prevailing price of 7¼c per pound held. Supplies are good.

ALUMINUM.—Price holding at 35c per pound, with trade anticipations better. Supplies are very fair.

TORONTO MARKETS

TORONTO, August 28—Firmness is generally evident in the markets these days and advances during the week have been shown in new prices issued on corrugated tee and strap hinges and light and heavy tee and strap hinges. Wrought steel butts have also moved upward as well as plated butts. Harvest tools show an advance approximating 7½ per cent. and kindred lines to be affected similarly are hay knives, reaping hooks and scythes. Pipe fittings have also moved upward. Business is considered very good.

Harvest Tools Advance About 7½%

Toronto

HARVEST TOOLS.—Due, it is indicated, to the higher prices asked for all kinds of lumber, and particularly the better grades, combined with higher production costs as a result of increased labor charges, there has been an advance reported this week in the price of harvest tools. A new discount which is being named to the trade is 12½ per cent. on Welland Vale, Maple Leaf, Bedford and kindred grades, with the Samson quoted at 7½ per cent. discount from list. There has been no change reported in the standard list prices.

Scythes Show Advance of 75c Dozen

Toronto.

SCYTHES.—An advance approximating 75c. per dozen is shown in the new prices which have been issued to-day on scythes. This is largely a result, it is stated, of higher production cost, and figures which are now prevailing to the trade are given as follows: Cast steel, per dozen, $15.75; Golden Clipper, $16.75; Samson, $18.00; Little Giant, $17.75; Cast Steel Lawn, $15.75; Little Giant Lawn, $16.50; Cast Steel Bush, $16.25; Little Giant Bush, $16.75; Cast Steel Cradle, $18.50. It is understood that these prices are immediately effective and apply also to booked orders.

Higher Prices Named on Reaping Hooks

Toronto.

REAPING HOOPS.—Quotations on reaping hooks are under revision this week and the new prices which are being quoted to the trade show an advance approximating 25 cents per dozen. On the present basis the prices which are being asked are for the No. 2, $4.40 per dozen; No. 3, $4.50; No. 4, $4.60; Little Giant, $6.25; and Barden, $6.25.

Hay Knives Register an Advance

Toronto.

HAY KNIVES.—In line with the advances which have been reported on kindred lines, such as scythes and reaping hooks, there has been an advance made in the price of hay knives this week. The prices which are prevailing to-day are for the Lightning, $13.25 per dozen; Heath's, $13.25; and Spear Point, $14.75.

Picture Wire Moves Upward

Toronto.

PICTURE WIRE.—Revised prices have been issued on picture wire this week, which is an advance over the levels which have been ruling previously. The new quotations now being quoted to the trade are for No. 0, 90c per dozen; No. 1, $1.40; No. 2, $1.90; and No. 3, $2.45. Prices on the No. 50 are now ranging at 50c a dozen; No. 51 at 60c and No. 52, at 70c.

Revised Prices Named on Hinges

Toronto.

HINGES.—There has been a revision upwards this week in the price of heavy tee and strap hinges, light tee and strap hinges, and corrugated tee and strap hinges. Quotations which are prevailing on some of the more popular sizes are reproduced herewith:

Heavy Tee Hinges—8 in., $3.90 per dozen pairs; 10 in., $6.90; 12 in., $11; 14 in., $11.20.

Heavy Strap Hinges—4 in., $2.85 per dozen pairs; 5 in., $3.50; 8 in., $5.20; 10 in., $9.10; 12 in., $11.25, and 14 in., $12.90.

Light Tee Hinges—3 in., 95c per dozen pairs; 4 in., $1.05; 5 in., $1.20; 6 in., $1.45; 8 in., $1.70; 10 in., $2.25.

Light Strap Hinges—3 in., 95c per dozen pairs; 4 in., $1.12; 5 in., $1.30; 6 in., $1.60; 8 in., $2.35; 10 in., $3.30.

Corrugated Tee Hinges, No. 937—4 in., $1.85 per dozen pairs; 5 in., $2.55; 6 in., $3.10; 8 in., $5.30; 10 in., $7.85.

Corrugated Strap Hinges No. 935—4 in., $1.55 per dozen pairs; 5 in., $2.10; 6 in., $2.70; 8 in., $4.35; 10 in., $6.55; 10 in., $10.20.

Revised Prices on Hinge Hasps; Up

Toronto.

HINGE HASPS.—Quotations are under revision this week on hinge hasps, and the new prices which have been named show an advance over former levels. New quotations which are now in effect are for the 3-inch, $2.00 per dozen; 4½ inch, $2.30; 6 inch, $2.60; and 8 inch, $4.00.

Three Dollar Jump in Wheel Barrows

Toronto.

WHEEL BARROWS.—There has been a revised price named this week on heavy wheel barrows with steel wheel, these showing an advance of $3.00 per dozen, now being quoted at $63.00 per dozen.

Wrought Steel Butts Go Higher

Toronto.

WROUGHT BUTTS.—In line with the changes which have been made on other lines of hinges, new discounts have been issued on wrought steel butts. The basis on which prices are now being figured for these lines is as follows: No. 800, add 7½ per cent. to list; No. 838, 5 per cent. discount; No. 840, net list; and No. 804, 12½ per cent. discount.

Advance Recorded in Plated Butts

Toronto

PLATED BUTTS.—Quotations just to hand on plated butts, which include antique copper and plain bronze finishes, show a change to higher levels. The basis of quoting, which has been adopted on this market, is for the No. 241, 2½ x 2½ inch, $4.55 per dozen pairs; 3 x 3 inch, $4.65; 3½ x 3½ inch, $4.75; 4 x 4 inch, $6.30; 4½ x 4½ inch, $9.20; and 5 x 5 inch, $11.35.

Pipe Fittings on Upward Move

Toronto.

PIPE FITTINGS.—An advance is shown in the new prices which have been named on pipe fitings and the quotations which are prevailing to-day are for the malleable, class B, black, 26c. per pound; class C, black, 17c; class B, galvanized, 36c; and class C, galvanized, 26c. Malleable and cast bushings are now being quoted at 22½ per cent. from list; unions at 37½ per cent. discount from list, and plugs at 20 per cent. discount from list.

Brass Butts Move to Higher Levels

Toronto.

BRASS BUTTS.—New discounts have been named on brass butts which provide, in the net, for an advance over figures which have formerly been in effect. The new prices provide for an advance approximating from 7½ to 10 per cent.

Upward Trend Shown on Sleigh Bells

Toronto

SLEIGH BELLS.—New price lists have been issued by the manufacturers on sleigh bells, and these, it is indicated, will provide for a substantial advance over figures which have been in effect. The new prices have not yet been worked out as far as can be learned, but should be available within another week's time. The rapid advances in the copper market, along with the stiffness shown in leather are considered factors which have brought about this change.

Leather Mitts Follow Upward Move

Toronto

LEATHER MITTS.—It is understood that new prices which jobbers have been compelled to issue on leather mitts, provide for a slight advance over former levels.

Waste Unchanged; Oakum Rules Strong

Toronto

WASTE, OAKUM.—There are no new developments in the situation on cotton waste. The demand is considered very good and market rules with a firm undertone.

Oakum prices seem due for an increase and it looks very much as though an advance will be made before the end of the week. Plumbers' oakum will, it is expected, reach a price of $5.00 per bale, or an advance of $1.10 per 100 pounds.

Better Movement Stoves; Wares Active

Toronto

STOVES, WARES.—A better movement of stoves and ranges is reported, and booked orders are moving forward quite freely. The outlook is considered very satisfactory and market is one of decided strength.

Trade in all lines of wares is active, and firmness is revealed in the question of prices.

Cordage Shows Unchanged Front

Toronto.

CORDAGE.—The situation is without material change this week in ropes and prices are holding at unchanged levels. Business is fairly good, but no marked activity is shown as yet. Quotations rule at the following levels: Pure manila, 32c per pound, base; Beaver or British manila, 28c; New Zealand hemp, 28c; sisal, 25c; and sisal lath yarn, 25c per pound, base.

Firmness Rules in Nails; Wire Holding

Toronto.

NAILS, WIRE.—The undertone of the market is considered quite firm, although there has been no notable change shown in the figures prevailing to the trade. There is a fair amount of activity, and manufacturers and jobbers all seem satisfied with the volume of business being done. Quotations on wire nails still remain at $4.70 per 100 pounds base, and cut at $4.75.

Smooth steel wire is unchanged at $5.00 per 100 pounds, with kindred lines ruling at usual extras. A fair volume of business is being done.

Oils Hold Steady; Gasoline Active

Toronto.

OILS, GASOLINE. — Steadiness seems to be the keynote in regard to prices on lubricating oils, with trade reported splendid. Gasoline remains at an unchanged price of 32c per gallon, with sales maintained at a good volume.

Coal oil is moving freely, and prices are unchanged at from 20½c to 23½c per gallon, according to grade.

Strong Tone to Iron and Steel Bars

Toronto.

IRON AND STEEL.—There is a fairly strong tone to the market, with trade coming along quite nicely, and prices reported as very well maintained. There is an intimation that bar mills will have new figures for the trade before very long. These mills have a lot of business, it is indicated, and are not keen to book in some cases at prevailing lists.

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk iron	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Firm Market on Wrought Pipe; Tubes

Toronto.

WROUGHT PIPE, BOILER TUBES. The market on wrought pipe is firm, but no change has been recorded from prices shown in current market quotations. Business is good and outlook satisfactory.

Boiler tubes show no change, and market is holding at firm levels. Range of quotations to-day follows:

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Sheets Remain in Firm Position

Toronto.

SHEETS, PLATES.—Warehouses are buying quite heavily in some cases, although in others they have not cleared out the large war stock that was being carried. One of the dealers stated this morning: "We are buying heavily now, because we confidently expect that prices are going up to a higher level than they are at present. There are labor troubles of several kinds on the horizon in the steel mills district, and these, along with other tendencies, are going to keep prices up. We regard it as a good policy on our part to buy enough now to put us in good shape for some weeks and months to come."

Business locally is coming along quite freely and warehouse shipments are going forward in good shape. Range of prices to-day follows:

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 00	$8 10
U.S. 28	7 40	7 60	7 70
U.S. 26	7 10	7 30	7 40
22 and 24	6 95	7 15	7 25
18 and 20	6 80	7 00	7 10
16	6 65	6 85	6 95
12 and 14	6 50	6 70	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Corrugated Sheets Moving Freely

Toronto.

CORRUGATED SHEETS.—The demand has improved materially, manufacturers state, and volume of trade now being handled is considered very good. Prices are firm, but without change at the following figures:

Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Trade Very Good in Lead Products

Toronto

LEAD AND ZINC PRODUCTS.—A distinct improvement in amount of business being handled is reported, and outlook seems to be for a continuation of this condition. Prices are well maintained, and without change at following levels:

Lead pipe, list, per lb.		$0 12½
Lead waste pipe, list, per lb.		0 13½
Do., over 6 inches, list, per lb.		0 14½
Above subject to discount of 10%.		
Lead traps and bends		15%
Lead wool, lb.	0 11	0 12½
Lead sheets, 4 to 6 lbs., sq. ft., in rolls, lb.	0 12	0 13
Cut sheets ½ to ¾c lb. extra and cut sheets to size, 1c lb. extra.		
Solder, guaranteed, lb.	$0 35½	$0 38
Solder, strictly, lb.	0 34½	0 37
Solder, commercial, lb.	0 32½	0 35
Solder, wiping, lb.	0 31½	0 34
Solder, wire, lb.	0 35½	0 41
Zinc sheets, per lb.		0 17

Doubt Shows Up in Scrap Metal Circles

Toronto.

OLD MATERIALS.—A feeling of doubt exists in the minds of some of the large dealers in scrap metals as to what the next move is going to be. There seems to be an impression that there is some manipulation going on in the larger consuming and buying centres, and until this is dispelled it is likely that there will be a tendency on the part of some of the larger dealers in Canada to sit tight. It may be that there will be a slight dip in values, but it is hard to see where it can last for any length of time. It is claimed by several that though coppers and steel have reached their peak for some time at least, that they are not due for much higher figures. However, there is no feeling that they will travel far in the opposite direction. Some of the smaller sellers feel that right now is a good time to sell their material, and they are still letting it go, particularly as the buyers here and in Montreal are standing behind the prices that have been ruling for some weeks past, and it hardly seems likely, unless something unforeseen happens, that there will be any reduction in buying values.

Dealers' Buying Prices—		
Tea lead	....	0 03½

Little Change Made in Ingot Metals

Toronto.

INGOT METALS.—An easier price has been made on tin in some quarters, but apart from that, little change has been made. Business generally is very fair.

COPPER.—The market is holding its own, and seems somewhat stronger, although no actual price change has occurred here. The price rules at 27c per pound.

TIN.—A decline has been recorded in some quarters on tin, making quotations read from 58c to 61c per pound. Stocks are very fair and demand satisfactory.

SPELTER.—A somewhat better demand is reported in this metal, which has had a tendency to strengthen the market. No actual change is reported, however, the price ranging around 10c per pound.

LEAD.—Sales are very good, and the market seems quite steady, with firmness showing. Prices here range about 7c per pound, an unchanged figure.

ANTIMONY.—Trade is along fairly well-regulated lines with sales considered satisfactory, and prices firm at about 10c to 10½c per pound.

ALUMINUM.—There is nothing startling in this metal, which is moving out in somewhat better volume at around 35c per pound, an unchanged figure.

LONDON MARKETS

LONDON, Ont., Aug. 28—Business all through this district continues exceptionally good and with the fall season near, the volume of trade is showing a steady increase. Nails, builders' hardware and household lines are in great demand. Pocket cutlery and razors are also moving briskly as many of the retail stocks are very low. The lines offered for sale are very limited. Indications point to great activity in building not only throughout the fall, but for the coming spring as well. Prices in general continue very firm. Collections everywhere are reported as exceptionally good.

Advance is Shown in Carpet Sweepers

London, Ont.

CARPET SWEEPERS. — New and higher quotations are now in effect on Bissell carpet sweepers. The japanned sweepers are up $2 per dozen, and the nickel-plated sweepers $3 per dozen. The new prices are as follows:

American Queen, $51.00 per dozen; Champion N.P., $43.00; Champion Jap'd., $36.00; Grand Rapids N.P., $48.00; Grand Rapids Jap'd, $41.00; Parlor Queen, $54.00; Princess, $49.00; Standard N.P., $44.00; Standard Jap'd, $37.00; Universal N.P., $46.00; Universal Jap'd, $39.00.

Big Increase Made in Vacuum Cleaners

London, Ont.

VACUUM CLEANERS.—A big advance has been made in Bissell vacuum cleaners, the new prices being: Superba $140 per dozen; Grand Rapids $124; Household $110.

Higher Prices Named on Belt Punches

London, Ont.

BELT PUNCHES.—New quotations on belt punches show an advance. The prices are as follows: No. 5, $1.75 per dozen; No. 6, $1.75; No. 7, $2; No. 8, $2; No. 9, $2; No. 10, $2.75; No. 11, $2.75; No. 12, $2.75.

Brick Hods Higher; Also Mortar Hods

London, Ont.

BRICK HODS.—Higher prices have been named on both brick hods and mortar hods. The new price on brick hods is $21 per dozen, and the quotation on mortar hods is $24 per dozen.

Adjustable Ice Skates and Straps Higher

London, Ont.

ADJUSTABLE ICE SKATES.—High quotations are now effective on Union adjustable ice skates as follows: No. 16, sizes 8 to 12, 85c a pair. Web or canvas skate straps are also higher, the figures being: 20 in., $1.75 per dozen pairs; 24 in., $2 per dozen pairs; 30 in., $2.50 per dozen pairs.

Fifty Cent. Advance in Single Barrel Shot Guns

London, Ont.

SINGLE BARREL SHOT GUNS.—New and higher prices have been named on single barrel shot guns, the quotations showing an advance of 50 cents. The new prices are: Plain, $11 each; Ejector, $11.50 each.

Advance is Made in Price of Cold Shuts

London, Ont.

COLD SHUTS.—New prices on cold shuts are higher, the quotations being: ¼ in., 60c per doz.; 5-16 in., 75c; ⅜ in., 90c; 7-16 in., $1; ½ in., $1.35

Demand is Brisk For Alarm Clocks

London, Ont.

ALARM CLOCKS.—Sales of alarm clocks have been very brisk and the supply is limited. Quotations are as follows: Good Morning, $1.30 each; Lookout, $1.70; Sleepmeter, $1.80; Big Ben, $3.20; Baby Ben, $3.20.

Another Advance in Calf Meal Recorded

London, Ont.

CALF MEAL.—Another advance is shown in Royal Purple Calf Meal, the new prices being: 25 lb. bags, $5.25 per 100 lbs.; 50 lb. bags $5.15 per 100 lbs.; 100 lb. bags, $5.10 per 100 lbs.

Eureka Sprayers For Spring Booking Lower

London, Ont.

EUREKA SPRAYERS. — Eureka Sprayers for spring booking in 1920 are a little lower, the quotations being: No. 110 Galv'd. Compressed Air, $7.00 each; No. 111 Brass, $9.50; No. 112, Tin, $5.25 dozen; No. 113, Glass Jar, $8.00; No. 114, Glass Jar, $8.75; No. 115, Continuous, $9.50.

Oil Heaters Are Finding Ready Sale

London, Ont.

OIL HEATERS.—There is a steady demand for oil heaters. Prices show no change from 25% off list prices, which are given as follows: Perfection, No. 525, $7.00 each; No. 530, $8.25 each; No. 630, $10.25 each.

Harvest Tools Higher For Spring Shipment

London, Ont.

HARVEST TOOLS.—Harvest tools for present shipment and spring booking for 1920 are up about 7½ per cent., the new discount being 12½% off list. No change is shown in the standard list.

Scythes Advance 75 Cents a Dozen

London, Ont.

SCYTHES.—New prices on scythes show an advance of seventy-five cents a dozen, the quotations being: Cast Steel, $15.75 dozen; Clipper, $16.75; Excelsior Concave, $17.75; Little Giant, $17.75; Double Beaded, $17.25; Bush, $16.25; Cast Steel Cradle, $18.50.

Hay Knives Also Advance 75 Cents

London, Ont.

HAY KNIVES.—An advance of seventy-five cents is also shown in the prices of hay knives, the new quotations being: Lightning, $13.25 dozen; Heath's Patent, $13.25; Spear Point T. Handle, $14.75; Spear Point, L. Handle, $14.75.

Canadian Reaping Hooks Up 25 Cents a Dozen

London, Ont.

REAPING HOOKS. — Twenty-five cents a dozen advance is shown in the new quotations on Canadian reaping hooks, the prices being: No. 2, $4.40 dozen; No. 3, $4.50; No. 4, $4.60; No. 5, $4.80; Little Giant, $6.25.

Higher Quotations on Tines Only For Forks

London, Ont.

TINES FOR FORKS.—New and higher prices are in effect for these lines, the quotations being: 3 Prong Hay Fork, $4.80 dozen; 4 Prong Manure Fork, $7.00; 5 Prong Manure Fork, $11.50; 6 Prong Manure Fork, $13.00; 4 Prong Barn Fork, $9.75; 5 Prong Barn Fork, $13.00; 8 Prong Ensilage, $20.75.

Snath Quotations Rule Unchanged

London, Ont.

SNATHS.—Quotations on snaths are being figured on the basis of list, plus ten per cent. The net prices are: No. 00 Pat., $13.75 dozen; No. 1 Pat., $13.20; No. 2, Pat., $12.65; No. 3 Pat., $11.65; Brush, $14.30.

Glass Sales Active; Putty Prices Firm

London, Ont.

GLASS, PUTTY.—The volume of glass sales is growing steadily as many of the building projects which have been under way have now reached the stage where glass is required. Quotations show no change and are as follows: Single Diamond, 25% off list; Double Diamond, 25% off list; Cut Light, 10% off list.

Putty prices are firm. Sales show increased activity. Quotations are as follows: Standard 100 lb. drums, $6.80 per 100 lbs.; Standard 25 lb. drums, $7.05; Pure, 100 lb. drums, $9.30; Pure, 25 lb. drums, $9.55.

Nail Prices Firm; Business is Active

London, Ont.

NAILS.—There is a good sale for nails. Prices are firm, but show no change, the quotations being wire, $4.70 base; cut, $4.75 base.

No Changes Shown in Sash Weights

London, Ont.

SASH WEIGHTS.—There is a good demand for this line. Prices show no change, the quotations being: Solid, 3 lbs. and up, $3.25 per 100 lbs.; Sectional, ½ lbs., $4.50; Sectional, 1 lb., $4.00.

Sash cord is unchanged also. It is selling well. The figures are: No. 6, 77c lb.; No. 7, 76c; Nos. 8, 9, 10, 12, 75c.

Turpentine is Up 10 Cents a Gallon

London, Ont.

TURPENTINE, RESIN.—Good sales of turpentine are being made. Prices are five cents higher, the quotations being: 1 bbl. lots $2.50 per gallon; 2 to 4 bbl. lots, $2.49 per gallon; 5 gallon lots $2.60.

There is a good demand for resin. Prices are firm, the figures being: Casks, 11½c lb.; small lots, 14c lb.

White Lead in Oil Remains Unchanged

London, Ont.

WHITE LEAD IN OIL.—Prices are firm and business is good in white lead in oil. Quotations are as follows: Pure, in tons, $16.35 per 100 lbs.; Less tons, $16.75.

Linseed Oil Prices Remain Unchanged

London, Ont.

LINSEED OIL.—Very fair sales of linseed oil are being made. Prices show no change so far, but it is expected that they will be a little easier very shortly. The quotations at present are as follows:

	Raw.	Boiled.
1 to 2 barrels, gal.	$3.22	$3.25
3 to 5 barrels, gal.	3.21	3.24
6 to 9 barrels, gal.	3.19	3.22

Less barrels, add 10 cents gallon.

WINNIPEG MARKETS

WINNIPEG, Aug. 28—Price changes during the week are few, but important. The only lines affected are Reach & Co.'s products, including boxing gloves, shin guards, indoor baseballs, striking bags and basket balls, while Alabastine is advanced 50c case. However, markets in general are showing greater strength and already advances of from 5 to 10 per cent. are recorded in Stanley Rule & Level Co.'s products as well as many other manufacturers and as soon as stocks are replenished on the new basis, higher prices will be issued.

Business is still very brisk in all lines of shelf hardware, harvest tools, etc., while fall shipments of stoves, axes, horse blankets, lanterns, lamp chimneys, stove pipe, elbows, etc., are moving freely.

Wire Nails, Staples Show No Change

Winnipeg.

WIRE NAILS, STAPLES.—Wire nails and staples show no change over former quotations. Prices on these lines, however, remain very firm in the face of recent advances made by American manufacturers of approximately $5.00 ton on wire. But as yet, no change has been made on this side of the line. To-day's prices are given as follows: Wire nails, head of lakes, $5.00; Winnipeg, $5 50; Staples, head of lakes, $5.15; Winnipeg, $5.65.

All Lines of Bolts Remain Unchanged

Winnipeg.

BOLTS.—Prices on all lines of bolts continued firm on the local market, despite reports from American centres of advances there. However, at present there is no indication of an immediate advance here. The demand in this line is reported very good, while stocks are well assorted. To-day's ruling prices are confirmed as follows:

Carriage Bolts—⅜ and smaller, up to 6 inches, 30%; ⅜ and smaller, over 6 inches, 15%; 7-16 and larger, all lengths, 10%.

Machine Bolts—⅜ and smaller, up to 4 inches, 35%; ⅜ and smaller, over 4 inches, 20%; 7-16 and larger, all lengths, 20%.

Shaft Bolts—All sizes, 20%.

Plow Bolts—25%.

Stove Bolts—50%.

Tire Bolts—All sizes, 45%.

Sleigh Shoe Bolts—All sizes, 5% on list.

Further Advances in Sporting Goods

Winnipeg.

SPORTING GOODS.—Further advances are recorded during the week in a number of lines manufactured by A. J. Reach & Co., due to the ever increasing price of leather and even further advances during the balance of the year would not be surprising. The following is a list of the goods which are affected by the latest advance:

Shin Guards—No. S.G.1, $16.80 dozen; No. S.G.2, $15.00; No. S.G.3, $12.60.

Indoor Baseballs—No 112, $18.00; No. 114, $21.00; No. P12, $21.00; No. P14, $24.00; No. 25B, $8.00; No. 50B, $12.00 dozen.

Basket Balls—No. 1½, $7.25 each.

Basket Ball Goals—No. 6P, $6.00 each.

Basket Ball Nets—75c pair.

Boxing Gloves—No. B0, $42.00; No. B2, $66.00; No. B4, $72.00; No. B6, $96.00; No. B7, $105.00 dozen sets.

Striking Bags—No. S1, $40.00; No. S2, $49.50; No. S4, $57.00; No. S6, $68.00; No. S8, $81.00; No. S1D, $40.00; No. S3D, $57.00 dozen.

Alabastine Advances Fifty Cents a Case

Winnipeg.

ALABASTINE.—Following increases in wages as well as higher manufacturing costs, alabastine prices have been revised to higher levels, showing an advance of 50c per case over former quotations, making to-day's selling price $9.00 case, f.o.b. Winnipeg.

Much Activity in Builders' Hardware

Winnipeg.

BUILDERS' HARDWARE.—Particular activity is shown in many of the builders' hardware lines, such as butts and hinges, which are now moving very freely, while prices hold very firm. To-day's ruling markets on the various lines are given as follows:

Butts—No. 241, old copper or dull brass—2½ x 2½ in., 37c; 3 x 3 in., 39c; 3½ x 3½ in., 40c; 4 x 4 in., 52c; 4½ x 4½ in., 75c; 5 x 5 in., 94c pair.

Plain Steel Butts—No. 804, 5% off list; No. 840, net list; No. 800, 5% on list; No. 838, net list.

Hinges—Light T and light strap, 15%.

Corrugated Strap Hinges—4 in., $1.60; 5 in., $2.20; 6 in., $3.00; 8 in., $4.75; 10 in., $7.00; 12 in., $10.80 dozen pair.

Corrugated Tee Hinges—4 in., $2.00; 5 in., $2.50; 6 in., $3.40; 8 in., $5.70; 10 in., $8.50; 12 in., $12.00 dozen pair.

Turpentine Prices Are Holding Firm

Winnipeg.

TURPENTINE.—Turpentine prices show no change on the local market during the week, and no immediate revision is looked for. Stocks in general are reported rather low, owing to strikes throughout the States, which has delayed shipments, while the demand is reported below normal. To-day's ruling prices are confirmed as follows: Barrel lots, $2.70 gallon; ½ barrel lots, $2.73 gallon; 5 gallon lots, $2.75 gallon; 1 gallon lots, $2.75 gallon, plus the usual extras for containers.

No Changes Shown in Linseed Oil

Winnipeg.

LINSEED OIL.—Linseed oil prices also hold firm on the local market, with about the usual demand, while stocks are reported adequate for all demands. To-day's market prices are as follows: Raw linseed oil, $3.10 gallon; boiled linseed oil, $3.13 gallon in single barrel lots.

Putty Sales Active; Prices Unchanged

Winnipeg.

PUTTY.—A good demand is reported on putty with prices holding very firm, and indications at present point to higher prices on this commodity in the near future, due to the high prices now ruling on raw material from which it is manufactured. To-day's ruling prices are given as follows: Putty, 100 lb. irons, $7.20 per 100 lbs; 25 lb. drums, $7.80 per 100 lbs.; 1½ lb. tins, 14½c each.

PITTSBURGH MARKETS

PITTSBURGH, PA., AUG. 28.—The iron and steel market has been dominated more or less in the past week by the labor situation and prospects, if the present uncertainty may properly be referred to as constituting "prospects." The steel mills have been almost entirely out of the market as sellers, except for the booking of such orders as regular customers insisted that they take, while they have been entirely out of the market as buyers, showing no interest whatever in such commodities as scrap, ferromanganese, ferrosilicon, etc.

While the market has been chiefly under the influence of the labor situation, it can hardly be said that the trade at large fully appreciates the seriousness of the situation. The large mills prob-

Continued on page 64

A New Base Price System Adopted

MANUFACTURERS of cold finished steel bars are adopting a new system of making prices, which is radically different from that followed in the past. From now on quotations will be made from a base price, with net extras, instead of quoting a uniform discount against a list.

Several considerations, it is said, moved the manufacturers to make the change now announced. The principal consideration was a desire to avoid having the higher priced materials fluctuate more widely than the base material when a change should be made in prices. Thus the old list carried the cheapest material at 5c, listed much material at about 10c, and some at total prices above 15c. Therefore, while an advance or decline of one point in the discount meant a change of $1 a ton on the cheapest material, it meant a change of $2 or $3 a ton on other material. As market fluctuations are due chiefly to changes in the cost of steel bars as bought from the rolling mills, this diversity was not desirable. Under the new system, when the base price advances or declines $1 a ton all descriptions of the product will also advance or decline $1 a ton.

The differentials incorporated in the new list are based upon careful study of actual manufacturing costs, and are in close accord with these costs. Such was not the case with the old list, and thus the change involves considerable changes in price of some descriptions of materials relative to the base price. There are some advances, but there are more declines, and the general average, having regard to the total tonnage produced, is in the direction of a reduction.

The full list of net extras as just adopted is given below.

NET EXTRAS FOR SIZE. Extras are for 100 pounds net.

Inch.	Per 100 lbs.
⅛ to 5-32	$2.25
3-16 to 7-32	1.50
¼ to ⅜	0.90
7-16 to 9-16	0.60
⅝ to ¾	0.40
13-16 to 1 1-16	0.30
1⅛ to 1 7-16	0.25
1½ to 2 3-16	0.15
2¼ to 3	Base

Inch.	Per 100 lbs.
3 1-16 to 3 7-16	$0.25
3½ to 3 15-16	0.50
4 to 4 7-16	0.80
4½ to 4 15-16	0.90
5 to 5 7-16	1.00

MISCELLANEOUS NET EXTRAS

EXTRA FOR ODD AND INTERMEDIATE SIZES.

The following sizes in rounds, hexagons and squares shall be considered standard:

By 64ths to 1", inclusive.
By 32nds, 1 1-32" to 1 31-32", inclusive.
By 16ths, 2" to maker's limit.

All odd and intermediate sizes (excepting those allowing a total tolerance of .008" and such specifications shall be for not less than 2000 pounds of a size), not less than 25c per 100 pounds net extra, in addition to the usual extras for accuracy, etc.

EXTRAS FOR CHAMFERING.

(For Automatic Screw Machine use only.)

	Rounds Per 100 pounds net.	Hexagons and Squares Per 100 pounds net.
7-16" to ⅝"	$0.13	$0.15
11-16" to 15-16"	.10	.13
1" to 2"	.065	.115
2 1-16" and larger	.04	.10

These extras apply on lengths 10 ft. and longer and one end bar only. For sizes smaller than 7-16" and bars shorter than 10 ft., special prices will be quoted.

BOXING AND BURLAPPING.

Boxing (minimum 50c), Domestic Shipment..$0.40 per 100 lbs. net
Boxing (minimum 50c), Export Shipment ... .50 per 100 lbs. net
Burlapping (minimum 25c), full length ..... .25 per 100 lbs. net
Burlapping (minimum 25c), ends only..... .10 per 100 lbs. net

PISTON ROD STEEL.

Uniformity to size and carefully selected surface finish—50c per 100 pounds net extra, in addition to usual extras for accuracy and short and long lengths.

ROLLER BEARING STEEL.....$1.00 per 100 pounds net extra.

EXTRAS FOR ACCURACY.

For accuracy from exact size to .0015" under, sizes 3" diameter and smaller ..... 25c per 100 pounds net

For accuracy from exact size to .001" under, or from exact size to not more than .001" either way, sizes 2½" diameter and smaller, 50c per 100 pounds net.

For accuracy with .0005" either way and from exact to .001" over size, sizes 2" diameter and smaller (standard sizes only), $1.00 per 100 pounds net.

For accuracy .001" either way or from exact size to .001" over, or from exact size to .001" under—sizes 2" diameter and smaller (odd and intermediate sizes), $1.00 per 100 pounds net.

SQUARES, HEXAGONS AND FLATS—double above extras.

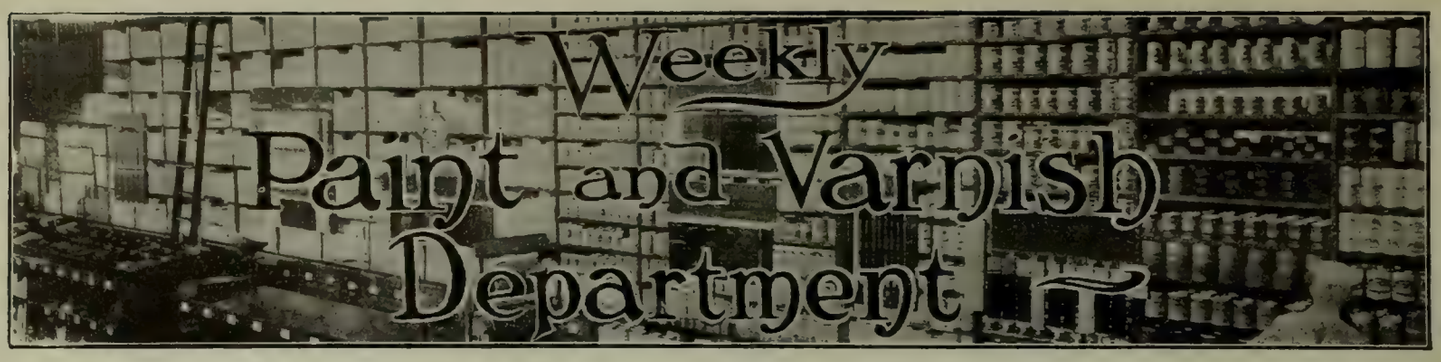
FOR ACCURACY, CARBON .31% AND OVER—double above extras.

EXTRAS FOR SPECIAL AND HIGH CARBON OPEN HEARTH STEELS.

Specified Analysis—Carbon .30% and less....25c per 100 lbs. net
Specified Analysis—Carbon .30% and less sulphur and guaranteed .05% and under....50c per 100 lbs. net
Specified Analysis—Carbon .31% to .50%....50c per 100 lbs. net

QUANTITY DIFFERENTIALS.

All specifications for less than 2000 pounds of a size will be subject to the following extras, the total weight of a size ordered to determine the extra, regardless of length and regardless of the exact quantity actually shipped:



1000 to 1999 pounds .....$0.15 per 100 lbs. net
Less than 1000 pounds ..... .35 per 100 lbs. net

EXTRAS FOR LONG AND SHORT LENGTHS.

	Per 100 lbs. net. Rounds	Squares	Hexagons	Flats
3" to 5 15-16"	$1.50	$1.50	$1.50	$3.00
6" to 11 15-16"	.75	.75	.75	1.50
12" to 23 15-16"	.30	.60	.30	.75
24" to 59 15-16"	.15	.30	.15	.40

Lengths longer than 24 ft. and less than 30 ft...$0.50 per 100 lbs. net
30 ft. and less than 35 ft. ..... 1.00 per 100 lbs. net
35 ft. and less than 40 ft. ..... 1.50 per 100 lbs. net
40 ft. and less than 45 ft. ..... 2.00 per 100 lbs. net
45 ft. and longer ..... 2.50 per 100 lbs. net

Extras for long lengths apply on Rounds, Squares, Hexagons and Flats.

Fall Painting Appeals to Farmers

Thousands of Them Have Been Too Busy All Summer to Do the Work They Know Ought to be Done—Paint Dealer Has Many Splendid Talking Points to Advance in the Next Few Weeks and Cash in on Business

PAINT dealers have never in the whole history of the trade had finer opportunities for developing a record fall business than are presenting themselves right now. There is a lot of city trade to be had, but the largest and most important business to go after now is in the country. The farmer's buying power is far superior to that of the city man at any time, and never have Canadian farmers had so much money to spend as at the present time. The farmers bought a lot of paint in the spring, but the hot weather came so soon and lasted so long that they were kept busy growing things and selling them at prices they never even in their wildest dreams expected to get. In their rush to corner as much of this money as possible while the cornering was good, the farmers let painting, and building, and a whole lot of other things stand over.

Now is the Time

Now they have saved one of the best harvests they have had in years, and with the profits from that and from a whole season's work in the bank, and big profits at that, they are beginning to plan where they can lay out some of this money to the best advantage. The average farmer is shrewd, and does not have to think twice to see the force of arguments about the value of paint. Nobody in the whole country knows better than the farmer to-day that lumber is getting in the class with gold and precious stones. He knows that if he started in to-day to build a new house or barn or farm buildings, that he could not get the lumber that is in his old buildings for anything like the price he paid when they were built.

He Sees the Point

The advisability of doing everything possible to prevent the decay of his buildings is obvious. There is no better way to save the wood and protect it from the coming storms of winter than to paint it, and the dealer who drives home this argument and also drives home the fact that he is handling paint that he guarantees, and can stand behind, and who invites the farmer to come into the store and give him a chance to prove his statements, is going to get some business. It is not a question of price with the man who knows the values of lumber and other commodities required to build to-day. He knows that paint is cheap at even higher prices than it is now selling at, and that it will pay him and pay him well to put it on.

The Proper Time

The dealer has a big talking point in urging fall painting. No one who is going to paint could ask for a better time to do it than now. With the wood thoroughly dry it is in ideal shape to take in and thoroughly absorb the protective covering of paint. It will dry now quickly and thoroughly, and now that the farmer is through his rush of work he has the time and money to paint and paint generously. It might also be pointed out that the fall is a splendid time to paint because of the absence of flies and gnats, which often cause real trouble and annoyance to painters who are busy during the spring and summer. It is essential that if painting is going to be done that it be proceeded with and given ample time to dry and set before the storms of the late fall and winter break and work their havoc.

Protect Implements

In talking paint to the farmer, don't for one minute forget that he has several hundreds of dollars' worth of implements that need protection from wind and weather just as much as his buildings. At the present costs of replacement there is a very strong argument to be based upon the protective value of painting implements. When things were selling for half or a third of what they cost now there was no excuse for letting them be ruined by exposure to the weather. With prices as they are at present and are likely to be for some time it is nothing short of criminal for anyone to leave costly machinery, waggons, implements and other property out unprotected. Painting will keep it in good shape, and will make it last.

Must Get Busy

The paint dealer who lives in a farming community must get after the farmer business. There is, of course, a certain percentage of farmers who know and appreciate thoroughly the value of paint, but the majority of them have to be reminded and be converted into buyers by the cold, hard facts. Nothing appeals to the farmer like a question of dollars and cents, and when he is satisfied that painting is not an expense to him, but an investment, and one which will pay him big returns, he will buy.

Paint business in the next few weeks, according to many dealers, is going to be best where the farmers are, because the farmer has the money, he has the property that needs painting, and he has been putting off a lot of painting that is badly needed, because he has been busy

The Brush Department

Keeping Good Assortment Helps Sale of Brushes

Many Hardwaremen Find That Brush Sales Can be Kept Active All Through the Year by Store and Window Displays and by Having a Good Assortment to Show Prospective Buyers

THE dealer who has a good assortment of brushes and keeps them well displayed will have little difficulty in keeping his stock moving. Many hardware dealers have developed their brush trade to the extent that it is a steady, all the year round business, and they have found that in order to maintain the progress they have made that having a good assortment is a necessity. Many dealers go even further in that they have a good assortment of good brushes. They will not try to sell a brush which they have reason to believe will not give satisfaction, even if the cost is small.

"If a man comes in and wants a paint brush we act on the assumption that he wants something that is going to help him do good work," said one dealer. "We might sell him brushes that would cost him quite a lot less than those we offer, but almost without exception we find that when we tell the prospective buyer why it is better for him to pay a few cents more and get goods that will not only do the work he wants, but stay on the job for other work that is to come, price is not a consideration. If we took the other view and sold the man a poor quality brush at a small price, I am satisfied that our brush business instead of growing steadily, would have declined until it would have reached a point where sales were negligible. As it is now, we find that we not only sell our customers brushes, but other goods, because they thoroughly appreciate the fact that they can depend on our goods to do the work we say they will. We frequently sell a man a paint brush and have him come in a little later for a shaving brush, or bring his wife in for a waxing brush or a floor broom or scrub brushes. It has happened not infrequently also that men have brought us new customers, friends moving to the town, and their wives have sent other women to us and given our stores a hearty recommend. We want no better advertising than this.

Keep Good Assortment

"We always aim to keep a good assortment. People, we invariably find, like to look over a number of sizes or styles, and they like to have us explain why this brush or that one is the best for the work. Very few people have any idea about the right kind of paint brushes to use. Many of them think everything can be done with one brush. By showing them how they can save time and trouble by buying two or even three brushes we usually sell them the goods and they are satisfied when they take them home and find that they get just the results that we tell them they will get. By keeping our stock well assorted and by arranging window displays and keeping the brushes out in the store where everyone can see them we keep them moving all the year. It pays to advertise them sometimes, and we do this, always giving prices, and very often showing illustrations of the various lines."

FALL PAINTING APPEALS TO FARMERS

Continued from page 56

making real money. Now he has no excuse for putting off the work any longer, and he simply needs a little persuasion of the right kind to buy paint, and buy lots of it.

Should Have List

Many dealers have a rural route directory, and in carrying out their fall campaign see that every farmer is the recipient of a personal letter. They back up this effort by store and window displays, and by boosting fall painting by advertising in the local papers. Many of them make a drive on house and barn paints, and tell the farmers about the paints especially adapted for use on farm buildings, to protect implements, and so on. Many dealers also aim to boost their sales of paints by devoting some time to interesting the farmer's wife by telling her all about the benefits of brightening up her home. This is a field in which there is a lot of good business to be developed, and some dealers are cashing in on it splendidly.

Attend the Fairs

In the next few weeks there will be scores of country fairs held, and dealers who know, state to HARDWARE & METAL that they have never found a better opportunity of personally boosting paint sales than by attending these gatherings. Some firms secure a space and put on a demonstration. Others simply show their goods and take orders. Many dealers when attending the fairs get a lot of information about future building and repairs to be done, and keep notes of this to be followed up later. It is surprising, they say, what a lot of useful and profitable tips may be picked up by the man who is looking for them and is ready to keep the information and follow it up.

AS TO "PROFITEERING" IN PAINT AND VARNISH

Price Bulletin No. 44 on Paints and Varnishes, issued by the United States War Industries Board, says:

"The competition among paint manufacturers is sufficient to cause any advance in the price of standard products to be made slowly and reluctantly. * * * It will be seen from the price tables (in this Bulletin) that the cost of the linseed oil is over half the cost of the paint. The relative prices of paint and varnish placed alongside those for the oil (for the six years 1913-1918 inclusive) show that the finished products" always lagged behind the raw material.

As to varnish—"The same long period of unchanging price, lasting through the first four years in the case of inside varnish chosen as typical, was followed by an increase of only 7.5 per cent. and this new price remained steady for another 14 months. With linseed oil at a relative price of 270, china wood oil at 280, and varnish gums under an import restriction, the final advance was forced in September, 1918, to a relative price of 166."

Note:—These are arbitrary figures to represent the advance over the average 1913 price which is considered the base, or 100.

SHOULD KEEP BOOKS

The importance of doing business in a proper way was emphasized by the investigators at the school probe now going on in Toronto. After referring to the hopeless task of getting at accurate details by questioning, Mr. Shirley Davidson said in part: "There can be no more sinister reference against the honesty of a trustee than that he keeps no books. Even the criminal code provides that if the court finds that a suspect has kept no books he may be sent to jail. That just illustrates the idea of the law as to keeping books. A man should keep books if he wishes to keep honest." In commenting further on the case he stated that no books had been kept for twenty-seven years and that this was no oversight, but deliberate defiance, despite a report made by Judge Winchester some time ago.

High Prices are Universal Now

They Are so Because the Price Increases Start at the Actual Point of Production, With the Result That They Have Affected Every Country—Peace Conditions Have as Yet Had Little Influence, and There Are Few Declines

THE advance of prices is not confined to Canada or to America or to the countries which participated in the war. It has been world wide. Nor has it occurred exclusively in the products required for war purposes, nor for the use of the millions engaged in the war. Practically every article entering international trade has advanced in price in the country in which produced, irrespective of their proximity to the war area. Nor have prices been reduced to a perceptible degree in any part of the world since the close of the war. There are, of course, a few exceptions to this general rule, but they are so few and so plainly due to peculiar conditions that they "prove the rule" that the advance has been world-wide, and that the termination of the war has not reversed the movement or at least caused any material decline in any considerable proportion of the important articles of world production and world consumption.

The extent of the increases in world prices and their distribution to all parts of the globe irrespective of relation to the war area is illustrated in the compilation by The National City Bank of New York, showing the 1919 prices in the country of production of the principal articles forming the international trade of the world and comparing these 1919 prices with those of the same month preceding the war. In the distant Orient, in the tropical world, in the interior of Africa, Australia and South America, and in the islands of the Pacific, the prices demanded for the articles offered for exportation have been and still continue to be far above those of the pre-war period, the advances ranging 50 per cent. to 100 per cent., and sometimes 150 per cent.

Some Interesting Figures

Rice, for example, cost in the country of production 7.2c per pound for that imported in December, 1918, as against 2.6c per pound for that imported in the month preceding the war, July, 1914.

Walnuts, which were sold at the producing points in France at 9c a pound in 1914, brought 35 cents a pound on the same market in 1919. Cheese, which sold at 16 cents in 1914, reached 47 cents in 1919. Tea at the plantations brings 24 cents instead of 19, while sugar cane increased from 2 to 5 cents. Nor were these increases only noticeable in foodstuffs. Nitrate of soda, drawn chiefly from Chile, for which the war demands ceased at the date of the armistice, cost in the country of production $57.40 per ton for that imported in May, 1919, against $26 65 per ton for that imported in the month preceding the war. Raw silk, of which we obtain our entire supply from China and Japan, cost in those countries an average of $6.12 per pound for the imports of the closing month of the war, and $3.84 per pound in the month preceding the war. Goat skins imported from China, India, Mexico and South America cost in those countries an average of 62.8 cents per pound for those reaching the United States in May, 1919, against 24.5 per pound for those imported from the same countries in the month preceding the war. Flaxseed, imported chiefly from Argentina, and not an article demanded for war purposes, cost in the country of production $3 per bushel for that reaching us in January, 1919, against $1.47 per bushel paid for that imported in July, 1914. Mattings for floors, imported chiefly from Japan and China, cost in the countries of production 26.4 cents per square yard for the quantities reaching the United States in May, 1919, against 9.1 cents per square yard for the quantities which reached us in July, 1914. Jute, imported from India, cost in that country $172.75 per ton for the quantity imported into the United States in March, 1919, against $49.56 per ton for that imported in the month preceding the opening of the war.

Comparative Figures

Curiously, too, the prices of many articles continue to advance without reference to the fact that the war has terminated. The following comparative figures are based on the wholesale price of articles in the markets of the countries from which imported, for unit of quantity stated:

	Unit	1914 July	1919 May
Macaroni, etc.	lb.	$0.04	$0.11
Rice	lb.	.026	.06
Rice flour, etc.	lb.	.019	.051
Wheat	bush.	.678	1.95
Flour, wheat	bbl.	4.065	9.58
Bristles, etc.	lb.	.932	1.58
Nitrate of soda	ton	26.65	57.40
Coal, bituminous	ton	2.96	5.31
Cocoa, crude	lb.	.104	.114
Coffee	lb.	.111	.167

NEW IRON AND STEEL COMPANY

A charter for $8,000,000 has been granted the Consolidated Iron & Steel Corporation, Limited, a company of Detroit and Toronto parties engaged in the mining business. The company is essentially Canadian, with head office at 20 King Street East, Toronto. They own two large deposits of iron ore lands and it is their intention to proceed with their development.

The company has opened a hematite mine on the C.N.R. in the county of Leeds, 25 miles north of Brockville at Furnace Falls. The city of Brockville has offered inducements to the company to build a pig iron smelter there and it is being seriously considered.

Their other property is located at mileage 182 on the Algoma Central Railway.

SULPHUR SCARES MONTREAL HOUSEWIVES

Escaping sulphur fumes was the cause of considerable alarm to Montreal housewives last week. It appears that one of the producing machines of the gas company broke and this made the system inoperative for some little time, permitting the sulphur fumes to gather in excessive quantities. This sulphur has to find its exit before the gas will again flow, but beyond annoyance and anxiety, there were, and could be, no serious consequences.

Varnish Advice

Now that most buyers realize so thoroughly the necessity and economy of careful discrimination in varnish buying, they appreciate more than ever reliable advice as to what finishes to select for their finishing operations.

The dealer has many opportunities of posting his customers along this line and earning their permanent good will.

The long record of Berry Brothers' Varnishes, Enamels and Stains for uniform quality and dependability makes them safe to recommend and easy to sell.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, August 28.—Paint markets are about the same as last week with a speeding up of orders from the trade anticipating the fall sales. Although this is the tendency, many of the paint travellers being on vacations, it will not be felt generally until a week or two passes. The linseed oil situation of course occupies the lead in raw material shortages, with the prices remaining the same as last week. A few more firms have withdrawn quotations. Mixed paint keeps rolling along even at the increase announced a few weeks ago, with no slowing down in sight. All other lines are steady, with turpentine a runner up as a raw material short.

Linseed Oil Shows Little Change

Montreal.

LINSEED OIL.—The news in the press as to a lowering in price of flax has caused the trade to be hopeful. The effect is a steadying one but will not be felt for at least two months, it is said. Few firms are quoting, and then only on small quantities to old customers. Nothing can be said until the crop is assured or definite information comes through about it. The following prices hold of course, no downward tendency in view:

Raw—	Imp. Gal.
1 to 4 barrels	$3 05
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$3 07½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Auto Varnish Sales Reported Good

Montreal.

VARNISHES. — The trade reports good sales on auto varnishes, with a little slowing down on other lines, due to between seasons and vacation time. The cool weather will alter the slowing down considerable and increased activity is expected at any time.

Turpentine Takes Another Upward Move

Montreal.

TURPENTINE.—Owing to the shortage and quantities being so small, higher prices are indicated. Last week's $2.50 goes to $2.65, with 5-gallon lots only available, and only old customers being served. Few firms are quoting at all and no trade is being solicited in this commodity.

Turpentine—	Imp. Gal.
1 to 4 barrels	....
Small lots	2 65

(Packages extra.)

Putty Sales Are On the Increase

Montreal.

PUTTY.—The cool weather has caused a lot more business to come through for the manufacturer a little in advance of the usual season. The prices as quoted last week remain steady.

	5 ton	1 ton	Less Quanty
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Glass Deliveries Slow; Prices Off a Little

Montreal.

GLASS.—In the plate-glass quotations to-day a slight revision in the discount is shown, this line now being quoted at 30 and 5 per cent. On quantities of window glass of 3,500 feet and over a discount of 25 and 5 per cent. on all sizes has been named by some factors.

TORONTO

TORONTO, August 28.—A peculiar state of affairs exists in regard to linseed oil. While the prices of flaxseed for future delivery have weakened considerably, there being a drop of 27 cents yesterday, there is none to be had. Some crushers state that there is not going to be enough oil to go around because they cannot buy the seed, and are maintaining prices firmly. Others have reduced prices. The general tendency seems to be to look for lower prices in November and December. To-day's quotations range from $3.15 to $3.27 per gallon for raw linseed oil and from $3.17½ to $3.30 for boiled. The turpentine market is very strong at primary points, prices having advanced during the week 17 cents. This is reflected in higher quotations here, to-day's figures being $2.50 per Imperial gallon. The rosin market is also very firm.

Linseed Oil Prices Show Wider Range

Toronto.

LINSEED OIL.—As a result of the changes in quotations on flaxseed for future delivery, linseed oil prices show a wider range, the latest quotations being from $3.15 to $3.27 for raw, and from $3.17½ to $3.30 for boiled. Crushers state that it is impossible to get any fair sized shipments of flaxseed. A whole lot depends, they say, on the weather in the Northwest in the next few weeks. Late reports indicate that the flaxseed is green. If frosts come it will suffer considerably. If the weather remains fine a fair sized crop is expected. There is a general tendency in some quarters to expect a weakening of the market, but no one believes that prices are going to show any material reduction even after the new supplies of seed are available. Paint manufacturers are not buying for immediate delivery to any extent. Quotations are as follows:

Linseed Oil	Raw	
1 to 2 barrels, gal.	$3 15	$3 27
3 to 5 barrels, gal.	3 14	3 26
10 barrels and over	3 12	3 24
	Boiled	
1 to 2 barrels, gal.	3 17½	3 30
3 to 5 barrels, gal.	3 16½	3 29
10 barrels and over	3 14½	3 27

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Orders Still Coming For Mixed Paints

Toronto.

MIXED PAINTS.—Paint manufacturers are well satisfied with the volume of business that continues to come in. Some of them report that to date their gallonage as compared with the same period last year has doubled and that repeat orders continue to come in steadily. Prices remain unchanged.

Turpentine Moves Up to $2.50 Again

Toronto.

TURPENTINE.—Turpentine is again advancing as a result of heavy orders for overseas shipment. A new factor in the buying is the large shipments being sent to Japan. There are rumors that some of this is destined for Germany. Supplies at the southern ports

A Chance to "Cash In"

We offer you a chance to "Cash In." Why waste your time with a line of Paints and Varnishes that requires uphill work to sell, when you can link your store's future to a Brand to which the public has been completely "won over." We long ago secured the all-important "quality" advantage—by **knowing how** to make a superior Paint. We later secured the "publicity" advantage — by consistently advertising our product in aggressive and unusual ways. Both these advantages we hand over to you the day you become our Agent.

We offer you a chance to "Cash In" on B-H prestige—a chance to get the trade of all those people who have been converted into staunch adherents of the B-H line by reason of what we've told them about it through our national advertising.

We place at the disposal of our Agent a complete assortment of color cards, counter cut-outs, store fixtures, window displays and newspaper ads, etc.—we co-operate with him to the fullest possible extent.

Write us for particulars of our attractive agency proposition.

Save the surface and
you save all" *Paint & Varnish*

MEDICINE HAT CALGARY EDMONTON VANCOUVER

are again becoming low and indications are that there is not going to be any cheap turpentine for a long time. Today's quotations are $2.50 per Imperial gallon with indications that further advances are not unlikely. Prices are as follows:

Turpentine —	Imp. gal.
1 barrel (barrel included)	$2 50
2 to 5 barrels (barrel included)	2 49
5 gallon lots	2 60

White Lead in Oil Remains Unchanged

Toronto

WHITE LEAD IN OIL.—A very fair volume of business is being handled in this commodity. Quotations remain unchanged and are as follows: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Window Glass And Putty Holding Steady

Toronto

WINDOW GLASS, PUTTY.—Window glass prices show no change, but an advance is shown in bevel and polished glass, and also in wind shield glass. Details regarding the new prices will be found on page 44. Business is more active in the window glass trade as many of the residences and other structures which have been building are now being finished up. Putty quotations are as follows:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$ 35	$5 60	$5 95
Do., 100 lb. iron ...	6 20	6 45	6 80
Do., 25 lb. iron	6 45	6 70	7 05
Do., 12½ lb. irons..	6 70	6 95	7 30
Bladder, in barrels ...	7 10	7 35	7 70

PITTSBURGH MARKETS

(Continued from page 55)

ably do, but even that is not certain. Some of the small mills apparently do not. Buyers have been showing apprehension that at some time in the not distant future there may be a restriction of output through labor difficulties, but few buyers seem to have realized that matters were likely to come to a head by September 1st. That, however, represents an opinion based upon the best collection of information obtainable.

Mills are fairly well sold up and buyers are of course, correspondingly well covered, i.e., the buyers who are jobbers or manufacturing consumers, while buyers who have construction work in view are in some cases covered and in some cases not. There is considerable tonnage involved in construction projects approved, but against which purchases have not been made, and most of this business is held up. For instance, there is a large building which it is desired to erect at once, and which will require 8,000 tons of concrete reinforcing bars. The buyer has been importuning one large mill after another to take the order, without success. A small mill could not handle the tonnage.

In present circumstances there is no issue in the market as to prices. Prices are now more thoroughly "stabilized" than even the Industrial Board of last March and April ever hoped to stabilize them, for no one would, of course, think of cutting prices at this juncture, while talk of advancing prices is altogether taboo. Labor is very restive and to advance any price would simply be to furnish ammunition to labor agitators. That is a fact that the United States Steel Corporation recognized three months ago, and made no secret of, but some of the independents have only lately grasped the point.

Labor Situation

There are really two labor situations. On the one hand the American Federation of Labor has been endeavoring to organize the entire iron and steel industry with the object of securing certain demands or calling a general strike. On the other hand several strikes have actually occurred, at widely separated points. In the past ten days, for instance, there have been three strikes in the sheet industry alone, at Wheeling, W. Va. Canton, O., and Newport, Ky. These and other strikes can hardly be regarded as directly a part of the American Federation of Labor program, for that contemplates a general strike and can hardly be aided by the men going off at half cock at this point and that. A definite indication that the detached strikes have no connection with the general program is that the strike at the steel and wire plant at Peoria, Ill., was settled a few days ago, and on the basis of the men being given a wage advance of 5 per cent. when their demand had been 12 per cent. advance. The Federation demands are much broader, and look more to working conditions than to mere wage rates. There is quite a collection of things they want, embodied in the list of 12 points formulated and made public July 20, including such items as the check-off, abolition of physical examinations, abolition of company unions, the eight-hour day, seniority to apply in employment and dismissals, etc.

The effort to organize the iron and steel trade was inaugurated at the St. Paul annual convention of the American Federation of Labor last year. At the Atlantic City convention last June a report was made, showing the progress had not been up to expectations, and giving the principal cause of the slowness of the work the fact that many municipalities, particularly mill towns in the Pittsburgh district, would not grant permits for holding labor meetings. Organizing efforts were increased, however. Sunday, July 20, a meeting was held in Pittsburgh of representatives of 24 labor organizations, the meeting enunciating a set of 12 demands and ordering that a strike vote be taken, to be completed in 30 days, the vote to be on the proposition, whether the men would back up the "National Committee for Organizing Iron and Steel Workers" should it consider it desirable to call a strike. Another union, that of hod carriers, was afterwards added, making 25. A point in this, as in all American Federation of Labor activities, is that each man must belong to the union particularly adapted. Among the 25 unions are those of blacksmiths, brick and clay workers, bricklayers, machinists, stationary firemen, etc., etc. The rank and file of the workers at blast furnaces and steel mills would belong either to the International Union of Mine, Mill and Smelter Workers or to the Amalgamated Association of Iron, Steel and Tin Workers.

The strike vote was announced at Youngstown on the evening of August 20, but was merely to the effect that 98 per cent. of the votes were affirmative. There is no line on the total number of voters. A statement merely of the number of voters, however, would not be particularly illuminating, and certainly would not be conclusive, for if the voters comprised only 10 per cent., or 20 per cent., of the total number of employees the question would be whether they are men engaged in such work that their withdrawal would cripple operations. For illustration, one of the 25 unions is the "Switchmen's Union of North America." If these men quit others might or might not take their places, but if no switches were turned it would be minutes in some plants and only hours in other plants before operations would have to cease.

On the date the vote was announced the committee decided to allow a period of ten days for the arranging of a conference with the employers, and the intimation has been that if within that period, which ends Saturday, August 30, the manufacturers do not agree to a conference a strike will at once be called. It is altogether improbable that the manufacturers will refuse to enter a conference and do nothing else. It is likely they will close their plants suddenly if they foresee a strike coming, although they may agree to confer. There being no organization of iron and steel manufacturers which the organizing committee can approach, its course was to address a lettter to Judge Gary, as the head of the dominant interest, and they followed this by going to New York in a body at the end of last week. Mr. Compers was expected to arrive in the United States from his trip abroad August 27, or before the time limit expired and in time for a conference.

SATINETTE

SATINETTE WALLPAPER, CALCAMINE, and WINDOW BLIND CLEANER

The Best in the World | **Why? Because**

1st. Satinette Cleaner is put up in an absolutely air tight tin.
2nd. There is no evaporation of ingredients. Goods remain perfectly fresh, no matter how long kept in stock.
3rd. The only real wallpaper cleaner manufactured in Canada.

SATINETTE FURNITURE POLISH
For People Who Care

The only polish on the market finishing with a hard dry lustre. Will not mar the finest finish no matter in what quantities used. The dust will not adhere to the lustre obtained by using Satinette, either on Automobiles or furniture.
Put up in four sizes—4 oz., 12 oz., 32 oz. and gals.

SATINETTE FLOOR OIL
Four Grades. Get our Prices in Barrel Lots

For sale by all reliable Wholesale Hardware and Smallware Houses. If your dealer can't supply you write direct. Mail orders receive prompt attention.

SATINETTE PRODUCTS MFG. CO. TORONTO CANADA

Did You Receive Stockdale's Lectures?

HARDWARE AND METAL has reprinted an additional supply of the four Stockdale lectures, as follows:

"Many Businesses Wrecked by Details"
"How to Make Figure Facts Earn Profits"
"How to Measure the Value of Turnover"
"How to Get the Information the Customer Wants"

We have had these printed for our readers and will gladly supply copies free upon request, so long as our supply lasts. Send for your copy now.

Stephen House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

IF IT'S STEEL OR IRON WE HAVE IT

The MANITOBA STEEL & IRON COMPANY.

WINNIPEG, MANITOBA LIMITED

THE BIG MARKET

—*IS AT HAND*—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

THE EDEN DOMINATES ITS MARKET

Because its construction is time tested.
Because it has twenty-five inimitable and exclusive features.
Because it is nationally advertised.
Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

Myers' Hay Tools

Offer a wide variety of money and labor-saving devices for the hay-maker. Haying is an operation that often is forced by weather conditions. A line of useful time-saving tools is welcomed by the farmer and sells with little effort on your part.

Myers Hay Tools offer these features in a greater degree than other lines.

Write to-day for information about these tools. It will pay you.

Order a case **to-day** from your wholesaler.

Manufactured only by

Stuart & Foster, Limited
Toronto, Can.

CHURCHILL'S "ICE GRIPPER"

Our "Ice Gripper" is made with an equalizing strap which adapts itself to shape of heel. It cannot slip off. It is made in three sizes which fit all sizes of shoes and overshoes.

We are sole manufacturers of the Featherweight Ice Creeper. This is a well known Ice Creeper and has a well established demand.

We are also manufacturers of Instep Creepers and Woven Straps for all purposes.

CHURCHILL MFG. CO., INC., LOWELL, MASS. U.S.A.

The Value of the Business Press to Business Men

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

Have You Noticed?

In any conversation that is fairly general, some firebrand slashes out with condemnations right and left. What he says is interesting, but it isn't informing. Usually there is at least one man present who listens to the general villification thus started and then quietly brings out a point which causes all to pause and think.

This is the man with the balanced viewpoint—the man who gets to the bottom of things before condemning—who takes notice of the various influences at work.

It is this balanced viewpoint which is presented in the editorials of
THE FINANCIAL POST

Consider Some Recent Editorials.
Government Advertising and the C.P.A.
Responsibilities of Auditors.
Careless Methods of Manufacturers.
A Good Man Gone Wrong.
Dr. McFall's Profiteering Charges.
The New Liberal Leader.
Need for Thrift and Greater Production.
The Western Budget Supporters.
Taxation Discouragement.
The Standard Reliance Scandal.
A Shortage of Unskilled Labor.
Dangerous Juggling With Figures.

This is an age when many papers seem overly anxious to advocate what will be popular—to attack the "classes" and so to please the "masses." THE FINANCIAL POST'S aim is to get after the truth. THE POST frankly believes in capital. It believes capital has a right to a square deal, and that causing capital to fear for its future in Canada will do the Dominion inestimable harm. But THE FINANCIAL POST believes capital has obligations as well as rights, and holds capital—where necessary—to account.

You will find enlightenment in the balanced viewpoint of THE FINANCIAL POST'S articles and editorials. You will find its "Answers to Enquiry" department of value. THE POST is the paper for the thinker—be he rich or poor; the paper for the man who is eager to study not only what is best for his business, but what is best for Canada. This is the paper which you may receive weekly for one year at a cost of $3.00. Fill in the attached coupon:

GREB RIM TOOL

Operates all types of cross-split rims. "Wallop" your rim with a hammer to force it in or out of place and you are bound to have greater trouble next time. Do the sensible thing: Provide yourself with the best rim tool on the market and save time, trouble and rims. TEN DAYS' TRIAL.—If your jobber does not have them, we will send you one. Try it ten days. If not satisfactory, return it to us and we will refund your money. We also make the Greb Automatic Grip Puller.

Hardware and Metal Subscribers

Buy for business as well as for p r i v a t e consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL r e a c h only the cream of the trade—the best and biggest buyers in Canada.

HARDWARE AND METAL is now the only weekly hardware paper in Canada, and is read by practically every worth-while buyer, both wholesale and retail in Canada. HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

The Canadian Who Bullied the Bolsheviks!

WHEN war broke out, Colonel "Klondyke" Boyle took across, at his own expense, 200 staunch Yukon volunteers. He was sent to Southern Russia, and in six weeks turned the transport system there from chaos into efficiency. He fed the starving Russian and Roumanian armies. He arranged temporary peace terms between Bolsheviks and Roumanians. Aided by twenty Chinese murderers and a brave Canadian girl, he bluffed the Bolsheviks and Austrians, in a tremendous exploit which won for him the title "Saviour of Roumania," and the personal thanks of the Roumanian royal family.

Read this story of "Klondyke" Boyle, by Arthur Beverley Baxter, in September MACLEAN'S—it starts on page 13.

"Growing Under Gouin"

—tells the amazing story of development of Quebec Province during the past fourteen years —in road-building, finances, industries and education.

"Meet Mr. Habitant"

—What does the rest of Canada know about the Habitant of to-day? Does he talk like Drummond's poems? This article, by Thomas M. Fraser, forcibly depicts the assets Canada has in French-Canadian stability and thrift, and will go far to remove any lingering prejudices which may exist in some minds.

Other Big Features

The Crowning of the King—By J. K. Munro, the pungent, pithy, political pundit.

Nuorteva's Propaganda—By C. H. Cahan, K.C., recently Director of Public Safety.

The White Eagle at Niagara—By Major C. R. Young, late adjutant Polish Army Camp.

The Problem of Our New Canadians—By Nellie McLung.

His Majesty's Well-Beloved—By Baroness Orczy.

Canada's Great National Asset—By D. B. Hanna, president Canadian National Railways.

Teddy Bear—A wonderful, poignant, Robert W. Service poem.

On Leave—A light, frolicsome story by Harry Bailey.

Evil Spirits—Another Bulldog Carney story, by W. A. Fraser.

Ebb and Flow—A new story by C. W. Stephens, who wrote "Man and Wife."

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

TURPENTINE

in steel drums containing 46 gallons, NO LEAK
ORDER THROUGH YOUR WHOLESALER, OR WRITE US DIRECT

Awnings Tents Flags Tarpaulins

We were optimistic for good business this year but trade has exceeded our expectations. Our many customers are participating in this good business by carrying our lines for immediate delivery. The season is on. Sort up your stock to be ready. Catalogue on request.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONTARIO

ONE COUPLER FOR ALL BELTS
Jobbers and dealers find it doesn't pay to carry several makes of Belt Couplers when the

Chase Belt Coupler

will couple ANY MAKE of traction belt INSTANTLY and couple it RIGHT.
The Chase couples belts so that their flexibility is never retarded. It has a Hinge Joint that lies flat and the belt is allowed to run perfectly free and easy.
With the Chase the cost to take up slack doesn't exceed from ¼ to 1½ cents per belt.
Its downright practicability, serviceability and economy are putting it into the best machine shops and over the counter of the best Hardware stores.
Write for Booklet and Discounts to Dealers.

STRONG MACHINERY & SUPPLY CO., 21 Walker St., New York City

Wanted

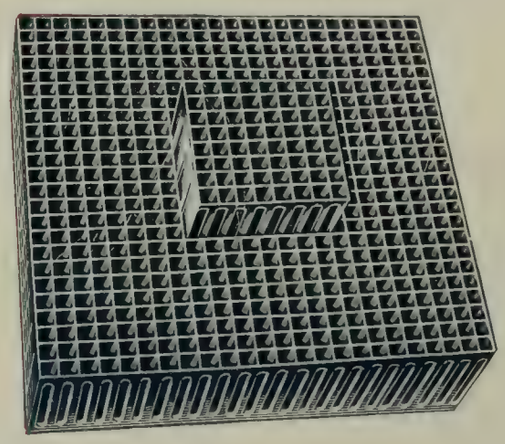
McKINNON RADIATORS

Really Cellular



It is easy to break an ordinary radiator beyond repair, a condition that entails wholesale waste, because scraping an ordinary radiator entails scraping the expensive tanks and other accessory parts.

The McKinnon Radiator solves this big waste problem—Its core is made up of individual cells, which can be fitted into any radiator frame work—

This is very valuable information for the auto owners and garage men—We supply new cores that will fit ANY RADIATOR SHELL.

Corrosion is also one of the evil influences of water on the radiator—We overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward, and corrugated so that the water is constantly in agitated action carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water pockets are also constructed to permit of an outward strain many times before a burst will take place—

Vibration has no terrors for the McKinnon Radiator—because it is a solid unit not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry.

NEW CANADIAN INDUSTRIES

HAVE YOU NOTICED

on every side the new industries coming to Canada from other countries?

EVERY NEW INDUSTRY

increases our volume of trade and is a possible customer for you. Just as soon as they locate in Canada you should buy from them, forgetting the past and its poverty-producing record.

RESOLVE NOW

to buy Canadian-made products where quality and price are right. Service will generally be better.

IN THE PAST

Canada has acted the part of the "Cinderella Sister" of the British Empire, beautiful but poor. That day is ended, and if we all use fairness and common sense in our dealings, then for Canada

THE PRINCE HAS COME!

Dominion Sheet Metal Corporation, Limited
HAMILTON

You'll be pleased to know that every worth-while jobber or manufacturer in CANADA uses "PREMIER" MADE-IN-CANADA GALVANIZED SHEETS.

SOME FACTS

OF INTEREST TO HARDWARE DEALERS

THE fundamental principles necessary to good distribution are these:—

A product that will give satisfaction—for satisfaction will result in repeat sales.

Attractive appearance—to hold the attention of the present user—as well as to gain the interest of the prospective user.

Fair profit—the article should be sold at a popular price—should provide a reasonable profit for the merchant.

In O-Cedar Polish and O-Cedar Polish Mops you will find all these points—combined with the important feature that O-Cedar Products are already well known to the consumer. The public is continually reminded of the merits of O-Cedar through our publicity in newspapers and other forms of advertising.

All the leading Hardware Dealers sell O-Cedar Products. Due to the great number of O-Cedar Merchants, many have never been called on by our regular representatives, only by our indirect representatives—"The Wholesale Salesmen." This wholesale service makes the buying of O-Cedar Products convenient, and we are able to indirectly call on every merchant.

With the co-operation of the merchants and because of the ever-increasing demand of the satisfied consumer, we have been called upon to frequently increase our factory output.

Space does not permit of the enumeration of all the excellent qualities of O-Cedar Products. The above facts, however, will enable a merchant to judge for himself the merits of these products.

ONEIDA GAME TRAPS

"Victor," "Hawley & Norton," "Newhouse" and "Jump" Traps

The day of the trap and gun comes with the chilling of the weather and the turning of the leaves. This year more than ever the call of the wild will get the ears of male Canada—the men who have returned from the war and the men who debarred themselves the pleasure of the hunt while their boys fought for them overseas.

Be prepared for this trade

"EVEREADY" DAYLO

The Daylo has become so universally recognized as a daily necessity that no huntsman's kit is complete without it. Whether it is the type he carries in his pocket or the lantern style, the "Eveready" Daylo is made to suit his every need. We carry a complete stock.

AMMUNITION

Interesting Prices

We have on hand a limited quantity of Winchester 30-30 Hard Point Smokeless Cartridges, also some .303 hard and soft point British cartridges which we purchased from the Government.

Prices considerably below regular. Ask about them.

RIFLES AND SHOT GUNS

"Winchester," "Remington," "Stevens," "Iver Johnson"

Our stock of rifles and shotguns consists of the above well-known brands in the best selling styles. There is sure to be a big demand for firearms this season, for never in the history of this young country have there been so many "crack shots" come to the fore, as the war has brought to light in the past four years. Evidence of this is seen at the rifle ranges.

We carry ammunition of all kinds, Metallic and Loaded Shells.

Ask the "Rice Lewis" travellers.

First Choice

With Garage Owners

The 805 and 806 Garage Door Sets are opened and closed with ease. One door opens independently, permitting ready entrance at all times without opening the whole set of doors. This pleasing door set saves space and time in opening. It slides and folds along the wall out of the way.

Set No. 805 includes — No. 29 Latch; 1 only Swivel Hanger; 6-foot Braced Rail; 4½ pair 4x4 inch jap. No. 505 T.P. Butts; 1 only No. 830 Foot Bolt; 1 only No. 5 Pull; 1 only 4½-inch No. 30 Safety Hasp. No. 806 is the same except that the Latch is No. 27. All bolts and screws packed in the "Unusual National Way," japan finished. Catalogue and prices for a postcard.

And a Bright Future for Sales

The well known fact that most automobile factories are unable to produce cars fast enough to supply the demand is a promising indication of the field for future business.

The host of purchasers are chiefly owners of garages; this handsome door set wins them on sight.

National Mfg. Co., Sterling, Ill.

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

Purchase the Products of Canadian Mills

TO uphold the Glory we have jointly earned—to honor our noble dead—to comfort the wounded, and extend to the men returned the hand of prosperous welcome, we must cast aside all forebodings and face the future with unbounded courage and confidence and, without a shadow of doubt, declare to the World that this Nation, which was so quickly and successfully transformed to a War basis, can be depended upon to revert to Peace conditions with equal success. The buyer and seller must recognize their duty to the Nation and co-operate fully to the end that all products that can be produced in Canada by Canadian workmen shall not be purchased elsewhere.

OUR Duty is plain; Canada with Canadian labor and capital can produce, manufacture and distribute products sufficient to keep the wheels of industry turning to the limit. The song of Prosperity and Happiness should ring out all over the land. Let us sincerely pledge to the extent of our needs, to purchase materials produced in Canada by Canadian Workmen, and the result of our efforts will return to us the Blessings of a Prosperous and Happy Nation.

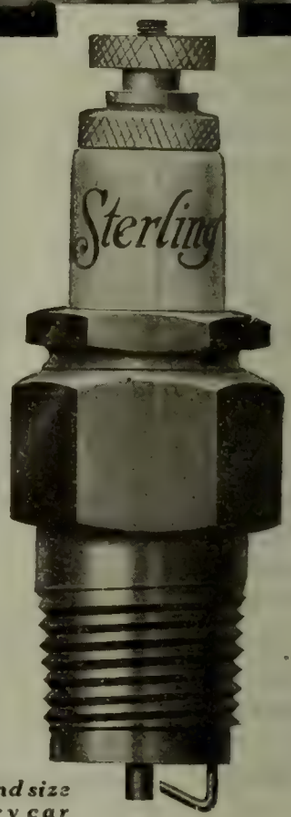
"Why I Sell Sterling Plugs"



"I sell Sterling Spark Plugs for the same reason that I use them in my own car.

"I know from my own experience as well as that of my customers, that Sterling Plugs give the kind of service that makes customers stick. Once in a car, you need never think of them except to occasionally wipe off the carbon—and that is a matter of only a few minutes. Anyone can clean a Sterling by merely unscrewing its bushing.

"Note the size and quality of Sterling electrodes. They are heat proof and shock proof. Practically no amount of firing will cause them to burn or bend from their original positions. The center electrode is made from high grade nickel alloy Monel metal, the most expensive material of its kind on the market.

"Sterling electrodes have a strength not found in ordinary spark plugs. They are built to last—to give an even, steady spark at all speeds and in any motor. Just look at the size of Sterling electrodes, then compare them with others."

Sterling Spark Plugs are sold by progressive garages and supply dealers everywhere.

AUGUST 18, 1919.

PRICES ADVANCED

To the Trade:

We show herewith prices taking effect today, all previous quotations and prices being withdrawn and please note new retail prices to the consumer which yield you a good profit.

We call your attention to the fact that the advance we have made on carpet sweepers is very small and only puts our prices back where they were before January 1, 1919. We were among the very few manufacturers who reduced prices January 1st. We fully expected at that time with the war over, that prices of raw materials and labor would gradually tend downward but as you know, while a few items in raw materials were slightly reduced, the great bulk have constantly advanced and as far as labor is concerned, prices have gone up steadily this year and are continuing to advance, all of which makes an advance in our prices absolutely imperative.

As the necessity for this advance is most urgent, all orders received and shipments made after this date must be invoiced at the advanced prices. The new retail prices as shown herewith should take effect at once and we request you to kindly instruct your sales people in the matter so that mistakes in the selling prices may be avoided.

New price cards will be sent you on request.

We remain

Yours truly,

BISSELL CARPET SWEEPER CO.
OF CANADA, LIMITED

RES–L

R. E. Shanahan
PRESIDENT

Price List of

BISSELL SWEEPERS

Effective Aug. 20, 1919

and Until Superseded

SUBJECT TO CHANGE WITHOUT NOTICE

In the belief that a uniform price for equal service is eminently fair; that it works alike to the advantage of the consumer, dealer and producer; and that it is only on this selling basis that a constant high standard of quality can be maintained; we stipulate that our sweepers shall be sold at not less than our established prices as listed below:

Carpet Sweepers	From Niagara Falls, Ont. or Eastern Canada Jobbers Stocks Per Doz.	Retail*
"American Queen"	$51.00	$ 6.00
"Champion" Nic.	43.00	
"Champion" Jap.	36.00	
"Club"	108.00	12.00
"Grand Rapids" Nic.	48.00	5.50
"Grand Rapids" Jap.	41.00	4.75
"Grand" Nic.	64.00	7.50
"Grand" Jap.	57.00	6.75
"Parlor Queen"	54.00	6.50
"Princess"	49.00	5.75
"Standard" Nic.	44.00	
"Standard" Jap.	37.00	
"Universal" Nic.	46.00	5.25
"Universal" Jap.	39.00	4.50
Vacuum Sweepers		
"Superba" Vac. Sw.	140.00	17.00
"Grand Rapids" V. S.	124.00	15.00
"Household" V. S.	110.00	13.00

*On account of the freight the established retail prices on carpet sweepers are 25 cents higher than above and on our vacuum line 50 cents higher in the following Western provinces: Man. (excepting the City of Winnipeg), Sask., Alta. B. C.

BARCALO

"S" Wrench

Simplicity

During our past twenty years' experience in the making and marketing of metal products we have made **Simplicity** a necessary quality—for an ideal "S" wrench. The absence of complicated parts in the Barcalo "S" wrench has made it a general favorite. Note the few parts, but four—a drop-forged movable jaw—screw—pin and solid bar. All combined to make a handy, durable and useful tool for the Mechanic, Machinist and Garageman.

The Wrench

There are many things the Barcalo "S" wrench will do, that many other wrenches will not—there are splendid profits to be made by you in selling it and the customer's satisfaction created will mean an added **quality reputation** to your store.

Made in 6, 8, 10, 12 and 14 inch sizes.

Its Parts

Our guarantee is **your protection.** We supply without question a new wrench for every one proving unsatisfactory in any way. Write to-day for information and prices.

Watches and Clocks

MEHASCO

We have built up a large trade in this line owing to the fact that in these particular goods the merchant appreciates service. The popular priced watch that sells for $1.75 carries the following guarantee. They are guaranteed to be running right and keeping good time when you sell them to the customer. If they cannot be adjusted or fail to give satisfaction, in say one week's time, the customer can return the watch and have it replaced, and we in return replace it free of charge to the dealer. But the customer cannot use his watch until it is worn shabby and then have it replaced. We will have it repaired for him if he wishes at a slight charge. On clocks the guarantee is two years, and if they do not keep good time for that period we will have them repaired free of charge provided they are not abused.

4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actua. tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

Again in Demand

The wooden tub is back—the high cost of the metal is largely responsible, but a wooden tub has other advantages.

There is no galvanizing or plating to fall off. No rust to spoil clothes, and hot water retains its heat longer.

Cane's wash tubs will be favored. They last a lifetime and are built with the workmanship that has made Cane's Woodenware popular for over thirty-five years.

Order a supply of Cane's Tubs from your dealer for a Source of Good Revenue

Every Canadian Should Read
OCTOBER MACLEAN'S

The contents of MACLEAN'S for October will grip the interest of Canadians. There will be a big demand for the October issue. It will be a trumpet blast for a national awakening. It will mirror Canada's great West — politically, socially, industrially. There will be action in every section—plenty of it. It will be a red-blooded issue in every respect. Read this list of contents—then send in an order for a generous supply of October MACLEAN'S. Western dealers should order an extra supply.

"WANTED—A WHITE WEST"

By **T. B. COSTAIN**

An article on the determination that has gripped the Western Provinces that no more aliens are to be allowed in that part of the Dominion. It includes the first complete story of the sensational labor developments in the Drumheller coal mines.

CONTENTS OF MACLEAN'S OCTOBER, 1919, ISSUE

"We Must Start Afresh,"
By Ralph Connor.
An article on the need for Canadians to gain a new viewpoint on things political, social and religious as a result of the war.

"Those Pesky Farmers Out West,"
By Hopkins Moorhouse.
An article on the grain growing movement and the way in which it is upsetting all political calculations.

"Fifty Years in the West,"
By Professor W. T. Allison.
A story of the remarkable business career of J. H. Ashdown, of Winnipeg, one of the earliest pioneers of the prairies.

"Solving the Problem of the Arctic,"
By Vilhjalmur Stefansson .
The last instalment of this remarkable exclusive narrative of his five years of exploration in the north.

"Grappling For New Holds."
By J. K. Munro.
The usual monthly review of political developments, giving inside information on the new line-up of the parties.

FICTION

"The Airy Prince,"
By Arthur Beverley Baxter,
Illustrated by E. J. Dinsmore.
A novelette, complete in this issue, by the author of "Mr. Craighouse of New York, Satirist," and "Klondyke Boyle,"—a delightful and witty story.

"Spanish Doubloons,"
By Camilla Kenyon,
Illustrated by Louis Royal.
The start of a new serial by a new writer, but one who promises to rival Mary Roberts Rinehart. It is a story of a treasure hunt written in rather high vein and with an engaging love story. It will wile away many pleasant hours for the reader.

"Ebb and Flow,"
By C. W. Stephens,
Illustrated by W. Goode.
The third and last instalment of this intensely interesting business story.

"His Majesty's Well-Beloved,"
By Baroness Orczy,
Illustrated by C. F. Peters.
The fourth instalment of this historical novel.

"The Banshee Bell,"
By Edith G. Bayne,
Illustrated by D. G. Summers.
A bright love story.

MAKE A BIG WINDOW DISPLAY

The dealers throughout Canada who are making a big success of MACLEAN'S are displaying the magazine prominently—talking about it and pushing it. They are taking advantage of the natural demand—using it as a foundation for profitable business. Make a display of October MACLEAN'S.

Over 70,000 Canadian Families Buy

Public Finance Disaster of Early Canadian Days

The almost forgotten experience of our forefathers, of which, to quote Sir Oliver Mowatt, "The effect was to diminish the value of municipal securities generally, and to corrupt the moral sense of the people with reference to moral obligations," makes a fascinating and thought-stimulating article as presented by Dr. J. Murray Clark in recent issues of THE FINANCIAL POST.

Dr. Clark, dealing with this Municipal Loan Fund of the fifties, says of its author, Sir Francis Hincks:

> He had in some respects genuine ability and, in matters which he understood, rendered considerable useful public service, but he was an idealist and a theorist without any practical grasp of the rigorous laws and unyielding facts of finance. He was patriotic and well-meaning, but his patriotism and good intentions did not save the country from the inevitable consequences of his scheme which those able to think clearly on matters of finance perceived from the beginning. He possessed in an eminent degree that fatal fluency of persuasive speech with which so many of our politicians are endowed, and swayed the people, for whom he expressed and probably felt sincere devotion, with superficial catchwords and glittering generalities not founded on the stern realities of economic laws. The confidence he inspired only enabled him to do infinitely more mischief than would otherwise have been caused by his scheme, and did not protect the people from the losses and distress resulting from disregard of sound business principles.

There is more here than an interesting story of early days. Here is a marking on the map of Canada's history by which all interested in the country should make their reckonings, should chart their course of action.

THE FINANCIAL POST is continually presenting such articles. Consider some which appeared in the early issues of August:

Stanley Tools

STANLEY
DOWEL AND ROD TURNING MACHINE
No. 77

A tool that will appeal to Carpenters, Cabinet Makers, Pattern Makers, Furniture Manufacturers and especially to Supervisors and Instructors of Industrial Education, in fact to anyone interested in woodworking.

It will not only cut dowels of varying sizes and lengths to perfect dimensions, but with it one can also form rods of practically any length.

Ready made or stock dowels have a tendency to warp and shrink, making them very unsatisfactory to use where a close fit is desired.

With this machine the workman can cut his dowels when he is ready to use them and furthermore of the same material as the wood being worked.

One cutter head complete for making dowels or rods 3/8 inch in diameter is furnished with each machine.

Additional cutter heads with cutters 1-4, 5-16, 7-16, 1-2, 9-16, 5-8, 11-16 and 3-4 inches can be furnished at slight extra cost.

A workman whose tool equipment includes one of these machines and a Stanley Doweling Jig can make doweled joints with surprising quickness and accuracy.

A Profitable Tool for you to Carry.

Branch Store Service That Serves

How Montreal Hardware Store Seeks to Preserve Connection With Customer—Must Carry Big Stock With City Opposition—Quantity Buying—Using Every Foot of Space

"WE must look after the needs of our customers and take care of them. The branch store enables us to give a real service, and this is one of its advantages."

This is the reply of H. L. Philbin, proprietor of the M. Philbin Hardware Company of 362 St. Catherine Street, Montreal, to the questions of the Montreal editor of HARDWARE AND METAL, who sought a commitment from Mr. Philbin as to the advantages of conducting branch stores in a large city, rather than running one large store in a single location.

Mr. Philbin, connected with the retail hardware business in Montreal since the early "eighties," has found it quite as necessary to look after the needs of customers in making purchasing convenient, as it is to give them those little attentions when in any one of his four stores. To this end, these several complete hardware stocks are placed in as many locations to meet the convenience of the public, as well as that of the regular customers who have found at "Philbin's" the very precise articles they want.

A Case in Point

"I was just about to leave the store a short time ago at night," said Mr. Philbin. "It was a few minutes past seven o'clock and we had closed for the day. A man came to the door and repeatedly tried to get in. I continued to finish up what I was doing and the man remained rattling the door until I started out. Of course, I said we were closed.

"Now I have just spent an hour on the tramcar getting here. Surely I won't have to go back without my purchase," he said. "If I do, I shall have to come again for I cannot get the article I want elsewhere, and I know you have it."

This well illustrates the dependence which Mr. Philbin states so many to have in the completeness of the stocks carried. It has, he states, been demonstrated over and over again.

This comprehensive stocking of hardware has not been without its decided burden to the owner. All good hardware men realize how readily a stock will increase even when closely watched. To carry the necessary assortments for a big city trade is no little problem, and Mr. Philbin has spared no item necessary to make the stocks of his stores very complete indeed. They have every appearance of being the last word in completeness, and this is carried out in the interior displays, the extra storage basements, and the shelving and boxes.

One of the points it has been necessary to consider is that of the opposition of the big departmental stores. With these stocks placed at the disposal of the citizens, the straight hardware store is forced to do his chosen business justice by just going, if anything, "one better."

Showing the auto accessory and sporting goods department in the M. Philbin Hardware Co., store at 169 St. Catharine St. W., Montreal.

This gives an idea of the excellent use made of the store windows of the M. Philbin Hardware Co. at their store at 4169 St. Catherine St. W., Montreal. A fine showing of auto and bicycle accessories and sporting goods is revealed.

Managers and Clerks

Asked as to whether there was difficulty in securing managers for his several stores, Mr. Philbin replied that there had been little trouble. He realizes how important this is, and has been quite fortunate in the selection of men, he feels. It is very necessary to have a man with a decidedly complete grasp of all parts of the business, and one too, who can select men to assist him and who are really the men who meet the customer.

"We have changed almost a complete staff to suit the plans of one of our managers," continued Mr. Philbin. "It has been necessary to really train these men over again, and to do this to suit our own ideas. "I believe that a clerk should so try to please his customer that that customer, when coming again, will ask for Mr. So-and-So, as the case may be."

This illustrates a point upon which emphasis was made in this interview, and bearing upon the difficulty of securing and maintaining a good staff. "It is necessary to pay help very high wages these days, and boys are getting the wages of men. Even at that, they are very often not accomplished hardware salesmen, and do not, therefore, take an interest in a given sale that they might."

Here Mr. Philbin related the following concrete illustration.

"I was leaving for lunch. Near the door one of the men was waiting on a lady, and I recognized her and spoke, briefly, asking her if she was being waited on satisfactorily. She replied that what she was shown would probably do, but I knew we had something better, and brought the better article out. I went into detail in explaining its advantages (as much for the salesman's benefit as for the customer's), and although she knew it would be higher in price, she readily agreed to buy it, once she realized its worth."

Mr. Philbin greatly wishes that salesmen would apply themselves to their work earnestly. That they would study the real merits of an article and so be able to sell it quickly and give the customer service. In this respect there seems to have been a decided falling away from the old determination to know one's goods and so be able to sell them. "It really is necessary to be watching closely all the time, so that customers may get the service from the clerk that should be given. And, I believe that it is necessary to have the manager the buyer also,—one who knows what is needed, and who can buy and sell, therefore, with a complete knowledge of what is required. We have tried to separate the buying and the selling duties, but I believe the combined plan is the better," said Mr. Philbin.

To Start Bonusing

Asked as to whether any scheme had been tried in the way of extra profits to the store help, Mr. Philbin stated that a commission basis on all sales was put into effect.

"We will give them a small commission over and above their salary. This will be paid weekly. We decided to make this apply on all business done by the men, and believe that it will be better than by giving a commission only on sales above a certain amount."

It was also pointed out that this plan might serve to keep the men trying hard to exceed their past sales. It would be a real incentive to selling more goods, and, as Mr. Philbin pointed out at the outset, the whole secret of the plan of branch stores will rest in the proper relation of turnover and overhead expenses. The bonusing plan ought to secure, in some measure at least, the desire of the management. Mr. Philbin believes that the men already appreciate this consideration in paying them according to their selling abilities. Increased earnings paid the men weekly, will be appreciated, no doubt.

In connection with furthering the interests of the business in a broad way, and that the various stores may be working harmoniously that the best results may be attained, arrangements are pending for conferences of the different managers at frequent intervals. This will have a splendid result, it is expected, for conferring of the managers will enable a free and full discussion of problems that have presented themselves. In conference, the best and most prompt methods of dealing with given matters can be followed. This method of co-operation will, it is expected, yield definite benefits that otherwise could not be anticipated or secured.

Checking Stock Display

A visitor to any one of the M. Philbin Co. stores is impressed with the completeness of various arrangements within comparatively limited space. The last store opened—that at 350 Bleury St., illustrates the careful and well-planned use of space better, perhaps, than any of the remaining stores.

One reading this article will scarce credit the statement that the width of the front is only ten feet. Provision

was made by the owner of the property for a stairway to the second flat of the building in which the Philbin store is located. This did not deter Mr. Philbin from securing the premises, for he wanted a location which would most probably afford him the number of transient and regular customers required to assure a profitable turnover. A short distance from the intersection of St. Catherine and Bleury Streets, this location was considered an excellent one.

The accompanying photograph will reveal better than worded description can, the splendid layout of the display windows. It is very doubtful if better arrangement of this narrow space could have been planned. With the change of background from time to time which effective display calls for, here is a pair of windows, which, when attractively dressed, cannot fail to attract. Unobstructed view from across the street is always to be had. That this view may be even improved, the colored glass has been removed from above the transom division. Using clear glass here, displays will be planned of various goods. With proper "backing" made for these, the view from the opposite side of the street will be much better. More height is given the front, and the best use in this is made of the windows.

"Once every week all the stock is carefully gone over in the display boxes. This is done both in the store and the cellar. We follow this plan to avoid being short of goods, and also to see that goods are where they ought to be. When we are busy, locks and other hardware may be quickly put into the wrong drawer, and this method prevents mix-ups," said Mr. Philbin.

Frequent change in the window displays is made, and the panel idea is extensively featured. In this way there is little delay in dressing a window and the panels may be prepared with the desired goods at any time when there is not a rush on within the store. Panel changes are prepared and kept in the basement for immediate use. This idea is followed also at all the branches.

A Unique Plan

"I have been working on a plan that I believe will save us hundreds of dollars," said Mr. Philbin, as he took the writer to a new display idea which had just been completed, though not fully sampled. This consists of a series of panels placed conveniently where customers can be shown the actual goods. The idea, briefly, is as follows:

Panels of wood about 26 inches wide and five feet long are arranged on rollers. These rollers were made from ordinary casters taken apart and placed on the bottom through the use of small pieces of narrow iron such as is used for corner braces. These rollers carry the weight of the panel when the panel is drawn out from the wall and smaller rollers are used at the top to guide the panels.

In a space of about 30 inches for the width of the panels, and about 5½ feet high, panels to the number of twelve can be accommodated in a space of five feet. Both sides of the panels are used, and the goods sampled on these are those not shown elsewhere in the store, and carried in stock in the basement. Thus, the idea of the store to "Show Everything" is carried out. Note a direct illustration.

"One of our men sold three locks in 15 minutes the other day," continued Mr. Philblin. "Each sale was made to a different person, and the total cash taken in for those three locks was $7. It just happened that this salesman waited on customers wanting locks. He was able to put out the panel already sampled and there the customer had the whole range before him; it was a very easy matter to make a selection."

So well pleased are the men with this arrangement, that Mr. Philbin believes it will save them much money every yeaf. If all goods are sampled there will be no excuse for crying—"We haven't got it."

With rents soaring in Montreal for choice retail locations, Mr. Philbin pre-

Tools and builders hardware are displayed to splendid advantage by the arrangement shown in the illustration. Ladders provide ready access to the stock. Note the large amount of stock kept out where people may see it and still there is no disorder.

dicts that the hardware retailer can, if need be, carry on a very extensive and profitable business in a decidedly narrow store by using these panels. He believes that it may become imperative.

Repair Dept.—Delivery

An extensive repair business is done by the various stores. To this end expert locksmiths are engaged, and an extensive lock repair and fitting business as well as key-cutting department, is operated. Several men are constantly engaged in the workshop. One may specialize on lawn mower repairs, another on guns and rifles, another on key-cutting, etc. Glazing is an extensive work conducted, and at certain seasons this is a very active department. To inform the public that work of this kind is done, a small, neat sign is often placed in the window—"Lock and Key Hospital." This is a timely advertisement, bound to attract.

If there is one worry which the average hardware man would welcome relief from, it is that of delivery. It is one of the greatest contributors to overhead expenses that any store can have. The Philbin stores has found it a decided problem, and yet to maintain their service, delivery must be always assured.

Deliveries are made in the morning and in the afternoon. Auto trucks are used. In case there may be a breakdown in the midst of a morning or afternoon delivery, a spare truck has to be maintained. When necessary, this is sent to the point of breakdown and the load transferred with the minimum of delay.

"One of the necessary things is to have a good driver," Mr. Philbin pointed out. "In this respect we have been fortunate, but there still is much cost to keeping up cars. We have run one of our cars as much as 100 miles in one day."

Parcels are collected from the various stores and the "zone" system is used so that there is no overlapping. The Westmount trade is looked after by one car alone.

Want Better Goods

Mr. Philbin related the experiences that he had had with Westmount trade. This is really a fine section of the city, whose citizens are well-to-do, and who have the money, as a rule, to buy what their tastes suggest.

"For many years it was insisted we could not sell a high-grade of goods there. We carried a good stock, but there were fears expressed about putting in the expensive lines of hardware. But it was decided some months ago to add to the stock, not only increasing it, but adding better and more expensive lines. It has already justified this plan being followed, and the customers are anxious to have the better goods, and will pay the price."

This all means increased investment to the owner, but it really is necessary, Mr. Philbin pointed out. It takes much more money to-day to buy a stock of a given size than it did five years ago. But with the increase of price the average customer wants the better article, and when a considerable outlay is necessary the knowing buyer will spend a little more and secure the worth while and durable goods. Then is left a better impression regarding the seller.

This is the store of M. Philbin Hardware Co., of 350 Bleury St., Montreal. The store front is just 10 feet wide and will be seen good use is made of the space. A feature that will be noted is a V-shaped window between entrance doors, another window space is utilized for paint and varnishes.

Added Accessories

Specializing in tools extensively as they do, and in high-grade cutlery (the latter of which Mr. Philbin says has sold splendidly throughout the war regardless of price), it was felt that automobile accessories could be sold. A stock was recently put in, and this will be limited for the present to such lines as are easiest to sell. Wrenches, pliers, spark plugs, batteries, small tools and the like will be tried out first, and as sellers are known the line will be increased. The windows will be extensively employed in pushing the sale of these.

Electric lamps have been big sellers. Aluminum ware of the best grades sells extensively. Altogether, the Philbin stores aim to carry a big assortment and to make use of every foot of space.

STEAMER TO SOUTH AMERICA

The Canadian Manufacturers' Association is sending out the following notice in connection with steamship service between Canada and points on the East coast of South America:

"We have just received advice to the effect that the Canadian Government merchant marine service steamer 'Canadian Pioneer' will be ready to sail from Montreal to Buenos Aires on or about September 10, 1919.

"We understand that the Canadian National Railways have been endeavoring to secure cargoes for this boat, but apparently are having some difficulty.

"Any member who can ship to Buenos Aires on this sailing should get in touch immediately with Mr. D. O. Wood, traffic manager, export and import department, Canadian National Railways, Royal Bank Building, Toronto, who will be glad to arrange for space and quote rates."

Getting After Export Trade in Orient

Sending Catalogues or Mediocre Salesmen Will Not Do---Carelessness Has Been a Handicap in Past and Must Be Followed by Efficient Business Methods.

THAT there is substantial export business for Canadian manufacturers in the Far East is the conviction of representatives of the Canadian Bank of Commerce, who recently visited New Zealand, Australia, China and Japan, but, as expressed by C. F. Weed, vice-president of the First National Bank of Boston, they will have to go after it in a "sane, dignified and substantial way." Further, those who have been on the ground realize that it is not going to be child's play. There is the keenest kind of international competition to be faced, and, as characteristically stated by Mr. Weed, "this cannot be met by sending illustrated catalogues to Government representatives, or by sending out mediocre salesmen with sample trunks." He adds:

It is pathetic to see, from that end, some of the futile attempts to do business at long range. One Consul-General told me of a single mail which brought him 1,300 letters from home asking assistance in marketing American goods. Think of it! Trying to compete by mail with bright, wide-awake, courteous Japs on the spot and with solid British firms which have been established there for upwards of sixty years, owning their own office buildings in the principal cities and having godowns of their own in the interior as well as in the port cities, and staffed by men whose families for generations have been in the Eastern trade. It is puerile.

This need for sending out competitive representatives is emphasized by the representative of the Bank of Commerce who also suggests the appointment of capable local representatives. Further, a warning is given against expected immediate results:

Immediate results should not be expected and manufacturers should be prepared to bear at least a share of the cost of advertising for a few years until their goods are well established, and their reliability and durability proven. We can sell in another country only if the goods are at least equal to those of our competitors in price and quality and we should aim to have the stamp "Made in Canada" represent absolutely undoubted quality, the best workmanship and the finest materials. It is only by producing a superior article that we can hope to make rapid progress in our foreign trade.

Gross Carelessness

At the same time a warning is issued to Canadian exporters against committing in the future such gross carelessness in regard to packing, etc., as has been in evidence in the past. Typical instances are given:

1. A shipment of angles, ordered to be a certain length, was sent to the East. When the shipment arrived there were at least three length in the consignment which were shorter than the specifications called for, with the result that the shipment was of no use for the purpose required. If the shipping clerk had checked the goods carefully before they were packed he would have discovered the error, and the resulting discredit to his employer, and a great deal of inconvenience to the importer, would have been saved.

2. A shipment of goods, which required several cases to contain them, went forward with the cases numbered and a statement that certain goods were in certain numbered cases, which was just what the importer desired. When the latter proceeded, however, to open some of the cases to secure the goods he needed, he discovered that the goods were not packed as indicated, with the result that he was put to considerable unnecessary inconvenience and annoyance.

3. A shipment of hardware went to the East and when it arrived a great quantity of the goods had been stolen. This might have been avoided if the cases had been bound with metal straps.

4. A shipment made against a banker's credit on a through bill of lading went forward from the exporter's warehouse on schedule time in accordance with the contract, and the shipper paid no further attention to it. The goods went as far as the seaboard, but there they lay for months and the importer at the other end was kept waiting for them. Finally he cabled to find out the cause of the delay and the exporter then woke up to the fact that he should have followed up the shipment and ascertained that it was promptly placed on board ship, thus looking after his client's interests. The importer, in view of this experience, says that he will not pay for any more goods shipped from Canada unless on an ocean bill of lading. There were numerous complaints of this kind.

5. An Australian importer stated that he purchased a considerable amount of merchandise from Canada for sentimental reasons, but that he always had the goods forwarded through a New York forwarding house as he could then rely on the shipment being in order. He stated that Canadians were too careless about handling this business.

6. One large foreign house recently sent a man through Canada and the United States with a view to establishing connections, and after looking the situation over he came to the conclusion that he could probably buy a considerable part of his requirements in Canada, but from his point of view the Canadians lacked "pep" and initiative, and were too careless in their business methods to compete with the Americans, with the result that he gave his business to United States firms.

7. The number of complaints that Canadadian export houses fail to answer letters and even cables was really astonishing.

8. Some firms complained bitterly that they would take up a line of Canadian goods and after going to the expense of introducing them and building up a good market for them, the Canadian house would suddenly cease shipments without even a letter of explanation.

This Eastern market holds great possibilities, as indicated by the following lists of imports such as Canada can produce—by various countries:

New Zealand—Automobiles, tires, etc.; bicycles; canned fish; canned fruits, fresh fruits; drugs; dry goods; fancy goods; hardware; iron and steel products; lumber and manufactures; machinery· metallic roofing; nails; paints and varnishes; paper, stationery, etc.; rubber goods, spirits, tobaccos, wearing apparel; wire fencing.

Australia—Agricultural machinery and implements; asbestos, crude, sheet, etc.; axles, bolts and nuts; brushes; calcium-carbide; cartridges, sporting; corsets; cotton goods: blankets, ducks, canvas, drills, denims, prints, unbleached calico, bleached calico, flannelette, twill, knitted underwear, fleece-lined underwear, mercerized cotton, piece goods, silk piece goods, linen piece goods, etc.; drugs, refined and in bulk for manufacture; electrical appliances; emery stones and wheels; fire bricks; fish, in cans (salmon, herring, lobster, etc.), smoked, dried and salted; furred skins; felt roofing; gas appliances and fittings; gloves; hair cloth; hardware; machinery; electrical, mining, woodworking, machine tools, printing machines, sewing machines, portable engines, stationary engines, etc.; metals, various manufactures of, and expanded metal; office furniture; paints; paper: newsprint, litho paper, writing paper, wrapping paper, vegetable parchment, waxed paper, paper boards, wall paper, etc.; pianos and organs; reinforcing materials; rubber goods; sewing silks; slate roofing tiles; springs: steel shafting; tube piping, black and galvanized; wire, fencing wire and nail wire; wood and manufactures thereof.

Japan—Aluminum; aniline dyes; asbestos, in lump, powder and fibre; automobiles; bones, animal; chemicals: carbonic acid, caustic soda, soda ash; butter and cheese; condensed milk; confectionery; drugs, medicines, etc.; explosives: dynamite; fertilizers of various kinds; fish, salt (salmon and herring); grindstones, artificial; groceries of all kinds; gypsum; iron and steel and manufactures thereof of all kinds, including iron screws, wire nails, horse nails, galvanized wire, materials for railway construction, rails, iron anchors, shipbuilding material, etc.; lead; leather, sole, dyed and colored; lumber, pine, fir and cedar; machinery, metal or woodworking; metal and manufactures; malt; oxide of cobalt; paints; paper: printing, writing, drawing, packing, pasteboard, fancy papers; parts for cycles; pulp for paper making; salt; talc; tarred felts, paper, etc.; wines and liquors.

TRADE CHANGES IN ITALY

During the war Italy has eliminated imports amounting to $111,000,000 a year from Germany and $54,000,000 from Austria-Hungary, and in doing so has lost an export trade to those countries valued at $60,000,000 and $37,000,000 a year, respectively. Nearly half of these exports were fresh and preserved fruits and vegetables and manufactures of silk, for the sale of which, unless other markets can be found, Italy is bound to turn to the countries which composed the Central Empires.

At the present time Italy is in need of supplies of almost every description and will import them as soon as trade restrictions are relaxed by the Government. Everything Canadian is popular, and there is a strong desire that Canada shall take a share in furnishing what the country itself is unable to produce. This trade will come to Canada if an effort is made to secure it. The decision rests with Canadian manufacturers, exporters, and above all with the banks, for a cash business with Italy is almost impossible. If the banks will not finance this trade or are not in position to do so, the opportunity will be lost.

A Profit-Winning Combination

Auto Accessories and Tractor Accessories Offer Big Possibilities for Future Business —Tractor Business is Growing at a Tremendous Rate—Auto Manufacturers Unable to Keep Up With the Rush of Orders

"THE tractor business is going to develop much more rapidly than the automobile business did, for the simple reason that thousands of farmers who own autos have learned the value of motor driven equipment. By reason of their satisfactory experience with their cars, they will take for granted the value of tractors and buy them. This is being demonstrated every day. A very large percentage of the tractors sold this year are sold to farmers who also own automobiles."

This statement was made to HARDWARE AND METAL by F. I. Fox, manager of the Toronto branch of the Ford Motor Co.

It is interesting to hardware dealers particularly, because it shows how one man who is close to actual conditions, and handling thousands of orders every month, views the future of the trade.

Has a Big Future

"Is it correct that the tractor business at the present time is where the automobile business was ten years ago?" he was asked.

"No, I would not say that," was the reply. "It is in a much better position than the auto business was ten years ago. Ten years ago the auto was just beginning to come into its own. A few farmers had cars, but there was a tremendous lot of prejudice against them. All sorts of arguments were advanced, that they ruined the roads; that they were unreliable; that they were expensive to maintain and so on. There was no more bitter enemy of the automobile ten years ago than the farm. The auto has proved its value and now it has no warmer booster than the farmer. They are buying autos in such numbers that we simply cannot keep up from a production standpoint. Usually in August and September our sales start to slow up. Now they are increasing, and this in spite of the fact that we are months behind with our orders."

Will Be Big Help

"The fact that the farmers have recognized the value of the auto is making it easier to sell tractors. Of course the business is in its infancy yet, but it is making tremendous strides. When the figures are published showing how many tractors have been sold this year a lot of people are going to be surprised. The tractor is here to stay. It has just as definite a place and will render just as definite a service in its own field as the automobile has. It will be a tremendous help to the farmers in solving their two greatest problems, the labor question and the question of greater production. In my opinion the tractor has arrived at a psychological moment in the history of the world. There never was such a need of greater production. People everywhere are clamoring against the high prices of food and the only possible way they can be brought down is to produce more. In my opinion the tractor is going to do more to bring down food prices than anything else. Figure it out for yourself. A good farm tractor will do as much work as from four to six horses and two hired men. Figure the cost of the tractor and then place it alongside of the figures for upkeep of horses and men. The horses and men will cost more than several tractors, and in addition the farmer has all the trouble of looking after the horses and of getting and keeping the men.

See Their Value

"Farmers are not slow to see the value the tractor is to them. That is why sales are jumping as they are. Unless my guess is wrong the tractor business in less than five years will be as important an industry as the automobile trade is to-day, and that is one of the greatest businesses in the world. Tractors are proving just as easy to work with and just as efficient as the automobiles, and thousands of farmers to-day simply would not be without their autos. It is only a question of time, and a short time when the tractor will be just as popular."

Offers Big Future

Hundreds of hardware dealers all over the Dominion have learned in the last few years just how profitable it is for them to handle auto accessories. Many of them not only handle accessories but the autos as well. In the last year a great many, especially in the north-west have taken agencies for tractors and tractor accessories as well. Reports are that the two go together well.

The development of the tractor business presents a field that is well worth the most careful consideration of the hardware dealer whether he is handling auto accessories or not. There is little doubt that both the auto business and the tractor business are here to stay. At the present time the automobile factories simply cannot keep up with their orders. Farmers are sending in orders faster than the cars can be manufactured, and many of the firms are months behind in their deliveries.

The Tractor Business

The tractor business has not reached this stage yet, but it is growing at a rate that is really remarkable. When it is remembered that the automobile sales in Canada have doubled every two years and that the tractor business is

(Continued on page 74)

This tractor will do the work of two men and eight horses. Farmers are buying tractors in ever increasing numbers and the sale of tractor accessories and supplies in a very short time may rival those of auto accessories and supplies. Many hardwaremen are giving this business careful consideration.

Labor-Saving Devices Popular

Every City Dweller, Every Farmer, Every Woman is Interested in Goods That Will Lighten Their Tasks—Big Opportunities in This Field For Dealers Handling These Lines—Business Growing Steadily

THERE never has been such a demand for labor-saving devices as there is at the present time. This is partly due to the difficulty of obtaining help that can be depended upon and partly to the important developments that are being made in the manufacture of appliances which are aimed to eliminate the drudgery in everyday working life. There is a big market for these things because everybody is interested in them. The city man is buying equipment of this kind because it makes for his comfort. The farmer is buying labor-saving devices because he wants to make his work as easy as he can, because he wants to have some of the comforts he has done without so long, and because he is getting educated to the fact that there is more in life than mere hard work. The city woman and the farmer's wife are keen for them because the installation of such equipment means their emancipation from tasks that for many years have been the bugbear of woman's existence and the cause of countless cases of wrecked health.

A Big Opportunity

There is a big opportunity in this field for the hardware men. One of the fields which the hardware man has been developing splendidly is in the sales of washers. At the present rate of increase it will only be a question of a few years when washing machines will be as common in the homes of Canada as sewing machines. There is a lot of business ahead for somebody, and the men who get it will be those who go after it.

Electrical equipment of all kinds is another big field for the hardware dealers, and one in which they are cashing in. Every year sees the business in electrical equipment increasing, and as yet the fringe of the trade is merely touched.

Farmers Big Buyers

The farmers are big buyers of all kinds of labor-saving devices. They will be bigger buyers from now on. No one in Canada is so prosperous to-day as the farmer, and the dealer who can show him how he can lighten a task, make his home better and more comfortable, or do his farming easier, is going to sell the goods.

The following from the Grain Growers' Guide shows what was found on a survey made in Manitoba. The same applies all over the Dominion and indicates the possibilities of the market.

A Wife Saver

The gasoline engine applied to the work of the farm home should not be called a labor-saving device but a "wife-saver." This, at least, is the testimony of Manitoba farmers who have tried it out. One farmer, in building his new home, paid particular attention to the equipment of the basement. One corner is partitioned off with a cement wall and forms a larder and dairy room; here are placed the cream separator and the churn. The opposite corner is partitioned off for a fuel room; here stands the circular saw. In another corner there is a small gasoline engine; along the girders runs the line shaft from which are driven the dynamo opposite the engine, the cream separator and the churn, the washing machine and the mangle, the soft-water pump for the pressure tank and the circular saw. The hard water comes from an elevated tank outdoors, to which it is raised by a windmill.

Possibilities in Remodelling

In another case we found that the farmer had simply remodelled his old home, building a lean-to at the back of the kitchen. This contained the washing machine, the separator and the churn, which were driven by a line shaft passing through the basement wall. In the basement itself stood the gasoline engine and dynamo. The old frame house, the barn and all the outbuildings were lit by electricity. The whole installation cost $500, and his wife would not be without it.

Another young farmer, whose wife was in poor health from work and worry, was intensely interested in the survey, and on finding out what others had done asked for advice on the installation of a power washing machine, separator and churn. A year later an investigator visited the house, and, in the presence of his wife, the young man said: "You did a Christian act when you advised me to put that in; my wife has been a different woman ever since."

Much of the drudgery and hard work could be avoided by the installation of these "wife-savers," and the education of women and girls in the running of gasoline engines and the adjusting of machinery by short course classes throughout the country and in the agricultural college will no doubt overcome the difficulty.

Proper Conservation

Another of the home conveniences which costs money to install, but easily pays good profit, is the water system. There is no doubt that the farmers have awakened to this fact for in eighty per cent. of the homes visited we have found either hard or soft water in the house, and frequently both; but in only fourteen per cent. of these cases did we find a running water system, and in less than two per cent. of the cases did they enjoy the luxury of a bath. It is difficult in these days of rising prices to estimate the cost of such installations, but in several of the cases the water systems had been put in for little over $100, and some had cost considerably more. The pressure tank system seems to be best fitted for the average farm conditions, and any farmer with a mechanical turn of mind can do the work himself.

Saves Much Labor

"No investment," says the commission of conservation report, "yields more in conserving the women's health and strength, in creating greater home comforts and in lifting the general tone of the material side of living, than the installation of water service of the sanitary conveniences in the home." The water system saves much labor in the carrying of water, but there is still the labor of carrying it out. Of the eighty-six per cent. who had water convenient in the house, only eighteen per cent. had drainage; ten per cent. had cesspools; four per cent. had septic tanks, and four per cent. had open drains. The remainder still laboriously carried out the waste water and spilled it on the ground. A septic tank system can be installed in the average farm for less than $100 if the farmer does the work.

Says Tendency is For Higher Brush Prices

"The tendency is towards higher prices in all lines of brushes," said A. L. Foster, secretary of T. S. Simms & Co., Limited, St. John, N.B., in discussing the outlook with HARDWARE AND METAL.

"The whole situation," he said, revolves around production costs, and these have been greatly increased. No changes in prices are being made at the present time, but indications point to advances."

Mr. Foster stated that business has been excellent not only in Canada, but abroad also.

"There has been a splendid demand for brushes from all parts of the Dominion," he said. "Our export trade is showing a nice development. We could have had a lot more business if we had cared to take it, but we are going after the business than can be developed into permanent trade, and also the business in the better grades of brushes. We find the export business developing nicely in all parts of the world."

EDITORIAL COMMENT

UNITY OF PURPOSE

A PLEA for "Unity of Purpose," made by a Toronto minister, is one which might well be taken up in the life of our country to-day. We read of the farmers' organizations, of the labor organizations, the manufacturers' organizations, the retailers' organizations, the War Veterans' organizations, and so on. Their objects are generally to further individual interests. There is no central organization composed of farmers, labor men, manufacturers, retailers, etc., to which representatives of one class can go to discuss the other fellow's problems. Each class will tell you they have the interests of the country at heart—after their own objects have been accomplished—and perhaps they have, but they have no way of accomplishing the greatest good, that is, by co-operation. Unity of purpose might well be taken as the watchword of a central organization embracing all factions. The retailer in the rural centres can do much to further this "community" spirit if he only will. The farmer has much in common with the town merchant if he only realized it. Get together with the farmers in your district and discuss your problems. The similarities of the main issues will surprise you—unity of purpose will accomplish much more good for the country than individual factions ever can. Call a meeting of your local Board of Trade and invite the farmers to sit in with you. Try it now.

WORTH INVESTIGATING

ON another page of this issue of HARDWARE AND METAL will be found a statement from the manager of a large firm manufacturing both automobiles and tractors. His views on the present situation in regard to the tractor trade are worthy of careful consideration by hardware dealers, especially those who are handling auto accessories, and might easily handle tractor supplies and accessories as well. The tractor business, of course, is merely in its infancy yet, but when we consider what a very short time it is since the automobile was in the same stage of its development and what amazing progress the business is making it might be well worth while giving a little attention to the future of tractors. The man who is quoted in the article mentioned, makes a significant and interesting point when he says that the development of the tractor business will be a great deal faster proportionately than was the auto business, for the reason that thousands of farmers now own and appreciate the value of automobiles and will not be so hard to convince regarding the value of tractors. As everyone knows, it is only a few years ago that the farmers were the most bitter enemies of the auto. There was a time when they were equally bitter over the inauguration of electric street cars and boycotted certain stores located on streets where the cars passed on the ground that their horses would be frightened. To-day many of these farmers or their sons are driving up to those stores in their automobiles. There is none of this prejudice about the tractor. It is simply a question of convincing the farmer that the tractor will make good. When he understands that with an inexpensive tractor he can do the work that now takes two men and six or eight horses it is only a question of time when the use of the tractor will be universal. It is going to take many thousands of tractors to supply all the farmers in Canada and there is going to be a lot of good business for the hardwaremen who handle tractor supplies and accessories. There is little doubt that the next five years will see some remarkable developments in this business and many hardware men are studying the outlook with much interest.

SHOWING BIG GAINS

ACCORDING to statistics retail stores and mail order houses are experiencing one of the most prosperous periods in their history. The only three classes of business comparing with them are the automobile manufacturers, the rubber companies and the woollen and cotton mills. Statistics up to the end of the seventh month of this year show gains in business of from twenty to thirty-five per cent. over last year. Hardware men are sharing in this general prosperity, and "Business is excellent" is the invariable answer when they are asked regarding conditions. One paint manufacturer stated to HARDWARE AND METAL that at the present rate of going his business will be double that of last year, and he had a good season in 1918, too. A significant factor in the business reports from the great part of the Dominion is that collections are excellent. This is due to two factors. One is that people never had so much money as they have now

and the other is that hundreds of business houses have been shortening credits. Many retailers are now doing as nearly a cash business as it is possible for them to conduct and they are finding the plan to work well as it gives them money they need for carrying on, and also saves them a lot of time, trouble and loss.

HERE IS A GOOD POINT

AN Ontario hardware dealer in his advertising recently made a point that other hardware dealers might use with profit. In urging people in his community to build and get homes of their own and get away from paying high rents he made the statement that the hardware for a $3,000 house only averages about $30 more to-day than it did in 1914. This is a point which many people do not realize. While it is quite true that it will cost a man who is going to build quite a lot more than $30 additional to build now, due to higher prices of lumber, material and labor, his hardware bill will not be materially increased. Many people who have been considering building have been carried away by sweeping general statements that everything has advanced prodigiously. The $30 more that hardware costs now is neither here nor there with the builder and the hardware dealer in talking to prospective builders, have a good point to make.

MONEY WELL SPENT

HON. DR. CODY, the Minister of Education for Ontario, will have the strong support of business men generally in the move he is making to obtain reasonable salaries for teachers. The training of the boys and girls of Canada is too important a matter to be trifled with and it is putting the case mildly to say that hundreds of really capable men and women have been lost to the teaching profession because of inadequate compensation. In the last five years there has been a great dearth of teachers and the reason is that other lines of work are offering so much better salaries that only a small number of men and women will go into teaching. It is stated, that in many places as a result of the scarcity of teachers, those on duty have to look after much larger classes than they should have to teach. They are overworked and underpaid. This situation should be remedied. Education is one of the most important matters in the national life and a penny wise and pound foolish policy in regard to paying teachers is to be deplored. It is understood also that Hon. Dr. Cody is planning important changes in the curriculum and in this also he will receive warm support. There is little question that one of the faults of the school system is that too much that is of no real value has crept in and essential subjects have been neglected. Many business men who have had boys and girls come into their stores to take positions have complained about their absolute lack of commercial knowledge, their poor arithmetic and spelling and their inability to write even reasonably accurate letters. These are important matters and instruction in them should not be skimped.

TWO-CENT POSTAGE

THE coming debate in the House on the motion of Hon. Rodolphe Lemieux, that "the time has come when a cheaper rate of postage and of cable communications should be adopted," promises to be interesting. Hon. Mr. Lemieux is personally in favor of the country going back to the two-cent postage rate. Many business men agree with him, especially since the United States postal department restored the two-cent rate. Others point out, however, that revenue is very urgently needed at Ottawa, and that although the extra cent on every letter only means between $5,000,000 and $6,000,000 per annum, that even that relatively small sum is a very welcome addition. Furthermore, it is pointed out, that paying an extra cent on letters inflicts hardship on no one.

GARDENING AS A CURE

PROFESSOR LEONARD HILL, director of the Department of Applied Psychology of the British Medical Research Committee, has aroused much interest in England by his statements that the quickest cure for the unrest that is general throughout the world is to establish garden cities where people can get outdoors, work in their gardens and eat plenty of fresh vegetables they have grown themselves. He urges the Government to see that the big cities are not added to and the conditions under which people have been living in large centres are changed. The tenement baby, over-clothed and confined indoors by its mother, for fear of its catching cold, he says, dies from troubles brought about by its environment. Countless cases of ill-health in adults, he says, may be traced to too much indoor life in crowded cities and ill-ventilated rooms. Get people outdoors, he says, and let everyone have a garden, and in a short time the high infant mortality and the high death rate of many of the large centres will be cut in half. It is interesting to note from a Canadian standpoint that since the war hardwaremen have done a greatly increased business in gardening tools and supplies, and that health statistics indicate that the national health was never better.

THE TINPLATE SITUATION

LATEST advices from England state that labor troubles in the United States are having a remarkable effect on the tinplate trade of South Wales. The market has stiffened to such an extent that many Welsh makers are refusing to quote ahead. There is a notable demand from Germany also. This is a gratifying situation in view of the conditions that have been prevailing for some time past when many of the tinplate firms of Wales did little or no export trade.

Stove Sales May Smash All Records

Dealers Have Exceptional Opportunities This Season for Getting Business — Sixty Thousand Soldier Boys Home With Brides—More New Homes Being Built Than in the Past Five Years

WITH more new homes being finished up in Canada than were built in the past five years, with nearly sixty thousand Canadian boys back from overseas with brides, and with thousands of people who were living "doubled up" because relatives were overseas starting back to housekeeping again, exceptional chances for the sale of stoves are presenting themselves to dealers this season.

In addition to this the fuel situation in itself is an incentive to people to give more consideration than ever to how they are going to keep warm this Winter. The scarcity of coal has caused people all over the country to think about stoves much earlier than many of them usually do and dealers report many inquiries and a good deal of business in hand already.

See Big Opportunities

Many dealers see opportunities offering this season for sales of stoves that are equal to the best they have ever had. People have the money, in fact the buying public never has been so flush of money as it is right now. Many of the inquiries made regarding stoves show that people are demanding the best there is and they are willing to pay for it. They want something that is going to give them the very best satisfaction and that will look well. Dealers state that as nearly as they can size up the situation this Fall efficiency, appearance and ease of operation are the three big points people are looking for in the stoves they are going to buy.

Want Good Cookers

Brides who have to cook for the soldier boys who have been putting up with all sorts of things in the trenches for the past five years insist on getting a stove that will cook well and bake well. Mothers who have the boys back home again and want to give them some of the real old-time meals insist on the same things. Many of the inquiries show that people have in their minds the advantages of getting a stove that will burn wood or some other fuel in case they are not able to get the supplies of coal they want. This is an important consideration from the buyer's standpoint and gives the dealer a real interesting talking point to play up and make the most of when he is demonstrating.

Easily Kept Clean

A lot of women are trying to get away from the job of blackleading stoves and keeping them clean by eternal scouring. They are interested in styles of stoves that are easily kept clean. In some districts this preference, it is stated, is particularly marked, and splendid sales of stoves with enamel and tile finishes are being made. These may be washed in a few minutes and kept in that condition that good housekeepers like to keep their stoves.

There seems to be a general tendency on the part of many manufacturers to break away from the extensive nickeling that was once so popular. This is partly a result of efforts to keep prices down and also a move brought about by the demands of the public in wanting a stove that will not require continual polishing.

Good Window Displays

Good window displays will always help the sale of stoves, and in arranging a display of this kind many dealers find that show cards drawing attention to various important features of the stoves help a whole lot in arousing interest and bringing people into the store to get further information.

Good window displays are excellent producers of business, but if they are

Not in many years have there been better opportunities for selling stoves than are offering this fall. With thousands of new homes being erected, sixty thousand soldier boys home with brides and the fuel situation acute, dealers who are handling stoves have some real chances for business. A good store display is a big factor in helping sales.

the supporting props in a good campaign of advertising the results will be far-reaching, especially for those dealers who wish to draw the attention of large farming communities to their stove displays.

Put on Demonstrations

Really excellent results have been obtained by many dealers who held demonstrations. The length of the demonstration varies according to the size of the territory it is desired to interest. In many of the smaller towns dealers have found that the best results have been obtained from a demonstration held on Friday and Saturday, the Saturday being a market day, when hundreds of farmers and their wives are in town. Other dealers in cities find that a three-day demonstration taking in Thursday, Friday and Saturday give the best results. In cases of this kind they frequently co-operate with the women's organizations of some of the leading churches and arrange for a sale of cooking, etc. This gives them a chance to demonstrate what the stoves will do in the way of baking and cooking and also makes for wider publicity both in the home town and in the country round about.

Bring Good Business

Various dealers have stated to HARDWARE AND METAL that they have obtained splendid results by taking stoves to the fairs in their district and talking up their good points to people interested. They say that in no other way can they get into such close personal touch with such a large number of people as by showing at fairs, and that they not only get orders but information that when followed up frequently results in subsequent business.

Second-Hand Stoves

A phase of the stove business that many hardware men are developing with excellent profits, they state, is the trade in second-hand stoves. Very frequently dealers are able to allow a fair price for an old stove in connection with the purchase of a new one and make almost as much out of the old one as they did on the new. By taking the old stove from the prospective buyer and allowing a little on it they are frequently able to close business up which might hang fire for some time or perhaps be lost altogether.

Perhaps one of the best indications of the business that is likely to develop in stoves this season is shown by the way the big mail-order houses are going after it. They are featuring stoves, it is stated, as never before and are sending out huge quantities of their catalogues. In one small Ontario town the other day nine tons of catalogues from one department store arrived for distribution. In another town smaller than the one just mentioned a bunch of catalogues came in for mailing and the postage bill exceeded $175.

Can Get the Business

The hardware man who goes after the trade can beat the mail-order house every time in price, quality, service and anything else. He will not do it though if he sits still and waits for the people who are going to buy stoves to come in and ask him about them. If he gets the stock, displays it and advertises it, in short lets the people know he has the goods, he has nothing to fear from outside competition.

During the first six months of this year the exports of steel from Sheffield to the United States amounted to £189,411, and of cutlery to £9,468. This is a fairly substantial increase upon the exports for the corresponding period last year.

Wise Profit-Sharing Succeeds; Unwise Fails

PROFIT sharing! There seems to be an extraordinary interest in this subject among employers and workers both.

To begin—profit sharing is not an experiment. We know beyond all doubt that it succeeds when properly applied, and that it fails when applied badly.

There have been many profit sharing failures. The main causes of failure are as follows:

(1) Using profit sharing as a device to make workers content with low wages.

(2) Refusing to say beforehand what proportion of profits will be given.

(3) Treating the matter as an affair of charity, not business.

(4) Installing it as a weapon against trades unions.

(5) Applying it to large bodies of rank and file workers.

(6) Giving too small a proportion of profits to interest employees.

(7) Using it as a substitute for personal contact and co-operation.

(8) Starting it without a foundation of good-will and confidence.

(9) Making it too legal and complex.

(10) Paying in non-saleable stock instead of in money.

These are the ten rocks upon which profit sharing has been shipwrecked. You must beware of these ten rocks.

Profit sharing differs from piecework because it is based upon net profits, not upon the output.

It enables workers to take the firm's point of view. It makes them partners. It increases their self-respect as well as their pay.

Extra pay for extra loyalty—that is the keynote of successful profit sharing.

When Leclaire suggested it to his 44 workmen, in 1842, they were suspicious. They could not understand it. Accordingly, Leclaire, being a Frenchman, proved his sincerity in a dramatic way.

At the end of the year he called his 44 men into a room and threw upon a table a 10 lb. bag of gold. He poured the golden pieces upon the table and said, "This is not mine. This is yours." Every man received about ten guineas in gold. That was proof.

As to how much of the net profits should go to the workers, there is a wide difference of opinion. Every one agrees that it must be at least 5 per cent.

Filene, of Boston, takes a certain percentage of profits and gives half to managers and half to his 2,500 workers.

In British firms the average profit sharing amounts to 5½ per cent. of wages.

Speaking generally, profit sharing is most successful when applied to managers, heads of departments, salesmen, foremen and small groups of high-grade workers.

It is not likely to succeed when applied to a large body of low-grade workers.

It can only be effective when there is a high degree of intelligence, confidence and loyalty.

Wherever there is a spirit of goodwill and efficiency, profit sharing comes as a matter of course. It binds a company together. It is not only the dollars and cents result of a good year's work. The market rate of wages is not supposed to pay for loyalty and personal interest. It does not pay for enthusiasm. It pays for a certain amount of work and no more.

Therefore when managers and workers take the interest of partners they should be treated as partners. They cease to be employees. They are responsible members of the firm.

Profit sharing is much more than chucking a tenth of surplus profits to the workers. It is much more than a form of insurance against labor troubles.

It means giving the workers a bit of the glory as well as a bit of the gold.

It means abolishing the caste system of industry, which regards directors as Brahmins and workers as pariahs.

It means more brain-power and heart-power as well as body-power.

It means that a firm becomes less like a despotism and more like a family circle.

Profit sharing means management sharing. It is a beneficial, profitable and inevitable development. and the sooner you move towards it the better.—Herbert N. Casson, in the Efficiency Magazine, London.

SHOULD STUDY THE SITUATION

Canadian firms who are sending cuts and other prepared material to be printed in Australia should bear in mind that newspaper facilities are not identical with those in Canada, and that local advertising agents should be consulted. Recently a fine-screen halftone block prepared by a firm was sent by its orders to a daily paper to be printed, but the quality of paper used produced simply a black smudge in place of a picture. A line cut would have been all right, but halftones can only be printed on coated paper, such as some of the Austrialian weeklies use.

EVENTS IN THE TRADE

Business Changes

Ayr, Ont.—R. A. Fleming has purchased the Lashbrook Hardware from Roy Lashbrook.

Dubuc, Sask.—Wright & Son have purchased the hardware business of Wilson McIntyre Co., Ltd.

Piapot, Sask.—R. Allen has sold his hardware and furniture business to W. Parkinson, formerly of the Union Bank staff.

Estuary, Sask.—The hardware business of Wiebe Bros. has been sold by the trustees of the Assiniboia Trust Co. to N. D Storey.

Mossbank, Sask.—The hardware and garage of E. Brink & Co. has been sold by the trustees of the Assiniboia Trust Co. to Witzke Bros.

New Firms

The Patterson hardware at Walkerton, Ont., which has been closed for some months, was reopened this week. A lease of the premises was taken by ex-Mayor A. Johnston of Walkerton and J. J. Richardson of Guelph, Ont., formerly of Walkerton. The new firm will conduct both a hardware and plumbing business.

Fire Losses

In a fire at Campbellton, N.B., which caused a loss of $50,000, the hardware store of W. Cook was completely destroyed. The fire is supposed to be of incendiary origin.

The premises of Adolphe Huot, marine supplies and tinsmithing, at Quebec, were damaged by fire. The loss is fully covered by insurance.

Fire of unknown origin completely destroyed the hardware store of John W. Kennedy at Georgetown, Ont. When discovered during the night the flames had made such progress that nothing could be done to save the building. The loss, it is stated, is only partially covered by insurance.

Obituaries

The death occurred at Montreal of A. G. MacPherson, of A. MacPherson & Son, hardware.

The death occurred at Rockwood, Ont., of James Milne, for many years the principal in the hardware business of Milne & Co., at Stirling, Ont. Mr. Milne was a native of Scotland and came to Canada as a lad of four. More than fifty years ago he commenced business in Stirling.

Personals

W. Lendon, of the hardware firm of Lendon & Cook, Leamington, Ont., is a visitor at Toronto fair this week.

S. W. Smith, manager of the Toronto branch of Brandram-Henderson, Limited, has returned after spending three weeks in Montreal.

A. L. Foster of St. John, N.B., secretary of T. S. Simms & Co., Limited, brush manufacturers, was a visitor at Toronto fair this week.

Norman D. Nairn, of the hardware firm of Armstrong & Dowswell, Regina, Sask., was a caller at the office of HARDWARE AND METAL during the week. He has been spending his holidays with relatives in Toronto and around St. Marys, Ont., his former home.

Prior to his departure for Oshawa, Ont., where he has accepted a position as manager of the Oldsmobile section of the General Motors Limited, George E. Peacock was presented by the business men of Orillia, Ont., with an address and club bag. He was the guest of honor at a banquet tendered him by the Canadian Club and Board of Trade. Mr. Peacock has been manager of the production department of the Tudhope, Anderson Co. for some time.

Trade Notes

The Levis File Company of Quebec has purchased new premises.

Foundries Buildings & Supplies Co., of Three Rivers, Que., has obtained a charter.

The Roxton Baby Carriage Co., Ltd., of Roxton Falls, Que., has obtained a charter.

The Lagare Automobile, of Sherbrooke, Ltd., Sherbrooke, Que., has been granted a charter.

The Renfrew Refrigerator Company, Renfrew, Ont., plans to build extensions which will double its capacity.

The Computing Scale Company, of Brantford, Ont., has commenced work on an addition to its factory to cost $11,000.

The Lougheed Machine Co. has sold its premises at Sarnia, Ont., to the Seagrave Co. of Walkerville, manufacturers of fire equipment.

Alex. McCarter, hardware dealer at Walkerton, Ont., has finished making alterations in the interior of his store and now will have 1,500 square feet of floor space.

The Union Cap Screw Co., Ltd., of Walkerville, Ont., has obtained a charter.

A meeting of the American Washing Machine Manufacturers' Association has been called for September 10 and 11 at Chicago.

The Goodyear Tire and Rubber Co. has purchased a site at Regina and will proceed shortly with the erection of a building to cost $75,000.

The Dominion Alcohol Company, manufacturers of charcoal and wood alcohol, is reopening its plant at Wotton, Quebec. The factory had been closed for six months.

At the picnic of the Iron Molders' Union held at Waterloo Park the tug-of-war was won by the men from Clare Bros. foundry at Preston, Ont. Preston also won the baseball game.

Montreal News

Mr. Anderson, of the Nicholson File Co., Port Hope, Ont., was in Montreal this week.

W. P. Kearney, of the Dominion Chain Co., Ltd., Niagara Falls, Ont., was in Montreal this week.

W. W. Ingersoll, vice-president and manager of the Dougall Varnish Co., Ltd., has returned from his vacation.

W. Redshaw, of the Tower Canadian Co., Ltd., Toronto, was in Montreal this week.

Mr. Weutrich, of the Charles Parker Co., who for many years has covered the Canadian territory, has been made sales manager for the company at their head office, Meriden, Conn. He is succeeded by A. Pease.

Carlin Campbell, of the Walkerville Hardware Co., Ltd., Walkerville, Ont., who was married on Wednesday of this week at Walkerville, will spend the beginning of the week getting acquainted with his new duties with the firm of Lewis Bros., Ltd., Montreal, for whom he will cover the western part of Ontario.

Incorporations

J. P. Abel, Fortin, Limited, head office Montreal, capital $200,000, plans to manufacture and deal in window sashes, paper boxes and similar products.

The Live Wire Company, Limited, head office Guelph, Ont., capital $100,000, plans to manufacture and deal in cables and wire, both insulated and not insulated.

Canadian Auto Accessories Company, Limited, head office, Ottawa, capital $40,000, plans to manufacture and deal in auto accessories.

The Anglo-Canadian Pharmacal Company, Limited, head office Montreal, capital $50,000, plans to manufacture and deal in oils, paints, varnishes, drugs, electrical and photographic goods.

VANADIUM COMPANY BOUGHT BY C. M. SCHWAB

A deal by means of which a few men control more than 95 per cent. of the world's supply of vanadium was completed when Allan A. Ryan & Company, bankers, acquired control of the mines in Peru and the mills in Pittsburgh of the American Vanadium Company in behalf of J. Leonard Replogle and Charles M. Schwab.

The company may revolutionize an important branch of the iron and steel industry. Acquisition of the American Vanadium Company includes enormous deposits of vanadium ore in the Peruvian Andes mountains, some 12,000 feet above sea level. It is stated that these rich ore beds will give the new company control of more than 95 per cent. of the world's supply of vanadium, which is now being used extensively in the manufacture of high-grade steel for automobiles and other purposes.

It is said that four pounds of vanadium will increase the strength of one ton of steel 45 per cent.

Simple Plan Helps To Boost Business

A simple plan which has resulted in greatly increased business for a Western firm which handles furniture was to put the following classified ad. in the local papers daily:

FREE.—Strangers in the city or families contemplating moving are invited to call for free rent list showing location and giving complete information about desirable vacant flats and apartments.———Furniture Co.

A new issue of the rent list comes out weekly, and it is closely checked up so that people seeking homes are not sent on a wild goose chase to places already rented. The firm has found that its business traceable to this stunt has grown so that it pays to keep a young woman who looks after the department.

People wanting lists must call for them. None are mailed and none given to children. The idea, of course, is to get the person into the store and get them familiar with it. The young woman looks after all who want lists. She knows the city thoroughly and it has been found that as a great many of the home seekers are women, it is of advantage to have a woman to talk to them. She can explain about the neighborhood, what street cars to take to get to it, and answer many such questions. While a direct appeal is never made for business to those asking for lists it is found that a surprising percentage of them remember and appreciate the service rendered, and if they have any buying to do come back to the store.

Next Annual Convention of Ontario Hardwaremen to be Held at Niagara Falls

Greatest Scenic Spot in Canada Will Be Chosen if the Big Clifton Hotel Can Be Secured—Membership of the Association Shows a Nice Increase—Preparation of Program Under Way

IF the Clifton House at Niagara Falls, Ont., can be obtained at the time required, the next annual meeting of the Retail Hardware Association of Ontario will be held there. This was decided at a meeting of the Executive Committee held in Toronto on Labor Day.

Hamilton, Toronto and Niagara Falls were considered as possible locations for holding the big gathering. It is planned at the next convention to have a larger space than ever devoted to manufacturers' exhibits. An effort had been made to secure premises in Hamilton suitable for the meeting and exhibition the Executive Committee had in mind, but as no hall or other quarters could be secured, it was necessary to secure some other place.

The general feeling was that Toronto would not be suitable. Every member of the Executive present favored Niagara Falls. The only question to be considered now is whether or not the Clifton House can be had during the third week in February of 1920. This matter will be decided by the management very shortly and it is stated that there is every likelihood that the hotel will be placed at the disposal of the hardware men.

The Executive Committee believes that in going to Niagara Falls they would be keeping the convention at a central point easily reached by all the dealers in the province. It would have the advantage of being close to Hamilton and Toronto and within easy reach of a number of important factories in the Niagara Peninsula, manufacturing lines in which the hardware trade is interested. It would also have the advantage of being one of the best known and most popular points of general interest in Canada, and would give the members an opportunity of seeing the beauty of the falls during the winter season.

If the convention is held in Niagara Falls it is felt that many hardware men would gladly come prepared to stay for four, or perhaps five days, especially when an attractive and interesting program is arranged. The question of the program is already under advisement and no efforts will be spared to make it full of interest to the hardware dealers and one of the best in the history of the association.

A gratifying statement regarding the present membership of the Ontario Association was presented at the meeting. It shows a nice increase. Plans are under way for still further increasing this. It is realized thoroughly that the stronger the membership the better work can be done for every dealer in the province.

The financial statement which was presented at the meeting was also very satisfactory.

Among those present at the meeting were President A. J. Wright, Hamilton, Ont.; Secretary W. F. Macpherson, Prescott, Ont.; Treasurer Jno. Caslor, Toronto; Executive members, Geo. E. May, Toronto; F. B. Smith, Belleville. G. D. Davis and C. E. Parsons of HARDWARE & METAL, Toronto, were also present at the meeting.

CATALOGUES and BOOKLETS

THE RENAUD MOTOR SUPPLY CO.

Catalogue No. 9, just issued by the Renaud Motor Supply Co., 326 St. Catherine St., Montreal, contains 154 pages, in which are listed a large number of motor supplies handled by the firm. The catalogue throughout is most attractively printed and illustrated. A section contains valuable information for tourists, giving the distance from many important Canadian and American points to Montreal. The catalogue is printed in both French and English. Copies will be sent to readers of HARDWARE AND METAL who are interested upon request.

S. F. BOWSER & COMPANY INC.

A folder illustrating the Bowser battery storage system for lubricating oil has been issued by S. F. Bowser & Company, Inc., of Fort Wayne, Indiana, and Toronto. The folder is attractively illustrated in colors and shows how tanks of varying capacity may be placed in battery, all being of uniform height. Copies of the folder will be sent to readers of HARDWARE AND METAL upon request.

THE CLERKS DEPARTMENT

Famous Detective Tells How We Make Things Easy For Swindlers

William A. Pinkerton Has Been Catching Criminals for Nearly Sixty Years and Has on His Payroll More Than 3,000 Employees—Do You Know How to Look After Your Own Money?

"BE careful with your checks," is the advice William Allan Pinkerton, head of Pinkerton National Detective Agency, gives to business men. Many merchants think they are careful, but in the following article from the American Magazine Mr. Pinkerton points out how people who think they are careful often make it easy for swindlers. His story as told to Albert S. Gregg is as follows:

"If people would only be more careful of their signatures," says Mr. Pinkerton, with a sigh, "they would take one mighty big step toward foiling the forger. Because this clever gentleman needs first the genuine signature of the depositor whose name he intends to forge, before he can ever attempt to imitate it.

"And yet, how many persons are careless about leaving their signature lying around loose where anyone can pick it up! They step into a bank, for instance, to make a deposit or to get a check cashed, and perhaps they make some mistake and have to write out a new check or fix up a new deposit slip. When this happens they are all too likely to fail to destroy the first check written, even the part which had their name on it. Some crooks frequent bank rotundas for the express purpose of finding signatures which they can use in forging checks.

There is Danger

"This is only one, however, of a number of things which bank depositors must remember. Naturally, you feel when you have slipped a check into a letter and dropped the letter in a mail box that it is comparatively safe. Yet there is danger at both ends of the line, particularly the receiver's end. Mail boxes in the halls of apartment houses or vestibules of buildings are never safe. Professional forgers have been known to follow the postman through the business districts of large cities early in the morning—before most of the occupants have reported for work—and to steal the entire mail delivered.

"If the stolen mail contains a check, the thief can either forge the endorsement and cash it, or else eradicate the name from the check and insert 'Bearer' or 'Cash.' Since there is a genuine signature to the check, he usually has little difficulty in putting it through. If the check is for a small sum, he raises it to a figure of his liking; if it is for so large a sum that he may have difficulty in cashing it, he makes the sum more moderate."

"But just how do forgers work, what are the inside tricks of the trade?" I asked.

"They work in many ways," replied Mr. Pinkerton. "Often professional forgers form bands consisting of the actual forger, whom they call the 'scratcher'; a confidential agent, to get specimens of signatures, and a third man, who presents forgeries at the bank. He is known as the 'presenter,' or 'layer.'

"The confidential agent works as a sort of middle man, and frequently the 'presenter' never even knows the identity of the 'scratcher.' This is done to escape the law, since the actual forger could not be convicted on the uncorroborated testimony of the middle man. The 'presenters' are usually men with prison records, so that if they turn state's evidence their testimony will have to be strongly supported to have any weight with a jury.

"The professional forger is not only an expert penman, but he usually has a thorough knowledge of the chemicals that will aid him in altering checks. Some of them are artists, too, in the way they can ply a camel's-hair brush to restore the most delicate tints in bank safety paper.

Trace the Signature

"The most usual method of the forger is to trace the signature with pencil or carbon upon the paper to be forged, and then to retouch it carefully with ink. But free-hand forgeries are the most dangerous. There are cases in which men's names have been forged so cleverly that they themstlves have actually hesitated to declare the reproduction a forgery. And I don't wonder," added Mr. Pinkerton, smiling over some of his memories.

"Coming back to the question of mail," he continued presently, "the habit of allowing letters to lie on the table of an apartment houses for the tenants to pick out their own letters is also a dangerous practice.

"Placing letters containing checks on top of office building mail boxes, where the box is full, is another careless custom. Forgers have been known to prowl around office buildings in order to steal mail. Moreover, firms receiving mail in the vestibule of their building should install a first-class very strong mail box equipped with a good lock and ample in size, so that the mail carrier will not have to pile letters on top of the box. Most private mail boxes are made of frail metal and can be easily broken open.

Don't Sign Blank Checks

"Do not sign blank checks in advance. This is done by many firms as a matter of convenience. The official authorized to sign checks will often sign a bunch of them, leaving the amounts to be filled in by a clerk or other officer in the ordinary run of business. These signed checks are safe enough if carefully guarded, but they are mighty dangeraus if they are stolen or go astray. A forger coming into possession of signed blank checks can withdraw a firm's or individual's entire account from a bank, and as the signatures on the checks are genuine the bank will not be the loser. Business men carrying signed blank checks in their pockets have often been robbed by pickpockets who turned the checks over to a forger to be negotiated.

May Be Easily Raised

"Unless you are careful how you write a check, it may be easily raised. If your office is not equipped with a check writer, fill in the amount by starting at the extreme left of the check. Write your figures and words close together so that nothing can be added to them. Even amateur forgers frequently take advantage of carelessness along this line. I recall a case in which a check was issued for $6. The six was written in the centre of the dollar line without any marks before or after it to fill up the space. A forger got hold of this check and wrote in the word 'thousand' after the six, and place '000' after the 6. The bank paid the check for $6,000.

"Also, I remember a forger who used to make out a check for five dollars, so small an amount that he had no trouble in getting a bank official to affix his O.K., thereby authorizing the teller to pay it. Instead of going direct to the teller's window to get the five dollars, this man would leave the bank and raise the check to $5,000. Since it had the bank official's O.K. he experienced no difficulty in getting the cash.

Watch the Samples

"Firms that have special checks lithographed should not allow the printer to keep any of their checks as samples, unless he prints prominently the words 'Sample Check' on the face of them. Forgers are always eager to get hold of a firm's printed check forms, as it is usually easier to pass one of these than it is to pass a plain check. One of the cleverest bank swindlers of recent years used to obtain his bank checks by calling on printers and posing as a man of affairs wanting an exclusive line of printing, and asking to see samples. If firm checks were shown him, he usually asked to see checks of another color, and while the printer was hunting for the special color he would steal one of the blanks already shown him.

"Under no circumstances should checks be written with lead pencil. Farmers are particularly prone to write checks with a pencnl, probably because of the inconvenience of going to the house for pen and ink. Some states have laws which hold that a bank is not liable for raised checks or altered signatures unless the maker writes with ink.

Watch Check Books

"Check books should be kept in the safe or in some place where they will not be accessible to anybody but yourself. If your book is left in your desk, or in an unlocked drawer, a person can easily take out several blanks toward the end of the book and you might not discover for a long time that they were missing. If you ever should find that check blanks have been abstracted from your book and you know that they were taken

out by someone other than yourself, notify your bank at once, giving the numbers of the missing checks, and warn the bank to be careful in paying checks drawn against your account.

"Beware of the stranger who calls on you for a small check to send to some distant city to pay a bill, claiming that he would buy a money order if the post office were not closed. It is likely that he is trying to get your signature to use as a model for a forgery. Canceled checks should be kept under lock. Do not let them lie around your office where a stranger may pick them up. Canceled checks serve as models for forgeries.

Beware of Strangers

"Never make a check payable to 'bearer' or 'cash.' Any presentable person finding or stealing such a check will have no trouble cashing it, unless the amount is unduly large."

"Will you tell me how you trace and catch forgers?" I asked him.

Like Setting Net

"Tracing forgers," replied Mr. Pinkerton, "is like setting a net for birds. Our bank protection system is based on a nation-wide information service, sent directly to bankers, generally by mail, but frequently by telegraph. The paying teller is the key to the system. Much depends on his memory and decisiveness, for he must cash checks or refuse them, as they are presented at his window. Strangers presenting checks should be identified by some responsible person, but tellers often take a chance on paying checks without this identification, simply because they have a hunch that the person is all right. This impression may be created by face, clothing, manners, or apparent friendliness with bank officials or someone well known to the teller. The expert swindler or forger understands the teller's point of view and plays up to it. For instance, if the teller sees a prosperous-appearing stranger in conversation with the cashier or president of his bank, and the stranger later steps over and presents a check in a casual manner, the teller hesitates to ask for identification. Many forgers work this very game in a skilful manner.

Are Hard to Detect

"Clever swindlers, who play for high stakes, take time to get into the 'atmosphere' of influential men by cultivating a speaking acquaintance with them in public places, dining at hotels where financial leaders congregate, and thus creating the impression that they belong to that crowd. They are very hard to detect until crime has actually been committed, because honest men use the same methods in promoting legitimate enterprises which depend on enlisting the backing of men with money.

"As professionals travel over the country they pick up young fellows, clever with a pen, and teach them some of the tricks, usually in return for help or information in putting over a check or a swindle. Thus a new crop is coming on all the time. So help us all you can by being careful with your checks."

Talk with any first-class, experienced city detective for half an hour on the subject of forgery and you are almost sure to pick up a number of anecdotes emphasizing the points made by Mr. Pinkerton, and a lot of other points as well, for the variety of the forger seems to be infinite.

A Smooth Scheme

The manager of a branch savings bank in a certain city was told one day that the manager of a local market, one of the bank's customers, wished to speak to him on the telephone.

"I have a friend here in my office," said the voice at the other end of the wire, "who wants to get a check cashed. I haven't time to come over to the bank myself, so I will have him step over with it." The voice then went on to state the amount for which the check was made out, the bank it was drawn on and the name of the payee. "Will you be good enough to cash it?" he finished.

The manager of the bank assented. Presently, a man claiming to be the one named in the check presented it as described, duly endorsed by the market which was named over the phone, and it was promptly paid. Later it developed that the check was a forgery, and that the telephone call was faked.

Avoided Hotels

Good men at the game show guile that is really uncanny. One very clever forger was at large for seven years, mainly because he dodged hotels and lived in a room in a private house whenever he was working a town. By doing this he avoided signing a hotel register, which prevented detectives from getting a sample of his penmanship. This man whom we will, of course, call John Smith, is now serving a term in the penitentiary.

Smith was a real artist at his trade. One day, in an Ohio town, while waiting to present a forged check at the bank, he stopped with the cashier for a moment. All he did was to make some important inquiries. But Smith knew that the teller could see him talking with the cashier. In fact, that was precisely what he intended that the teller should do. A few moments later, after Smith had taken his place in the line before the teller's window, the cashier left his desk on some errand which took him near the teller's cage. As he passed, Smith called out heartily, "How do you do, Mr. ——?" naming him, and waving his hand in salutation. Presuming that he had met the man somewhere and forgotten his face, the cashier nodded with a friendly smile and passed on. As he got nearer to the window Smith turned to a well-dressed man just back of him, and asked:

"Are you going to the football game this afternoon?"

"Sure," was the jovial reply. "Everybody who is anybody is going to the game."

When Smith handed in his check, all the teller could do was to say, "How will you have it?"

Dangerous Sometimes

You see, what Smith did was to cash in on ordinary courtesy, by creating the impression that he was on friendly terms with the men to whom he talked. Men of standing, and who are known in a bank, should be careful about being too friendly with strangers when they meet them either in a bank or in any public place. It is sometimes actually dangerous even to be courteous, for by that very act a man of influence, in speaking to a stranger, may give a clever crook a standing in the estimation of onlookers that will enable him to swindle somebody. Get the teller's point of view, and you will better understand Smith's method. The teller must read men at a glance, and decide when to cash the check of a stranger. He must take chances, and he does take chances. Theoretically he should hold up every man he does not know, but he rather prides himself on his ability to decide the matter without asking a direct question, or requiring identification, particularly if the man is well dressed, looks prosperous, and seems to be a man of affairs. Hence he comes to depend on the evident relationship between the stranger and the men he already knows.

Ingenious Method

I have heard of a clever swindler who is going about the country swindling jewelers by a very ingenious method. In one town he called at a well-known jewelry store and said he wanted a movement put in a valuable old watch case, an heirloom. There was nothing in such a proposition to excite suspicion and the watchmaker gladly booked the order. When the customer called for the watch a few days later he tendered his personal check in payment of the bill. Of course, the check was refused. The fellow offered it in such a way that it was sure to be rejected.

"Very well," he said pleasantly. "Just keep the watch until the check has gone through the bank. I am confident you will find it all right."

The check was duly deposited by the jeweler; but it came back with a slip marked "no funds." When the man called for his watch a few days later he appeared surprised and indignant to learn that his check had been dishonored. He declared there must be a mistake somewhere.

"Just let me have my check back," he said, "and I will go right over to my bank and find out about it."

The jeweler still had the watch, so he was perfectly willing to return the check, which he considered worthless. But he had forgotten one very important point: when he deposited the check a few days before he had, very naturally, endorsed it, and his endorsement enabled the swindler to cash the check. Thus was the swindle compounded out of a bogus check and a genuine endorsement.

MAKING EXCELLENT PROGRESS

Reports from Canadians who have been investigating the trade situation in Belgium are gratifying in that while there are no great possibilities of large business, they show that the Belgians, by sheer hard work, are making splendid progress in getting back to a producing basis and looking after themselves.

The number of Belgians receiving Government aid has been reduced from more than 800,000 at the time the armistice was signed to less than 200,000 at the present time. That the number has been so greatly diminished is not due to the fact that wages have been abnormally high in comparison with other European countries. It is due entirely to the well-known characteristics of the Belgians for being hard workers. Every available plot of ground, except three small strips in the north-western part of the country, which has been so terribly torn up by shell-fire, is under intensive cultivation, and the present crops will not be greatly inferior to the ones of pre-war years.

All the glass factories of the country are in operation, and 30 per cent. of the looms are now working, the number increasing from day to day as the damaged and destroyed mills are repaired.

That more rapid strides are not being made in the reconstruction of the railroads is due entirely to the lack of rails and other material, but much has already been accomplished when one considers the vast amount of damage done to the roadbeds by the Germans before leaving the country. At present there are three express trains daily to Paris and a number of trains between Brussels and Antwerp, Liege, and Ostend. All trains are greatly behind their former running schedule, but here, too, is noticed improvement from day to day. The project for electrifying all railroads in the country has been approved, and the change will be made at the beginning of 1920.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

WATER CIRCULATOR

The "Gusher" water circulator for Ford cars, trucks and tractors manufactured by the Cluley Auto Supplies Co., of 471 East Ohio St., Chicago, will, it is claimed, prevent boiling, steaming and overheating. The "Gusher," it is claimed, saves the engine, keeps the water and

Water Circulator

the engine cool, and increases power. It is stated that it is located in the proper scientific place in the engine to give the very best results and the greatest amount of circulation to the water. It is stated that it will circulate the water even though the water supply is down to an inch below the bottom of the water tank. It is claimed that it will circulate five gallons of water per minute, being seven to ten times more rapid than gravity circulation. The Gusher, it is stated, is made of the best materials, is accurately machined, and is furnished complete with belt ready to be placed in a car. It is stated that it may be installed by anyone with a wrench in a few minutes. The Gusher is made in two types: Type A, for cars prior to 1917, and type B for the 1917-1918 models.

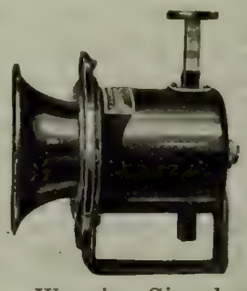
WHEEL BEARING

The "B N Long Life" front wheel bearing for Ford and Chevrolet cars, manufactured by the Burgess, Norton Mfg. Co., of Geneva, Illinois, is, it is stated, easily installed. The construction of the cones is such, it is claimed, that the parts cannot separate and will run with a loose adjustment without damage. Ordinary bearings, it is stated, are broken because in running with a loose adjustment the cones and cups become separated and allow the steel balls to work out of their places, resulting in a jam, a broken ball or two, and damage to the rest of the bearings.

SATINETTE

The Satinette Products Mfg. Co., of Toronto, is putting on the market Satinette wallpaper, kalsomine and window blind cleaner, Satinette furniture polish and Satinette floor oil. The cleaner, it is stated, is put up in air-tight cans, and

Wall Paper Cleaner

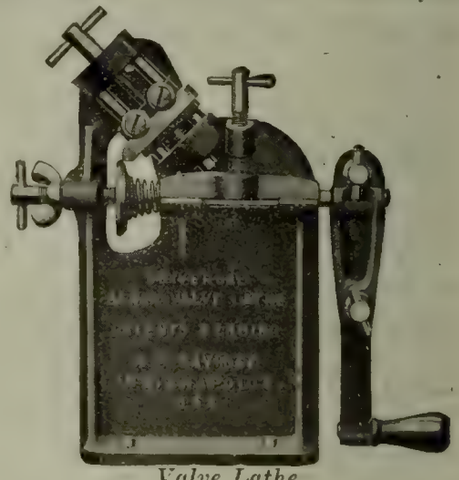


there is no evaporation of the ingredients. The furniture polish, it is claimed, is the only polish on the market finishing with a hard, dry lustre. It is stated that it will not mar the finest finish no matter in what quantities it is used. Dust, it is stated, will not adhere to the lustre obtained by using Satinette either for automobiles or furniture.

Furniture Polish

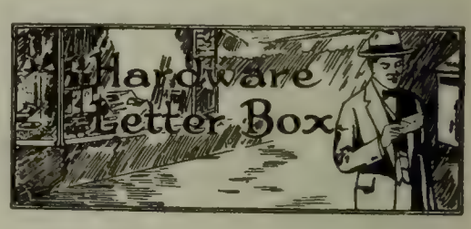
WARNING SIGNALS

"E. A." warning signals, manufactured by the E. A. Laboratories, Inc., of Brooklyn, N.Y., are made, it is stated, in many models adapted to any size and style of car or truck. All parts, it is stated, are interchangeable. The horn shown in the illustration is operated by a train of gears, case hardened, it is stated, and has an outside tone adjustment. It will render satisfactory service, it is claimed, under the most severe conditions. All



Warning Signal

E. A. warning signals, it is stated, are made of the finest materials and are tested under conditions that will never be experienced while in service.



BENCH VALVE LATHE

The Savidge universal bench valve lathe, manufactured by A. C. Savidge, 611 North Capitol Avenue, Indianapolis, Indiana, has a capacity, it is stated, for valves with 45 degree or 30 degree heads up to 2½ inches in diameter and 7-16 inch stems. It is claimed that anyone

Valve Lathe

can quickly and effectively operate the device and that it will eliminate ninety-five per cent. of the usual valve grinding. It is stated that very few motors receive proper valve attention and that the excessive heat in the gas engine often warps the valve heads, causing poor compression and faulty ignition. When the valve head is true, as turned out by the Savidge bench lathe, it is claimed economy in gasoline results, as well as a smooth running engine.

HARDWARE LETTER BOX

Lendon & Cook, Leamington, Ont.—Will you advise us where we may secure the yard sticks which are distributed by some firms for advertising purposes?

These may be procured through the Copp, Clark Co., Limited, of Toronto; the Westcott Jewell Co., of Seneca Falls, N.Y.; and E. B. Estes, 362 Fifth Ave., New York.—Editor.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A NUMBER of changes are shown in this week's quotations. The Reach line of sporting goods show an advance of twenty-five per cent. Canvas gloves are up five per cent. An advance of thirty per cent. is shown in wood hand screws. Veneer hair seats are up from five to ten per cent. New and higher prices are effective on butts and hinges.

Owing to higher production costs in both labor and materials advances of from five to ten per cent. have been made in bicycles.

The turpentine market is very strong and firm and quotations show an advance of five cents per Imperial gallon over former figures.

Linseed oil for immediate delivery is very firm and some crushers, owing to difficulties in securing supplies of seed, doubt if there is going to be enough to take care of demands until the new crop comes in. Linseed oil for November and December delivery will be from 25 to 40 cents a gallon below to-day's quotations, it is stated.

A reduction is shown in hack saw blades, the new quotations being 12½ per cent. below former figures.

Prices for black screen cloth announced for 1920 show that no change will be made, the quotation remaining at $3.25 per 100 square feet.

In ingot metals tin prices have advanced a cent and spelter shows a very slight decline. Copper is steady at 26 cents.

MONTREAL MARKETS

MONTREAL, Sept. 3—This week the holiday interfered with many changes that were expected by the jobbers and trade, but a few filtered through with one or two reductions, which on staples are being looked for particularly on 1920 delivery. The outstanding increase comes in sporting goods registering 25 per cent. on one line announced, with others getting ready to follow. Wood hand screws show 30 per cent., but the trading is light, hence the effect is negligible. Practically no increases are shown in heavy goods and in the best selling lines the prices are firm with little tendency to increase for the fall trade.

Wrought Butts and Hinges Show Advances

Montreal

WROUGHT BUTTS, HINGES.—This line has advanced to 12½ per cent. off list on No. 804, plus 5 per cent. on No. 800. No. 840 is net list. The discount on hinges is now 5 per cent. off list, which is a small advance on last week's prices.

Veneer Chair Seats, Wood Hand Screws Up

Montreal

VENEER SEATS. — Announcement from one or two manufacturers is to the effect that new prices will be at an advance of from 5 to 10 per cent. Wood hand screws are advanced 30 per cent. over former prices.

Hack Saw Blades Are Down a Little

Montreal.

HACK-SAW BLADES.—New quotations on Victor hack saw blades show a reduction of 12½ per cent.

No Change Made in Black Screen Cloth

Montreal.

BLACK SCREEN CLOTH.—Prices announced for 1920 are the same as this year, that is, $3.25 per 100 square feet.

Canvas Gloves and Sporting Goods Up

Montreal.

CANVAS GLOVES, SPORTING GOODS.—Manufacturers announce an increase of 5 per cent. in canvas gloves. The "Reach" line of sporting goods are advanced 25 per cent. according to an announcement to the trade to-day.

No Changes Shown In Cordage Prices

Montreal.

CORDAGE.—The situation shows no change. Trading is quiet. There is a little direct trading but the manufacturers can take care of this without trouble. The raw material supplies are good, and unless some shortage looms up the following prices should hold for a time. Pure manila per pound, 32c; Beaver or British manila, 28c, and sisal 25c.

Old Metals, Materials Show No Increase; Slow

Montreal.

OLD MATERIALS.—Old materials show but little movement. Traders expect that the fall season will show an improvement. The slowness of the trading does not tend to increase the prices offered. The following prices seem to hold firm:

Dealers' Buying Prices -		
Pipe scrap, ton	....	8 00
Stove plate, ton	14 00	15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08
Overshoes, lumbermen's rubber boots	....	0 05
Overshoes, etc. (trimmed)	0 05	0 06

22 gauge	....	7 30
18 and 20 gauge	....	7 00

NOTE—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Lead Products Steady; Business Very Fair

Montreal.

LEAD PRODUCTS.—No change is shown from former quotations. Manufacturers state that business is good and no big changes in prices are looked for in the very near future.

Lead pipe	0 12½
Lead waste	0 13½
Note.—Lead pipe is subject to a discount of 10%.	
Lead traps and bends	15%

45-55	0 38¾
50-50	0 41¼
Zinc sheets, casks	0 17
Do., broken lots	0 18

Steel Prices Hold; Sales Are Small

Montreal.

STEEL PRODUCTS.—Sales are numerous but in small quantities, and the market shows no change. Supplies of raw materials are plentiful. There is a dearth of large orders in the steel trade and keen competition for what there is. The following prices are quoted:

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond too steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Few Changes Shown In Ingot Metals

Montreal.

INGOT METALS. — With supplies plentiful trading shows an inclination to be slow. Copper prices remain unchanged. Tin has advanced a cent a pound. Spelter shows a tendency to be very slightly easier.

COPPER.—Sales are fair and quotations are on the basis of 26c a pound. There are ample supplies to take care of all demands.

TIN.—Prices are firm, and with only a fair demand sales are being made at 61c, which is one cent higher than former quotations.

SPELTER.—Business is quiet and the market very slightly easier with no permanent tone. Quotations range around 9¾ cents.

ANTIMONY.—Antimony prices are a little easier, having been reduced to ten cents. Only a fair volume of business is offering.

LEAD.—Fair activity is shown in lead with prices steady at 7¼ cents. Supplies are ample.

ALUMINUM.—No change is shown in quotations on aluminum from 35 cents per pound.

TORONTO MARKETS

TORONTO, Sept. 4—Prices adopted on lawn mowers for 1920 are now available and show no change from levels prevailing during the past season. Quotations on sleigh bells show an advance aggregating from 10 to 25 per cent. in new figures just adopted. Steel markets rule with a very firm undertone, though no actual change has been recorded in prices. Ingot tin is strong and features the metal markets, which otherwise are unchanged, with an advance.

Lawn Mowers Hold at Steady Figures

Toronto.

LAWN MOWERS.—Prices have been named, it is understood, on lawn mowers for the season of 1920, and these provide for an unchanged basis of figures for the coming year over those prevailing during the season of 1919. Booking orders are now being accepted at these figures, it is said.

Higher Prices on Cotton Gloves Noted

Toronto.

COTTON GLOVES.—Higher prices have been made on cotton and jersey gloves during the week, present quotations ranging about 10 per cent. above those formerly in effect.

Sleigh Bells Up 10 to 25 Per Cent.

Toronto.

SLEIGH BELLS.—Jobbers have figured out new prices on sleigh bells, and prices which they are now issuing range from 10 to 25 per cent. higher than those previously in effect. This is in line with information in these columns last week, the reasons assigned being the rapid advances in the copper market, along with the stiffness shown in leather.

Revised Quotations Shown on Par Plate

Toronto.

PAR PLATE.—Revised prices have been issued on par plate, which show an advance over former quotations amounting to about 6 per cent. The new quotations are now in effect.

Oakum is Higher; Waste Holds Steady

Toronto

WASTE, OAKUM.—An advance of 25c per bale has been made in plumber's oakum, which is now quoted at $4.75 per bale of 50 pounds, or $9.50 per 100 pounds. No change on other grades has been made.

Business continues to come along in very fair volume for cotton waste, with the markets holding steady at unchanged levels.

Stoves Move Better; Wares Selling

Toronto.

STOVES, WARES.—The first of the month ushers in a better movement of stoves, and manufacturers are very well satisfied with the volume of business now being handled. It is not easy to get real good deliveries, it is said, but no great shortage is yet apparent. The market is firm, but without change as yet.

All lines of wares are selling freely with prices well maintained and outlook for business considered very satisfactory.

Coal Oil Up 1c; Gasoline Unchanged

Toronto.

OILS, GASOLINE.—An advance has been named in coal oil this week, which amounts to 1c per gallon. On the new basis Royalite is quoted at 21½c per gallon, and Palacine 24½c per gallon, barrel basis. Higher crude oil is assigned as one reason for this change. Big sales are reported.

Gasoline remains without change at 32c per gallon. The demand is splendid and seems to show no sign of letting up.

Position of Cordage Shows No Change

Toronto.

CORDAGE.—There have been no new developments during the week. which prove any diversion from the steady tone of rope during the past couple of weeks. Business is considered fairly good, but could be better. The range of quotations is as follows: Pure manila, 32c per pound, base; Beaver or British man-

ila, 28c; New Zealand hemp, 28c; sisal, 25c; and sisal lath yarn, 25c per pound, base.

Demand Good For Nails; Wire Moving

Toronto

NAILS, WIRE.—Manufacturers and jobbers report a very good demand for nails. Building has come along better than generally expected, with a consequent improvement in the sales of this line. Prices are firm and well maintained, the wire selling at a base of $4.70 per 100 pounds, and the cut at $4.75.

Wire is moving very well, and prices hold without change, the smooth steel wire being quoted at a base of $5.00 per 100 pounds, with other lines taking the usual extras.

Iron and Steel Bars Holding Firmly

Toronto

IRON AND STEEL BARS.—The situation in bars reveals no new or particularly interesting features. There is a firm undertone and prices are strong, though unchanged. The demand is keeping up nicely and outlook considered quite bright. Stocks are ample. The range of quotations follows:

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50
Norway iron	11 50	15 00
Toe caulk iron	5 15	5 45
Sleigh shoe steel	4 25	4 50
Band steel	4 00	4 25
Spring steel	9 50	11 50
Mining drill steel	21 00	30 00
Sheet cast steel	0 42	0 45

Wrought Pipe Holds; Boiler Tubes Firm

Toronto.

WROUGHT PIPE, BOILER TUBES.—The market on wrought pipe holds without change at firm levels. There has been some talk of higher prices being named, but these have not materialized as yet, the figures shown in the current market quotations still holding good. Supplies are none too plentiful owing to difficulty getting skelp.

Boiler tubes are firmly held with a very good demand manifest. Quotations herewith show no change:

	Per 100 feet	
BOILER TUBES—	Seamless	Lapweld
1¼ inch	27 00	.....
1½ inch	28 00	.....
1¾ inch	30 00	26 00
2 inch	30 00	26 00
2¼ inch	33 00	28 00
2½ inch	40 00	32 00
3 inch	46 00	38 00
3¼ inch	.....	45 00
3½ inch	56 00	42 00
4 inch	70 00	54 00

Sheets Hold at Unchanged Levels

Toronto.

SHEETS, PLATES.—Prices have shown no change this week, and the greatest difficulty facing the warehousemen seems to be that of getting deliveries. The railroads in the United States seem to be badly tied up, and are not getting shipments through quickly which makes deliveries uncertain. Warehouses in many instances are buying heavily, for their own stocks, and find it difficult to keep up with their range. This is especially true with regard to plate, for which there has been a very good demand, and there seems to be no let-up.

Firms that are represented in Canada claim to have no fear of a tie-up of their steel mills. The independents seem to be more certain of this than the corporation mills. They—the independents—state that whatever trouble there has been was local, and adjustment has been made. Of course they realize that it is not well to go the length of making the statement that they will not have a strike, as things all over the world seem to preclude that degree of certainty in referring to any industry or calling.

14 gauge	4 85	5 10
16 gauge	4 95	5 20
18-20 gauge	5 80	....
22-24 gauge	5 85	....
26 gauge	5 90	....
28 gauge	6 00	....
3-16 inch plate	4 90	6 25
¼-inch boiler plate	4 50	5 80

Prices shown are for full cases. An extra charge of from 25c per 1$$ lbs. is made for less than case lots.

GALVANIZED SHEETS.

10¾ oz.	$7 80	$8 00	$8 10
U.S. 28	7 40	7 60	7 70
U.S. 26	7 10	7 30	7 40
22 and 24	6 95	7 15	7 25
18 and 20	6 80	7 00	7 10
16	6 65	6 85	6 95
12 and 14	6 50	6 70	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than case lots.

Steady Market on Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—There is a steady market on corrugated sheets. The demand is good and the same is true of eavetrough, conductor pipe, ridge roll and kindred lines. Manufacturers are satisfied with the volume of business being done, and outlook is considered satisfactory. Range of prices follows:

Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Lead Products Maintain Activity

Toronto

LEAD AND ZINC PRODUCTS.—Business is reported good from all quarters, and manufacturers are keeping the wheels of industry turning in a way to make all feel cheerful. Prices are without change from figures shown herewith:

Lead pipe, list, per lb.	....	$0 12½
Lead waste pipe, list, per lb.	....	0 13½
Do., over 8 inches, list, per lb.	....	0 14½

Zinc sheets, per lb.	....	0 17

Little Change in Scrap Metal List

Toronto

OLD MATERIALS.—"The movement in scrap at the present time is of a very conservative character, as we are more or less in the dark as to early developments. The situation in the States, of late, has been a disturbing factor, and the market has consequently been quiet, but little weakness has developed from the lesser demand. Should conditions become more stable there is a possibility that strength will follow. In anticipation of early labor settlements we are holding firm on previous quotations." This statement by a dealer here reflects the general conditions, but coupled with this it should be remembered that August is invariably a quiet period, not only in old materials, but in other lines of industry.

The scrap metal market is really passing through a peculiar era, for which there seems no good reason, unless it be that there is some manipulation going on in the larger centres. There was a slight break in New York about ten days ago, and so far there has not been a corresponding recovery. Local dealers have not marked down their lists but they state that the figures they are quoting are only nominally correct and may change very suddenly.

Dealers' Buying Prices—		
Tea lead	....	0 03½

Tin Reveals an Upward Tendency

Toronto.

INGOT METALS.—Tin is strong this week and shows an advance of about four cents over figures quoted last week. The other metals are quite steady and rule at unchanged levels.

COPPER.—The market rules with a firm undertone at unchanged levels for the week, 27c per pound being the figure quoted.

TIN.—An advance of 4c per pound is shown in prices asked this week for tin. The market is decidedly strong and may go slightly higher on the present move. Prices range from 62c to 63c per pound.

SPELTER.—The market price re-

Advances in Bicycle Prices Will Run From Five to Ten Per Cent.

Higher Costs of Labor and Also of Materials Results in Revision of Prices—Good Season Closing and Prospects For Future Are Excellent

AN advance which will average from five to ten per cent. has been made in the prices of bicycles. J. W. Gibson, general manager of the Canada Cycle and Motor Co., Limited, Weston, Ont., stated that the increases are necessitated by higher costs both of labor and raw materials.

"Bicycle sales have been good this season," said Mr. Gibson in discussing the business outlook with HARDWARE & METAL. "There has been a good demand both at home and abroad. Our export trade has been developing steadily. We are now sending bicycles to England, and have had orders for more than 2,000 machines. Our business in Australia is constantly expanding."

Mr. Gibson stated that the general outlook for bicycle sales next season is excellent. There will be good business, he states, for dealers.

---

mains around 10c per pound, which is an unchanged figure. There is a very fair demand reported.

LEAD.—Prices here range around 7c per pound, this being no change from last week's level. There is a very good movement, and supplies are ample.

ANTIMONY.—New developments are lacking, sales being fair and the price unchanged at 10c to 12½c per pound.

ALUMINUM.—A somewhat improved trade is the general report on this metal, with the price showing no change from the 35c per pound level.

LONDON MARKETS

LONDON, Ont., Sept. 4—Several advances have taken place during the week, among others being higher prices on pipe fittings, mica, axle grease, Rose brick trowels, Lightning bread knives, soldering irons and turpentine. Business all through the district continues excellent. The summer lines have had an exceptionally large sale and many dealers are practically sold out. Fall lines, such as stoves, heaters, stove boards, axes, cow ties, lanterns, gloves, mitts, etc., are selling well. Prices continue very firm and it seems as if goods are getting harder to get each day.

Advance is Shown in Pipe Fittings

London, Ont.

PIPE FITTINGS.—New and higher quotations on pipe fittings are now in effect. The figures are as follows:

Malleable Fittings—Class C, black, 17 cents lb.; class C, galvanized, 25 cents lb.; class B, black, 25 cents lb.; class B, galvanized, 35 cents lb.

Pipe Fittings—Plugs, 22% off list; bushings, 25% off list; unions, 40% off list.

Higher Quotations on Rose Brick Trowels

London, Ont.

ROSE BRICK TROWELS.— New prices on Rose brick trowels show an advance. The prices are: Philadelphia or London pattern, 10½ in., $17.00 dozen; 11 in., $18.00 dozen; 11½ in. $18.50 dozen.

Lightning Bread Knives Are Revised Upwards

London, Ont.

LIGHTNING BREAD KNIVES.—An advance is shown in Lightning bread knives, the new quotations being $4.00 per dozen.

Cow Chains Selling; Also Stall Fixtures

London, Ont.

COW CHAINS, STALL FIXTURES. There is a very fair demand for these goods. Cow chains, open ring, are quoted as follows, all less 20 per cent.: No. 1, $2.40; No 1/0, $2.90; No. 2/0, $3.20; No. 3/0, $3.50; No. 4/0, $4.40; No. 5/0, $5.60; No. 8/0, $10.50. Hollow stall fixtures are quoted at $1.40 per dozen.

No Changes Shown in Lanterns or Globes

London, Ont.

LANTERNS, GLOBES.—These lines are in demand. Prices show no change, the quotations being $12.50 per dozen for short or long globe. The prices on lantern globes are: 1 dozen to case, $1.10 dozen; 3 dozen to case, $1.05 dozen; 6 dozen to case, $1.00 dozen.

Mica Axle Grease is a Little Hihger

London, Ont.

MICA AXLE GREASE.—New and higher prices have been named on Mica axle grease. The list prices are as follows, less 15 per cent.: 3 pound tins, 2 dozen to case, $7.85 per case; 3 pound tins, 1 dozen to case, $3.95 per case; 1 pound tins, 4 dozen to case, $6.20 per case.

Advance is Made in Soldering Irons

London, Ont.

SOLDERING IRONS.—Higher prices on soldering irons are now effective. The new base price is 54 cents per pound, net prices being: 1 pound to pair, 61c per pound; 1½ pounds to pair, 59c per pound; 2 pounds to pair, 56c per pound; 2½ pounds to pair, 55c per pound; 3 pounds to pair, 54c per pound.

Oil Heaters Are Finding Good Sale

London, Ont.

OIL HEATERS.—A good demand for oil heaters is noted. Prices show no change, the list prices being as follows, less 25 per cent.: No. 525, $7.00 each; No. 530, $8.25 each; No. 630, $10.25 each.

Stove boards show no change, the quotations being: Wood lined, 30/5%; paper lined, 40/5%.

Shells, Shot Guns Show No Change

London, Ont.

SHELLS, SHOT GUNS.—No change in quotations is shown in these lines for which there is now a fair demand. Quotations are as follows: Shells—Dominion black powder, add 10% to list; Dominion smokeless powder, net list. Single bbl. shot guns, plain, $11.00 each; ejector, $11.50 each. Winchester shot guns and rifles, add 25% to list. Stevens single shot rifles: Little Scout, No. 14½, $5.75 each; Marksman, No. 12, $8.50 each; Crack Shot, No. 26, $6.75; Favorite, No. 17, $10.50. Stevens repeater rifle, No. 70 x 22 cal., $17.25.

Handsleighs Quoted at 35% Off List

London, Ont.

HAND SLEIGHS.—Hand sleighs are now selling, and Canadian Buffalo sled make are quoted at 35 per cent. off list.

Fair Demand For Ash Sifters Now

London, Ont.

ASH SIFTERS.—Ash sifters are now selling. Quotations are as follows: Wood sides, $3.00 dozen; Banner, $3.20 each; Rocker, No. 1, $4.75 each.

Weather Strip Prices Are Holding Unchanged

London, Ont.

WEATHER STRIPS.—Prices on this line are holding without change, and the figures are as follows: Weather strip, wood and felt, No. 60, 5c foot; No. 61, 5c; No. 61½, 7c; No. 64, 10c, less

55/5%. Weather strip—Swan, 75c set; Frost King, $4.40 dozen packages.

Food Choppers and Bread Mixers Selling

London, Ont.

FOOD CHOPPERS, BREAD MIXERS.—There is a good demand for these lines. Prices show no change, and are as follows: Food choppers—Gem, No. 20, $24.00 dozen; No. 22, $30.00; No. 24, $40.50. Universal, No. 0, $21.00 per dozen; No. 1, $25.50; No. 2, $31.00; No. 3, $39.50.

Bread Mixers—Universal, No. 4, $40.-75 per dozen; No. 8, $49.75.

Building Makes Brisk Demands For Nails

London, Ont.

NAILS.—Building activity continues to create a brisk demand for nails. Prices are: Wire, $4.75 base; cut, $4.75 base.

Glass Prices Are Holding Unchanged

London, Ont.

GLASS.—Merchants are sorting up for the fall trade, and report good sales of glass. Quotations are unchanged, and are as follows: Single diamond, 25%; double diamond 25%; cut lights 10%.

Linseed Oil is Holding Unchanged

London, Ont.

LINSEED OIL.—Good sales of linseed oil are being made. Prices show no change, and are as follows:

	Raw.	Boiled.
1 to 2 barrels, gal.	$3.22	$3.25
3 to 5 barrels, gal.	3.21	3.24
6 to 9 barrels, gal.	3.19	3.22

Less barrels, add 10 cents per gallon.

Good Demand For White Lead in Oil

London, Ont.

WHITE LEAD IN OIL.—Business is good in white lead in oil. Quotations are holding unchanged, the prices being, for pure in tons, $16.35 per 100 pounds; less tons, $16.70.

Turpentine Higher and Sales Active

London, Ont.

TURPENTINE.—Turpentine continues to move upward. Business, however, has been excellent. The new prices are:

1-barrel lots, gal.	$2.55
2 to 4 barrels, gal.	2.54
5-gallon lots, gal.	2.65

WINNIPEG MARKETS

WINNIPEG, Sept. 4—Price changes during the past week again include many staple lines of interest to the hardware dealer, among which will be noticed: Tinware, enamelware, galvanized ware, coal hods, stove boards, pipe fittings, valves, clay picks, crow bars, mattocks, grub hoes, etc., the majority of the lines showing slight increases, while the balance have decreased. However, markets in general are reported very firm and it is felt that price changes in the future will have an upward trend.

Business in all lines is reported to be good and as the harvest progresses crops seem to be panning out better than expected, with the result that a big fall business is anticipated. Particular activity is noted in the movement of horse blankets, lanterns, stove pipes and elbows, stove boards and all such seasonable lines.

Slight Reduction is Made in Clay Picks

Winnipeg.

CLAY PICKS.—A slight revision downward is recorded during the week in prices of clay picks, mattocks and grub hoes, based on new costs, and are selling to-day at the following figures, f.o.b. Winnipeg: Clay picks, 5-6 pound, $11.75 dozen; 6-7 pound, $12.75 dozen; long cutter mattocks, $13.75 dozen; grub hoes, 3½ pound, $11.00 dozen.

Crow Bars Decline 75 Cents Per Hundred

Winnipeg.

CROW BARS.—Prices on crow bars have also been revised during the week, and register a decline of 75c per 100 pounds, due to recent prices issued by manufacturers. To-day's ruling prices are given herewith: Crow bars, wedge point or chisel point, $10.50 100 pounds.

Pipe Fittings Show 10 Per Cent. Advance

Winnipeg.

PIPE FITTINGS.—New prices have just been issued on pipe fittings, both cast and malleable; nipples, unions, values, etc., which with the exception of nipples, show a general advance of approximately 10% over former prices, due to increased costs of production. To-day's ruling discounts on the various lines are given herewith, and apply to piece price list issued by the manufacturers in 1918: Wrought couplings up to 4 in., 40%; over 4 in., 20%; pipe fittings, class A, 60%; class B and C, 60-10 per cent.; rail fittings, 40%; cast iron fittings, "net list"; drainage fittings, 30%; companion flanges, "net list"; floor and ceiling plates, 40%; cast iron floor plates, 60%; nipples, wrought, up to 4 in., 75%; over 4 in., 65%; plugs and bushings, 10%; radiator values, 50%; eccentric reducers, "net list"; steam cocks, square head, 25%; branch tees, "net list"; unions, malleable, 30%; flange unions, "net list"; flange fittings, "net list"; standard valves, globes and angle, 5%; standard gate valves, 20%; Jenkins' valves, globe, angle and check, 5%; iron body gate valves, 15%; pet cocks, 45%.

Black Wire Cloth Shows 25 Cent Drop

Winnipeg.

BLACK WIRE CLOTH.—Bookings are now being taken by Winnipeg jobbers on black wire cloth for spring delivery, the new price just announced being 25c per 100 square feet below last year's quotations. Owing to extensive building programmes planned for next year, dealers would be well advised to get specifications in early, so as to have stocks on hand when required. The new price just announced is $3.25 per 100 square feet.

Harvest Tool List Shows Little Change

Winnipeg.

HARVEST TOOLS.—Harvest tools are now being booked by Winnipeg jobbers for spring delivery, the discount remaining the same as this year, namely, 17½% off list. New lists have been issued by the manufacturers, dated August 22, 1919, which show several minor advances in scythes, etc., but prices for the line in general remains practically the same as this year.

Tinware, Enamelware is Slightly Higher

Winnipeg.

TINWARE, ENAMELWARE.—Following the wage increases made by manufacturers, new prices have been announced on tinware, enamelware, stamped ware, pieced ware, galvanized ware, etc., all lines showing a slight increase averaging from 2 to 3% over former quotations. To-day's ruling prices on the various lines are given as follows: Enamelware, Scotch grey, 50%; Imperial, 25-2½%; Canada ware, 2½%; White ware, 40-10%; White ware decorated, list plus 32½%; Japanned ware plain, list plus 32%; Japanned ware, white, list plus 42%; Stamped ware, plain, 30-20-2½% off list; Stamped ware, retinned, 20-20-7½% off list; Tinners' trimmings, plain, 33 1-3-20% off list; Tinners' trimmings, retinned, 40-2½% off list; Railroad cream cans, list plus 34%; Factory milk can, list plus 29%; Pieced tinware, list plus 43%; Sheet iron and steel ware, list plus 21½%; Acme fry pans, 25-15-10% off list; Stove shovels, list plus 21%; Light galvanized pails, list plus 31½%;

Light galvanized tubs, list plus 32%; Heavy galvanized pails, list plus 21%; Heavy galvanized tubs, list plus 21%; Galvanized ware, general lines, list plus 30%; Galvanized coal hods, list plus 51%; Stove boards, paper lined, 25-16-2-3% off list; Stove boards, wood lined, 12½-12½% off list.

Turpentine Prices Remain Unchanged

Winnipeg.

TURPENTINE—Turpentine prices remain unchanged during the week with only a very limited demand, and from present reports from producers no immediate change is anticipated. To-day's ruling prices are given as follows: Barrel lots, $2.70 gallon; ½ barrel lots, $2.73 gallon; 5 gallon lots, $2.75 gallon; 1 gallon lots, $2.75 gallon, plus the usual extras for containers.

Linseed Oil Prices Holding Unchanged

Winnipeg.

LINSEED OIL.—Linseed oil prices still hold firm on the local market, there being no change during the past two weeks. To-day's prices are confirmed as follows: Raw linseed oil $3.10 gallon; boiled linseed oil, $3.13 gallon.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Sept. 4.—Possible labor troubles in the steel industry have been even more the dominant factor in the iron and steel market in the past week. This does not mean by any means that at any time the balance of probability has been that there would be labor troubles. If there were only one chance in 10 or 20 of there being a strike or a voluntary closing of mills (and producers certainly would close their works themselves rather than leave it to the workers to do so) that would be the dominant factor, for the reason that in this dull season there are no other factors or influences of the least importance.

The labor situation, moreover, has had various important ramifications. Its most important is its influence upon prices. Nothing could more thoroughly stabilize prices on their present level than this. On the one hand, with the bare possibility of production being curtailed by labor troubles, no steel manufacturer would think of shading existing prices for the sake of securing an order, for the mills are already fairly well filled with business, and in some lines are crowded, while on the other hand the labor unrest that unquestionably exists, even though it is altogether improbable, there will be any disturbance, is such that any price advancing tendency in the market would be harmful in the extreme. It is the common opinion of nearly all manufacturers, and those who hold the opinion assert it is the opinion of all intelligent manufacturers, that no price advances, even of minor character, are permissible in present circumstances. Price advances would arouse labor to make demands, and would create public antagonism, for the public is now coming to realize that the high cost of living, against which there is so much outcry, is all one thing, made up of many parts, including all wages and prices of all commodities. An advance in any wage rates, or in any commodity, or in any transportation rate, is recognized as affecting the whole structure in which the cost of living is involved.

Thus iron and steel prices may be regarded positively as at a dead level. Recently a few sheet manufacturers started quoting higher prices for their product, but they were very anxious that their names should not get into the trade papers, let alone the daily papers, and now if they do not wish to sell they are much more likely to say simply that they are out of the market than they are to quote a price above the recognized market level.

In some pig iron districts furnaces have been attempting to spread the idea that pig iron prices are higher for next year than the level prevailing for some time past, for this year's deliveries. Assertions have been made that sales have been put through at advances of from 50c to $2 a ton. Generally speaking, such references are undoubtedly incorrect. In occasional instances a buyer of foundry iron may have had occasion to contract for next year in order to cover contracts for the sale of their finished products, but such transactions would be entirely exceptional. Never in the past has the pig iron market advanced that way. When higher prices come, they come first for early delivery, representing in substance a delivery premium, and then if the market is strong enough the higher price gradually extends to the later delivery.

The special committee of the general committee for organizing iron and steel workers, appointed to seek a conference with the iron and steel producers in regard to enforcing the 12 points in the labor platform enunciated July 20, and empowered, in case no conference could be secured, to call a strike, failed to get the conference and thus far has failed to call a strike.

Whether the iron and steel workers have an organization or not is debateable, the manufacturers asserting that the strike vote announced Aug. 20 as 98 per cent. affirmative, did not represent more than 15 per cent. at the outside of the workers. The men soliciting a conference, however, claim they are an organization. In this they have the advantage of the manufacturers, who have no organization, and thus the special committee had to approach Judge Gary, chairman of the Steel Corporation, as the leading man in the trade. When they went to his office Judge Gary sent out word politely declining a personal conference and suggesting that the committee put what it had to say in the form of "a written letter." In writing a letter the committee could not ask Judge Gary, as doubtless it wanted to, to invite all the iron and steel manufacturers to gather for a conference, as Judge Gary would undoubtedly have replied promptly that he was minding his own business and did not care to be the committee's representative in seeking a conference with other manufacturers. The committee, therefore, simply asked for a conference with Judge Gary and Judge Gary replied, refusing, and saying the Steel Corporation stood for the open shop as against the closed shop and would not discuss business mattters with labor unions. Judge Gary referred to the many things the Steel Corporation had done for its employees, in welfare work of many kinds. The committee replied saying that if these claims as to good treatment were true "even in a minor degree" (and they are absolutely true) the committee would not be seeking a conference. A few days were left and Judge Gary was urged to grant a conference. As he denied that the committee represented the Steel Corporation's employes, they could only prove the point by calling the strike.

The committee then went to Washington, and President Gompers, of the American Federation of Labor, had a conference with President Wilson, who, several days before, had issued a very strong statement, calling for a truce as to all labor demands and during that every citizen co-operate to stop this whole thing. Apparently there was a forlorn hope that the President could be induced to use his influence with the steel manufacturers to get them into conference with the labor leaders, and, obviously, it failed. In bringing the issue before the President the committee burned one of its bridges behind it. It burned another when it wrote to Judge Gary that only a few days were left in which to avert a strike. It burned another, between it and the 12-plank platform enunciated July 20, when it wrote to Judge Gary, "There has not arisen anything between your corporation and your employees, whom we represent, in which the question of 'closed shop' has even been mooted." The fact is that one of those 12 planks was nothing less than a demand for the "check-off," which is the most extreme form of closed shop labor leaders have been able to conceive, and which they never succeeded in establishing, except in some of the union coal mines.

The prevailing view now is that labor demands have just passed their crest and that progress has now commenced towards saner counsels.

Do You Pay Yourself a Salary?

If You Do, On What Basis? Read What Hardware Dealers in Various Parts of the Country Have to Say About This Question

SHOULD a retail merchant pay himself a salary? If so, on what basis? This question put to a number of hardware dealers in various parts of the country brought some interesting answers. All are agreed that the man who looks after the business is entitled to a salary, but on what that salary should be based there are varying opinions.

Here are the views of the hardware men as expressed to HARDWARE AND METAL.

Thomas Jones, manager of the Cowan Hardware Company, London, Ont.: "I should say store owners should draw a salary and I fail to see any good reason to the contrary.

"Put the thing in this light," Mr. Jones went on. "Supposing the proprietor is taken with a long illness or dies, so that someone has to be engaged to manage the business in his absence, do you get that outsider for nothing? No, you have to pay a good round sum for his services, and therefore it stands to reason that the proprietor is entitled to a salary just the same as any other employee, as he is devoting his time and attention to running the business even if it is his own.

From Three Angles

"As to how much he should be paid, I would base that on three different angles.

First: How much would he be able to command, doing the same work for someone else in the same sized business.

Second: How much would he (the proprietor) be prepared to pay someone else to do the same work as he does for himself?

Third: How much will his business stand?

The third angle may not seem to fit in with Nos. 1 and 2, but the business may not warrant paying him all he feels he is worth and therefore it behooves Mr. Boss to get out and hustle and then hand himself a substantial raise.

Should Find Out

G. A. Stanley, of the G. A. Stanley Hardware Co., Lucan, Ont: "It has been quite plain to me that business men generally do as much haphazard business as any class of people in the world—hence the lack of real success so often evident. A departmental store always figures the manager's salary. If a joint stock company does a hardware business it figures a manager's salary, and there are many of them in the country. A milling company figures the manager's salary, and on the same principle if a hardware man manages his own business he ought to figure in his salary, and he ought to do it honestly, just according to what he is worth on the job. If he is big enough man to make it pay him $3,000, or if only $2,000, or if only $500, he ought to know his real worth, and it is the only way of finding out. Altogether, too many men never find out what salary they are worth. Never did know, or try to know. Advise in HARDWARE AND METAL that they try it out and it will amaze many of us in the trade."

How He Would Figure It

Arnold N. Smith, of the Smith Hardware Co., Cornwall, Ont.: "I certainly think a merchant should pay himself a salary as it is the only sound method of doing business. He should draw out what he would be capable of earning were he out working for someone else. If his business is not capable of paying him a decent living salary then he is not making money and ought to give up business and get a job with someone who can pay him."

Certainly He Should

J. W. Fleming & Son, Blenheim, Ont.: "Why not? Does he not work? Doesn't he earn his wages? Doesn't he take cash weekly, or daily or at intervals (either regular or irregular)? Certainly he should.

"On what basis? How much does he pay his best clerk, or salesman? Who is more important to that business, that clerk or the merchant? Why, the business would not last without the merchant. He is at least twice as necessary as the clerk. The clerk could be more easily replaced. If this is not the case, Mr. Merchant had better quit. Well, then, his salary should be more than his highest-paid clerk—probably twice as much."

They Pay Themselves

Dakin Bros., Digby, Nova Scotia: "The proprietors of this firm draw a salary and we do not know of any reason why they should not considering that they do most of the work. The firm that will not pay its hardest working employees a salary can hardly be called a firm."

F. E. Hendershott, of the Hendershott Hardware, Mount Forest, Ontario: "I certainly think a merchant should pay himself a salary and take it out of the business regularly, enough to comfortably live on."

Makes Business Pay Salaries

John H. Lee, Stoney Creek, Ont.:—I believe a retailer should pay himself a salary, and pay it every week. Circumstances may alter cases, but it seems to me to be the only safe way to run a business. After a careful survey of the business field it seems a likely spot to locate, then if he cannot make the business pay him a salary the fault lies with the man, for perhaps he isn't fitted for that kind of business and the best thing for him to do is to get into something that he is fitted for, as if the business can't pay him a decent salary he isn't a good business man.

I tell the boys who work for me it is not I who am paying their salaries, it's the business. If they are not worth so much a week to the business how is the business going to pay their salary? In other words, if they don't make their salary and a little more for the business, the business can't pay them the salary, and generally I have no trouble in getting them to take an active and personal interest in the business."

Salary and Bonus

Mills Hardware Co., Ltd., Hamilton, Ont.—"Yes, most decidedly. The basis would be hard to determine, but the merchant should draw enough to live on. I should say at least from $1,500 per year and up according to the business, and at the end of the year, if there are any profits, then declare himself an extra bonus."

Sole Owner and Partnership

W. F. Macpherson, Prescott, Ont.—"Where a merchant is sole owner of his business, any withdrawals which he found necessary to give himself a comfortable living might be taken as the occasion arises rather than taking a stated salary. In a joint stock or partnership concern the situation is changed and stated salaries should be drawn with the division of the profits at the end of the year."

Class of Business Should Determine

Albert T. Taylor, manager of the Cochrane, Ont., branch of the Geo. Taylor Hardware, Ltd.,

"I realize that this question is a very serious one with a great many merchants and I certainly feel that the merchant who does not pay himself a salary is most assuredly making a costly mistake.

In regard to the amount of salary, this depends entirely upon the class of business and the amount of turnover. It is a very poor business indeed which will not allow a man to pay himself at least the same salary at which he would have to hire another if he was unable to perform the duties which naturally fall on the proprietor."

A hardware dealer who did not wish his name published expressed his views as follows:

My method of handling this troublesome question is:

1st—I draw out the salary of a first-class hardware clerk. This amount I present to my wife on January 1, which is in the form of fifty-two cheques.

2nd—All large amounts, such as taxes, life insurance, coal, upkeep of motor car, and personal expenses are paid out from the business as they become due.

By this time I have drawn quite a modest salary for a business man in my position.

I have found this system work very satisfactorily and it has two special advantages to my mind:—

1st—It gives a businessman's wife free spending money of her own.

2nd—It distributes his important expenses evenly throughout the year.

Paint as a Factor in Social Content

Need of Paint Outlined by Writer—Encourage Public to be Brush Wielders—Visions of Paint Pot Making World Better Place to Live In—Get Down to Facts

TOM GEGGIE, in a weekly letter from London England, to a Canadian daily paper, reviews some of the remedies for industrial unrest, suggested by various ingenious minds, who are casting about for an antidote to offset Britain's present complex labor problem.

Even "more beer" and more "horse racing" have failed to distract the mind of British labor from their troubles fanciful or real.

Suggests More Paint

Someone with a combined sense of both the artistic and economical has hit upon the idea of encouraging the use of "more paint," which would make it seem as though Britain too, was ripe for a "Save the Surface Campaign," such as is now being waged both in Canada and the United States.

Geggie says:—"During the last few days I have seen at least two notions which lift the matter from the realm of drab suggestion on to the higher plane of poetic fancy. One is that we need paint. The thought was evidently born among the waving flags and blazing colors of last week, when London was welcoming home the dove of peace. Amid the cheery, happy faces of the holiday makers, the boisterous camaraderie, the slap-em-on-the-back, hail-fellow-well-met spirit of joviality which ran through this city for three or four days, this enthusiastic butterfly chaser reached out his net and brought to earth his great idea. 'Democracy may be saved from itself only by paint.' He remembers that discontent is most rife in the unlovely industrial cities of the earth, where the eye has no relief from long lines of dreary streets, each of dull brick—red monotony."

Public as Brush Wielders

"The visionary would invade those dismal thoroughfares with enormous pots of paint and invite the inhabitants to become fanatical brush wielders. Bradford, he thinks, would cease to be known as a socialist school of thought and would turn vivaciously to camouflaging itself as a Dutch village with a color scheme that changed with every dying season. Long ago someone made the discovery that long hours of meditation transformed every shoe cobbler into a revolutionary, but who, as he lays bright vermilion streaks, good and strong on his garden fence could be other than filled with the noblest thoughts and exalted by the spirit of the purest patriotism?"

Safe For Democracy

Shades of the paint brush! Who can say that the paint trade is a dead one?

We have had our "Paint Up and Clean Up" campaigns, we have had, and are having, our "Save the Surface" campaign, we have sold paint for sanitary reasons for insurance purposes, for protection and for decoration and now we see visions of the paint pot making the world safer for democracy.

Europe has had her fill of bread lines, and municipal soup kitchens, but yet comes the corporation paint pot of such proportions that he who wills may come with his brush and dip in freely.

Starts Him Painting

Wherever an artisan sits and broods over the world's social and political ills, and is likely to break forth into agitated palaver to rouse unwarranted consternation and commotion in the minds of his fellow workmen and citizens; set him to work with paint pot and brush to restore the rosy hue of contentedness with the myriad colors of the rainbow.

Teach all mankind to paint, for by so doing, democracy will again become firmly established on a social basis upheld by the soothing influence of color, color schemes and all that gladdens the eye of humanity from the myriad hues of the spectrum.

Paint the Peace Offering

Wherever capital and labor disagree, wherever industrial deadlocks occur, where arbitration fails, a pot of paint shall be the peace offering, the dove of peace, that will wipe away all differences, and send each happily to his own work.

Verily, the potential power of paint is great.

A New Advertising Angle

Paint advertisers had seemingly exhausted every possible talking point for the advancement of the use and sale of paint, but lo and behold, out of the world's bitterest struggle comes a mighty social unrest that can be solved by the use of paint.

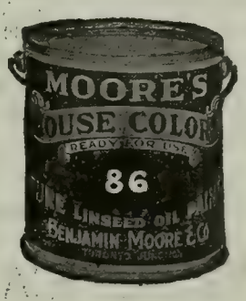
Will paint possibilities have no end? Seemingly not!

Environment Does It

Laying all joking aside, there is at the bottom of this man's suggestion a kernel of psychological fact that bears strongly on the influence of environment.

Europe is hungry for paint. More than one writer of fiction has called attention to the shabby condition of London, Paris and other European cities. To what extent

(Continued on page 74)



MAKE THEM PERMANENT CUSTOMERS:

GIVE THEM "VALUE FOR THEIR MONEY":

Sell Them MOORE'S PAINTS and VARNISHES.

They are dollar for dollar value. They are sold with a **Guarantee** of **Absolute Satisfaction** or **Money Refunded,** a guarantee which is backed by the manufacturers.

Better Prices and Bigger Profits

We offer you an **Agency Proposition** whereby you can successfully beat competition, and at the same time, reap **Bigger Profits** in your paint Department.

We Can Do This Because,---

We use only the most efficient and economical methods both in the manufacture and marketing of **Our Products.** Also, we do not ask you to pay high prices to help cover the cost of a lot of expensive and ineffective advertising.

The details of our Agency proposition are worthy of your serious consideration.

Always glad to furnish Prices and Descriptive matter on request.

PAINT AS A FACTOR IN SOCIAL CONTENT

(Continued from page 72)

the drab, dreary, uncolored condition of their surroundings has brought about the present labor unrest it would be difficult to say.

To what extent paint might have an influence in allaying this unrest it would be as difficult to estimate.

Appearance Exerts Influence

But whether he be rich or poor, high or low, workman or capitalist, a man and his family are influenced in their contentedness by the appearance of the dwelling in which they may be housed.

Certainly the wielding of the paint brush engenders content rather than discontent. It means improvement which fosters optimism rather than brooding over troubles which may be fancied or otherwise.

Clean up and paint up campaigns have promoted civic and communal pride in the home and the home town.

Perhaps after all, if Europe could be treated to one grand coat of paint, it would brighten up the perview of Europe's labor and assist to promote a brighter outlook.

This suggestion may appeal to the humorous sense of many paint dealers, but after all there is a sound business idea pervading it. Have we exhausted every means and opportunity of promoting the sales of paint? Contrast the man with the slovenly run-down, unpainted home with the man who keeps his place neat and trim and painted. Which is the more proressive of the two? Doesn't the appearance of the home about indicate the character of the man?

Exerts Influence For Good

If a well-painted home has its influence on the individual, will not a well-painted town have its influence on the mass of its citizens. Extend this ideal all over the country. A slave has no interest in the upkeep of his hovel. A free citizen of a democratic country has. The idea that democracy would have a better meaning to us all if all homes were well painted and painted frequently is probably not so far fetched after all.

Then, let every paint dealer ask himself this question, what is being done in my paint department to further the sales of paint in the interests of my fellow citizens as well as my own purely business welfare?

PRACTICAL POINTERS FOR PAINT SELLERS

There is such a wide range of uses for both paints and varnishes; at the same time the use of one class for many purposes, is so similar to the use of the other class that every paint seller should bear clearly in his mind some general distinction between the two classes.

In many instances the two are not clearly differentiated. Where an opaque color varnish or an oil paint may be used on the same surface, there must be a distinct treatment in preparation of the two classes for application.

In thinning, for instance, an oil paint to be used on an exterior surface should be thinned with raw linseed oil, where a long oil enamel is to be used it should be thinned with turpentine. All enamels and varnishes should be thinned with turpentine only.

Confusion is often brought about, though unintentionally, by manufacturers labelling materials which are purely varnishes, such as enamels, as enamel paints. Enamels, properly labelled, are based on varnish liquids and should be treated as such.

Care should be taken by the paint seller to take every precaution against selling an interior enamel, whatever it may be called, for exterior use.

A clear understanding of the fact that very few enamels or color varnishes can be used for exterior use will assist the seller avoiding giving the buyer this material for outside use.

The proper distinction between a paint and a varnish is that the latter is characterized by the presence of a gum or a resin or some organic material so treated that it assumes the characteristic qualities of these. The directions on the label indicating that it should be thinned with turpentine only shows that the material in the can is in the varnish class.

Where there is any question in the mind of the seller, concerning a clear understanding of the buyer about the use of his purchase, the differences and uses and application should be explained and the buyer advised to purchase the proper material for the object he has in mind.

This distinction between the two main classes in the paint and varnish trade naturally leads to the necessity of more detailed explanation of the various materials entering into their manufacture.

Oil paints or paints of the class that has been defined are made up principally of basic carbonate of white lead, basic sulphate of white lead, zinc oxide, littropone, inert pigments, earth colors or natural pigments, chemical colors, linseed oil, turpentine, mineral spirits and dryers.

Most of these materials are also used in varnishes and enamels, but the process of manufacture is somewhat different and is designed to meet the ultimate use of the finished product.

Incident to this explanation comes the question as to whether the old time painters' paint (pure linseed oil and pure white lead) or ready mixed paint should be used. Where it is at all possible advise the customer to have any considerable quantity of painting done by the experienced hand of the expert painter. But time and expert tests by many experienced painters have proven that good paint implies more than pure linseed oil and pure white lead. The addition of zinc to lead makes a paint cover more surface, looks better and last longer. Zinc oxide is unquestionably a necessary ingredient of any good wearing paint.

As to whether it shall be mixed by the painter or ready-mixed needs some indication of the modern trend in the use of paint. An ever-increasing number of painters are using prepared or ready-to-use paints in their work. These paints contain practically all the necessary ingredients and because they are made on standard formulas by machinery are more uniform, better made, and better mixed than the hand-made paints of the painter. Generally speaking they have proven superior in both composition and preparation to the individually mixed paints. Certainly they are vastly better and handier for the man who is obliged to do his own painting about the home.

PRIZE WINNING COMBINATION

Continued from page 54

likely to grow even faster, it is obvious what it will mean in a short time. When the dealer stops to think that every automobile and every tractor that is sold will need supplies and accessories and need them continually, it may be seen what splendid opportunities for business are presenting themselves.

Many hardware men, when they saw the way automobile sales were increasing, very carefully and very cautiously ventured into the business of handling accessories. They bought only a very small stock so as not to lose money. They tried the business out from every angle, and these same hardware men will tell you to-day that auto accessories have proven one of the nicest lines in the whole store and one of the most profitable. Many of them are at the present time going over the same ground with tractor accessories. They realize that the business is young yet and that it is well to go carefully, but the main thing is that they have given it their attention and made a start. From their experience so far there is every indication that auto accessories and tractor accessories can be handled together and make a profit-winning combination that is growing every year.

SAYS APPEALS WILL ACCOMPLISH NOTHING

In a recent issue of the "Oil, Paint and Drug Review," published in Chicago, the following appeared:

"Some local paint and varnish men are said to have taken steps to urge the Federal Trade Commission at Washington to investigate conditions in the turpentine market at Savannah which have been potent in forcing up prices. Strange to say, this movement does not come from the manufacturers, but from retail men who feel a sincere desire to go as far as they can to correct a situation which forces them to face uncomplaining but often embarrassed customers with prices that are not altogether fair."

Replying to the above the Savannah "Weekly Naval Stores Review" says:

The naval stores producers are now selling their products on half of a normal production, at prices that yield them, for the first time in years, very substantial profits. Every barrel they make of either rosins or turpentine will be demanded by the world, and, the world will pay the existing or better prices for them.

The endeavors of the varnish and paint men referred to will be of no avail. Two years ago when the producers of naval stores faced absolute ruin, when a number of them were forced out of business, when it looked as though the industry were doomed, the paint and varnish manufacturers sat back, smiled, got their supplies at prices that meant the destruction of the naval stores industry if continued. To-day they are paying for the unprofitable prices of 1914-'15-'16-'17. The Federal Trade Commission or no other body can force the producers to sell their small production of this year at lower prices than competitive conditions establish. The Federal Trade Commission did not lift its hands to save the industry from almost ruin during the first three years of the war. It is too late for the consumers to appeal to it now to overthrow natural conditions that have come about from price depression in the past.

High prices this year may bring better production next year and somewhat lower prices, but even that is problematical with the difficulty experienced in getting and holding skilled negro labor. For the next eight months though, prices will be governed by the law of supply and demand. It is the old minus supply and plus demand producing an extraordinarily high market. The conditions and the results are seen in other commodities than naval stores.

THOUGHT HIS CLAIM MODEST

"Speaking of the false claims of fakers who pretend to sell automobile tires and other accessories for less than they are worth," says a bulletin which the National Vigilance Committee of the Associated Advertising Clubs recently sent to its local advertising clubs, "we have observed that there is scarcely any limit to what such a faker may claim.

"For example, one of the local vigilance committee handled a case where such a dealer had said he would save the motorist 75 per cent. on tires.

"This fellow was taken to task, of course. He admitted that he could not possibly make any such reductions, yet he declared that the statement was modest, comparatively speaking, and he produced a piece of advertising matter used by a similar faker in another city—from which he said he had copied his advertising matter—in which the other faker declared he would save the car owners 100 per cent.

"'I liked that advertising matter,' the faker told the local advertising club member who protested against the claim he had made, 'but I thought 100 per cent. was a little strong, so I toned it down a bit and had my printer copy it.'

"Eternal vigilance is necessary in dealing with the claims of the average cut-price tire store," says the bulletin from the advertising association, "for there seem to be plenty of people who are willing to believe, even in this enlightened day, that they will in some mysterious manner find a stranger who will give them something for nothing, or sell them something at a price considerably below what it is worth."

Employs Effective Methods For Displaying Paint Paddles

An effective method of displaying paint paddles is that used in the hardware store of McPherson Bros., at Medicine Hat, Alberta. The paddles are suspended from the ceiling and by the use of counter-weights may be pulled down to the level of the counter for inspection when required and run up out of the way to make room for other things when they are not. By this simple arrangement good display is obtained and valuable space is conserved.

This firm has adopted also the system of placing in a wall cabinet behind the counter just inside the door at the front left of the store, a very complete stock of the articles on display in the window. They are, therefore, able to give speedy service to all who step inside to make further inquiries. The windows are changed every week, and in dressing them the firm has adopted the policy of featuring one line of articles at a time. The greatest pains are taken to create an alluring display which will catch and captivate the eye. In June there was a very marked response to a display of fishing tackle; later, as the hot weather came along, vacuum bottles were featured, and this was followed by auto accessories. The photograph above gives a fair view of one side of the store interior.

The Muskoka Foundry, Ltd., of Bracebridge, Ont., has obtained a charter.

F. S. Reed and J. Coombs, formerly with the Copp Stove Company, of Fort William, Ont., before the plant was burned, have secured the right to make all the parts for Copp stoves and ranges and have opened a shop on Empire avenue, Fort William.

Varnish Knowledge

Even the greenest varnish buyer realizes there is a vast difference in quality values, and that poor or unsuitable finishing materials may spoil the looks of an interior. In spite of this, comparatively few know enough in a practical way about wood finishes to enable them to choose them wisely. This is the dealer's opportunity to protect his customers against inferior finishes.

It is safe to recommend Berry Brothers Varnishes, Enamels and Stains. They satisfy completely, and the big demand for them is always growing greater.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Sept. 3.—Manufacturers are getting down to fall production and a bigger fall business is expected than any year since the war, with an even tone expected in prices. Present levels should hold for several weeks for linseed oil and unless the flax crop is an utter failure, no great fluctuation will result. Most of the raw materials needed for paint production are coming slowly, with no other shortages reported other than the linseed oil and turps.

Linseed Oil Supplies May Be Insufficient

Montreal.

LINSEED OIL.—While no changes have been made in quotations on oil, few firms are running to capacity, owing to the impossibility of securing sufficient quantities of seed. In some quarters doubt is expressed as to whether there will be enough oil to meet demands until the new crop of seed is in. Business has been good. Quotations are as follows:

Raw—	Imp. Gal.
1 to 4 barrels	$3 05
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
1 to 4 barrels	$3 07½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Turpentine is Short With Prices Firm

Montreal.

TURPENTINE.—The indications are that no relief is in sight from the shortage, and very few firms quote at all. Very small quantities are being offered, and even then the sale of a gallon is discouraged by the majority of dealers.

The same prices as last week are being quoted.

Turpentine—	Imp. Gal.
1 to 4 barrels	....
Small lots	2 65

(Packages extra.)

Putty Prices Same; Supply About Even

Montreal.

PUTTY.—No change has been made in prices of putty. The demand is fair, with the supply about even. Plenty of small sales are being made, but the larger orders are being held back for a possible decline in prices, which hardly seem likely within fall season.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do. 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Slight Change in Glass; Deliveries the Same

Montreal.

GLASS.—Discounts on case lot orders of glass tighten up, the discounts now reading 15 to 20 per cent., with plate glass discounts on city deliveries changed to 35 per cent.

TORONTO

TORONTO, September 4.—A very firm market for linseed oil for immediate delivery exists and crushers are experiencing much difficulty in getting supplies of seed. Quotations show a range of from $3.15 to $3.27 for raw oil and from $3.17½ to $3.30 for boiled. During the week turpentine has moved up five cents, quotations now being made on the basis of $2.55 per Imperial gallon. Reports from primary points indicate a strong and very firm market.

Linseed Oil Prices Are Holding Firmly

Toronto.

LINSEED OIL.—Prices of linseed oil are remaining steady. Crushers continue to experience difficulty in getting supplies of seed and in some cases their troubles are added to by slow deliveries of the seed obtainable. There is a very fair volume of business offering. Reports show that seed from the Argentine is continuing to move overseas steadily. As far as prices of linseed oil in Canada are concerned, it is stated that there will be no changes for immediate delivery. A decline of from 25 to 40 cents is expected on oil for delivery in October, November and December. Quite a good volume of export business is available, but crushers are adopting the policy of taking care of the needs of the home market first and then if they have any surplus it will be sent out. Crop reports from the West show a wide variance, and it is difficult so far to gauge the condition of the seed at the present time, or the amount that will be available. Quotations are as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 15	$3 27
3 to 5 barrels, gal.	3 14	3 26
10 barrels and over	3 12	3 24
	Boiled	
1 to 2 barrels, gal.	3 17½	3 30
3 to 5 barrels, gal.	3 16½	3 29
10 barrels and over	3 14½	3 27

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

Mixed Paint Trade Continues Very Active

Toronto.

MIXED PAINTS—Repeat orders continue to come in steadily from all parts of the country for mixed paints and manufacturers are more than satisfied with the business they are doing. Their gallonage for the season will show a splendid increase and an unusual feature of the trade for August is that during a period when business usually slackens off some firms are showing as high as 100 per cent. increase. No changes are noted in prices.

No Change Shown in White Lead in Oil

Toronto.

WHITE LEAD IN OIL—Business in this commodity has been good. Quotations show no change and are as follows: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Turpentine Prices Advance Five Cents

Toronto.

TURPENTINE.—During the week turpentine has moved up another five cents and quotations are now being made on the basis of $2.50 per Imperial gallon Local dealers have been getting deliveries much better than formerly and are in good shape to take care of the brisk volume of business that is offering. Reports from southern points state that lowness of stocks of turpentine continues to be one of the great elements of strength to the market. This coupled with activity in orders for overseas has sent prices to new high levels. The prospects of American crops showing up any larger as the season progresses are

THE strong feature of the B-H proposition is the way the product **backs up** all that we say about it in our advertising. We can afford to be enthusiastic—and so can you—about a paint that we know to have superior spreading qualities and to give particularly fine finish—the paint, moreover, of greatest durability.

For almost 200 years Brandram's Genuine B.B. White Lead has been the world's standard lead. One of the reasons why B-H "English" Paint is the best on the market is that this exceptional White Lead is used in making it.

While it's the quality of our product that makes the B-H Agency so desirable and so profitable, nevertheless it would be idle to expect Quality to win out against more aggressive advertising of competing brands. The B-H Agency is one outstanding example of "Good Products" and "Good Advertising" going hand in hand. The B-H line is so fine a line that we have felt justified in extensively advertising to tell the public of its merit. And the result has proved that we were right—a huge business has thus been built up.

Now, in further extending our business and in adding more Agents, we are able to approach merchants with a proposition that far overshadows all others in the Paint Business.

Write us for full particulars of our Agency proposition

"Save the surface and you save all" *Paint & Varnish*

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

slim. Half of the crop is in now and is on the way to all parts of the globe. The outlook is for a very strong market. Rosins are also strong and business active. Quotations on turpentine are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$2 55
2 to 5 barrels (barrel included)	2 54
5 gallon lots	2 65

Changes Likely in Window Glass Prices

Toronto

WINDOW GLASS, PUTTY.—Window glass prices will likely be revised very shortly and it is expected they will advance. In the meantime quotations show no change. Owing to natural conditions in the building trade a brisk demand for glass is being experienced.

Putty quotations show no change and are as follows:

Standard Putty	5 ton	1 ton	Less
Bulk, in barrels	$ 35	$5 60	$5 95
Do., 100 lb. iron ...	6 20	6 45	6 80
Do., 25 lb. iron	6 45	6 70	7 05
Do., 12½ lb. irons..	6 70	6 95	7 30
Bladder, in barrels ...	7 10	7 35	7 70

Markets in Chile For Hardware Goods

The Canadian Manufacturers' Association has issued the following for the information of firms wishing to go after export business in South America:

Steamship Service, Canada to South America (West Coast)

The Pacific Steam Navigation Company are contemplating the establishment of a service from Halifax to ports in Chile. At the moment they are not in a position to definitely decide the question owing to the fact that the Imperial Government has a considerable number of their boats under requisition. However, as these boats will be released from time to time they will be in a position sooner or later to establish this service, provided there is sufficient tonnage offering from Canada. The thought is that perhaps a monthly service would take care of the requirements.

As the association has been approached by the Royal Mail Steam Packet Co., a sister company, for the purpose of detemining what traffic would be offering, the above information is being placed before you, and it is requested that you advise as soon as possible information along the following lines:

1. Number of tons weight and measurement shipped annually to Chile.

2. Number of tons weight or measurement you expect to ship within the next year or any other period you may state.

If you have never had any trade with Chile, but expect to enter the market, or feel that you could do so if the service mentioned were established, I shall be glad if you will let me have information to that effect.

We understand that there is quite a market in Chile for manufactured goods such as agricultural machinery, belting, automobiles and trucks, railway equipment, flour, cement, cotton and wool cloth, knit goods, thread and yarn, electric machinery and supplies, mining machinery, dynamite, jute sacks, iron and steel bars and beams, galvanized and plain iron and steel sheets, industrial machinery and supplies, wire, leather, boots and shoes, newsprint and writing paper, furniture and several other articles. Chile is also in a position to export considerable quantities of iodine, nitrates, hides and wool as well as a number of other articles.

As the information which we are able to supply the steamship company will determine whether or not a service will be established it is desirable that you give this matter your attention and let us have a reply to this circular at your earliest convenience.

"Ain't it ever going to drop?"

—"Retail Public Ledger."

AUTOMOBILE PRICES TEND UPWARD

NEW YORK.—While the war was in progress and automobile prices were steadily mounting higher, it was a popular belief that cessation of hostilities would witness reductions almost as rapid as the advances had been. It seemed that this belief was justified when not long after the armistice several manufacturers announced substantial price cuts. Since, however, the true condition of this country's automobile industry has been more clearly recognized. Costs of labor and material have not declined as it was expected they would. Many manufacturers have not been able to speed up production to the point they had hoped to reach and the enormity of the shortage of motor cars, not only here, but abroad, is daily becoming more apparent.

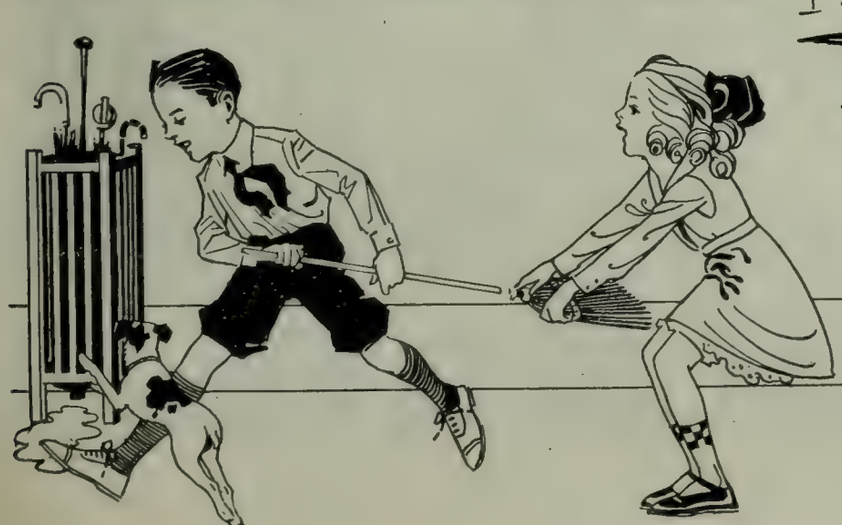
T. S. SIMMS & CO., LIMITED

ST. JOHN, N.B.

Branches: Montreal, Toronto, London

THE varnish that gives floors a hardwood finish—brings out the natural grain perfectly.

Specially made for the hard usage to which floors are subjected.



—impervious to water—even boiling water won't hurt it;
—elastic—don't show tell tale heel marks;
—durable—don't show white marks when scratched.

The Floor Varnish that Satisfies the Customer.

Turn-overs Instead of Left-overs!

WHEN you figure it up at the end of the year, the line that fattens your profits is the line that makes a quick turn-over — and *does it often!*

When a small dealer takes on a new line for the first time, and inside of a year re-orders from three to four times, exceeding his initial order each time — *he's handling a live one.*

Hundreds of Pratt & Lambert Dealers are doing this every year because "61" Floor Varnish is a varnish with a million friends. For 30 years people all over this continent have been buying "61" and telling their friends how good it is! This Fall a lot more people will know about "61" through a big, hard-hitting series of full-page advertisements in the magazines going to millions of householders.

Hundreds, perhaps thousands, of these readers are right in your own community and they're going to spend money for "61" *somewhere* in your town!

You are going to buy varnish of *some kind* before Fall and your stock will make a quick turn-over if you're prepared to sell your customers the kind of varnish they'll want! The money you spend for "61" Floor Varnish will return to you quickly with a nice profit and you'll have a clear conscience about it because "61" will stand hard knocks and water without cracking or turning white.

It's a varnish with the good-will of a million people and a quality reputation of over 30 years' standing. Cash in on it now! Just a postal will bring the details!

If You Knew—

THE economic reasons, alone, as a motive for housewives in selecting "Silkstone" as a wall covering, are a big factor in promoting sales.

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

Silkstone is cheaper than wall-paper (and decidedly more sanitary), lasts longer than other wall finishes, can be washed often, and won't rub off. It gives a beautiful soft, silky finish that will outwear any other wall covering. The economy of a finish that costs little to apply and lasts so long will forcibly appeal to all.

Set "Economy" to make sales of Silkstone for you. If there is no Stephens' Agent near you, write for our good proposition.

THE BIG MARKET
—IS AT HAND—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

THE EDEN DOMINATES ITS MARKET

Because its construction is time tested.

Because it has twenty-five inimitable and exclusive features.

Because it is nationally advertised.

Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

VEEDOL

In Convenient Containers Meets Every Need

A Record-Breaking Seller

Ten Ply— "Built to the Pulleys"

VULCO CORD

"The Standardized Fan Belt"

Vulco Cord Belts are oil and heat-proof; non-stretch. Built by a special patented process, they conform to the pulleys.

They are positively guaranteed to outwear any other leather, webbing or fabric belt on the market. There is no substitute—they're patented. Will fit as many as twelve different makes and models of cars—not just one. These standardized sizes mean great success and profit for the dealer. There's a great demand and a popularity, still growing among all classes of car, truck and tractor owners.

Special Oils and Greases

There's a Veedol product for every need. Consult Veedol Lubrication Charts for the needs of Automobile, Airplane, Marine, Motorcycle, Tractor and Stationary Engines. Oils for cold, and oils for extreme heat; oils for moist cylinder conditions; for kerosene or heavy oil-burning engines; for transmissions, and many special uses.

Veedol Greases — Gear Compounds, Cup Greases and Graphite Grease all meet special needs in the efficient, satisfactory Veedol way. Sell Veedol in the convenient containers from half gallon up—the cans have handy spouts and faucets. Ask for prices and begin a prosperous move to-day.

QUALITY

"Save the surface and you save all" Paint & Varnish

The *Practical* Value of Paint—

can be determined only by application.

Its serviceability depends upon the ingredients that go into it.

Therefore, what your customers get out of their paint is determined only by the quality inside the tin—or the reputation of the house that stands behind it.

Both dealer and consumer have long since been educated to the fact that it pays to pay a little more for good paint especially when such a paint *returns this slight extra first cost by giving better and longer service.*

Never in the world's history has money been needed but wasted than right now.

Why not sell paints that save it?

The Jamieson Proposition is sure to interest you.

Write for it.

BLACK and GALVANIZED SIZES, ⅛ IN. TO 4 IN.

All our pipe thoroughly inspected, tested to 600 lbs. hydraulic pressure and branded.

All Sizes of NIPPLES (Black and Galvanized)

Ask your jobber for CT *Brand of Wrought Pipe*

CANADIAN TUBE & IRON CO., LIMITED, MONTREAL
Works: Lachine, Can.

MEAKIN'S BRUSHES

ARE BUILT FOR SERVICE

The productive life of any brush depends on quality of material and methods of manufacturing.

Our policy of using nothing but high-grade materials, together with the extraordinary care and attention we give to the making of our Brushes, has put them in the front rank of **"serviceable products."**

Meakins' Brushes give unusual service to the user and return splendid profits to the Dealer.

The bristles "cannot loosen." They are Rubberset. A feature that makes them easy to sell.

Write us for catalogue. Order through your jobber.

Meakins & Sons, Limited, Hamilton, Ont.

Warehouses: Winnipeg, London, Toronto, Montreal, Vancouver

Mr. John M. Parsons,
379 Wellington St.,
London, Ont.

London, OCT. 13, 1896

Dear Sir:—

We hereby guarantee the No. 9-20 Champion Souvenir Range, sold to Mr. John M. Parsons, 379 Wellington St., City, to be first class in material and properly put together, having no defects in workmanship, economic in fuel, will bake or roast, in a thorough manner, any article to be cooked in the oven. That the firepot will run five years, with renewal in case of failure, to be made at our expense, at such time of failure, and that after five years' use, when required we will replace or renew in a proper manner anywhere in the city, the firepot, at a cost not to exceed $1.50, and hereby give him three months' trial or less, to satisfy himself by tests, using wood and then coal, in order to make a thorough test in all lines of cooking, when if satisfactory, he agrees to accept the same and pay us the price agreed upon.

WM. WYATT & SON.

The above is an exact copy of a guarantee given by a merchant to his customer, Mr. John M. Parsons, of London, Ontario, OVER 22 YEARS AGO.

Now read what Mr. Parsons has to say about it:—

The Hamilton Stove & Heater Co.,
Hamilton, Canada.

London, Canada, August 21, 1919.

Gentlemen:—

This bit of Stove history may be of interest to you as successors to the firm that built our kitchen range:—

Some thirty-five years ago I brought into Canada a bright, active young English wife. Neither of us knew anything about a Canadian Kitchen range; we paid a big price to a big firm for one of their latest models; and for twelve years we had kitchen misery.

Then for about eighteen months I began a systematic enquiry among the dealers and then went to the homes of their customers and heard their private opinions after various terms of service:—The race narrowed down to two; with not a single user who was not well satisfied with either; with our minds prejudiced in favor of the rival of the Souvenir I decided to buy on a test plan and absolute guarantee; and with that plan approached all the dealers, and not one of the several competitors would entertain the test except the firm handling the Souvenir (A copy of contract enclosed).

We tried wood, coke, soft coal and hard coal; it made no difference, the Souvenir handled them all.

Instead of taking up 90 days' trial, we were fully satisfied in a month and paid in full $30.00.

On October 13th next, this range will have been 23 years in continuous service, and I would not take the original price for it to-day if offered. We have renewed nothing beyond the fire back bricks and the iron rest supporting same. It is also fitted to burn natural gas; this we did not try, because London has none.

In addition to our kitchen work, we heat a 30-gallon Soft Water Bathroom Tank upstairs some 25 feet away, and from which we get heat enough to protect the bathroom from frost during the winter months.

Our test plan of buying may have silenced timid rivals; but it gave us all we could desire, THE QUEEN OF KITCHEN RANGES, and almost a quarter of a century of kitchen range pleasure, and still going good as ever.

This range can be seen at my residence any time as a proof of these statements.

Very sincerely and unsolicited,

(Signed) J. M. PARSONS,

379 Wellington St., London, Canada.

Mr. Parsons' letter is the proof that there is such a thing as "BUSINESS CONSCIENCE" and we still believe that SATISFACTORY SERVICE AND LASTING QUALITIES are the manufacturer's highest obligation to his customer.

CARTER'S

Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

Pronounced "RU" as in RUBY

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

We invite all Canadian Implement and Hardware dealers to investigate the strong selling merits of this line of machines.

This Speed Governor and Line Shaft outfit will make the gas engines you sell more valuable to your farmer trade. They operate Cream Separators, Washing Machines, Churns, Grain Separators and Grind Stones, without vibration.

Ask your jobber for prices and write us for catalog and information.

Address **Cedar Rapids Foundry & Machine Co.,** 720 1st Ave. W., Cedar Rapids, Iowa, U.S.A.

Awnings Tents Flags Tarpaulins

We were optimistic for good business this year but trade has exceeded our expectations. Our many customers are participating in this good business by carrying our lines for immediate delivery. The season is on. Sort up your stock to be ready. Catalogue on request.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Bowser Gasoline and Oil Pumps are bringing many thousands of dollars in business and profits to their owners, business that would have gone elsewhere but for the ever present invitation of the

BOWSER
ESTABLISHED 1885

Storage System

to "stop and fill up." Bowser Pumps give the owner continuous satisfactory service accuracy, safety, saving and convenience.

Filling Stations equipped with Bowser Pumps and Portable Wheel Tanks for gasoline and oil are known the world over as the most satisfactory place for the motorist to stop. The Bowser equipped place gets the profitable business.

Send for literature telling more reasons "WHY."

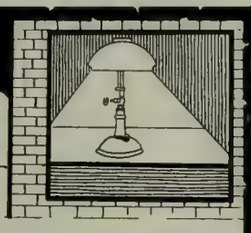
HAVE YOU FIGURED IT OUT IN THIS WAY?



A salesman running to and from a cash office or register fifty times in a day requires, in the average, say, fifteen seconds each way. Detention at office for change making, thirty seconds, or sixty seconds for change of each sale, making thus fifty minutes lost time for each salesman. Had you our Cash Carriers, this time, needlessly consumed, could be devoted to further the sale of goods, or to the performance of other duties highly necessary at busy periods when the services of your selling staff is most valuable.

Do not forget to write for that circular which explains all.

Imperial Polarine *Fully* Satisfies

Build your lubrication business on the solid foundation of customer satisfaction

The motoring public appreciate in a practical way the service of dealers who cater to their requirements. This is especially true in the matter of lubricating oils and greases.

More Imperial Polarine is used by Canadian motorists than all other makes together.

The average car owner prefers to trade with those dealers who can give them the size package they want in the correct grade for their car.

Increase your package lubricating oil business by becoming headquarters for

Polarine
FRICTION REDUCING MOTOR OIL
"Makes a good car better"

Imperial Polarine satisfies customers because it fulfills all the exacting requirements demanded of a good lubricant.

You can secure considerable regular year in, year out, business by linking your store with the never-ending Polarine advertising campaign.

Have a full supply of Imperial Polarine in stock at all times. *The Red Ball Sign identifies your store as the right place to buy Imperial Polarine.*

To post yourself on the correct grade of Polarine for any use, read our booklet, "Polarine for Automobile Lubrication." If you have not received your copy we will gladly send you one. Address, 56 Church Street, Toronto.

The Imperial Polarine proposition is a most attractive one for you. A minimum profit of 33 1/3% on every sale. Increase with larger quantity orders. Get our dealer proposition.

Imperial Polarine comes in three grades—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A for cylinder lubrication. Imperial Polarine Oils and greases for transmission and differential lubrication in half-gallon, gallon and four-gallon sealed cans, 12½-gallon steel kegs, half-barrels and barrels.

Polarine is a light-bodied oil, Polarine Heavy is a heavy-bodied oil, Polarine A is an extra heavy-bodied oil.

IMPERIAL OIL LIMITED
Manufacturers & Marketers of POLARINE MOTOR OILS & GREASES
Marketers of *Gargoyle Mobiloils* in Canada
BRANCHES IN ALL CITIES

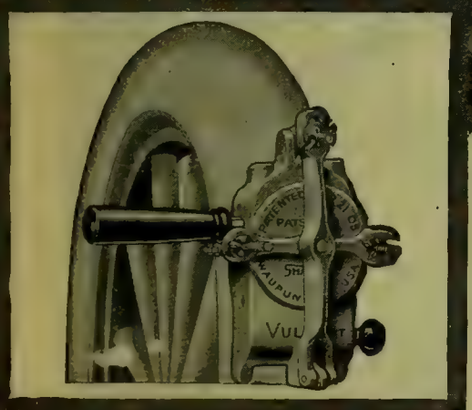
Keep Your Stock Spotless

THERE is no feature of your store service more important than the cleanliness of your merchandise. All customers prefer to trade with the cleanest store. You cannot keep dust out of your store, but you can effectively control it and keep it off your goods by using—

STANDARD Floor Dressing

When you use the old-fashioned duster you merely displace dust, whereas Imperial Standard Floor Dressing definitely lays and holds 90% of all atmospheric dust. Dust cannot rise where Imperial Standard Floor Dressing is used.

Imperial Standard Floor Dressing cleans and preserves the surface of wood, linoleum and oil cloth. A single gallon suffices for 500-700 square feet of space and lasts for several months. It may be applied with an ordinary floor sprayer.



Imperial Standard Floor Dressing will not only help you to keep a brighter and more attractive store, but it will also bring you a new source of business. Your store and stock will demonstrate to neighboring merchants its cleansing, dust-preventing qualities, and they will want some, too.

Imperial Standard Floor Dressing is sold in one and four-gallon cans, also half-barrels and barrels.

IMPERIAL OIL LIMITED

BRANCHES IN ALL CITIES

"—saves two-thirds of my Tire Expense"

"Once a week I go over my tires—and seal the little holes and cuts that ruin tires by permitting dirt, oil and water to reach and rot fabric. With the SHALER Vul-Kit I 'vulcanize' these holes with tough, new rubber that makes a lasting job of it. It takes only a few minutes—but keeps my tires good as new—prevents tire trouble—*doubles* my mileage—and actually saves ⅔ of my tire expense."

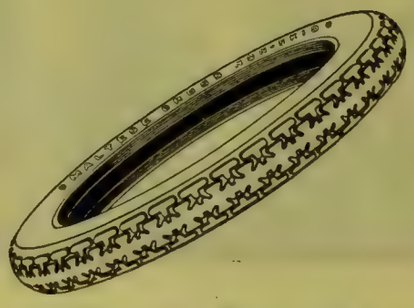
Sell the SHALER VUL-KIT

It's easy to sell. Motorists are looking for a tire-saver like this. Their word-of-mouth endorsement of the SHALER to their friends gives you a chain of sales. The repair material they buy of you to use with this vulcanizer gives you "repeat" profits that come to you regularly—without effort. You make a good profit selling the Vul-Kit itself and big, steady "repeat sale" profits.

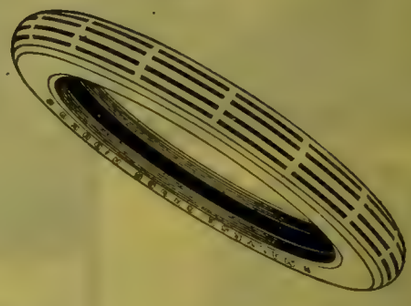
SHALER Vulcanizers are advertised regularly throughout the year. Motorists are now reading the large, dominant advertisements in the leading national and motorist publications. Every car-owner needs a SHALER Vul-Kit—sell it to him and make these big steady profits for your self.

Order From Your Jobber Now—Write Us for Catalog

of the complete line of SHALER Vulcanizers for garages, tire repair shops and motorists' use.



C. A. SHALER CO., 1503 Fourth St., Waupun, Wis.

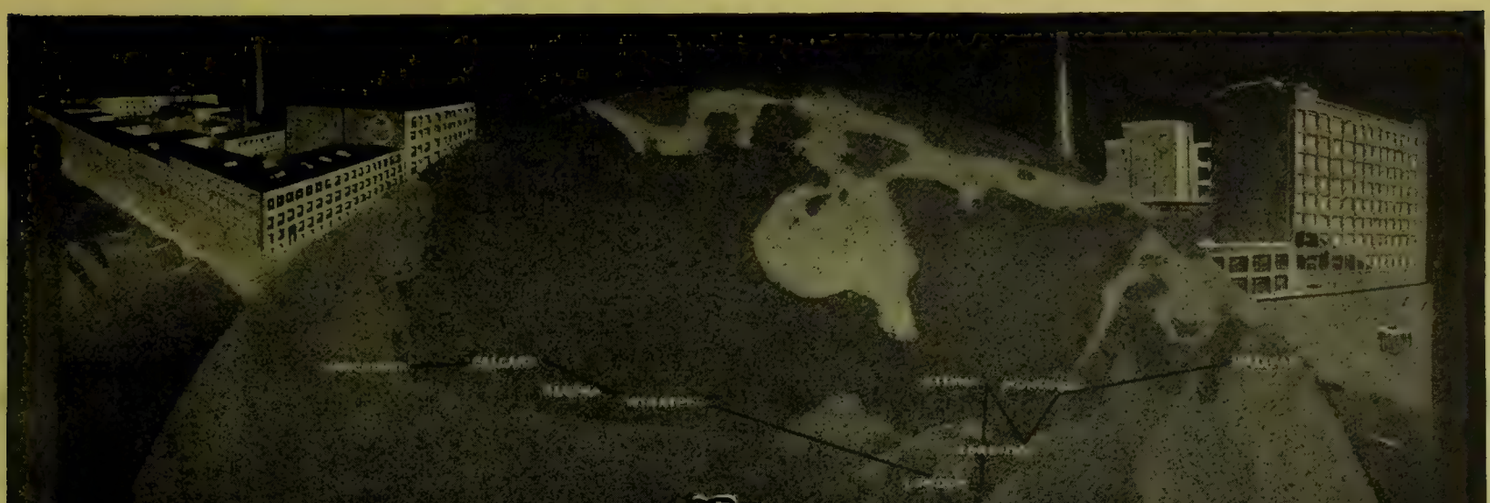


Oldest and Largest Manufacturers of Vulcanizers in the World

ALWAYS UP TO EXPECTATIONS

If this is your slogan there is not much chance of a failure. When a customer purchases a tire he has certain expectations. If the tire you sold him fails to measure up to his hopes, you can never expect to sell him another. How different is the man who buys a tire that fulfills his expectations. No chance of him buying elsewhere in future—more than that, he's going to tell his friends about the square deal he got at your store.

MALTESE CROSS Tires



are fulfilling the requirements of exacting motorists from coast to coast. The ability of Maltese Cross Tires to eliminate road trouble is one of the chief reasons for their immense popularity. Maltese Cross Tires are made from the best materials the world's markets can offer, and are built by master tire builders. You can safely recommend Maltese Cross Tires to any of your customers, and know that repeat business will follow. Display them regularly in your store and windows. You thus link your store up with our national advertising and we both benefit.

Ford

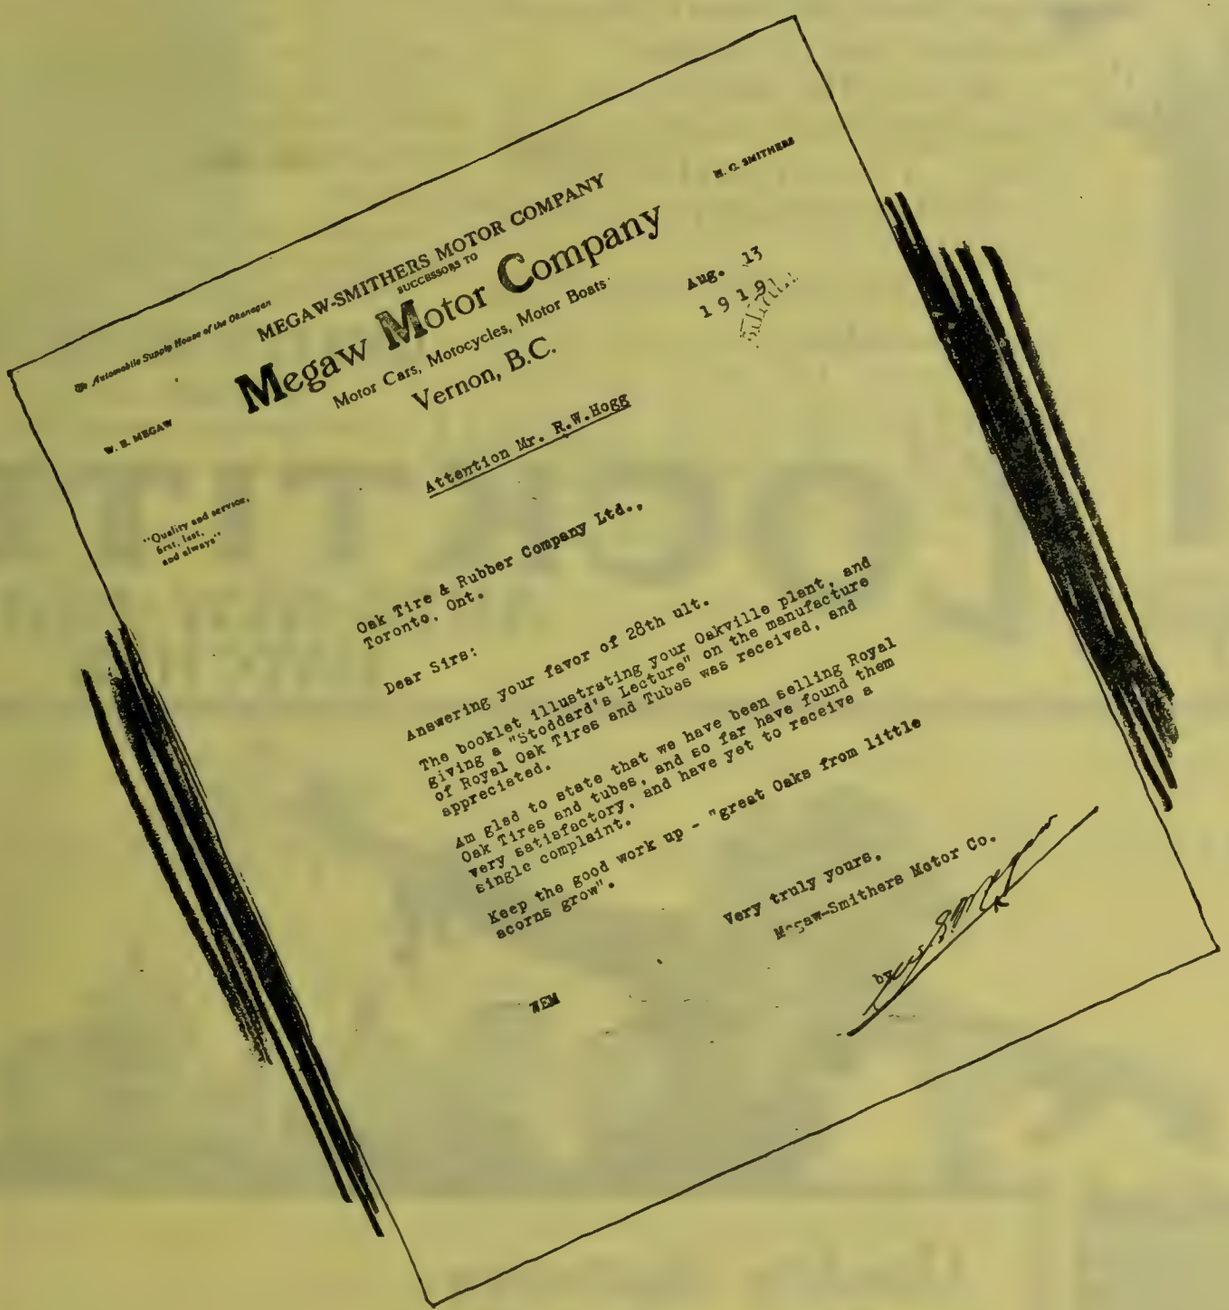
"A Joan of Arc Machine"

SHE withstood everything in the field and above all was, and still is, the last and only car to survive until the cessation of hostilities"—Extract from letter received by Ford Motor Company from a British Soldier, in Africa.

Over shell-torn roads, through water soaked fields, second only to the tanks in its power to climb debris and crater holes, the Ford car made a world famous record in the fighting area of the great war. In press despatches, in field reports, in letters, in rhyme and song the praises of the Ford were sounded.

In France	-	700 cars out of 1,000 were Fords
In Italy	-	850 cars out of 1,000 were Fords
In Egypt	-	996 cars out of 1,000 were Fords
In Mesopotamia		999 cars out of 1,000 were Fords

The Ford power plant that established this world-wide record in every theatre of the war remains the same. It will be in the Ford you buy.



Ford Runabout, $660. Touring, $690. On open models the Electric Starting and Lighting Equipment is $100 extra. Coupe, $975. Sedan, $1,175 (closed model prices include Electric Starting and Lighting Equipment). Demountable rims, tire-carrier and non-skid tires on rear as optional equipment on closed cars only at $25 extra. These prices are f. o. b. Ford, Ont., and do not include War Tax.

Buy only Genuine Ford Parts. 700 Canadian Dealers and over 2,000 Service Garages supply them. 119

"Quality and service, first, last, and always"

Aug. 13
1919

Attention Mr. R.W.Hogg

Oak Tire & Rubber Company Ltd.,
Toronto, Ont.

Dear Sirs:

Answering your favor of 28th ult.

The booklet illustrating your Oakville plant, and giving a "Stoddard's Lecture" on the manufacture of Royal Oak Tires and Tubes was received, and appreciated.

Am glad to state that we have been selling Royal Oak Tires and tubes, and so far have found them very satisfactory, and have yet to receive a single complaint.

Keep the good work up - "great Oaks from little acorns grow".

Very truly yours,
Megaw-Smithers Motor Co.

by

WEM

Before you place your order for spring delivery would it not be well to ask us first for a demonstration of the quality that makes Royal Oak Tires the cheapest cost-per-mile? Aside entirely from the question of money profit there's a double advantage for you in handling Royal Oak Tires.

That which you derive from the good will of your customers, and the comfort you experience in comparative freedom from complaints. To these may be added our promptitude and accurary in filling orders. Inducements enough here surely to warrant your investigating carefully what we have to offer.

Oak Tire and Rubber Company, Limited

Winnipeg Branch: 120 Lombard St. **Factories: Oakville, Ontario, Canada**

HOW IT WORKS

Place the injured tube around the container—as shown in the picture. Clean and roughen the surface around the hole with the emery on the top of the package. Apply and allow the cement to dry. Then press on the patch firmly—and the tube is ready to go into casing.

A TIRE PATCHER THAT SELLS ITSELF

On the road—or in the garage—the Locktite Auto-New-Matic Patcher makes easy the quick and permanent repair of a cut or tear in a tube.

It seals the hole in the tube absolutely tight—with no waiting. A money- and time-saver—the Locktite soon pays for itself.

Any size repair is made easy with Locktite.

Because the outfit is complete—

Because it saves the motorist time and money — the demand for the Locktite Patcher is increasing every day—every week.

Are you in position to get your share of the Locktite business?

Requiring little shelf room and no service—selling over the counter like a spark plug—there's a good profit in Locktite.

A special larger size is made for the garage and repair shop.

Write for our dealer proposition.

All good jobbers sell them.

CANADA DRY CELLS, LIMITED, WINNIPEG, CANADA

DUTCH BRAND "2 IN 1" CUT FILLER

saves tires from going to the junk pile. "2 in 1" Cut Filler is a heavy liquid rubber for filling small cuts in casings and solid tires. Lengthens the life of the casing and tire. Easily applied. The motorist can repair his own tires. This is one of the famous Dutch Brand Products you should be selling. Our attractive counter display stand will make sales for you.

May we send you "Keeping Down the Up-keep," our completely illustrated catalogue? It's necessary to the success of your accessory department. Send us a postal to-day.

Order through your jobber direct.

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS BUT DOES NOT OFFEND

This improved signal says—"car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

CROWN CYCLE & MOTOR CO.

319 Craig St. West, MONTREAL

LARGEST WHOLESALE MAIL ORDER HOUSE IN CANADA

The Fastest Selling All-Year Accessory a Dealer Can Handle

Small investment — Good profit — Takes up little room — Every motorist needs them — And has no excuse for being without them at this price.

MERCHANT'S ANTI-SKID CHAIN TIGHTENER

$1.00 A PAIR

If dealer does not handle, sold direct prepaid on receipt of price.

Simple and easy to attach. You can slip it on a customer's car in about one minute, and it means a sale every time.

The Tightener catches the chain at five points, giving an easy tension all around. It holds the chain in place, prevents dragging or rattling, and yet permits the chain to creep on the tire, and carry out to the full its non-skid action. Keeps chain from pounding the fender, and prevents it from unhooking.

JOBBERS AND DEALERS:—Write at once for full particulars and generous terms, for now is the time to sell these things.

The world's bookkeeper

MODERN National Cash Registers are recognized throughout the world as labor-saving machines.

They are used wherever money is handled and accounts kept—in every line of business, in all parts of the world.

National Cash Registers are the result of 35 years of study and invention.

To make them requires 7,100 people, 21 buildings, 40 acres of floor space, and 2,475 patents covering 35,000 claims.

Considering workmanship, materials, and what it does, the National Cash Register is the lowest priced piece of machinery in the world.

THE SATURDAY EVENING POST

For the Table

Perfection in table appointments at surprisingly moderate cost is possible with the Silverplate of William Rogers and his Son, made in patterns of lasting charm and enduring beauty.

Quality Guaranteed

The Silverplate of
William Rogers and his Son
"The Best at the Price"

Made by
WM. ROGERS MFG. CO.

INTERNATIONAL SILVER CO., Successor, MERIDEN, CONN.
Also made in Canada by Wm. Rogers Mfg. Co., Ltd., Niagara Falls, Ont.

Building a desire in two million homes To advertise the Silverplate of William Rogers and his Son to the greatest purchasing market in the country, we are beginning, next month, a consistent and expensive campaign in The Saturday Evening Post, McLean's and several other magazines.

This means each week that a *Wm. Rogers & Son* advertisement appears, a large number of people see, *in their homes*, the desirability of this silverplate.

Are you taking full advantage of this?

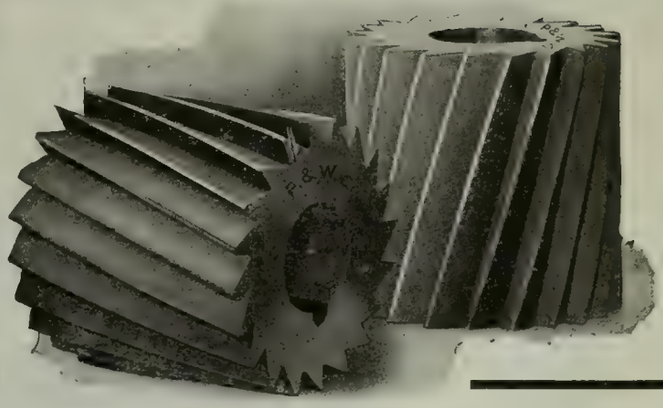
The Silverplate of William Rogers and his Son is "The Best at the Price."

Made and Guaranteed by WM. ROGERS MFG CO., LIMITED, Niagara Falls, Ontario

HARDWARE AND METAL, September 13, 1919. Volume XXXI., No. 37. Published every Saturday at Toronto. Yearly subscription price, $3.00. Entered as second-class matter July 1st, 1912, at the Post Office at Buffalo, under Act of March 3rd, 1879. Entered as second-class matter at the Post Office Department, Ottawa.

TRADE YALE MARK

Behind YALE Padlocks



and every other "Yale" product—Yale Night Latches, Door Closers and Builders' Hardware is the modern Yale plant at St. Catharines, Ontario.

Up-to-the-minute manufacturing methods, sound designing and construction practice, and the rigid Yale inspection system, make certain that every Yale product is fit for the purpose for which it is intended.

The trade-mark "Yale" on the product is our guarantee that it is.

"The trade-mark 'Yale' helps makes the sale."

Canadian Yale & Towne Ltd., St. Catharines, Ont.

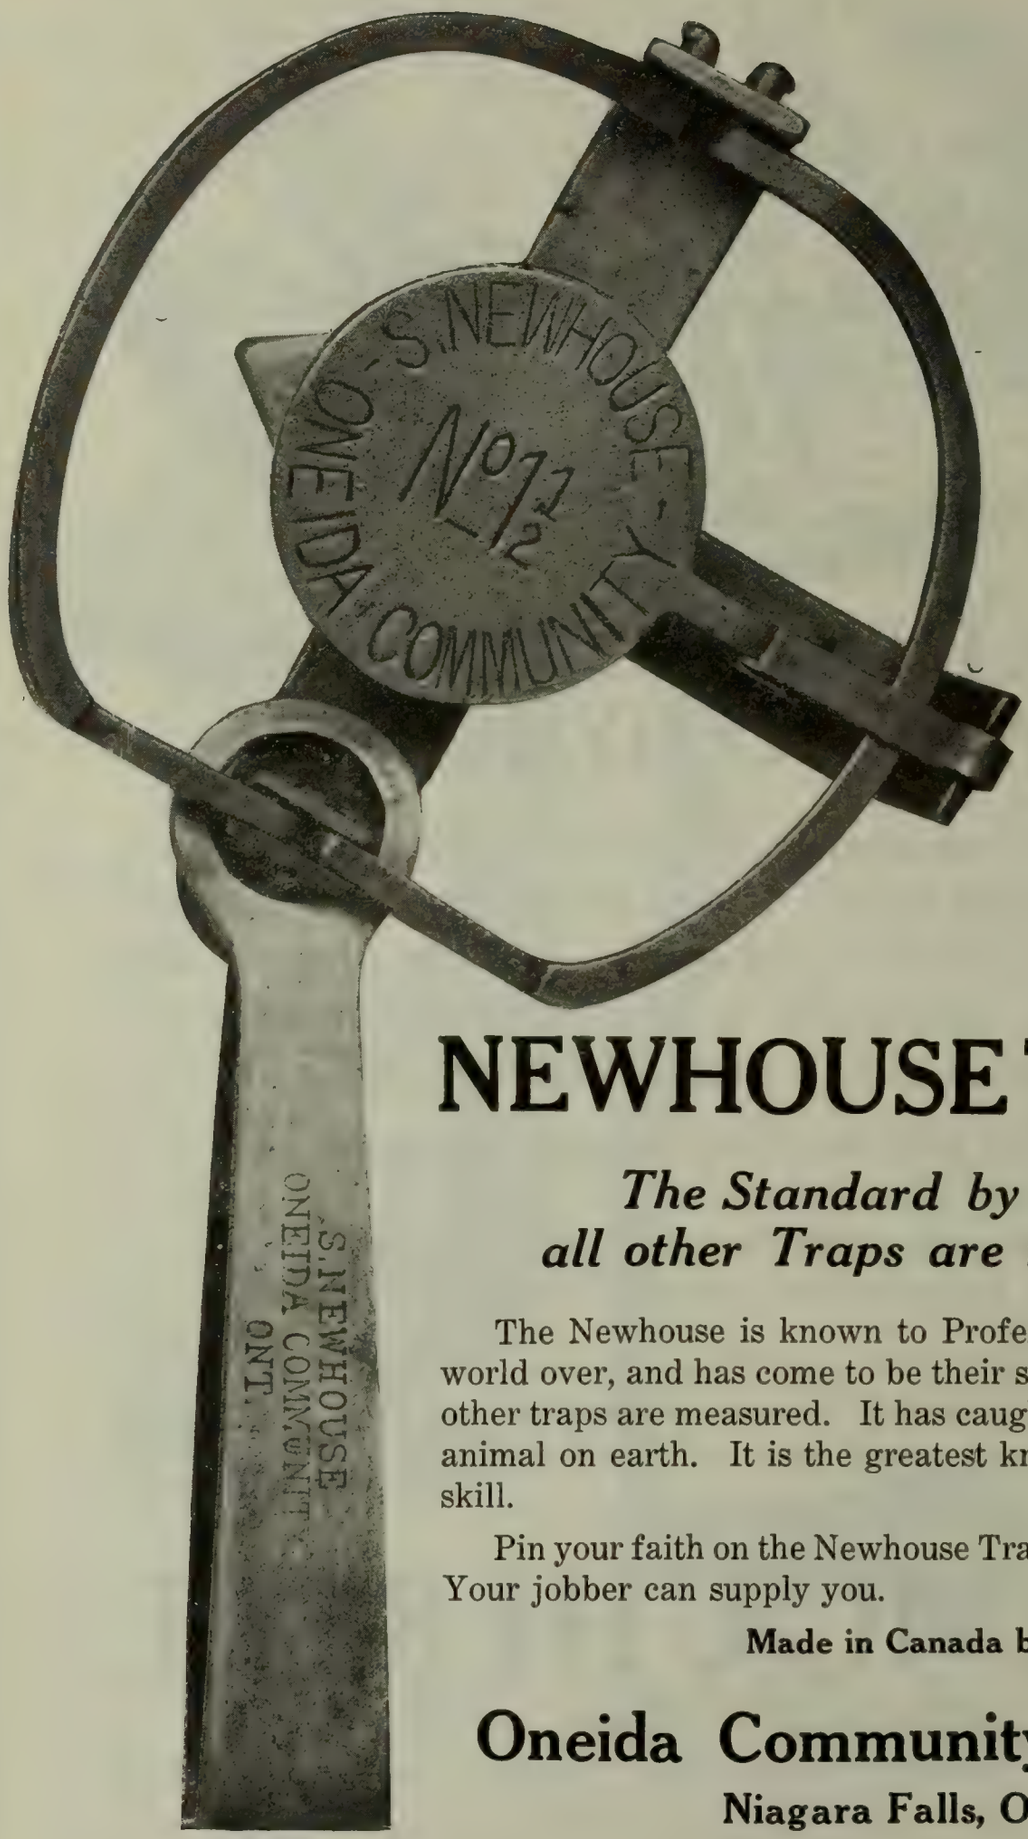
THE FIRST ARTICLE THAT CAME TO PLYMOUTH

THE first article to come to Plymouth was a piece of rope. It was the painter of the small boat held in the hand of the first member to step ashore of that band of explorers sent out by the Mayflower to find a proper landing place.

It was a natural act, and became significant only in the light of after history, when two hundred and four years later was established at Plymouth a ropewalk destined to become the largest in the world.



For ninety-five years Plymouth has been making and shipping to every part of the civilized world, rope—good rope—"The Rope You Can Trust."

805-6 Garage Door Sets

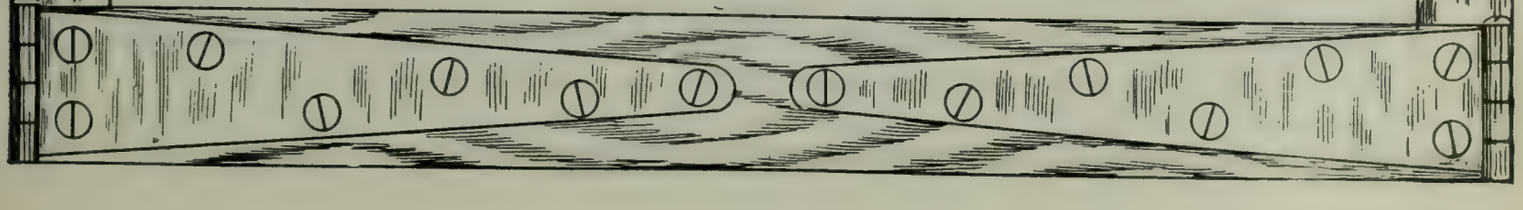
This number is one of the convenient swinging and sliding sets. The doors open easily, sliding and folding inward along the wall, greatly economizing space. They close with equal ease. A special reason for their popularity is the easy entrance at all times by one door, which is so hung, that it may be used independently.

The doors are adjustable to correct for swelling, sagging, or a rise in the cement floor.

Furnished, regularly, with six-foot, braced rail for eight-foot opening.

Set No. 805 includes: No. 29 Latch, 1 only Swivel Hanger, 6-foot Braced Rail, 4½ pair 4 x 4-inch Jap. No. 505 T.P. Butts, 1 only No. 820 Chain Bolt, 1 only No. 830 Foot Bolt,, 1 only No. 5 Pull, 1 only 4½-inch No. 30 Safety Hasp. All necessary bolts and screws.

No. 806 Set includes the same, except that No. 27 Latch is used instead of No. 29.



Both Sets furnished in Japan finish.

Keep Pace With the Sale of Cars

It is a well-known fact that few automobile factories can keep production up with the orders, just now. A large percentage of the purchases of new cars means new garage requirements. The car owner seeks garage hardware and, of course, buys it from the dealer who is prepared, and ready to offer National Service, without annoying delay.

National Manufacturing Company

Sterling, Illinois

The Great West Trolley Door Hanger

A hanger built for service and especially recommended for use on heavy doors.

The axles pass through seamless tubes and turn on steel roller bearings, making it anti-friction and very easy running.

A leading feature of the "Great West" is the vertical and lateral adjustments, allowing the door to be raised or lowered, or the space between the door and building increased or decreased as desired.

The track is made of heavy steel and double grooved attached to the building with heavy corrugated brackets.

We will gladly look after your door-hanger prospects. Write us.

Rotary Ash Sifter

"Canada" Rotary Ash Sifter

For these days of coal shortage, Davidson's Rotary Ash Sifter is just the thing. Solves the fuel problem. Separates the ashes from the cinders quickly and efficiently, without any clogging.

Moreover, you can recommend Davidson's Sifters to your customers on the score of cleanliness. Note the enclosed working parts—it means freedom from the smothering dust of the old-fashioned sifter. Easy to operate, and free from mechanical difficulties.

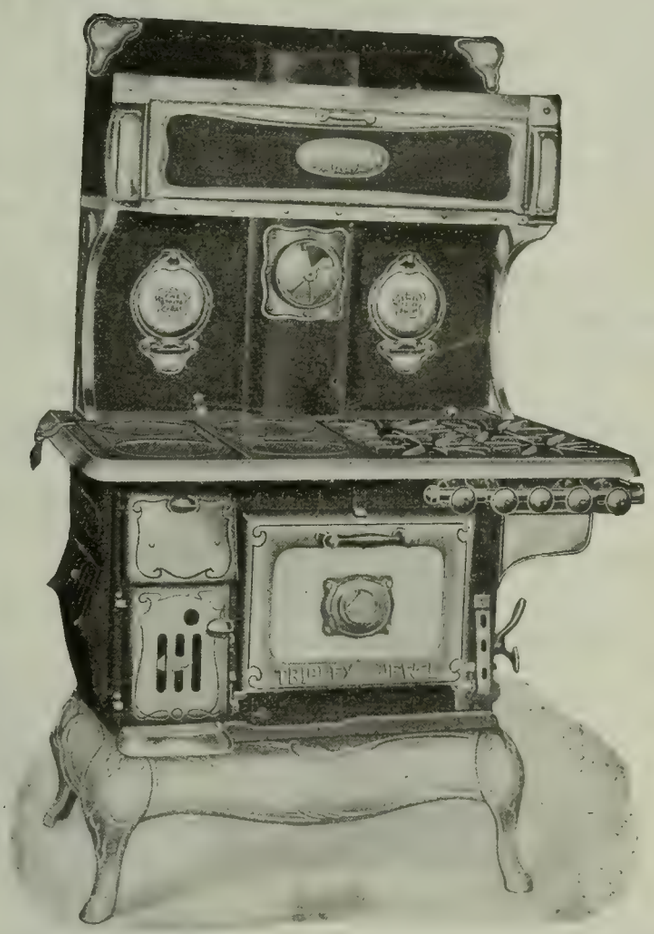
Davidson's Sifters are neat in appearance, and made rustproof by galvanizing after being assembled.

The Thos. Davidson Mfg. Company, Limited
WINNIPEG MONTREAL TORONTO

Ask your Customer

Did You Visit The Toronto Exhibition?

Did you see the new Combination Range



"The Triplex Jewel"?

Are you not convinced that it is the most modern constructed combination and most complete cooking apparatus for coal or wood, artificial or natural gas burning you have ever seen?

Did you see any combination Range that could be placed in its class?

There can be but one answer: "It is the most complete, best constructed and neatest range I have ever seen, and so simple to operate."

Hundreds of satisfied customers are now testifying to its wonderful working qualities, the enormous saving in fuel and the comfort they have experienced since placing this range in their homes.

Mr. Dealer, if you want to introduce in your territory a combination range which you can sell under the fullest guarantee and know that you will have satisfied customers,

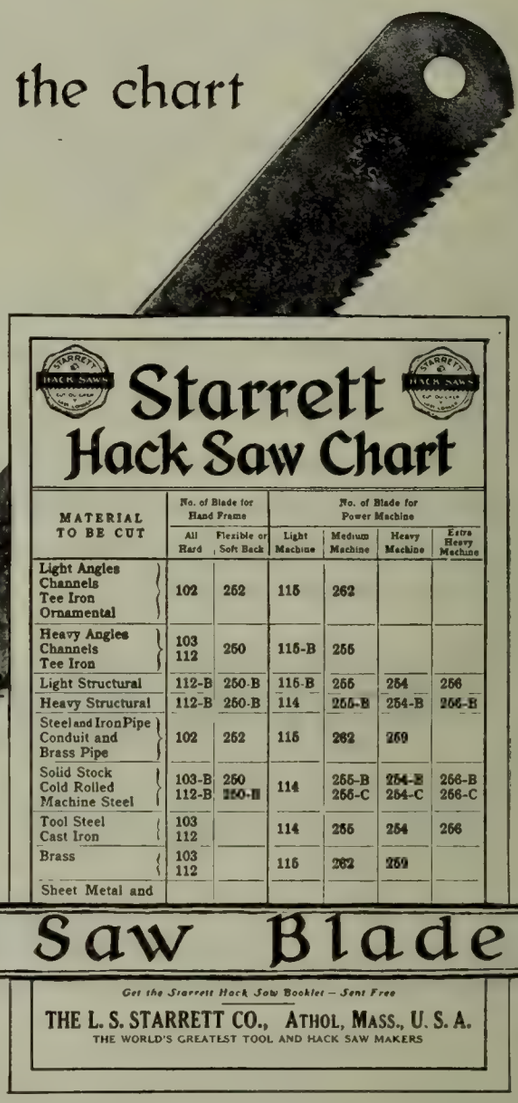
To cut down the cost per cut

Follow the Chart

Make your hack sawing just as efficient as any other machine tool operation. Choose your blade according to your work. You can't cut cold-rolled and heavy angle iron with the same blade without a waste. Whether you are cutting by power or by hand, big quantities of a comparatively few kinds and shapes of metal or smaller quantities of a lot of different things—there's a Starrett Hack Saw that will meet your needs most efficiently.



Get the most out of every box of saws you buy. Use them for the purpose for which they were made.

A copy of the Starrett Hack Saw Chart "M.A." sent free upon request.

Interest in razors is aroused by advertising and display. You change razors into coin of the realm by using just the right selling talk.

The GENCO Display Cabinet makes a man think of razors who came in only to buy a box of tacks. You use the right-to-the-point selling talk appearing in our advertising and —Bingo! you ring up a good profit.

Every barber uses a blade like the blade on all GENCO Razors. These professional shavers would certainly turn to a better blade if there were a better one. The Safege is a professional blade with a guard. With this guard flipped back or removed entirely, the razor can be stropped and cleaned just like a professional razor.

Anybody can strop a GENCO Razor. It is made with a heavy back and is hollow ground and beveled, and lies against the strop at just the correct angle to bring up a perfect edge for a lifetime of shaves.

You can have this handsome GENCO Display Cabinet with your first order ***Free.***

It will stop and interest many a man in razors who came to your store to buy something else. "Let me look at that razor?" It helps sell and it saves your time.

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS

BUT DOES NOT OFFEND

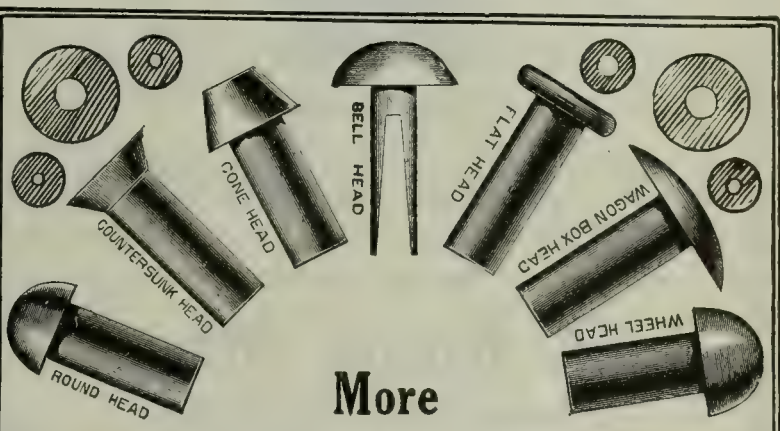
This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY



This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

Which do you hear— the *brake* or the *accelerator?*

The brake means sales for you— the accelerator, sales for the other fellow

When you hear the sound of a brake in front of your store, the chances are that a motorist is stopping for correct lubrication.

He has seen your red Gargoyle sign and knows that at your store he can get the grade of Gargoyle Mobiloils which is correct for his engine.

But suppose you hear the accelerator. That means that the motorist has slowed up, looked at your store and found neither a window display of Gargoyle Mobiloils nor even the flange sign that carries the red Gargoyle, and has speeded up to another store where he *can* get the lubricant he knows is correct.

The pity of it is that sometimes you may have the grade of Gargoyle Mobiloils he wants right on your shelves, but have given no indication of it at the front of your store.

Can you afford to let profits ride right by you that could so easily be yours?

Isn't the sound of the brake more agreeable to your ears than the hum of the accelerator?

Keep motorists stopping at your store by displaying the red Gargoyle flange sign and by showing the complete line of Gargoyle Mobiloils in your windows. And don't run the risk of losing sales after the automobilist has stopped by letting any of the grades run low.

THOUSANDS

of Hardware Merchants are Making Real Profits Pushing Gargoyle Mobiloils.

GARGOYLE

Mobiloils

A grade for each type of motor

The four grades of Gargoyle Mobiloils, for engine lubrications, purified to remove free carbon, are:

Accurate Accounting Key To Success

Quebec City Hardware Firm Pay Close Attention to Buying and Selling Accounts—Be Able to Get at Vital Details Quickly — Order With Stock Breeds Better Clerks—Doyle Hardware, Reg'd, Do Not Follow Beaten Path—Some Details in Connection With Their Business as Carried on in the Ancient City

A contributing factor in the success of most businesses is the one which provides for their having a good store front. The above is a reproduction of the store front of the Doyle Hardware, Reg'd, Quebec City. There are four fine display windows in which they always try to have a sales-compelling arrangement of merchandise.

WILLIAM DOYLE, Registered, 15 St. Peter Street, Quebec, firmly believes that business success is built upon careful and accurate accounting. Since the firm has been in business for nearly forty years, being first established in 1880 by the late Wm. Doyle, Sr., their adherence to careful accounting ought to be argument of a winning and compelling order, for this is one of the very important principles upon which they have builded.

In speaking with the office manager, H. Doyle, a representative of HARDWARE AND METAL was told that, were it necessary, the exact condition of the business could be immediately ascertained within a few hours. This was only possible through a system of bookkeeping which enabled the management to tabulate purchases and sales, and to so allocate these under their respective headings, that, when a certain vital fact was needed, the same could be immediately turned to and produced.

Should Possess Helps

"No dealer should be without an accurate knowledge of his costs," thinks Mr. Doyle. "One of the best helps to this end is that of a book containing a table of percentages, discounts and laid-down costs. It is a big help, is accurate, and saves a great deal of time in figuring out exact net prices."

Mr. Doyle produced such a book for the writer's inspection, and this he uses to figure out the data and information required in every business. For instance, bolts, screws, various chains, harvest tools, valves, and countless items sold through the hardware trade, are bought on a list basis. To figure out net prices in the old-fashioned way is laborious, costly, and sometimes proves inaccurate. For when one is in a hurry, there is much danger of errors creeping in. On the other hand these tables are proven accurate before they are printed, and in a modern business they are a great boon to a busy merchant.

It Pays to Study

Mr. Doyle is, himself, very fond of accounting. With him it is really a hobby and he is continually aiming to keep abreast of new ideas and to assimilate the best that is evolved by various experts. This, Mr. Doyle considers, is a splendid policy to adopt. Short cuts may be suggested by reading an article in one's trade paper or a business magazine. Even though the idea is not wanted at the time, if there is merit in it, Mr. Doyle clips it out and places it in a scrap book kept for the purpose. There is likely to be use for it sometime, and the best way is that of filing these ideas away where they may be available when wanted.

In addition to being continually being on the "qui vive" for new methods that may be adapted to his business, Mr. Doyle does a great deal of studying and particularly that his own accounting may be simplified and work reduced to the minimum, without impairing efficiency, of course. The idea is to eliminate all dead wood, and waste motion is thus prevented.

Know Your Costs

In the prosecution of modern selling, it is decidedly essential that one should know his costs. Even before a piece of goods goes into stock its cost should be figured and its selling price determined. This entails a full consideration of freight, duty, war tax, probably, discounts, etc. In addition, it is essential that over head expenses be determined and added to the laid-down cost before one can say that he really is making a given margin of profit. All these things, the Doyle Company does, and there is thus no chance taken and no guess-work indulged in. Much value is attached to the retail price book which is kept right at the salesmen's elbow for quick references.

Following out the modern accounting system, in the matter of billing, the Doyle Hardware Co., has installed a billing machine and finds it excellent, particularly at the end of the month. In fact, it is the use of this machine right through the month that enables the accountant to render statements promptly at each month end. Where 2,500 to 3,000 accounts are handled, as is the case here, it proves the wisdom of such an investment. Time is saved and customers receive their accounts without delay. It makes for prompt settlement of accounts,

Neat, attractive displays of merchandise greet the eye of the visitor to the Doyle Hardware, Reg'd., Quebec City. In the background will be seen shelving on which sample drawers are placed. In the foreground the use made of show cases, counters, etc., can be seen.

and indicates to the customer, that he is dealing with a business house of prompt and systematic principles.

Invoice Part of System

While no attempt will be made to particularize on the Doyle bookkeeping system, a few references will be helpful. Mr. Doyle has evolved a system to meet his own business requirements, and there are, in this system, a number of ideas that he prefers to retain, for they are being gradually changed to meet special requirements of this business.

"The invoice we consider a part of our accounting," said Mr. Doyle. "Once received, this record is never parted with. If asked for it by the firm we have purchased from we will send them a copy, but the invoice, never."

As received, invoices are carefully checked. Goods are passed into stock, and entries made into the purchase ledger. Great care is taken to examine each individual item. This is done to ascertain if there is anything directly chargeable to expense, fixtures, building, or maintenance accounts, and so on. Done as invoices are received, there is no possibility of any mix-up occurring. The amounts are carried into a specially-ruled purchase ledger.

All invoices are consecutively numbered and pasted in a large book with expanding binding, together with all freight bills, duty, and other outlay sheets; in fact everything directly connected with the invoice in question accompanies it. This makes a bulky book, when filled, but the binding of the book is made to take care of this. When filled, the books are "keyed" and, if necessary, numbered, and placed in the vault.

Discounts—Keying Letters

In speaking with the accountant, the writer was informed that cash discounts were taken on purchases. "This is a big item in the course of a year," he said. "Some amounts are small and this saving may be but a few dollars, or in some cases, only a few cents. But, in a year's time, it totals a great deal, and the saving is well worth while.

"I never fail to attend to a piece of correspondence, a bill or any other item needing attention on a certain date. I am perfectly sure that bills will receive my attention when they should and there are no mistakes made in this matter," continued the accountant.

This seemed so definite that HARDWARE AND METAL'S representative wanted to know wherein lay the excellence of this system, whatever it might be, and the same was shown him. In the vault adjoining the office, a filing case is kept. This is of the upright-filing style, and there are thirty-one divisions. These are numbered consecutively from one to thirty-one corresponding with every day of the month. As invoices, letters, bills, etc., are received, the same are examined and filed into the case under the date when they should receive attention. Thus, if a bill were maturing on the fifteenth of the month it would be filed under that date. It might be marked for attention on the tenth or the twelvth, and this would be the case if settlement were to be made by cheque and the same mailed so that cheque would reach destination on due date. As a matter of fact, this definite plan is followed, for Mr. Doyle stated that practically all settlements were made by cheque.

Statements Attached

It matters not what the correspondence is, needing attention, it is filed in the above manner. It may be that someone has been given until a certain date to make settlement of an account. Copy of this letter is filed and turns up at the required time. That each letter, bill, statement, or invoice may receive its necessary attention, the office boy is required, as one of his first duties each day, to place each day's file on the accountant's desk early in the morning. Constant attention to this ensures no mistake being made, the idea has worked out perfectly.

In sending settlement to a jobber or wholesale house, a statement is attached. This is printed with the Doyle Co's. name on it and is complete, neat and business-like. The information embodied contains the total of the invoice, any credits allowed on it, cash discounts, etc., the net item for which cheque is the settlement being indicated clearly.

All through, while the Doyle Company has adopted good ideas from other systems, they do not follow a beaten path. They have suited the system adopted to their own particular needs, and in this plan have the advantage of discarding burdensome, antiquated methods.

Stockkeeping Methods

In keeping with its office and accounting system, the Doyle Hardware follows a policy of decided order in the arrangement and care of stock. The result is a model of neatness on all four floors. It would be safe to say that when clerks are trained to keep every nook and corner of a store orderly as it should be kept, and particularly when this extends to the warehouse and stock rooms, they are getting a training for their business life that is invaluable.

"About half-past five every night," said Mr. Doyle, "our men are required to go through the stock and see that everything is in its place. This enables us to keep our stock in first-class order at all times and each day is begun with the

shelves neat and tidy. This is a rule that all our men are required to follow."

A very striking idea was seen on each of the three stock floors above the store itself where all surplus stock is carried. Extensive shelving is provided on each floor. This is arranged on all four walls, or rather against them, and here very heavy goods such as bolts, ammunition, pumps, shot, builders' hardware, etc., are placed. Being near the walls, the weight is carried better and distributed to advantage.

Four Floors Used

In the centre the same idea is carried out, shelves running up, in some cases, to near the ceiling. An immense amount of stock can be placed in this way, and with the regular arrangement, aisles are provided for, with a ready approach to all lines carried. Provision is also made for small ledges, on which any goods being examined may be placed. These extend out from the shelving from 10 to 12 inches and are above the floor some 28 to 30 inches, just about as arranged in the store, on the wall shelving.

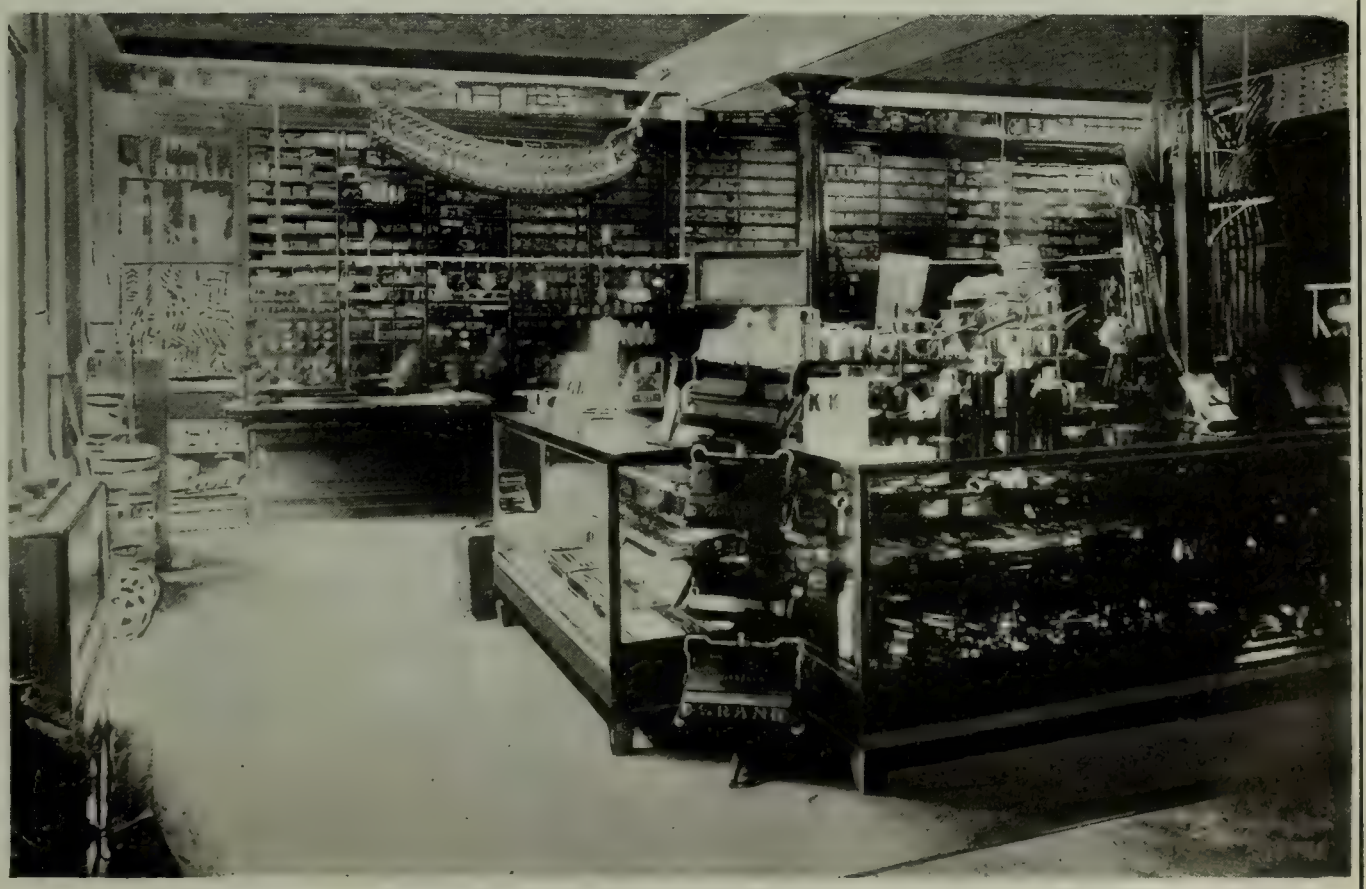
The top floor is used for harvest tools, garden or lawn hose, milkcans, asbestos board, stamped ware, handles, pumps, brooms, etc. The second floor accommodates shot, traps, boat hardware, varnish, plumbers' supplies, electric goods, brushes and fishing nets and twines, while on the first floor, builders' hardware, shelf-goods, knives, tools, etc., are stocked. On each floor, and at the end of shelving, lockers are provided for the warehouse apparel of the men. No soiled or unsightly garments or oil-soaked overalls are left around.

A Unique Oil Cellar

Access to the various floors may be had through use of a spiral steel stairway, or an elevator placed at the rear. In connection with the elevator arrangement, an interesting point developed recently. The store is built right under the "Upper Town" of this giant city. The stores on the street actually butt on the base of solid rock peat near which stands Canada's one-time formidable fortress, the Citadel. The rock is of a particularly solid and stubborn type and in endeavoring to lower the elevator shaft three or four feet, the workmen found it almost impossible to quarry this stone. Eventually this was accomplished, but the work was almost given up. Immediately to one side of the shaft, a huge room, literally a cave, accomodates the oil stock of the store, putty, white lead, etc. This big room is built in the solid rock, has a dome-shaped roof of a kind of cement, and contains a large stock of these goods. It is said that this and similar caves were the ancient retreats of Canada's founders, when the Indians, in all their war paint, descended upon the hardy settler for his very scalp. Could they now see the use to which these are put, they would at least feel that their great effort in providing them, was serving useful and practical purposes.

Store Arrangements

It is usual to leave mention of the actual store appointments to the closing chapter of a trade story such at this. However, this fact is not to be overlooked, that the selling floor of the Doyle business is fully appointed to serve the needs of customers promptly.



Dividing their duties Wm. Doyle assumes charge of the retail section and has his office immediately at the rear and in the centre. From this vantage point a clear vision of the store, customers and clerks is available. Being almost rectangular, the manager's office is convenient of access, and while it is amply large, does not take up a great deal of space. The accounting office is on the second floor, and well lighted, comfortable and quiet.

Wall cases are built right to the ceiling and sample and stock boxes are light finished oak. Brass pulls are used and these make a neat appearance. In connection with the sampling of these, Mr. Doyle said: "We change the samples at least once a year. This prevents them becoming shop-worn and soiled. It enables us to keep the stock fresh-looking, and we are not carrying a lot of money along in samples from year to year."

A good idea this. It takes diligence and means work to change the sampling on drawers, but it should really be done. The accompanying photograph will serve to convey a splendid idea of how carefully boxes are sampled. Attention paid in this way is not lost. A better impression is made upon the customer, than when sampling is poorly arranged, and when samples are dusty and tarnished. Bright, shining, builders' hardware has a lure for all—when well arranged.

Some Heavy Sellers

Some of the lines disposed of here are those which would not sell at all in other places. For instance, muzzle-loading shotguns have been a big seller, and still sell to some extent. This seemed a peculiar thing, and the writer asked the reason. It appears that the trapper, (for there are many of them in this part of Canada) does a lot of tramping. It means that he must eliminate weight as much as possible. And to assist in

This gives a view of the opposite side of the main floor of the Doyle Hardware, Reg'd., Quebec City, to that shown on the preceding page. The case in the foreground to the right is dressed with electrical household appliances, and cutlery is shown in the case facing the front of the store.

This gives a "close-up" view of the four windows fronting the Doyle Hardware, Reg'd., Quebec City premises. Good use is made of these at all times and their success as sales producers has been, it is said, remarkable.

this, he carries powder, shot, wads, and primers, rather than carry the breech-loading modern gun, and loaded shells.

"The trapper is a good shot," said Mr. H. Doyle. "He will rarely make more than one miss in a hundred, and, as he values his ammunition, he aims to make every shot do real work. We still sell quite a number of these guns."

Game traps are carried in large quantities and these, in some cases, are shipped out considerable distances. Quebec is a large trapping province, and this trade reaches large proportions. In addition, large quantities of nets are sold to fishermen plying the St. Lawrence, and these have been a profitable line and a steady seller. They are imported from the old country direct.

Paints are carried in the basement, and the shelving used is extra deep, so that a good space is left for the various colors. This department is in accord with the excellent arrangements carried out elsewhere, and fully described above. Electric lights are used here, and this department was a hive of bustling activity when the writer called.

As some packing requires to be done from time to time, and as an accumulation of straw and waste of various kinds is bound to need attention, a steel box is provided in the basement in which to take care of this material during the day, eliminating risk from fire.

Altogether, the Doyle store is conducted on the principle of order, neatness and efficiency, and new ideas are effected as required.

EXCHANGE NO FACTOR IN BASIS OF TARIFF

Ottawa.—The Customs Department has had many requests from importers that, in view of the fact that the British pound sterling has heavily declined, this should be taken into consideration when Canadian importers pay customs duties on imports from Great Britain. The practice is that they pay on the par value of $4.86. They believe that they should be given the benefit of current exchange.

The Customs Department points out that the practice is fixed. The matter of exchange is not taken into consideration as the value of the pound sterling is fixed by the Currency Act of Canada as compared with the dollar. Officials claim there is no injustice to the importer, as the goods he imports are worth at the rate of $4.86 2-3 in Great Britain, and under the customs law goods are valued at the time and place whence they are shipped direct to Canada. The importer gets sufficient advantage in the favorable rate of exchange.

The matter has been up for consideration several times. The practice is the same in the United States, the valuation for customs purposes there being $4.86 2-3, as here. The department has refused to entertain all requests to accept payment at the exchange rate.—T.M.F.

TIRE COMPANY FOR HAMILTON

The Industrial Department of the city of Hamilton may very shortly announce that negotiations have been completed by which the Canadian branch of an American rubber concern to employ 6,000 hands will locate there. Efforts are being made, it is stated, to obtain a site that will meet the requirements of the firm. It is rumored that the company is the Firestone Company of Akron, Ohio, which is capitalized at $75,000,000.

DON'T TINKER WITH ECONOMIC PRINCIPLES

Lowering the standard of living by artificial methods makes for popularity, but this course ignores economic principles, thus setting aside temporarily the law of supply and demand. But, back of all is that economic law which grows out of the experience of years and which, in the end, will prevail. Governments, and more especially those recently engaged in war, have borrowed heavily under inflated conditions. It would seem unreasonable to expect that there would be any attempt to meet the interest obligations on such indebtedness contracted under inflated conditions out of taxes to be raised under a deflated condition.

Such being the case, it would appear to be sound business to expect the Governments to refrain from any drastic measures to bring about a general widespread deflation until the public debt had been cared for in permanent form on a basis where the revenues from direct taxation under a moderate revenue law would be ample to meet the interest charges and provide the necessary sinking fund.—Continental and Chemical National Bank, Chicago.

Trouble With Trade Department at Top

Good Commissioners at Low Salaries Are Handicapped — Publicity Department — Interesting and Practical Exhibits For Manufacturers Seeking Orders in Power Trade

OTTAWA.— Notwithstanding the general paralysis which seems to affect the Department of Trade and Commerce, there are here and there indications that it is not altogether creeping paralysis. It seems largely confined to the head. Many of the trade ambassadors whom Canada has sent abroad—and to whom it may be remarked it is paying a salary which under present conditions is ridiculous —are men who would be valuable to any live organization where they had a chance to exercise their energy and ability.

One of the indications of energy is to be found in the Publicity Branch of the Department. In a large and well-[illegible] building on Kent Street, off Wellington, the department has a sort of trade exhibit, showing samples procured and sent in by the different trade commissioners of foreign-made goods which are in demand in the countries where they are stationed. As might be expected, Germany and the United States were, before the war, our chief competitors. The competition of the United States, particularly, is strong in countries like Australia and the West Indies. A familiar characteristic of the British goods is their strength and heaviness. In many cases, lightness would appear to be sacrificed to strength. An agricultural fork, for example, used in the West Indies, is steel-clad right up the shaft to the handle; and the tines of the fork are very massive and heavy. It would scarcely seem a suitable instrument to put in the hands of the lazy West Indian negro.

There is an exhibit from Russia of German made skates, with which Canadian makers, it would seem, could easily compete. The skate has the turned up end in front, familiar in the old days; and the method of fastening is different from the Starr patent. It is fastened to the sole of the boot by turn screws on each side and the heel has a plate attachment which is inserted in a hole in the heel of the boot. Bread slicers (such as are familiar to those who have poked around the cook tents of circuses), fruit pitters and slicers, hatchets and axes, almost all American make, are among the other exhibits. In South Africa also Germany seems to have had a big hold before the war, judging from the samples.

German Imitations

Attached to each exhibit is a printed card, giving the country of manufacture, the purpose for which the article is used, and various directions regarding packing and so forth. It is interesting to note how the goods of German make have closely imitated, externally, the British made wares; but there is a finish and solidity lacking in all of them, though the resemblance is close enough to impose on the casual purchaser. From New South Wales there is an exhibit of miners' drills and other tools, nearly all of American make.

Among the exhibits from the West Indies is one of the machetes, or heavy knives like claymores, which the natives use for cutting cane; and which, in the various Cuban insurrections, they used to use as weapons against the Spaniards with considerable effect. Some Canadian manufacturers have taken samples and specifications of these with the intention of producing a similar article.

Among the products sent from the different countries where they hope to do a trade with Canada, is a large collection of native woods from British Guiana, South America, and Australia. The supply of cabinet woods produced in those countries is very large, and the woods like mahogany, purple and green heart, crab wood, and so forth, are very beautiful; but with the exception of the crab wood, they are very heavy and seem inclined to check in the sawing. The crab wood of British Guiana is used a good deal in chairs which may be seen on the club verandahs in long rows in those countries. They stand up well under use. An interesting wood shown is the yaruba, which grows in a peculiar shape, soemwhat like natural balustrade.

A separate room is devoted to the display of catalogues of Canadian and foreign manufacturers. There is also a good exhibit of photographs of toys made in Victoriaville, P. Q., which shows that they are making fine progress in the industry, so well suited to Canada. There is also a fine exhibit of mechanical and other toys, made in Germany and Great Britain; and Canadian toy makers frequently come in to view this. In many cases they have duplicated or improved on the specimens. There are also shown specifications of patent toys, the patents on which have expired. The conditions on which they may be manufactured in Canada are stated; and for twenty-five cents a manufacturer can get a copy of any of the specifications. There is a large exhibit of picture mouldings of German and Austrian make, which have been selected by the British Board of Trade for exhiition in Canada, where they could be duplicated and are now being made to some extent.

Moving Pictures Shown

Perhaps the most interesting part of this Publicity branch of the Department of Trade and Commerce, and one which shows real enterprise, is the moving picture department. In a small theatre with seats there are shown pictures taken by the department in all parts of Canada, representative of sport and industry. Duplicates of these films are sent to each trade commissioner, who has them released to various moving picture circuits in the country where he is stationed. No better way of introducing our country abroad could be imagined. I was shown excellent reels of shipbuilding, aeroplane-making in Ontario, in British Columbia, and of salmon fishing and of bear hunting in New Brunswick, which are intensely realistic. Over fifteen of these big national subjects have been thus treated and are carrying the name and fame of Canada all over the world. This work is under the direction of B. E. Norrish.

There is, in the department described, the germ of what our trade and commerce department might be made. All that is lacking is a young and energetic executive head of the department in the cabinet.—T. M. F.

Take Insurance For Employees

Nearly $1,000,000 in life insurance is being taken out for its 1,200 employees by the Peck, Stow & Wilcox Co., in celebration of its centennial anniversary being celebrated this week in Southington, Conn.

Announcement of this was made Friday by President Lyman H. Treadway, following his presentation of gold and silver service medals to employees who have been wtih the company 25 years or more.

The insurance, which is retroactive, will go into effect October 1.

The plan is to provide a policy of $500 for every employee after he or she has been with the company for three months; $600 after one year's employment; $700 after two years; $800 after three years; $900 after four years, and $1,000 for everyone who has been with the concern for five years or more. There may be slight modifications in the working out of this, but they will be only minor.

With the long periods of service on the part of so many men and women in the organization, this means an average of between $700 and $800, totaling to something over $840,000.

Hold Carriers Responsible For Safety of Goods

Important Case in Superior Court at Montreal Places the Burden of Assuring the Safety of Goods Once Delivered to Carter or the Carrier Company, Whether Receipt Has Been Signed or No

AN interesting and important decision was handed down recently by Mr. Justice Maclennan in the Superior Court at Montreal recently, when he decided in the case of Greenshields, Ltd., against the Canadian Northern Railway that once the driver of the railway company received the goods on his waggon they were in his charge, and whether he had signed a receipt for them or no he was responsible for their safety.

This case had a very definite and important bearing on all shippers, and places a strong burden of responsibility upon all carrier companies to safeguard the goods handled.

In his judgment Justice Maclennan required the Canadian Northern Railway Company to pay to Greenshields, Limited, Montreal, the sum of $1,564.43, representing the full value of six cases of goods which were stolen from the company defendant's sleigh after being placed thereon in January, 1918.

The Details of the Case

The Canadian Northern Company sent a team of horses and sleigh to Greenshields' premises on Craig street to collect twelve cases of goods for shipment to Drumheller, in Alberta. The sleigh was standing in the warehouse yard, and after six cases had been loaded, the teamster went into the warehouse. When he came out, the horses, sleigh and goods had disappeared. Afterwards horses and sleigh were found, but the goods were never traced. Greenshields, Limited, in their action alleged that the carriers were liable to make good the loss.

Plea of No Avail

The company defendant contested the claims, submitting that as the contract and bill of lading had not been signed plaintiffs had not entrusted the goods to the carter or the company in whose employ he was; that the team and goods were on plaintiff's private property at the time they were stolen and in that circumstance it was plaintiff's duty to procure the protection necessary for the safety of the goods; that at the time the goods were stolen the carter had been invited into the premises to assist plaintiff's employees; that the disappearance of the team and goods was due to the fault and negligence of plaintiffs and their employees and the carter and defendants could not be legally held responsible.

Facilitated the Theft

Justice Maclennan dismissed the plea on the grounds that: "The defendants' carter, in leaving the goods in question unguarded facilitated the theft, and the loss was therefore entirely due to his fault and negligence. The carter was the agent of the company defendant duly authorized to receive the six cases of goods on behalf of defendant and was authorized to sign and execute a bill of lading for the carriage of the goods in question by defendants. Nothing further remained to be done by plaintiffs or their employees with respect to the six cases of goods after they had been delivered to the teamster and placed upon the sleigh in his charge. The delivery of the goods to the teamster was complete delivery to defendants for the carriage of the goods to their destination. The theft and loss of the goods was due wholly to the negligence of the teamster in the work for which he was employed and defendants are responsible therefor."

The goods were of the proved value of $1,564.43 and the judge said the plaintiffs were entitled to recover this amount from defendants.

Judgment was accordingly rendered for plaintiffs for the amount named and the costs of the action.

Plate Glass Rates Not to be Increased

Possibility of Adjustment in Premiums Later, Due to High Cost of Glass To-day

CANADIAN plate glass insurance companies have not yet decided to increase their rates to keep pace with American companies, who have declared a general increase for the whole United States ranging from 10 per cent. to 33 1-3 per cent. Insurance men state, though, that the question of revising the rates will probably be taken up shortly as there is no prospect of the world shortage of plate glass and the consequent high prices showing any signs of improvement. Canadian rates were last adjusted in August, 1918, when increases averaging 15 per cent. went into effect.

As practically all plate glass insurance is written on a replacement basis, the price of glass is naturally the governing factor in determining rates. During the war the price of plate glass has increased from 100 to 150 per cent. in Canada, and there is a shortage even at the higher rates. Before the war practically all Canada's glass was imported from Belgium, Northern France and England. This supply has been cut off for the past five years, as the Belgian and French plate glass factories were nearly all destroyed by the German invader, and English plate glass factories have been kept busy replacing windows shattered by German air raiders. It is estimated that it will take several years to replace all the glass windows broken in England during the war. Of late Canada has had to depend almost entirely on the Pittsburgh glass makers for its supply. With a shortage of glass in the States and high prices being bid, the American manufacturers have not been anxious to market their goods in Canada and have been very lax in their attention to Canadian orders.

The increases put into effect by the American companies will not affect Canadians insuring through the local agents of the American companies, as the local rate is always taken as the premium basis. The Canadian companies are unanimous in stating that there is no profit for them in plate glass insurance at present rates. One agent reported having collected $256 in policies last year and paying out $3,500 for breakages. They have merely been carrying the insurance at a loss in the hope that a return to normal conditions will aid them to make up their losses.

MERCURY IN B.C.

Production, Now Dormant, May Be Resumed

Mercury production, which has been dormant in Canada since 1896, may be resumed in British Columbia. A report issued by the British Columbia Department of Mines points out the commercial possibilities of the cinnabar deposits of that province, and states that the failure of attempts to produce mercury in 1895-96 was due to lack of economy in the operation of the furnaces rather than to the grade or character of the ore.

The principal deposits are in the Copper Creek Valley in the Kamloops Lake district. Other deposits are at Tunkwa Lake at the mouth of the Three Mile Creek and also in the valley of the Criss Creek. Though no attempt has been made to analyze the veins, it is thought that the high grade ore could produce about 2.9 per cent. mercury, and inferior ore about 1 or 2 per cent. This compares favorably with Italian deposits of 1 per cent., Austraian deposits of 0.85 per cent., and Californian deposits of 0.4 per cent.

STOVE BUSINESS IN CHINA

Practically all the heating and cooking stoves in use by the natives of North China are manufactured by Chinese foundries in Tientsin. Foreigners, and the better class Chinese, however, are gradually becoming aware of the advantages of the foreign article, and therefore the demand from this source is increasing. Furnaces and stoves are, it is said, usually installed by local branches of foreign firms, the materials coming chiefly from the United States.

Boosting Sales of Cutlery Department

Many Dealers State That a Window Display of Cutlery May be Shown With Profit Every Two Months—Many People Judge Whole Hardware Store by the Stock of Cutlery It Carries

SOME hardware dealers believe that a window display of cutlery and silverware can be put in every two months, and produce excellent results from a sales standpoint each time. Other dealers, while not making window displays as often as this, declare that they obtain excellent results by putting in occasional window displays of these goods, and by keeping them displayed about the store throughout the year. One of the troubles of most hardware men for some months past has been to get enough cutlery to keep up with the demands. In a great many stores stocks are very low and the dealers state that they would gladly replenish them if they could get the goods.

Always Looks Well

There are few lines among the scores which the hardware dealer handles which have so many attractions from a selling standpoint. Cutlery and silverware, if given any kind of care and attention, always look well and make a nice display, whether in the windows, or in the show cases. It has been said, and with a good deal of truth, that many people judge the general standing and efficiency of a hardware store by its displays of cutlery more than any other one line. Certainly whether displayed in the store or arranged in the window it catches the eye more quickly than most lines of stock. It carries a real interest also for a very large percentage of prospective buyers. Many dealers state that they can trace sales for weeks after putting in a window display, because people will come in and ask for this or that article which was in the window at a certain time.

The Two Big Seasons

Of course June, the month of brides, and December, the great gift month, usually see the largest sales of purely household cutlery and silverware. Sales, however, in other lines, may be very greatly stimulated all through the year if the dealer will make a drive. One dealer who is now handling more than $20,000 worth of these lines every year

Continued on page 70

Many dealers are of the opinion that a window display of cutlery or silverware may be shown with profit every two months. Few lines carried by hardware men offer more possibilities for attractive window dressing. Note the price tickets shown in the above display. This is a window display used with good effect by the Bond Hardware Co. of Guelph, Ont.

EDITORIAL COMMENT

THE RETAIL MERCHANT AND THE LOCAL NEWSPAPER

E. M. TROWERN, Dominion Secretary of the Retail Merchants' Association of Canada, in speaking at Carleton Place recently, stated emphatically: "It is the small town newspaper that is going to save the country." Mr. Trowern claimed that the large city dailies were so tied up to the departmental stores and big interests that only through the town newspapers could the people look for fair treatment. "Get behind them," he said, "and don't be afraid to advertise. They depend on you almost wholly for their support."

Whether Mr. Trowern's statements regarding the city papers are correct or not, there is no question of a doubt that his statement regarding the town papers, is beyond question. The town paper is booming the local town, often with all too limited co-operation. On such papers unquestionably rests in a large measure the success of such towns. For that reason if for no other the merchant should support them heartily with his co-operation in the form of advertising. But fortunately, the merchant can do so while at the same time furthering his own interests. The business of the merchant who advertises is sure of growth, with others the growth is problematical. It is good business to help the newspapers, for by so doing the merchant helps himself.

THE HIGH COST OF STRIKING

JUST how many strikes are on and are threatened throughout the world to-day it is impossible to say, but it is certain that at no time in history have strikes been so common or so widespread. It is impossible to pick up a daily paper now without finding the word "strike" figuring prominently in the headlines. One of the chief causes of the walkouts is usually given as the high cost of living. Not very much is said though about the high cost of striking. Every time a man strikes and every man who strikes increases the cost of living. He may get a few dollars a week more in wages, but this simply means that the cost of whatever product he is making advances and his fellow workers have to pay it. Then they strike and get more wages, and the man who first went out has to pay more for the commodities his fellow men are making. This sort of thing has been going on so continuously that everyone is affected by the high costs. This has been added to not only by higher wages, but by shorter hours and limited production. Prices cannot come down until there is a surplus of goods. What is needed is more production, not less. If by some miracle production could be brought up to the point where the world's needs could be supplied prices would quickly readjust themselves. One of the regrettable things about most of the strikes is that they never would have happened if both sides had got together and talked things over and understood the other's difficulties and tried to allow for them. Figures which are available for the recent strike of the miners in Yorkshire, England, show that in damages to the mines, coal lost to industry and losses to other industries, the total was $37,500,000. The miners' strike fund, which amounted to $1,400,000, and had taken them 25 years to accumulate, was completely exhausted. And all because there was a misunderstanding over a few clauses in an agreement and neither side would get together and talk things over. It is obvious that this sort of thing is ruinous in its results and is bad for trade, bad for the people directly concerned and bad for the nation.

GREAT BUILDING ACTIVITY

EVERY week sees increased activity in the building trades. Many contractors have more work now in hand than they had just before the war and that was the busiest period for many of them in their history. The building projects include all kinds of work, but from the standpoint of the hardware man it is particularly gratifying to see so many splendid homes being constructed. Houses of the better class are being erected in great numbers. These call for the best in many lines supplied by the hardware men and a splendid business is being done. In spite of all the work that is now under way a still larger programme of building is developing for next season and indications are that 1920 will mark new records in construction work in Canada. Many firms are finding themselves so rushed with business that extensions to their plants are required to take care of orders. A large amount of construction work of this kind is developing. Another feature of the building figures that is of peculiar interest to many hardware dealers is the great number of new garages being erected. As stated in previous issues of HARDWARE AND METAL, automobile manufac-

turers cannot keep pace with their orders. This means some splendid business for the hardware firms handling auto accessories and supplies.

THE GET-TOGETHER SPIRIT

EVIDENCES of a better relationship between employer and employee are not lacking in spite of the many strikes which have been called and that threaten. This is shown in welfare schemes and insurance plans being instituted by many firms for the benefit of their employees. But it is not solely for the benefit of employees, as these employers have realized. They appreciate that a satisfied employee is an asset and are taking steps which will encourage an employee to stay with them and develop their abilities in the interests of the employer. This means the development of experienced help by which production can be increased. Greater production is the crying need of the day to bring about a readjustment from the present high scale of living. The growth of these get-together schemes is an omen for good; let us lend them every encouragement.

TONNAGE HAS INCREASED

IN view of the acute shortage of ocean tonnage and the effects it is having on trade, it was with some surprise that the announcement of Lloyds Register of Shipping was received, showing that there are now 2,500,000 tons of shipping more than there were in June, 1914. And in spite of the huge subarine losses, there are more boats available to-day than before the war. The explanation of the shortage, however, appears to lie in the fact that a great number of the new steamers are under 2,000 tons capacity and are not ocean-going vessels. The majority of these new ships were built by the United States. It is interesting to note that Great Britain still maintains her lead as far as ocean carrying is concerned, having 1,485 ships of a tonnage between 4,000 and 8,000 tons, compared with 811 of the Americans and 263 vessels of 8,000 tons and over, as compared with only ninety owned in the States. These boats are the real cargo carriers, and the bulk of the world's trade on the high seas is still being transported in British bottoms.

WE CAN'T AFFORD THIS

CANADA'S fire waste in spite of our enormous resources is suicidal, and if continued means only one thing, an enormous and unnecessary drain upon every man, woman and child in the country. Because it does not appeal to them personally, the great majority of people fail to realize that they suffer every time there is a fire loss. The whole country is just that much poorer every time property is destroyed. It can never be replaced. The insurance companies may pay for it but they cannot bring it back and the great mass of people provide the insurance companies with the money. Every merchant who carries insurance provides for it in his overhead and the consumer pays. Last year Canada's fire losses were almost $34,000,000. This year it is not expected they will be quite so large. One of the reasons for the reduction is the attention that is now being given to the problem of checking fires. Every hardware man in the country can do his share in this good work and it is to his interests to do it. There are many ways of helping and as soon as everyone realizes what a criminal waste is taking place and does his share in stopping it, just so soon will Canada's fire loss cease to be the largest per capita fire loss in the world.

HOUSEHOLDER AND ELECTRICITY

ON every side the rapid development of electrical utilities is witnessed. Electric washing machines, motors for sewing machines, electric vacuum cleaners—one can go on naming them and one striking thing is the attention paid to the householder, to the lady of the house. Evidence is not lacking that efforts are being put forth to give to the housewife equipment which will make her work easier and better. The shortage of domestic help is one big factor upon which the merchant can depend to enlarge upon his sales of these various appliances. Even where domestic help is available, greater consideration is given towards lightening their labors and the woman of the house is quick to see the advantages in modern electrical equipment. Developing this trade is profitable and makes friends who become permanent customers of the store. Merchants to-day are realizing this fact and planning their sales campaigns accordingly.

EDITORIAL BRIEFS

SAVE and Serve is a good slogan at any time. In view of the coming Victory Loan, it is particularly adaptable now.

* * *

BETWEEN 1901 and 1919, Canadian workers lost over 14,000,000 days through strikes. Even at $3.00 per day this represents over $42,000,000 in wages, not to count the loss in production, interest on capital involved, etc. Strikes are, therefore, a factor in the high cost of living which should not be overlooked.

* * *

THE Canadian National Exhibition at Toronto went over the top in a splendid way. Many of your customers have seen new goods in the various exhibits which a little persuasion on your part can turn into business for yourself. The moral is obvious—strike while the iron is hot.

* * *

THERE is a good month ahead to develop outside painting. Keep up the good work which you have been doing all this year. Your customers will be as pleased at the results as you are.

EVENTS IN THE TRADE

Business Changes

Peterborough, Ont.—Miller, Powell and Watson have succeeded Alexander & Miller. The new store will be known as "The Electric Shop."

Fire Losses

A. J. Drummond, hardware dealer, Alderson, Alta., suffered loss to his store and contents through fire.

The store of W. Cook, hardware merchant, Campbellton, N.B., was badly gutted and stock suffered almost total loss in a recent fire.

Fire completely destroyed the second floor and roof of the building occupied by Goldman Bros., scrap, metal and paper dealers, located at 407-9 Grand River Avenue, Port Huron, Ont. It will be rebuilt at once.

Obituaries

The death occurrred at Hamilton, Ont., of Frank A. Fox, president of the Fox Chain Company of Canada, Limited.

Mrs. Edward Gurney, widow of the late Edward Gurney, founder of the Gurney Foundry Company, died suddenly Saturday morning at her home, Toronto.

Mrs. Gurney had resided in Toronto all her life and was highly esteemed by a wide circle of friends. She is survived by two sons. Cromwell and Holt, and three daughters, Mrs. Sanford Evans, Ottawa; Mrs. E. B. Wryckman, Toronto, and Miss Gladys Gurney, who lives at home. She was seventy-one years of age.

Personals

W. H. Cunningham of Kasement Skrene Dore Co., Toronto, who has been spending a few weeks in England and Scotland, on business, returned last week on the Tunisian. Mr. Cunningham reports great difficulty in securing return passage. Many of his fellow passengers have been weeks trying to book.

W. T. Hedges, sales manager of the Pyrex division of the Corning Glass Works, has sailed for Europe on an extended trade investigation. During his trip, Mr. Hedges will visit the industrial centres of Europe gathering information from manufacturers and retailers which can be utilized in the further development and extension of the sale of the firm's products.

S. W. Smith, Ontario sales manager Brandram-Henderson, Ltd., Toronto, is spending this week in London, Ont., at the fair, where the firm has an exhibit.

Mr. D. S. Fisher, of the Enterprise Foundry Co., Sackville, N.B., was a caller at HARDWARE AND METAL'S Toronto office during the week. Mr. Fisher spoke optimistically of the future outlook for the stove business, and stated that his firm had been working to full capacity. The company recently found it necessary to enlarge the plant both in pattern storage and the moulding shop. The company's export business in South Africa has been very satisfactory.

Trade Notes

H. B. Wilcox, Toronto, plumbing and hardware, has discontinued business.

The Acme Stamp & Tool Co., Hamilton, are erecting a $10,000.00 addition to their factory.

The Royal Oak Sales Co., Toronto, (W. W. Digby), jobbers in automobile tires, has discontinued business.

The Canadian Linderman Company of Woodstock, Ont., plans to manufacture unit lighting and power plants.

Declaration of partnership of James Doyle has been made by Doyle's Stove Company of Sydney, Nova Scotia.

The Dominion Sheet Metal Co., Ltd., Hamilton, have been granted a permit for an addition to its factory to cost $30,000.00.

The Renfrew Refrigerator Co. of Renfrew, Ont., contemplates erecting an addition to its plant and going into the manufacture of kitchen cabinets.

The Fox Chain Co., of Hamilton, has been reorganized since the recent death of F. A. Fox. The business will be conducted under the same name under the supervision of Robert N. Evans, the general manager.

The National Safety Council, with headquarters in Chicago, Ill., are planning a monster program for their eighth annual safety congress, which takes places in Cleveland, O., at the Statler Hotel, from October 1 to 4. This is a congress of men and women interested in accident prevention and the improvement of industrial relations.

Brantford, Ont., it is understood, will have the Canadian branch of the Robbins & Myers factory, which will manufacture all manner of small electric motors. A ten-acre tract of the waterworks property on which the buildings will be built has been procured. They are one of the largest builders of small motors in the world, with their head office at Springfield, Ohio.

The Iron Moulders' Union picnic at Waterloo last week was a grand success. There was a large attendance of members of the I.M.U. and their families from Waterloo, Kitchener and Preston. Over four hundred sat down to the supper tables. There was a long list of sports. The moulders of Clare Bros. won the tug of war. They first won from the Preston Electric Fittings Co., and then from the Waterloo Moulders. In the baseball game Preston won from Waterloo by the score of 9-4.

Montreal News

W. E. Skitch, of Calgary, was a Montreal visitor this week.

Frank L. Freeze, of Calgary, was a Montreal visitor this week.

J. L. Hilton, of Moose Jaw, and M. Geddes, of Regina, were Montreal visitors this week.

F. A. Ray, of Stevens-Hepner, Port Elgin, Ont., is making a trade call on Montreal wholesalers.

Norman O. Philp, sales dept. Starke-Seybold, Ltd., Montreal, is spending his holidays in Ontario points.

O. N. Parent, Canadian Yale and Towne Co., St. Catharines, is expected in Montreal next week.

A. H. Jenkins, of the firm of A. C. Leslie and Co., wholesale metals, is away this week on holidays.

J. M. C. Muir, secretary-treasurer Brandram-Henderson, Ltd., Montreal, is spending his holidays at Atlantic City.

Henry Detchon, general manager Canadian Credit Men's Association, Winnipeg, was in Montreal this week attending the fifth annual meeting.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., Montreal, returned on Wednesday from New York.

G. N. Jackson, National president of the Canadian Credit Men's Trust Association, spent several days in Montreal this week before returning to Winnipeg.

J. Thurston Smith, secretary-treasurer Lewis Bros., Limited, Montreal, left on Friday of this week for San Francisco. Mr. Smith expects to be absent until early in October.

Thos. W. Learie, of Toronto, and A. S. Crighton, were delegates to the annual convention of the Canadian Credit

Men's Trust Association held in Montreal this week.

R. D. Dinning and A. L. McWilliams, Vancouver, were visitors to Montreal this week, and where they attended the National convention of the Credit Men's Trust Association.

Alexander Gibb, wholesale metals, etc., has been appointed Montreal sales agent for McKinnon Columbus Chain, Limited. Mr. Gibb will represent this firm for its electric welded and fire welded chain and for boom chain.

A CORRECTION

Consumers Cordage Company, Limited advertisement that appeared on page 109 of the Fall Sales Number of HARDWARE & METAL, issue of August 23, 1919, contained a copy writer's error reading as follows: "Quality that has taken 94 years to perfect." This line should have read: "A Quality 94 years perfect."

INCORPORATIONS

Universal Batteries, Ltd., Toronto, have been incorporated with a capital stock of $150,000 to carry on business in all kinds of electrical apparatus.

International Bushings, Ltd., Toronto, have been incorporated with a capital stock of $25,000,000 to deal in iron, steel, brass, etc., in all their many branches.

TO MANUFACTURE TUNGSTEN PRODUCTS

A Canadian Company is being formed at St. Catharines, Ont., to be a consolidation of the Canadian interests of P. R. Mallory & Co., Inc., the Liberty Electric Corporation, Abendroth Bros., all of Port Chester, N.Y., and the P. G. Nichoff & Co., of Chicago.

G. F. Yessler the general manager of P. R. Mallory & Co., Inc., of Port Chester, N.Y., was in St. Caharines last week and signed a lease for the factory on Niagara street, occupied during the war by the St. Catharines Machinery Co. as a munition plant.

The plant will start operations with about 25 employees manufacturing principally tungsten products such as tungsten wire for electric lamps and similar products of the rarer metals, and will also represent the Canadian interests of P. G. Nichoff & Co. in connection with the automobile trade.

The company hopes to be in full operation by October 1st.

NEW INDUSTRY IN LINCOLN, ENGLAND

The city of Lincoln, England, whose industrial enterprise in the past has been mainly devoted to the manufacture of agricultural implements, is to be given a new industry by one of its principal engineering firms, namely, Messrs. Ruston & Hornsby (Ltd.). This firm has transferred its extensive aeroplane works at Boultham, Lincoln, into a motor-car factory. It is expected that they will shortly turn out a new model touring car, from the design of Mr. Broughton, late of the Daimler Co., who has assumed charge of this new undertaking.

A. G. BOX

Hardware merchant of Pierson, Man., who was electea president of the Manitoba Retail Merchants' Association, at the annual convention held in Brandon.

WHY COST OF LIVING IS HIGH

It would seem that the high cost of labor is the real cause of the high cost of living, but this is only partially true, for labor has had to have its wage increased to keep pace with the increase in the cost of living. The true cause, as we have stated before, is because millions and millions of the world's workers turned from production to destruction and the world cannot escape from that great economic loss. It must pay the bill. It has resulted in an inflated currency, which in turn has brought about a national extravagance, and people are complaining not because they cannot live in the manner in which they have been accustomed, but because they cannot live in the manner to which they would like to become accustomed.—"N. Y. Commercial."

CATALOGUES and BOOKLETS

PECK, STOW & WILCOX CO.

In conjunction with the 100th anniversary of the Peck, Stow & Wilcox Co. of Southington, Conn., a souvenir program, which incorporated the official welcome of the town to the Soldiers', Sailors' and Marines' homecoming, was published. This is a very attractive program of 56 pages, which contain much interesting matter relative to the founders of the Peck, Stow & Wilcox Co. and the various stages of growth which the firm has experienced since its inception. The program is printed attractively on coated stock and presents a very fine appearance.

OAK TIRE AUD RUBBER COMPANY LIMITED

The Oak Tire and Rubber Company, Limited, of Oakville, Ont., has issued a booklet "Tougher Than Oak," or the Story of the Royal Oak Tire. It is most attractively printed throughout, and contains numerous illustrations, many of them full page. The booklet tells in a most interesting way of the various processes in the manufacture of tires. Readers of HARDWARE AND METAL who are interested, may obtain copies upon request.

WILSON AUTO SPECIALTIES CO.

Advance catalogue 1920, just issued by the Wilson Auto Specialties Co., of Hamilton, Ont., lists the lines of auto supplies, parts and equipment for pleasure and commercial cars handled by the firm. The catalogue is printed on glazed paper, contains fifty-two pages 10¼ x 7 inches, and is profusely and very attractively illustrated. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

HOYT METAL CO.

A very interesting booklet has been issued by the Hoyt Metal Co., Toronto, covering one of their products. This is attractively gotten up, printed in two colors on coated stock and is pocket size, which makes booklet convenient to carry A full description of the product, its uses and the results of tests in actual use are given.

THE STANLEY WORKS

To introduce a new salesman for their products, the Stanley Works of New Britain, Conn., are issuing a counter display easel, which is very nicely gotten up. The trademark of the company and one class of their products are worked in attractively, and not the least feature; it is intimated, is the new salesmen.

BEATTY BROS., LTD.

Beatty Bros., Ltd., Fergus, Ont., have just completed their new general catalogue, which is a splendid sample of the printer's art. The type matter is clear, the illustrations clearly reproduced on coated stock, and the compilation shows an effort to supply retailers with a selling catalogue as well as one from which they first do their buying. Color work has been freely employed also, which adds much to the appearance of the book. The catalogue illustrates the entire line manufactured by this firm, including pumps, hay carrier goods, churns, washing machines, etc., each class of goods being grouped together and thumb indexed for quick reference. The book comprises 176 pages and cover. Readers of HARDWARE AND METAL can secure a copy by writing head office or nearest branch office at London, Ont., Winnipeg, Montreal, Edmonton, Alta., St. John, N.B.

Canadian Credit Men Convene at Montreal

Representation From Coast to Coast — Bankruptcy Act Most Important Work of Past Year — President Jackson, of Winnipeg, Reviews Progress Made

THE fifth annual meeting of the Canadian Credit Men's Trust Association Council was held in Montreal on Monday and Tuesday of this week, representatives attending from coast to coast and most of the provinces being represented by one or two delegates. Considerable interest was manifested in the various sessions.

Henry Detchon, general manager of the association, Winnipeg, made particular reference in his address to the forthcoming conference at Ottawa known as the National and Industrial Conference, and to which delegates will come from all parts of Canada. The interests of the Canadian wholesale trade will be ably looked after, he said, by James H. Ashdown of Winnipeg, Hugh Blain of Toronto, and George B, Fraser of Montreal. These appointees will attend the sessions opening on Monday, September 15.

In this connection the association expressed its approval of the plans of the Industrial Conference as embodied in the League of Nations programme. Particular attention was called, however, to the adoption of the eight-hour principle. When production was required on an intensified scale, the ushering in of a measure such as this required that due and careful consideration be given the matter.

Discuss Distribution

Some discussion centred upon the present system of distribution of commodities through the medium of the middleman. This is a timely subject engaging many minds. The assembled delegates were of the opinion that, while there might be improvements, the present system has worked out quite well. On the whole the scheme of distribution was conceded to be reasonably satisfactory.

In view of the fact that the Board of Commerce has been appointed by the Government to go into matters affecting trade, it was recommended that committees be appointed whose duties would require that they work with a view to assisting this board in its work. This may be accomplished through co-operation, consultation and conference with members of the above body. Such interest should be manifest in the operations of the Commerce Board as would be of value or assistance to the Canadian wholesale trade. This, the members believed, could be best attained through the co-operation just referred to.

To Secure Viewpoints

Manifest interest was evinced in the discussion which took place relative to the formation of a Dominion-wide wholesale association. It finally was agreed that the head office board should circularize the various wholesale associations throughout Canada and in this way to secure their ideas as to the advantages of such a body, were it formed. In fact, if the replies which come to hand are sufficiently encouraging, it was proposed that authority be granted the board to proceed with organization.

Registration of assignments came in for important consideration. This applies to book accounts, and as an act is at present operative in Saskatchewan and British Columbia it was felt that all the provinces should be on as uniform a basis as possible in this matter. Out of this discussion a definite decision was reached whereby a model bill will be drawn up, submitted to the various branches, who, in turn will take this up with the respective Provincial Legislatures.

In connection with the Bulk Sales Act, it was felt that a clause should be inserted into a model bill being prepared, providing for payment by the vendor of the commission due trustees. Because of the fact that the Bulk Sales Act was primarily in the interests of the creditors likely to suffer loss, the amount involved should not be made a tax upon the vendor and, therefore, the council should be instructed that no action be taken in the matter. It was decided to send the proposed act proposed by the Canadian Bar Association forward to the various provincial branches for their findings.

The Delegates Present

The afternoon session was occupied with discussion of internal questions relative to the work of the association, and in the evening the delegates attended the Princess Theatre as guests of the local branch.

Opening the convention in the morning President Jackson extended a welcome to the delegates, pointing out the importance of the questions to be discussed in the first session of the council since the declaration of peace. Mr. Thurston Smith, on behalf of the Montreal president and board, welcomed the delegates to Montreal.

Delegates representing the various branches of the organization throughout Canada as follows were in attendance: G. N. Jackson, national president, and Henry Detchon, general manager, Manitoba branch, Winnipeg; R. D. Dinning and A. L. McWilliams, British Columbia branch, Vancouver; W. E. Skitch and Frank L. Freeze, Alberta branch, Calgary; J. L. Hilton, Moose Jaw; M. Geddes, Saskatchewan branch, Regina; Thos. W. Learie and A. S. Crighton, Ontario branch, Toronto; Thurston Smith, J. L. Moriarty, J. W. Deziel and F. A. Todd, Quebec branch, Montreal; E. Milton Smith and Thos. Somerville, Maritime branch, St. John.

Banquet is Given

Problems confronting Canada in general, and business men in particular, with something of interest in regard to the situation in Britain, were matters which formed interesting speeches at the banquet held at the Windsor Hotel. Hon. C. J. Doherty, who had hoped to address the gathering, was prevented from so doing by pressure of public duties at Ottawa. The speeches were made by Geo. N. Jackson, of Winnipeg, president of the association, and Geo. T. Milne, British Trade Commissioner at Montreal. J. Thurston Smith, president of the local branch of the association, presided over the festivities.

POSSIBILITIES FOR WEST INDIAN TRADE

Present Arrangements Should be Enlarged, Says Canadian in London

Referring to possibilities of trade between the West Indies and Canada, Hon. Gideon Murray, M.P., in an interview in London, said that Canada and the West Indies are anxious for closer association. They are complimentary to each other, for Canada can supply the manufactured articles, flour, etc., which the West Indies require and do not themselves produce, while the West Indies are able to furnish all those tropical products such as fruit, cocoa, limes, sugar, etc., which Canada is unable to obtain within her own borders. It seems fitting, therefore, that these two countries should continue to come closer together in all matters of commerce and trade.

When the Reciprocity Agreement of 1912 comes up for review in 1922 it may be expected that the terms on either side will grant even larger preferences than exist in the present agreement.

Another nation that is anxious for trade with Canada is San Domingo, according to Dr. W. A. Morris, of that republic, who is visiting Canada. Dr. Morris says:

"There are many commodities that Canada wants and must shortly have as she grows in population, such as sugar, coffee, cocoa and tobacco, while the people of the island require saddlery, hardware, machinery of all kinds, cheese, butter, and almost everything shipped from the great manufacturing countries. The stability of the present Government is absolutely guaranteed under American military occupation, and there is no attempt by the authorities to boycott one country in favor of another, the island being opened to the development of the world. The soil is virgin, requiring no artificial means for crop production, which would spell disaster to the planter of many acres in subtropical countries."

Bicycle Dealers Hold Successful Convention

Third Annual Had Good Attendance—Dr. Cody Spoke on Co-operation—Walter Rinck, of New York, Announced Bicycle Trades Plant to Spend $150,000 For Propaganda—Officers Re-Elected

TORONTO, Ontario.—That the Canadian bicycle business has reached a responsible, dignified and substantial basis was indicated by the magnificent success of the third annual convention of the Canadian Bicycle Dealers' Association, which was held at the King Edward Hotel, Toronto, Wednesday and Thursday, September 3 and 4. Upwards of one hundred and twenty representatives of the bicycle trade in Canada, from Vancouver to Amherst, Nova Scotia, attended. Walter Rinck of New York, secretary of the United Cycle Trades Directorate, attended, and, in the chief speech on the second day of the congress, announced the organization of the Cycle Trades of America to take in all retail and wholesale branches of the bicycle industry in the United States.

Dr. Cody Speaks

Hon. Dr. Cody, Minister of Education for Ontario, in a forceful address at the annual banquet, made an eloquent and stirring appeal for co-operation, economy, work and education during the post-war reconstruction period. Dr. Cody further declared that a fault of the present situation was that too many people believed that they deserved a holiday after the war strain, and many were laboring under the apprehension that perfect happiness was obtained through reaching a state of idleness. Comfortable satisfaction was to be gained, however, by attention to agreeable work. Referring to the bicycle, he declared that the transportation facilities of a country were an important factor in the development of the nation, and the bicycle was playing no small part as a feature of the country's transportation.

Will Spend $150,000

Walter Rinck, the New York official, declared that nowhere had he seen such trade enthusiasm and apparent co-operation as at this convention, and the sight of the attendance of so many merchants inspired him to greater effort in his own sphere. He declared that the new Cycle Trades of America would appropriate $150,000 next year for bicycle propaganda in place of $40,000, as was spent this year, and he urged the Canadian Association to observe Bicycle Week next spring on the same dates as in the United States so that the full measure of success would accrue from the campaign. He believed that the consensus of opinion was that the first week in May was best suited for the spring drive. He told of the great rivalry aroused by the offer of a directorate dinner prize for the city making the best showing during Bicycle Week last spring, and he complimented the Ottawa and Hamilton, Ontario, associations for their showing in Canada.

Other Good Features

One of the brilliant successes of the conference was a mock bicycle sale on the first day, the sale being effected by George Wenige of London, secretary of the association, to A. E. Treadgold, of Kingston, vice-president of the organization.

A. E. Humphrey gave an enlightening talk on "Trade Conditions for 1920" in which he declared that the bicycle business was the best business in Canada to-day, all things considered. One reason for this was that the Canadian Bicycle Dealers' Association had been able to get the dealers together and the feeling of comradeship which had been aroused was bearing fruit. The dealers now have the confidence of the public, which was also due to the association's work. Cut-throat methods had been discouraged and the dealers talk better of each other. Sales are therefore, better.

Mr. Humphrey pointed out that the only way in which wholesale orders will be taken to-day is for "delivery when ready" and no cancellation of orders was permitted. English manufacturers are ready to go back to ordinary business after five years of munition and other work, but their machines are worn out and materials are scarce. "England will not be able to supply quantities for another year, and prices in England range up from $45," he said. "To bring any English bicycle to Canada, means that the wholesale price at Toronto for the imported wheel would be about $65."

Canadian bicycle prices had remained the same all year, although materials had advanced greatly in the meantime. This showed that the manufacturers had used foresight in buying materials. With regard to types of dealers, he stated that the man who carries a cheap line and sells at a cheap price is not the most prosperous. The better way is to sell a good line at a fair margin of profit.

What Ottawa Did

One of the early speakers was W. M. Gladish, a chairman of the C.B.D.A. executive, who told of the development in advertising and racing enthusiasm which had been in evidence in a number of cities, particularly Ottawa, Ontario, where the results had been particularly noticeable. In Ottawa, the dealers had spent $49.13 for propaganda in 1918, and $35 of this amount had been for parade prizes. In 1919, the Ottawa association spent $77.95 for prizes, printed matter, signs and other details and bicycle sales had been enormous. As a result of co-operation, Ottawa had had more bicycle racing than any other city in Canada this year, and it had been of the effective and paying sort. There were practically no races in Ottawa for many years previous. What had been done in large cities had been done in Ottawa, and could be done in even smaller towns. For the last track races in Ottawa, the attendance was upwards of 12,000 people.

Good Speakers There

Prominent speakers at the convention included J. W. Gibson, general manager of the Canadian Cycle & Motor Company, Limited, who dwelt at length on the subject of "Canadianism"; E. C. Briscoe of Chatham, Ontario, who spoke on office efficiency; George Wenige of London, who addressed the gathering on "Time Sales"; F. Occomore of Collingwood, Sid Simpson of Sarnia, Ontario; J B. O'Higgins of Toronto, whose subject was "Window Dressing"; President J. R. Dixon, of Hamilton, A. T. Tanner of London; A. A. Butler of Kitchener; Bert Brown of Hamilton, and others.

Souvenirs were distributed at the annual banquet in the shape of silver pencils and the big dinner was provided by the Canadian manufacturers and jobbers along with the Dunlop Tire and Rubber Goods Company, Limited. The producers present included the Canada Cycle & Motor Company, Hyslop Bros., Humphrey Bicycle and Motor Company and the Planet Bicycle Company.

Good Representation

Upwards of thirty cities and towns of Canada were represented at the convention by delegates and several Ontario cities, including Chatham and Brantford, had one hundred per cent. representation. The centres represented included Toronto, Hamilton, Chatham, Ottawa, Brantford, London, Vancouver, Sarnia, Kingston, Collingwood, Weston, Woodstock, Orillia, Peterboro, Amherst, N.S., Kitchener, St. Catharines, Rockland, Alliston, etc.

Officers Re-elected

Officers were re-elected with one exception, the new board including:—President, J. R. Dixon, Hamilton; Vice-president, A. E. Treadgold, Kingston; Secretary-treasurer, George Wenige of London. Executive:—N. S. Ferries, Hamilton; J. L. Isaac, Brantford; E. C. Brisco, Chatham; Percy A. McBride, Toronto; W. M. Gladish, Ottawa.

The fourth annual convention will be held in Toronto during the first week of September, 1920. Coincident with the recent convention was the Canadian National Exhibition at Toronto, which had a number of bicycle, motorcycle and accessory exhibits of direct interest to the visiting dealers.

THE CLERKS DEPARTMENT

How to Achieve Success in Business

Ability to Systematize and Organize Produces Best Results—Energy, Foresight and Knowledge of Human Nature Required to be a Real Leader of Men

By Theodore N. Vail, Chairman of the American Telephone and Telegraph Co., in Forbes' Magazine

WHERE do the men who earn salaries of $10,000 to $25,000 a year come from? Right from the ranks. I don't know if you realize that of all the really big men in New York to-day there is hardly one who didn't start in the ranks. Take the men who are running the big financial institutions of the country—nearly every one of them started in the messenger office. It is the same in our big industries. The presidents of most of our railroads have walked the tracks, and in our own business there is not a single man in any big executive position who has not come up through all the various grades of organization, either in this company or in other industrial companies. Many of them have climbed poles or worked at the key or the switchboard. I believe I would find the same conditions in any business. If I went into a big newspaper office I should expect to find that the executives who didn't start in as cub reporters started in as office boys or printers' devils.

What are the qualifications of a $25,000 a year man? What is demanded of him? you ask.

Well, the man who earns $10,000 to $25,000 a year must first of all know his business from the ground up. Large salaries are paid because of ability to so systematize and organize that the same effort will produce greater results, and so organize operations that neither effort nor material nor time is wasted. Mere drivers are not valuable. It is organization, system, ease, and comfort in operation with production that is valuable.

He must be absolutely efficient; that is, he must have ability, judgment, courage, enthusiasm, self-confidence, energy, initiative, foresight, experience, a great knowledge of human nature and personality enough to be a real leader of men.

He must take infinite pains in small things as well as in large. He must demand of himself as well as of others nothing but the best.

He must win and retain the confidence and the friendship of his superiors, his associates, and his subordinates.

He must always be ready to take responsibility, to decide quickly, and he must be right more than half the time.

With all that he must have backbone and a real desire not only to excel, but also to serve.

Of course, a man has to earn a big salary before we can pay it, but we are only too anxious to pay it to men who can earn it.

Do we get many college men in the $25,000 class?

Well, they don't come right out of the universities and take up executive jobs, but every year we take in a certain number of college men, and they have to start in at the bottom and work their way up gradually. A man has to have it in him. Sometimes, of course, we make mistakes, but not often. There may be a man in a $1,500 job doing remarkably good work, and we promote him. We put him up, and then we discover that he is only a $1,500 man after all—that he doesn't grow with the growing responsibility. In the same way there may be some good men who have never really had an opportunity, but, after all, real merit is rare and hard to hide. Higher salaries are being paid now than ever before.

Let a young man see to it that he increases his earning power to the highest point of which he is capable, and a salary commensurate with his worth will be forthcoming sooner or later—sooner rather than later, as a rule.

You ask me the importance of certain qualifications; let me answer briefly.

Observation

It is, of course, necessary that you see a thing before you can appreciate or understand.

Concentration

In order to understand you must have powers of concentration, or reflection is worthless.

Imagination

Imagination is necessary to grasp properly anything that is new or original, but it must be backed by powers of observation, concentration, reflection. Imagination is essential to great success in constructive lines, but it must be under control. No great success except on routine or developed matters is possible without imagination. Imagination is like a very spirited horse—most valuable where the horse is useful, but it must be harnessed, saddled, and bridled. Without saddle, bridle, or harness or complete control a splendid horse would, if you tried to use him, only destroy, not accomplish.

Reflection

Without reflection, observation or imagination is useless, and with concentration reflection is valueless.

Memory Cultivation

Memory is valuable, but don't load your mind with immaterial things or things where correctness and exactness are essential and which can be easily obtained from a reference book.

There are so many lines along which industries and professions are developing that any type of mind will find a line adapted to the type. This is the chance which has been brought about by the application of what might be called pure science to operations of every kind.

Talking of imagination, when Mr. Bell and Mr. Watson first talked in public over the telephone, or Mr. Hubbard first tried to interest constructive interests in the new "Yankee toy," if either had prophesied as possible what actually exists to-day, he would have been laughed at. Those who laid the foundation of the business could well define the structure, but its magnitude has far surpassed expectation. When my connection with the telephone was announced, one who was then a representative and afterwards a senator and a cabinet minister, whose name always commands respect, said to me: "Vail, that isn't big enough business for you." Consider that in the light of to-day!

It is not too much to think that in time it will be possible for anyone, at any place, to communicate immediately with anyone at any other place in the world by reasonably available methods; that distance will be annihilated and the whole world will be united in common interest, common thought, common traditions and prejudices. Then and only then can there be a common people.

The wonderful work that geographical research did in opening up the unknown world in the late seventeenth, eighteenth and early nineteenth centuries presented a new field to the people of initiative and enterprise of an old world already bursting its confines by its development.

This world development, for which geographic research is largely responsible, is in turn responsible for the magnitude of present operations, economic and social. This immensity is constructive, not destructive, is something to be welcomed and encouraged rather than persecuted and destroyed. It is something which is uplifting all men, raising them up to higher levels and possibilities, and is neither oppressing nor taking away from man any possibility of greater enjoyment or of better things. It is bringing to him and within his power of acquisition those things which were formerly for the few. It is making possible all things that can bring the extremes of mankind nearer together.

This economic industrial development of the world is caused by that co-operation, that co-ordination of effort which assigns to individuals the tasks and duties for which each is best fitted, and in this way gets the most out of the efforts of all.

Everything possible should be done to develop proper understanding and education. No matter what may be the future "uplift" or development, some conditions will never change. Food and clothing and shelter, no matter how simple, must be procured and prepared for use by labor. Transportation and inter-communication must be provided by labor. All kinds of work must be done, agreeable or disagreeable, cleanly or soiling. From the raw material to the finished product, some must bear the physical burden, some the mental, and some the financial.

There must be mutual concession and subordination of the individual to the comfort of all. There must be leaders and followers, for without organization there can be only chaos. Society must be organized and improved if possible without destroying its essential element, or man must go back to the primitive state where each does everything for himself, or by brute strength forces some one into slavery to do it for him.

Much can be done to improve conditions and environment surrounding labor and rest, but the only way permanently to better the condition of the individual is to teach him to raise himself by his own efforts, into a better position, and, by thrift, economy, and intelligence in labor, and by absence of self-indulgence earn and save enough to take care of his future.

Speaking more directly to young men (and any man is young who comes to recognition of new ability in himself), I would emphasize that it will be your own actions and the experience and knowledge gained from them, that will mould you and make for you your place as active, responsible members of society.

Every act, small or great, will have some influence on your future; it will have its part in the formation of your character. Be careful, therefore, that each act is a rightful act, and one that will be part in the formation, for you, of a good and worthy character and reputation.

A permanent or desirable reputation is slow in coming, but once gained, while it may be temporarily obscured by misunderstanding, or misconstruction, or mistaken knowledge of your acts, no thoroughly good reputation, based on character and on actions which have been guided by correct principles, can ever be permanently destroyed except by yourself.

As you go through life you will need the assistance, credit, and the confidence of your fellow men. Credit and confidence are based on reputation and on the cumulative influences of your acts far more than upon any other asset you may have. Credit, confidence, and intelligent productive labor, together with co-operation, create prosperity, both of the individual and of the community.

Try to do whatever you undertake a little better than you have ever done it before and a little better than anyone else does it. While you cannot always succeed, the effort brings its reward through its influence on your character and the satisfaction afforded you.

No matter what you may undertake, education, forethought, and organization will help you to accomplish it better; this applies as well to your own efforts and your own labor as it does to the management and organization of the labor and effort of thousands.

Ordinary results come from ordinary methods; the great results of the world are the result of that organization and efficiency which produce more with less effort and work than can be produced by ordinary methods.

Do not undertake anything beyond your limitations, natural or acquired, and before undertaking be sure that you have a fair understanding of what you are about to undertake. Do not have overconfidence. Have just enough lack of confidence to recognize that there are some things you do not know and that you could not accomplish, and thus avoid recklessness and failure, but do not lack confidence sufficiently to kill initiative and enterprise.

Recognize and have proper deference and subservience to age, position, and larger experience.

Neither ask nor expect others to bear the expense of getting your experience and knowledge. Every man's position in this world dates back to the practically unaided efforts of the individual, and, even if part of it comes from his forbears, is only maintained and can only be maintained permanently by the individual efforts of the possessor.

Dependence upon assistance from others is apt to be like putting concentrated fertilizer on the hills of corn planted in very poor soil—it makes a splendid start but a lamentable finish. The soil in which it is planted and the preparation and cultivation make the crop.

Everything in this life worth having is dependent upon your own efforts, either in the getting or in the maintenance. Learning and experience you caannot inherit.

One word more. In business, take as your slogan: "Increase in quantity, increase in quality, and decrease in cost per unit of measure or weight."

Increase in cost increases price, decreases consumption, decreases profits.

Decrease in cost increases consumption and aggregate profits.

The great fortunes of modern times have been accumulated by increase in consumption and consequent increase in aggregate profits.

These truths or rules of guidance which I have laid down are not new or original, they are but the summary of thousands of years of experience. Individuals have varied characteristics and degrees of natural capacity and ability, but within your natural limitations your success will be measured by the completeness of your education and understanding and the thoroughness of the application of them to your daily life.

A BRAZEN OFFER TO NEWSPAPER PUBLISHERS

The following letter has been sent by The A. W. Phillips Petroleum Co., Wichita Falls, Texas, to newspaper publishers. One of them sent a copy of the letter to the National Vigilance Committee, with appropriate comments.

THE A. W. PHILLIPS PETROLEUM COMPANY

Wichita Falls, Texas.
July, 1919.

Mr. Publisher:

How would you like to take a shot at the oil game with very little actual cost to you, and make a nice little sum on the side?

Here is how! Run the accompanying advertisement, on a quarter or half page, in your paper three times during one week either on succeeding days or every other day (including once on Sunday) and take your payment in stock.

Put a line in at the bottom recommending this stock, and we will give you 15 per cent. commission on all sales made as a result of your ad.

All we ask you to do is to forward all applications at once, so certificates may be mailed without delay, and mail us copy of every edition carrying the advertisement.

Hoping to receive the first copy as soon as you can get it here, we beg to remain,

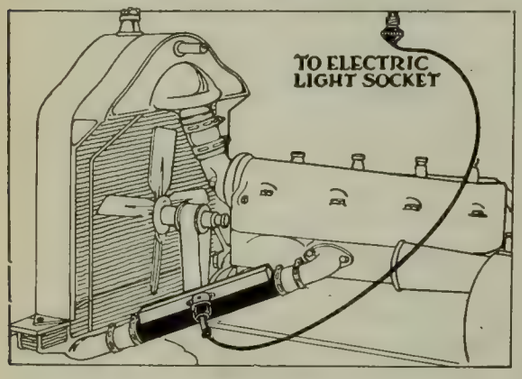
Sincerely yours,
A. W. Phillips Petroleum Co.,
By Wm. G. Hoover, Sales Manager.

P.S. If acceptable, wire rates and circulation; we will confirm ad by wire.
—Associated Advertising.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

MAYALL AUTO HEATER



The Mayall Auto Heater now being marketed in Canada by John Miller & Son, Ltd., Montreal, is, it is indicated, a big step forward towards all-year running. The expense of the heated garage, or the unpleasant task of starting a cold motor has deterred many an enthusiast from enjoying the pleasures and convenience of year-round motoring.

Mayall Auto Heater

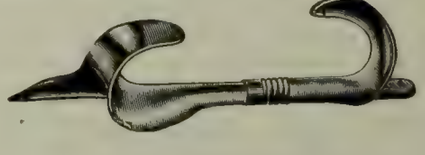
With the Mayall Auto Heater attached, the circulating water is warm, the engine is warm, the lubricant is not congealed, and at the first crank the motor is running.

The Mayall Auto Heater is, it is said, 100% efficient—the "Nichrome" element immersed in the circulating water transmits every unit of heat. There is no fire risk and the cost of operation in most parts of Canada is as low as $2.00 per month when in use ten hours nightly. Screws into any 110v. D.C. or A.C. electric light socket—other voltages to special order. The installation on the Ford Car is illustrated—models for other cars will be on the market later in the year. The lower Ford water pipe is replaced by the Mayall Heater and the hose connections tightened up again

Showing Installation on Ford Car

—a ten-minute job. There is no impediment to free circulation and the Mayall Heater carries a year's guarantee from date of installation.

IRON CEMENT

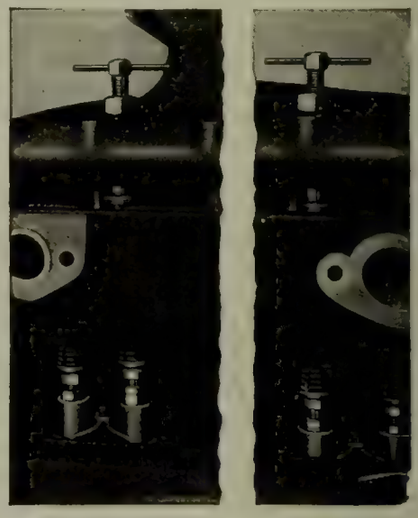


A new product, Norwesco Iron Cement, which will, it is said, permanently repair cracks, blemishes and sand holes in iron and steel castings; and leaks in radiators, boilers, steam, hot and cold water pipes; threaded joints, etc., has been placed on the market by the Northwestern Chemical Co., Marietta, Ohio. Norwesco Iron Cement is made in powder form, and manufactured, it is indicated, under strict laboratory supervision which insures a standard quality that will give the desired results. Used extensively by United States Government during the war. Norwesco Iron Cement is put up in cans of three sizes; 6 ounces, 1 pound and 5 pounds. When mixed with water, and applied according to directions, most remarkable repairs can be made at a very small expense, it is stated.

Norwesco Iron Cement

UNIVERSAL PIN

The R. F. Clark Mfg. Co., 169-173 N. Jefferson St., Chicago, Ill., have put on the market a new universal pin, No. 2700. Advantages of this new style pin, enumerated by the manufacturers, are its heavy nickel plate with much brighter finish; round handle which does not cut the fingers when gripped; more flaring edges to prevent irritation to



Universal Pin

any part of the hand; the front and rear brace twist on each other making an automatic flexible grip to fit any hand with comfort; rigid adjustment to any size hand which will not come loose while using. The new style pin, the manufacturer states, contains every feature of any other similar pin on the market, as well as those additional stated above.

CYLINDER HEAD LIFTERS

John Millen & Son, Ltd., Montreal, are placing on the Canadian market cylinder head lifters. These when screwed into spark plug holes, one at each end of cylinder head, makes, it is said, the removing of the head a simple matter, avoiding the crude method of prying up

Cylinder Head Lifters

with a screwdriver and spoiling the gasket.

These are sold in pairs either ⅞-18 or regular ½ in. spark plug size. The handle itself is threaded into the shell and by turning same down will, it is intimated, produce sufficient upward pressure to easily separate the head from the cylinder block.

RETAIL CLERKS, WINNIPEG, ENJOY INTERATIONAL UNION

Officers of the Retail Clerks' association of Winnipeg were elected recently. They are: President, W. Smith; vice-president, T. Cross; recording secretary, J. G. Jordon; financial secretary, Miss S. Smith; treasurer, Miss A. McQueen; warden, J. A. McDonald; executive, A. T. Clarke, Miss M. Rose, John Walker, D. Richmond. A resolution was passed supporting the Trades and Labor Council and international affiliation. The local, shattered as a result of the general strike, is now fully organized, its officers say.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

REVISIONS have been made in some quarters on galvanized and black steel sheets, resulting in an advance in both of these commodities. Steel plate is just the reverse, having shown a slight decline. The market is firm at present levels, which are in the form more of a readjustment than otherwise.

Boiler tubes, seamless, show an advance ranging from 5 to 7½%, with lapweld tubes in some sizes similarly affected. These changes, it is indicated, bring prices more in line with latest prices issued by the manufacturers.

A somewhat lower level of prices has been established on both electric weld and fire weld chain this week. Another important change is that recorded on iron rivets which show an advance in new discounts issued over former levels, approximately 10%.

Prices on window glass show a decline in new discounts issued of about 7½%. This is true of both single and double diamond glass with the exception of the first three brackets of single on which the list shows an advance which offsets change in discount very largely.

Linseed oil becomes scarcer every week. Crushers are pretty well loaded up with business and cannot handle the orders offering. This does not mean that volume of orders is exceptionally heavy, but rather that shortage of seed is becoming acute. No relief is looked for before another month or six weeks passes and new crop seed is available. Prices show a slight advance this week.

Turpentine has reacted from the high level reached last week and is now being quoted at figures showing a decline of 10c per gallon. This is in line with downward move shown in markets to the south. Resumption of overseas buying of turpentine may mean higher prices again as stocks are just about at level of domestic requirements.

MONTREAL MARKETS

MONTREAL, Sept. 11—Price changes for the week are those of an advance for soldering irons and one for scales. Drawer pulls are also higher and all iron and tinned rivets are advanced through a change of the discount. Various chest, trunk, suitcase, wardrobe and other locks are also marked up to the extent of about 20 per cent. Winchester and Remington shotguns, rifles, carbines and parts are marked higher. Scythes are up 75c per doz., net. An increase of one cent per gallon is in effect for coal oil of various grades. Copper, in the ingot, is weaker and is quoted down half a cent. Tin is very firm and spelter is higher to ten cents per pound.

The state of trade in Montreal is excellent, orders from the country being particularly frequent and the total tonnage going out every week is considered gratifying. Some difficulty is experienced in getting various goods promptly.

Locks and Keys Up; Rifles and Guns, Too

Montreal.

LOCKS, GUNS, RIFLES.—Increased prices are effective for locks of Eagle Lock Co.'s manufacture. The advance runs from 10 per cent. to 15 per cent., and applies to cabinet, chest, box, drawer, wardrobe, suit case and trunk locks, etc. Cut keys and key blanks are likewise affected by a similar discount. Winchester rifles, carbines and shotguns are higher in price, the new discount now amounting to 27½ per cent. on list or an increase of 10 per cent. Remington rifles, shotguns and parts are also advanced. The increase brings the present advance over list to 50 per cent.

Soldering Irons Up; Scales Higher, Too

Montreal.

SOLDERING IRONS, SCALES.—Regular styles of soldering coppers are now being sold on the basis of 55c per pound. This increase is due, of course, to the recent advances made for ingot copper. Scales of New Warren make are now selling on a new discount basis, this being 20 per cent. to the hardware trade.

Drawer Pulls Are Up; Small Rivets Higher

Montreal.

DRAWER PULLS, RIVETS. — Increased prices are in effect for drawer pulls of the American Ring Co.'s manufacture. The increase is approximately 20 per cent. Iron rivets, black, tinned, etc., are also advanced through a change of discount from 40 and 5 per cent. to 37½ per cent.

Scythes Marked Up 75c; Snaths Sell 10% Off

Montreal.

SNATHS AND SCYTHES.—The discount on snaths is now quoted 10 per cent. from list. Scythes for next season are being booked at an advance of 75c per dozen net.

Soft Fibres Firm; Rope Slow Mover

Montreal.

ROPE AND CORDAGE.—The trade is not buying heavily of rope just now and the movement is confined to actual requirements for present needs. Soft fibres continue to maintain a strong undertone. Manila fibre is steady, while sisal is somewhat unsettled, but there is no change of price. The basis for pure manila holds at 32 cents per pound;

British or beaver manila, 28 cents, and sisal 25 cents.

Heaters Move Out; Fall Lines Active

Montreal.

STOVES, RANGES, WARES.—With the near approach of colder weather the manufacturers are sending forward booked orders of heaters and other kindred lines. There has been no change in the price basis but a firmness characterizes the market and steel basic materials, in particular, are very high in price. Stove pipes and boards, coal hods, wash tubs, pails and such lines are steadily firm with a seasonably good movement to the trade.

One Cent Advance In Coal Oil Basis

Montreal.

OIL AND GASOLINE.—The feature of the week in coal oil is an increase in the price of 1 cent per gallon. This makes the range 22 to 25 cents per gallon, Royalite grade selling at the lower price and Palacine and Electroline at 25 cents. The gasoline movement is fair and the basis holds unchanged at 33 cents per gallon.

Big Country Orders Take Iron and Steel

Montreal

IRON AND STEEL.—An active movement of steel and iron bars continues and this is particularly manifest from the country store sources. The price basis is steadily held without change, and various sizes and grades are selling at the following prices:

Iron finish machinery steel	3 80
Norway iron	12 00
Single reeled machinery steel	5 50
Spring steel	5 50
Sleigh shoe steel	3 75
Tire steel	3 95
Toe calk steel, per 100 lbs.	4 65
Band steel	3 75
Harrow tooth steel	3 90
Mining tool steel, per lb.	0 22
Black Diamond tool steel, per lb.	0 22
Black Diamond cast steel, lb.	0 22
Common bar iron, per 100 lbs.	3 75
Refined iron, per 100 lbs.	4 75
Mild steel	3 75

Wire Nails Sellers; Pipe Moves Freely

Montreal.

WIRE NAILS, PIPE.—There has been a steady demand for wire nails and the movement to the country trade is especially active. The price basis is unchanged for both cut and wire nails at $4.75 per keg. The sale for wire has been fairly good, seasonably speaking, and the prices are without change, smooth wire, gauges 0-9, selling still at $5 base. There is an excellent demand for wrought pipe, and one jobber reports difficulty in procuring needed supplies.

Some Say Shortage Certain Gauges Iron

Montreal.

SHEETS AND PLATES.—A good movement of galvanized and black sheets is reported, and one jobber states that there has been some difficulty in maintaining a stock of the lighter gauges. The tone is, if anything, somewhat firmer. Advances have, as a matter of fact, been suggested by United States makers. It is felt that increases at the present time, if made by the makers, would but increase the demands made by labor for increased wages.

BLACK SHEETS—	**Per 100 lbs.**	
10 gauge	$5 50	$6 25
12 gauge	5 55	6 20
14 gauge	5 60	6 35
16 gauge	5 70	6 50
18-20 gauge	....	6 35
22-24 gauge	....	6 40
26 gauge	6 45	6 50
28 gauge	6 75	7 00
GALVANIZED SHEETS—		
U.S. Standard—		
10¾ gauge	$8 65	$9 25
28 gauge	8 30	8 85
26 gauge	....	8 50
22 and 24 gauge	7 70	8 35
20 gauge	7 50	8 35
18 gauge	7 50	8 35
16 gauge	7 30	8 00
English Standard—		
28 gauge	....	8 35
26 gauge	....	8 10
24 gauge	....	7 40
22 gauge	....	7 30
18 and 20 gauge	....	7 00

NOTE——These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Manufactured Lead Products Selling

Montreal.

LEAD PRODUCTS.—In view of the fact that considerable repair work is undertaken at this season of the year there has been a fair trade for manufactured lead products. The basis holds steady and firm with no actual price changes reported in this market. Solder is steady.

Lead pipe	....	0 12½
Lead waste	....	0 13½
Note.—Lead pipe is subject to a discount of 10%.		
Lead traps and bends	....	15%

45-55	....	0 38¾
50-50	....	0 41¼
Zinc sheets, casks	....	0 17
Do., broken lots	....	0 18

Makers Halt Buying Of Old Materials

Montreal.

OLD MATERIAL. — Manufacturers, the old material dealers claim, are purchasing in decidedly small quantities. This makes for an accumulation of tonnage in the hands of the different dealers and the condition is rather that of a waiting one. No price changes are made for the week and the following quotations obtain here:

Dealers' Buying Prices—		
Pipe scrap, ton	....	8 00
Stove plate, ton	14 00	15 00
No. 2 busheling	7 00	8 00
Old rubbers, boots and shoes	0 07	0 08
Overshoes, lumbermen's rubber		

BRIEFS FROM THE WEEK'S MARKETS

One usually has to reach for a hat and coat hook. They are higher—in price—this week by 10c gross.

* * * *

Iron rivets and burrs are now quoted at a discount of 37½%, an advance from former levels with prices determined from a discount of 40 and 5%.

* * * *

Mirrors have registered a further increase in price. The question is: "How will many people 'face' such a move?"

* * * *

A decline has been registered in both fire-weld and electric-weld chain this week.

* * * *

Sheathing is reported very scarce and an advance in price seems possible. Higher prices on some of the better grades of roofing are talked of also.

* * * *

There is said to be a famine in ½-inch galvanized pipe. Shortage of skelp is the reason given and it will be a couple of weeks before manufacturers will be able to supply.

* * * *

Molasses gates show an advance in new prices issued this week.

* * * *

Barb wire is up 15c a spool in Winnipeg following higher prices named in United States markets.

* * * *

Window glass has undergone a revision downward, the discount now being 30%. The list on the first three breaks of Star Glass has advanced but other sizes and double diamond are unchanged.

* * * *

Scales show an advance in price this week.

* * * *

Remington shotguns, rifles, carbines, etc., are marked up; Winchester lines are also higher.

* * * *

Soldering coppers have registered an advance this week.

Copper Little Weaker; Spelter Up; Tin Firm

Montreal.

INGOT METALS.—Copper is a little weaker and tin very firm. Spelter is also firmer with a slight advance to 10c per pound. There is not a heavy movement in any line.

COPPER.—Buying at the present price levels is not active and the tendencies have been weaker. At present the basic prices here are half a cent less at 25½c per pound.

TIN.—Shipments of English tin have been arriving as required, and while there is no quotable change the basis is firm at 61c per pound.

SPELTER.—Some strength has developed this week in the local market and prices are marked up one-quarter cent to 10c per pound.

ANTIMONY.—Ten cents per pound is still being quoted for this. The sales are rather light.

LEAD.—At 7¼c per pound the market is fairly steady. The United States market is firm at present.

ALUMINUM.—Absolutely no change in the basis and the movement is very light at 35c per pound.

PIG IRON.—Some sale obtains for this and the price holds at $50 per ton.

TORONTO MARKETS

TORONTO, September 11 — Higher prices continue to mark the position of some lines, among these affected this week being boiler tubes, iron rivets and burrs, galvanized and black sheets with the tendency in bars upward. Chain has been revised downward and steel plate is slightly easier. Some lines of pliers, boring machines, augers, car bits have shown an advance and the tendency is upward on sheathing, roofing, and brooms.

Iron Rivets and Burrs Show Advance

Toronto

IRON RIVETS AND BURRS.—An advance is shown in iron rivets and burrs in the new discount issued this week and effective from September 8. The present discount from standard list on iron rivets and burrs is 37½ per cent., which replaces a former discount of 40 and 5 per cent.

Pliers Higher; Hat and Coat Hooks Too

Toronto

PLIERS, HAT AND COAT HOOKS.—An advance in some lines of pliers is reported this week, amounting to from 7½ to 10 per cent. The lines affected include fence, pipe cutting, etc.

Higher prices are effective in some quarters on coppered wire hat and coat hooks, 3 inch. These have advanced 10c per gross to $1.15.

Tin Roofing Caps Sell at 10½c

Toronto.

TIN ROOFING CAPS.—Quotations have been revised on tin roofing caps in some quarters and the price named to the trade is now 10½c per pound.

Boring Machines, Augers, Car Bits Up

Toronto.

BORING MACHINES, AUGERS, ETC.—A general advance has been recorded in the various lines manufactured by the Snell Mfg. Co. These goods embrace such items as boring machines, boring machine augers, car bits, eye augers, ship augers, etc.

Chain Prices Show a Decline

Toronto.

CHAIN.—A decline is shown in new prices named in some quarters this week on electric weld and fire weld proof coil chain. The quotations which now prevail are being shown as follows:

Electric Weld Proof Coil Chain: ¾ inch, $9.30 per 100 pounds; ⅝ inch, $9.50; ½ inch, $9.75; 7-16 inch, $9.70; ⅜ inch, $10.00; 5-16 inch, $11.00; ¼ inch, $13.00.

Fire Weld "B" or Proof Coil Chain: 1 inch, $9.10 per 100 pounds; ⅞ inch, $9.20; ¾ inch, $9.30; ⅝ inch, $9.50; ½ inch, $9.75; 7-16 inch, $9.80; ⅜ inch $10; 5-16 inch, $11; ¼ inch, $13.

Fire Weld "BBB" Chain: 1 inch, $10.-50 per 100 pounds; ⅞ inch, $10.80; ¾ inch, $11.10; ⅝ inch, $11.65; ½ inch, $11 90; ⅜ inch, $12.25.

Sheathing, Roofing Revealing Strength

Toronto.

SHEATHING, ROOFING.—Manufacturers report market situation in sheathing as one of decided strength. Materials are very scarce and an advance in price seems the logical outcome of the present conditions.

The continued high prices of felt and the fact that it is none too plentiful are factors which it is thought may affect the better grades of roofing. Competitive grades will, it is thought, hold their present level, but an advance in first grades looks probable.

Higher Broom Prices a Prospect

Toronto

BROOMS.—There is some talk of an advance being made in prices applying on brooms. Whether this will actually take place is still questionable, but tendency seems to be that way.

Stoves Selling; Wares Go Forward

Toronto.

STOVES, WARES.—A very good movement of stoves continues to be manifest and manufacturers generally appear to be quite satisfied with volume of business being done. Prices are holding at very firm levels with no change recorded as yet.

An active trade is shown in all lines of wares with the markets remaining firm, but unchanged. Stove pipe, elbows, stove boards and kindred lines are moving forward freely along with other fall and winter lines.

Coal Oil Holds at Advance; Gasoline

Toronto.

OILS, GASOLINE.—No further change has been made in coal oil, prices ruling at the advance made in figures last week and range from 21½c per gallon to 24½c per gallon, according to grade. Gasoline shows no change in price, 32c per gallon being figure quoted, with sales of same holding at high average.

Cordage Rules at Unchanged Levels

Montreal.

CORDAGE.—The sign "no change" still hangs out over the market in rope. Business is only fairly good and prices remain at the following unchanged figures. Pure manila 32c per pound, base; Beaver or British manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25c per pound, base.

Nails Moving Very Well; Wire Selling

Toronto.

NAILS, WIRE.—There is a very good movement of nails recorded and prices are holding at firm levels. Quotations on the wire nails are made at $4.70 per 100 pounds base, and the cut nails at $4.75, unchanged figures.

Wire is going forward in fairly liberal quantities with prices holding steady. Smooth steel wire, base, is still $5.00 per 100 pounds.

Strong Market in Steel and Iron Bars

Toronto.

IRON AND STEEL BARS.—There is a feeling of more confidence in the

steel market, as there seems to be no likelihood of a strike at the mills for the present at least. A week or so ago the Canadian selling agents of some of the U.S. mills seemed to be certain that there would be trouble. Some of the warehouses here were none too well fixed for material, and prospects of a strike, or of a holdup of material were not pleasing. Warehouses in several cases are buying heavily at present, preferring to get their stock in good shape while they can do so, and before there is any tie-up of the transportation system. It cannot be said that they are looking for increased prices, although bars do look as though they would not stay long at present figures, one Canadian mill already having announced an increase of $2 per ton.

Common bar steel	$4 00	$4 25
Common bar iron	4 00	4 25
Angle base	4 25	4 50
Horseshoe iron	4 50	4 75
Tire steel	4 45	4 70
Mild steel	4 25	4 50

Boiler Tubes Show Advance; Wrought Pipe

Toronto.

WROUGHT PIPE, BOILER TUBES. An advance amounting to about 7½ per cent. has been made in seamless boiler tubes and 1¾ inch, 3 inch, 3¼ inch, 3½ inch and 4 inch lapweld tubes are up about 5 per cent. Prices to-day are, it is indicated, more in line with the market on the other side. Quotations in effect are given below.

Wrought pipe maintains an unchanged position as regards prices, those shown in current market quotations being firmly held. The shortage of skelp reported in these columns two weeks ago has developed to a point where a famine is said to exist in ½ inch galvanized pipe with manufacturers claiming it will be two weeks before further supplies are released. Other sizes are still available.

BOILER TUBES—	Per 100 feet Seamless	Lapweld
1 inch	$27 00	.....
1¼ inch	29 00	.....
1½ inch	29 50	.....
1¾ inch	32 00	$27 00
2 inch	31 00	26 00
2¼ inch	35 00	28 00
2½ inch	43 00	32 00
3 inch	48 00	40 00
3¼ inch	.....	47 00
3½ inch	60 00	44 00
4 inch	75 00	56 00

Advance Recorded in Sheets; Plates Down

Toronto.

SHEETS, PLATES.—An advance has been recorded in some quarters in both black and galvanized sheets, and the tendency seems to be towards the slightly higher level. The range of prices on galvanized is still the same, with indications that the $8.00 figure for 10¾ oz., 30 inch width, will be general in another week or so. Black sheets, which have been down considerably in some quarters in an effort to reduce stocks to a more workable basis are readjusted to a higher basis of quoting, as shown in figures below. Plate has been revised downward, ¼ inch and heavier being quoted at $4.25 per 100 pounds.

BLACK SHEETS—		
14 gauge	4 75	5 10
16 gauge	4 85	5 20
18-20 gauge	5 70	....
22-24 gauge	5 75	....
26 gauge	5 80	....
28 gauge	5 90	....
3-16 inch plate	4 75	6 25
¼-inch boiler plate	4 25	5 80

Prices shown are for full cases. An extra charge of from 25c per 1$$ lbs. is made for less than case lots.

GALVANIZED SHEETS.			
10¾ oz.	$7 80	$8 00	$8 10
U.S. 28	7 40	7 60	7 70
U.S. 26	7 10	7 30	7 40
22 and 24	6 95	7 15	7 25
18 and 20	6 80	7 00	7 10
16	6 65	6 85	6 95
12 and 14	6 50	6 70	6 80

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c per 100 pounds. Other gauges show no change for different widths.

Prices shown are for full cases. An extra charge of 25c per 100 lbs. is made for less than

Scrap Markets Still Rather Quiet

Toronto.

OLD MATERIALS.—Business is fairly good in the scrap metal market, and this is about all that can be said for it. The larger dealers are shipping to the United States market, but only on contract, and no new business is being taken on for the present. In some places slight increases have been shown in line with tendencies outlined in these columns last week.

Copper continues to be fairly strong. There is quite an amount of copper turnings yet in this country, the property of the United States Ordnance Department. A certain part of this has been disposed of, but sales have not been made against the entire holdings. As far as the shell steel scrap is concerned, the market has been cleared out, as all that the United States Government had stored here has been sold or removed, while that of the British Government has in a large measure been shipped back to Britain.

Dealers' Buying Prices—

Corrugated Sheets Selling Very Well

Toronto

CORRUGATED SHEETS.—A very good demand is being experienced for corrugated sheets as well as much other kindred manufactured materials, with gratifying results to the manufacturers. Prices are holding firm, but no change is looked for in present scale of quotations, which follow:

Corrugated Sheets—	Gal'zed Per 100 Square	Painted Feet
No. 28 gauge	$8 25	$7 00
No. 26 gauge	9 00	8 00
No. 24 gauge	13 50	10 00
No. 22 gauge	16 00	12 50
No. 20 gauge	19 00	16 00
No. 18 gauge	24 00	19 50

Discount, 7½ per cent.

On shipments of 300 lbs. and over, freight is allowed south and east of and including North Bay; also several western counties in Quebec Province. Places north and west of North Bay, the freight is equalized on North Bay. For Quebec and Maritime Provinces, freight is equalized on Montreal.

Steady Trade in Lead Products at Firm Prices

Toronto.

LEAD AND ZINC PRODUCTS.—Manufacturers report business coming along nicely with a decidedly firm undertone to the market on solder, due to advances recorded in the price of tin. No changes have yet occurred, however. Lead products are holding unchanged with a good demand in evidence.

Lead pipe, list, per lb.	....	$0 12½
Lead waste pipe, list, per lb.	....	0 13½
Do., over 8 inches, list, per lb.	....	0 14½
Above subject to discount of 10%.

Zinc sheets, per lb.	....	0 17

Tin Goes Still Higher; Others Steady

Toronto.

INGOT METALS.—Higher prices are again the order of the day in some quarters on tin, with other metals showing an unchanged market, though spelter is weak. The demand for all lines is generally good.

COPPER.—There has been just a little doubt as to the course of copper during the past few days, it being held that it was at its peak and was likely to recede. The trade here is not disturbed, This being quoted at 27c per pound with a somewhat steadier feeling apparent.

TIN.—An upward move is again revealed in some quarters on tin, prices showing a wider range as a result at 62c to 65c per pound. Supplies are ample and the demand considered satisfactory.

SPELTER.—Weakness is showing up in this metal, but no actual change in price is shown here, 10c per pound being the figure generally prevailing.

LEAD.—The demand for lead is considered very good and the market is ruling firm at unchanged levels. Some factors have made a slight advance in quotations, but this has not extended to the local field.

ANTIMONY.—A brisk demand is reported which serves to keep the market firm. Supplies, though ample, are not superfluous. The price ranges from 10c to 11c per pound.

ALUMINUM.—New features are lacking in regard to this metal. Sales are coming along pretty fair and price shows no change at 35c per pound.

LONDON MARKETS

LONDON, Ont., Sept. 11—The markets remain decidedly firm with higher prices being recorded in shellac, molasses gates, wood dash churns, rifles, shotguns and mirrors. A decline has been registered in window glass. Hardware business here continues brisk. All the stores report their sales heavy and compare very favorably with the same season other years.

The Western Fair is on here this week and many out-of-town merchants are visiting London. Several local hardware stores have splendid exhibits at the Exhibition Grounds and have also put in special window displays for the week. Collections are good.

Cyclone Seeders Higher For Spring

London, Ont.

CYCLONE SEEDERS.—Spring booking orders are now being solicited on the Eureka Cyclone seeders. These show an advance over prices which have been in effect during the past season, quotations now being made at $17 per dozen.

Supply Disinfectant In All Sizes Now

London, Ont.

DISINFECTANT.—Jobbers, it is indicated, are now in a position to supply all sizes of Zenoleum disinfectant, and this line is moving forward quite freely. Prices quoted to-day are as follows: 30c size, $2.50 per dozen; 60c, $5; $1.10, $9; $1.75, $15.

Booking Orders For Screen Wire Cloth

London, Ont.

SCREEN WIRE CLOTH.—The price remains the same as last year on screen wire cloth for spring booking orders, which are now being solicited by the jobbers. The quotations are confirmed as follows: Painted black, 100-ft. rolls, $3.25 per 100 sq. ft.; 50-ft. rolls, $3.30.

Activity Noted In Coaster Wagons

London, Ont.

COASTER WAGONS.—Auto wheel coasters are moving forward freely at the new prices established about one month ago. The new list prices, which are subject to a discount of 35 per cent., are as follows: No. 00, $40.50 per dozen; No. 01, $79.70; No. 1, $96.15; No 2, $106.25; No. 3, $117.65; No. 4, $134.10. The net prices figured from the foregoing lists at a discount of 35 per cent., are as follows: No. 00, $26.33 per dozen; No. 01, $51.81; No. 1, $62.50; No. 2, $69.07; No. 3, $76.48; No. 4, $87.17.

Wood Dash Churns Register Advance

London, Ont.

WOOD DASH CHURNS.—New prices have been established on wood dash churns this week which provide for an advance over figures formerly in effect. The present list of quotations is as follows: No. 0 x 4 gal., $24.75 per dozen; No. 1 x 5 gal., $25.50; No. 2 x 7 gal., $26.75; No 3 x 10 gal., $27.50

Shipping Snow Shovels, Ash Sifters

London, Ont.

SNOW SHOVELS, ASH SIFTERS.—Snow shovel orders are now being shipped out at prices which have been ruling for some time past. The range of prices follows: Prince, No. 20, $7.88 per dozen; Queen, No. 30, $8.75 per dozen; King, No. 40, $10.50 per dozen; Moose, No. 50, $13.13 per dozen. Furnace scoops are also being shipped, prices for long and D handles being $8.75 per doz. Ash sifters are also selling quite freely at following quotations: Common wood side, $3 per dozen; Banner, $3.20 each; No. 1 Rocker, $4.75 each.

Rifles and Shot Guns Up Again

London, Ont.

RIFLES, SHOT GUNS.—Higher prices have again been named on Winchester rifles and shot guns, the new quotations being determined by adding 27½ per cent. to list. Loaded shells are selling very freely with prices firm and unchanged as follows: Dominion, black powder, add 10 per cent. to list; smokeless powder, net list.

Lanterns Moving; Stove Boards Sell

London, Ont.

LANTERNS, STOVE BOARDS.—The shorter days are bringing about a bigger sale of lanterns. The tin lanterns, both long and short pattern, plain, remain at an unchanged price of $12.50 per dozen. Stove boards, wood lined, are moving out at 30 and 5 per cent., and paper lined at 40 and 5 per cent., unchanged discounts. Kindred lines such as stove pipe and elbows are also active.

Mirrors Reach Higher Levels

London, Ont.

MIRRORS.—Higher prices have been named on framed shock mirrors this week, the new quotations on the common white frame being as follows: No. 2401 x 5 in. x 7 in., $3.25 per dozen; 6 in x 9 in., $4; 7 in. x 9 in., $4.50; 8 in.. x 10 in., $5.25; 9 in. x 12 in., $6.50; 10 in. x 14 in., $8.50.

Molasses Gates Up; Pliers Available

London, Ont.

MOLASSES GATES, PLIERS.—An advance is shown this week in molasses gates, the new prices being: No. 1, $5.25 per dozen; No. 2, $6; No. 3, $6.95; No. 4, $7.50. Whitman & Barnes fence pliers are now being offered for sale, the price being for the 10-inch, $10 per dozen.

Brisk Sales of Nails Reported

London, Ont.

NAILS.—A brisk sale of wire nails is reported with the supply very limited locally at present. Price shows no change at $4.70 per 100 pounds base. Cut nails are active and firm at $4.75 per 100 pounds base; large head American roofing nails are enjoying a good sale, too, in line with the above. Prices are well maintained; $8.50 per 10 pounds in kegs, and $9 per 100 pounds in 25-pound boxes.

Shellac Up Again; Short Supply

London, Ont.

SHELLAC.—Shellac jumps in price again this week with the supply very limited. The new quotations are as follows: Orange, 1 gals., $6.90 per gallon; ½ gals., $7.10 per gallon; ¼ gals., $7.30 per gallon; pints, $11.45 per dozen; ½ pints, $6.10 per dozen; ¼ pints, $3.45 per dozen; ⅛ pints, $2.20 per dozen. White, 1 gals., $7.40 per gallon; ½ gals., $7.60 per gallon; ¼ gals., $7.80 per gallon; pints, $12.15 per doz.; ½ pints, $6.45 per dozen; ¼ pints, $3 65 per dozen; ⅛ pints, $2.30 per dozen.

Turpentine Shows a Ten-Cent Decline

London, Ont.

TURPENTINE.—The market rules at firm levels. Prices in Southern markets show a recession which has resulted in a decline to their present level. This is as follows: 1 bbl. lots, $2.45 Imp. gal.; 2 to 4 bbl. lots, $2.44; 5 gal. lots, $2.55.

Decline in Glass; Lead in Oil Firm

London, Ont.

GLASS, WHITE LEAD IN OIL.—A decline has been recorded this week in the price of window glass. New lists have been established on single glass in the first three makes, but otherwise list is unchanged. The new discount on both single and double diamond glass is 30 per cent. There has been no change in the price of white lead in oil, and a good seasonable demand is apparent. The price of pure white lead in oil in ton lots is $16.35 per 100 pounds, and in less than tons, $16.70.

Linseed Oil Shows An Advance

London, Ont.

LINSEED OIL.—There is a fair sale of linseed oil at present though dealers are restricting their purchases to immediate requirements. An advance in price is shown though flax seed prices have declined considerably. Quotations are: 1 to 2 bbls., raw, $3.27, boiled, $3.28 per gallon; 3 to 5 bbls, raw, $3.24, boiled, $3.25; 6 to 9 bbls. raw, $3.22, boiled $3.25. Less than barrels, add 10c gallon.

WINNIPEG MARKETS

WINNIPEG, September 11—Price changes during the past week show some lines of interest to the hardware dealers. The advance in barb wire and a slight revision in Rie Nie products and carborundum oil stones are noted. Markets in general remain very firm with a tendency in many lines toward advances and the next 30 days will no doubt see many changes in staple lines of hardware.

Business in all lines is reported good and particularly in axes, snow shovels, stoves, elbows, pipe, etc., which are moving very freely, while a good demand is reported in all general lines.

Barb Wire Goes Up 15c Spool

Winnipeg.

BARB WIRE.—Following the recent advance of $5.00 per ton, made by American mills on all wire products, new prices are now effective on barb wire, which shows an increase of 15c per spool on all styles. To-day's selling prices on the different styles are as follows: Lyman 4 point, $5.15 spool, Winnipeg basis; Glidden 2 point, $4.95; Baker 2 point, $4.85.

Ten Per Cent. Advance in Oil Stones

Winnipeg.

OIL STONES.—Prices on carborundum stones have advanced approximately 10 per cent. during the week, due to further advances in the cost of manufacture, and are now selling at the following figures: No. 108, $1.70; No. 109, $1.20; No. 110, $1.45; No. 111, 95c; No. 112, 75c; No. 115, $1.45; No. 116, $1.45; No. 118, $1.20; No. 119, $1.20; No. 121, 95c; No. 122, 95c; No. 124, 80c; No. 125, 80c; No. 133, $1.20; No. 134, $1.20 each.

Cement, Grinding Compound, Etc., Down

Winnipeg.

CEMENT, GRINDING COMPOUND, ETC.—A general revision in prices has just been announced covering Rie Nie products, which show a general reduction, based on new costs of production at the Canadian branch. To-day's selling prices are as follows, on a few of the more familiar lines:

Cement and rubber filler, 63c each.
Patching cement Tubes, 70c dozen; ¼ pints, 18c each.
Vulcanizing Cement—¼ pints, 18c; ½ pints, 28c; 1 pint, 45c; 1 quart, 88c; 1 gal., $3.35 each.
Radiator Cement—½ pints, 45c each.
Grinding Compound—Duplex, 23c; shop size, 52c each.
Radiator Compound, 30c each.
Mohair Dressing—1 pint, 70c; 1 quart, $1.25; ½ gallon, $2.10 each.

	¼ pts.	½ pts.	Pints.
Air Drying Black Enamel, each.	32c	53c	88c
Air Drying Grey Enamel, each..	35c	60c	$1.05
Cylinder Black Enamel, each...	32c	53c	88c
Cylinder Grey Enamel, each....	35c	60c	$1.05

Rubber Patches—Small size, 30c box; large size, 60c box.

Linseed Oil Declines 10c Gallon

Winnipeg.

LINSEED OIL.—Prices on linseed oil show a reduction during the week of 10c per gallon, due to lower prices now ruling on flax seed, making to-day's ruling prices as follows: Raw linseed oil in barrel lots, $3.00 gallon; boiled linseed oil in barrel lots, $3.03 gallon.

Prices Named on Harvest Tools

Winnipeg.

HARVEST TOOLS.—Discounts on harvest tools, which were given in last week's issue, are confirmed at 17½ per cent. off the manufacturers' list, and net prices on the various lines are as follows:

Feeder Forks—No. 41½, $10.95 dozen.
Hay Forks—No. 40, $9.40; No. 41, $10.70; No. 50, $11.35; No. 51, $12.80 dozen.
Barley Forks—No. 77, $19.00; No. 79, $20.45; No. 80, $21.65; No. 83, $25.20; No. 84, $26.80; No. 80¼, $20.00; No. 80½, $21.45 dozen.
Barn Forks No. 118, $17.30; No. 122, $21.65; No. 222, $20.35 dozen.
Chaff Forks—No. 92, $27.50; No. 93, $28.65 doz.
Manure Forks—No. 97, $12.35; No. 98, $13.80; No. 107, $18.15; No. 108, $19.60; No. 112, $20.60; No. 113, $22.05; No. 95, $11.35; No. 96, $12.80; No. 105, $17.30; No. 106, $18.75; No. 110, $19.80; No. 111, $21.25 dozen.
Straw Forks—No. 68, $12.50; No. 69, $14.85; No. 70, $16.25 dozen.
Field Hoes—No. 155, $8.25; No. 157, $7.40; No. 170, $6.00; No. 172, $4.75 dozen.
Garden Rakes—No. 271, $7.25; No. 272, $7.75; No. 273, $8.25; No. 251, $10.70; No. 252, $11.65; No. 253, $12.55; No. 281, $5.55; No. 282, $6.00; No 283, $6.50 dozen.

Prices on Valves and Fittings Figured Out

Winnipeg.

VALVES, FITTINGS. — Net prices have just been figured on valves and fittings, discounts on which were given in last week's issue of HARDWARE AND METAL, to-day's ruling prices being as follows:

Bushings—Black: ¼ in., 4c; ⅜ in., 4c; ½ in., 4c; ¾ in., 4½c; 1 in., 5½c; 1¼ in., 6½c; 1½ in., 8c each; galvanized, 7½c; ½ in., 7½c; ¾ in., 9c; 1 in., 11½c; 1¼ in., 13c; 1½ in., 17c each.
Caps—Black: ¼ in. 2c; ⅜ in., 2½c; ½ in., 5c; ¾ in., 6c; 1 in., 11c; 1¼ in., 11c; 1½ in., 13c ea.
Reducing Couplings—¼ to ⅛ in., 5½c.; ⅜ to ¼ in., 4c; ½ to ⅜ in., 5½c; ¾ to ½ in., 8c; 1 to ½ in., 13c; 1 to ¾ in., 14c; 1¼ to 1 in., 12c; 1½ to 1¼ in., 18c; 2 to 1½ in., 25c each.
Black Crosses—⅜ in., 8c; ½ in., 12c; ¾ in., 18c; 1 in., 36c; 1¼ in., 38c; 1½ in., 42c each.
Black Elbows—⅜ in., 5c; ½ in., 7c; ¾ in., 7c; 1 in., 12c; 1¼ in., 20c; 1½ inch, 25c; 2 in., 38c each.
Galvanized Elbows—⅜ in., 7c; ½ in., 10c; ¾ in., 12c; 1 in., 19c; 1¼ in., 33c; 1½ in., 40c; 2 in., 62c each.
Black Locknuts—⅜ in., 2c; ½ in., 2½c; ¾ in., 4c; 1 in., 6½c; 1¼ in., 8½c; 1½ in., 9c; 2 in., 9½c each.
Galvanized Locknuts—⅜ in., 2½c; ½ in., 4c; ¾ in., 6½c; 1 in., 8½c; 1¼ in., 12c; 1½ in., 12c; 2 in., 13½c each.
Black Plugs—⅛ in., ¼ in., ⅜ in., ½ in., 2c; ¾ in., 3c; 1 in., 4c; 1¼ in., 5c; 1½ in., 6½c each.
Black Unions—¼ in., 13c; ⅜ in., 14c; ½ in., 16c; ¾ in., 19c; 1 in., 24c; 1¼ in., 33c; 1½ in., 41c; 2 in., 53c each.
Galvanized Unions—¼ in., 19c; ⅜ in., 21c; ½ in., 24c; ¾ in., 28c; 1 in., 35c; 1¼ in., 49c; 1½ in., 63c; 2 in., 81c each.
Standard Angle Valves—¼ in., 69c; ⅜ in., 73c; ½ in., 95c; ¾ in., $1.20; 1 in., $1.71; 1¼ in., $2.40; 1½ in., $3.33; 2 in., $5.05 each.
Standard Globe Valves—¼ in., 69c; ⅜ in., 73c; ½ in., 95c; ¾ in., $1.20; 1 in., $1.71; 1¼ in., $2.40; 1½ in., $3.33; 2 in., $5.05 each.
Standard Horizontal Check—¼ in., 62c; ⅜ in., 67c; ½ in., 86c; ¾ in., $1.10; 1 in., $1.55; 1¼ in., $2.15; 1½ in., $3.00 each.

Turpentine Prices Hold Without Change

Winnipeg.

TURPENTINE.—Turpentine prices show no change during the week, holding firm at former quotations with no immediate prospect for lower prices, as producers are having calls for large quantities for export. To-day's market prices are confirmed as follows: Barrel lots, $2.70 gallon; half barrels, $2.73 gallon; 5 gallon lots, $2.75 gallon; 1 gallon lots, $2.75 gallon, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Sept. 11.—The labor situation in the iron and steel industry is greatly improved. The universal opinion among manufacturers is that a general strike, such as was threatened, is out of the question. There may be sporadic outbreaks, as there have been in the past three months, but there may even be less of that than there was.

At no time was the balance of probability that there would be a strike. At Youngstown it was thought at one time to be "50-50," but Youngstown is the worst place in the country in that respect. It was there that the riots occurred at the beginning of 1916. Now the chances, taking the industry as a whole, are practically insignificant. Of course, no prediction can be made for any length of time, for there may be new developments eventually, but as to this particular strike that the labor agitators have been endeavoring to foment, it would

have occurred before this if it was going to occur at all.

There was quite a complication of events, as detailed in last report, with the strike committee seeking to arrange a conference with Judge Gary and threatening strike if the conference were not arranged, at the same time that Samuel Gompers, President of the American Federation of Labor, with his more moderate views, returned to this country, and President Wilson issued his appeal that there be a truce in labor disputes.

The outcome was that the strike committee did not call any strike. Why they did not nobody but the labor people knows. It may have been through realization that calling a strike would not produce a strike, or through Mr. Gompers refusing on general grounds to sanction a strike, or through the issuance of the President's appeal showing that a strike would be ill-timed.

After the hand seemed to be played out the strike committee continued throwing down cards. They secured, under the headship of Mr. Gompers, an interview with President Wilson, seeking to have him endeavor to get Judge Gary into a conference, and then last Friday they sent a long telegram to the President at St. Louis, urging him to arrange a conference, and saying they had great difficulty in restaining their men at various points from striking. All along the Washington press correspondents have had the wrong view of this thing, and they seem to have taken seriously the agitators' bluff that they were having trouble keeping the men from striking. Everywhere else in the country the sun shines through the bluff, which is considered a cheap joke.

It may be taken that the whole matter rests for a time, or at least until after the conference, early in October, that the President has called, to be participated in by 15 men selected by manufacturing and financial interests, 15 labor leaders, and 15 men to be selected by the President himself. The object is to devise a solution for the whole labor matter, so that strikes and lockouts will be relegated, like wars, to the barbaric past. Naturally enough, however, one is inclined to be cynical. There have been great conferences before in Washington, aimed at accomplishing various things. However, the chief trouble is "unrest," time is passing and time has been expected to decrease the unrest.

Production

Production of pig iron at the beginning of September was at the rate of about 34,400,000 gross tons a year, against average rates of 32,650,000 tons in August, and 28,950,000 tons in July. The low point in production was at about the middle of May, since when there has been a constant increase to date. Capacity is about 44,000,000 tons a year, based on what the furnaces actually produced in 1916, working under 1916 conditions, with allowance for new furnaces completed. On that basis production now is at 78 per cent. of capacity, which would indicate 22 per cent. capacity idle. All the idle capacity, however, could not operate if they had a market for their product at present prices, because with wage rates so very high now the furnaces that employ much more labor per ton of iron produced than the generality of furnaces are at a much greater disadvantage than formerly. There was a time when the greater labor employment was more or less balanced by the much smaller capital investment, but the great advance in wages, with decreased labor efficiency, has altogether altered the balance. This might apply to something like 10 per cent. of the capacity, so that there remains a considerable volume of idle capacity that could come in if the orders were available. Such orders are not available, however, since buying now is on a limited scale. Consumers of foundry grades of iron are fairly well covered by contracts to the end of the year. Some of them are buying in a moderate way, finding that their wants are greater than anticipated when they contracted, or having concluded to end the year with a normal stock, when formerly they had counted on having practically no stock. Some sales into next year at advanced prices are reported, but the tonnages are small. There is little demand, and producers prefer to wait until they have a better line on their costs.

Steel Market Quiet

The steel market is quiet, there being only a very limited demand, as to new purchases, while on the other hand the mills have little to offer, being fairly well sold up to the end of the year. If the works that are in operation were producing normal tonnages there would be a good bit of steel available, but at nearly all plants tonnages are unsatisfactory, by reason of slackness on the part of labor. While 90 to 95 per cent. of the productive capacity is in operation, the tonnage output is 80 to 85 per cent., estimating capacities on the basis of what the mills were able to turn out in 1916, when manufacturing conditions were favorable.

Occasionally reports are circulated that this producer or that has advanced one price or another. Such advances, if actually made, are not suggestive of any general advance to come, for the leading producers are strongly opposed to advancing steel prices. On the other hand there is no prospect of any decline while conditions are as they are to-day.

Export Business

Export inquiry for blast furnace and steel mill products is about the same as formerly, which means that it is about as good as could be expected in view of unsettlement throughout the world and the very unfavorable exchange rates on New York that prevail in several countries. Italian exchange is at a level that makes it the same as if exchange were at par and prices here were 88 per cent. higher than they are. Exchange in France is nearly as bad, and while London exchange on New York is much less distance from par, it is unfavorable enough to cause business to be held back. With a better exchange situation the export demand would be still heavier, but the exchange situation has not begun to improve, and it may get still worse.

Hardware Firm Employs Float To Keep Firm Name Before Customers

The float shown in the accompanying illustration was a feature of the Peace Parade, at Barrie, Ont., which attracted a lot of attention and favorable comment. It was arranged by the Otton Hardware Co., Limited. The framework of the boat was constructed of 2 x 2 lumber the length of the firm's auto truck and the bow and stern were made of lighter strips of wood. This was bent to shape and the whole was covered with white cheese cloth and then decorated with flags. The body part of the truck was left open for the young ladies to ride in and the driver was clothed in a white duck suit, as a sailor.

Widen Your Paint Merchandising Ideas

Develop Broader Outlook in Regard to Paint Business—Sell Prospect Ideas—How It Has Been Worked—Keep the Think-Tank Working—Let the Trucker Truck

LORD KITCHENER, shortly before his death, stood nearly half a day with his staff reviewing British troops before their departure for France.

After the last man had passed, Kitchener turned to his generals with the query: "Gentlemen, has this taught you to think in millions?"

A new era in the size of military operations had come about and Kitchener was anxious that his men should think in terms commensurate with the problems before them.

Broader Outlook

And so it is with merchandising to-day. It has become necessary to think in bigger numbers, with bigger ideas, with broader viewpoints, and with deeper comprehension of what possibilities exist about us.

Not a few paint and varnish dealers have sat and whistled, scratched their heads, and developed worry bumps about the forward strides of his competitor, or mail order business, or how he could become as big as the big fellows in his line.

In the first place worry won't get a man anywhere. The fellow with his nose in close proximity to the grindstone won't get along very much further. There is just as broad a conception of wide, up-to-date merchandising in the paint and varnish trade as with any other line.

Sell Prospect Ideas

Norval Hawkins, the man who increased the sales of Ford cars from 6,181 to 815,912 in twelve years, says that the secret of big sales accomplishment is to get a big conception of your work. "Remember," says he, "that you are not selling goods, you are selling ideas about goods. First, sell the prospect-ideas that will make him realize he needs your goods. Second, sell him the ideas of possession of the goods."

In other words the prospect should be led to the realization that the value of paints and varnishes rests entirely in the service rendered rather than the actual cost of the goods. The retail paint salesman's chief object should be to bring about a conviction that paints and varnishes are needed for preservation and protection. When the customer has been brought to a complete recognition of this service and the value of paints and varnishes for this purpose, 85 per cent. of the sale has been made.

An Idea That Worked

A traveling paint salesman had in his territory a town that looked very shabby for lack of paint. As long as a man's neighbor did not paint his house, he saw no need for doing so himself. Moreover, the paint dealers in this town, naturally, were not interested in stocking a product for which they had no call.

So this salesman sold them the idea of painting instead of paint. He went to each dealer in turn and told of the benefits to be derived from a bright and well-painted town. He touched slightly on the profit they would make in selling the paint. And the dealers, having the idea of painting up the town, helped to put on a "Paint Your House and I'll Paint Mine" campaign which resulted in a boom of paint sales.

Get-Together Spirit Best

If shabby, unpainted conditions exist in your locality, why wait for an outsider to come along to show your town up, and incidentally show up your lack of merchandising enterprise, as the salesman in the above incident had to do? Why not get into touch with the other paint dealers and put on a co-operative campaign that will meet the needs of your community?

Size up the most serious needs of the property of your town from the painting standpoint, then pick out the most vulnerable point for attack with an advertising campaign and shoot ideas into the trade that will lead to paint business.

If your former paint advertising has not brought about the results you expected, or you wish to change your methods of advertising paint, change to advertising ideas about paint. There is an almost inexhaustible fund of ideas to draw from for this purpose.

A rather fussy old gentleman had erected a cement garage beside his home. He had selected cement, because it was cement and would last without painting or any other attention. Yet there was something about it that didn't please him. Just what it was he couldn't tell, though he told his troubles to others aplenty. Finally he reached the ear of his hardware dealer who knew the old man and the history of the garage pretty thoroughly.

Playing "Harmony" End

The hardware man was shrewd enough not to mention paint, yet knew that paint was the remedy. He pointed out that the cold greyness of the cement scarcely fitted in with his nicely painted home and the shrubbery

BETTER SERVICE—
For Our Customers in Province of Nova Scotia

We have just completed arrangements with MR. JOSEPH H. CLEVELAND, who has represented us IN THE MARITIME PROVINCES for the past four years, to carry a COMPLETE STOCK of OUR PRODUCTS in an up-to-date warehouse located at 150 Granville St., Halifax, for distribution in Nova Scotia.

Our new arrangements will help us to give BETTER SERVICE to our customers and to maintain OUR POLICY, which has always been to put OUR GOODS in the hands of our dealers at the LOWEST POSSIBLE PRICES.

All ORDERS and ENQUIRIES should be sent direct to—

Mr. J. H. Cleveland,
150 Granville St.,
Halifax, N. S.

Will Not Affect New Brunswick

This new arrangement WILL NOT AFFECT our dealers in NEW BRUNSWICK as MESSRS. EMMERSON & FISHER, LIMITED, wholesale hardware merchants, St. John, N.B., will continue to act as OUR DISTRIBUTORS for this Province. ALL ORDERS and ENQUIRIES which are sent to them will receive the VERY BEST ATTENTION.

The Brush Department

Why Not Investigate This Chance for More Business?

Ninety Per Cent. of the Shaving Brushes Sold To-Day Are Handled by the Drug Stores—Big Chances for the Hardware Dealers to Cash In On Some Easily Made Profits

"NINETY per cent. of the shaving brushes sold to-day are sold by the druggists," said the sales manager of one of the largest brush firms in Canada to HARDWARE AND METAL in talking over trade conditions.

"The hardware men could get the lion's share of this business very easily if they will go after it," he continued. "It is business that is worth going after, and it is easily secured. Very few druggists advertise. They depend on their window displays and their store displays almost entirely. Many people would be surprised if they knew the number of shaving brushes sold by some of the drug stores each year. They would also be surprised if they knew the prices for which the brushes are sold.

Get Good Prices

"Many hardware dealers think they are making a good sale if they sell a brush for $2. They regard it as an extra good sale if they sell a $3.50 brush. Any number of druggists are selling brushes that retail at $12 each. They have realized that it is just as easy in a great many cases to sell a $12 brush as it is to sell a $2 brush. When a prospect comes in attracted by their window display or their store display of shaving brushes, they do not trot out a $2 one and offer it to him. They talk the $12 brush and point out its good qualities. A man does not buy a shaving brush every day. He does not mind paying for a brush that is going to give him real service and satisfaction, and last for years. Druggists report that there is a very decided tendency on the part of people to demand quality regardless of price. The druggists know that they can stand absolutely behind high quality brushes and that they can go the limit in guaranteeing them. The same sales effort that they might put in in selling a $2 brush will get results in a $12 article and they make a great deal more profit. If the $12 brush is beyond the prospective buyer's pocket they can always come down and offer something a little cheaper."

Keep Goods Displayed

This sales manager's experience is a wide one, and his trips bring him into close touch with the men who are distributing brushes. One general fault he declares with hardware men is that they keep their stock hidden away and seldom put in window displays.

"There are a great many hardware dealers," he said, "who are doing a splendid brush trade. They are the men who are not afraid to let people know that they are in the business and that they have a stock of brushes. They do not keep their brushes hidden away in drawers but out where people can see them, and they put the prices on them. The dealer who gets in a few brushes and then hides them away and waits until people come in and ask him for a brush naturally finds sales slow. There's a reason, and the dealer himself is the reason."

A Good Business

There is a lot of good business to be had in brushes of all kinds. It is an all-year-round trade for the man who goes after it. Brushes of one kind or another are needed the year round, and the man who carries the stock and lets people know that he has it need not worry about sales. Some of the hardware men who are doing the biggest business in brushes to-day are finding that it pays well to run an occasional brush advertisement and also to occasionally mention brushes in a section of their regular advertising. These dealers also give attention to their store and window displays of brushes and they get results.

WIDEN PAINT MERCHANDISING IDEAS

Continued from page 66

that surrounded it. He finally led the old man up to the point where he realized that the garage was out of harmony with its surroundings. With this conviction the old gentleman naturally took up the question of paint on his own initiative and a sale was made. Had the hardware man mentioned paint at the outset, the probability is that the customer would have been further antagonized and the possibility of a sale spoiled.

Will Realize Benefits

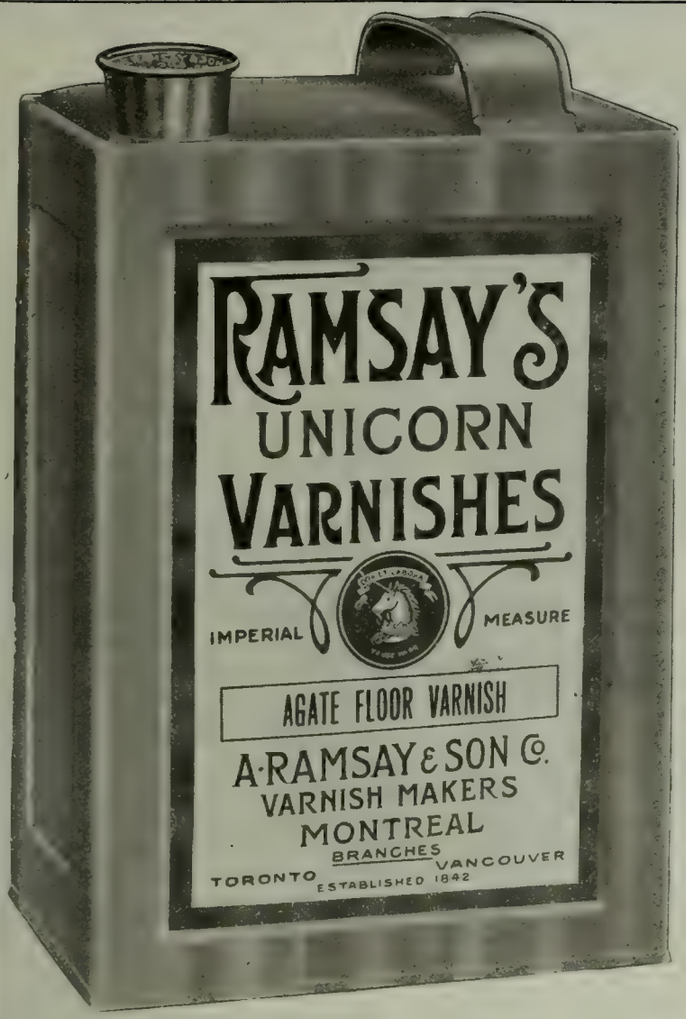
Call it diplomacy, camouflage, or what you will, the fact remains that when emphasis is placed upon ideas rather than goods, when the approach to a sale is shrouded with ideas of service and benefit to the customer, it takes the mind away from any dead-lode notion of price, cost, etc., and leads him to a position where he sees the benefit that will come to him through the use of those goods. With that attitude obtained, desire on the part of the customer overcomes other objection and the closing of the sale becomes merely a matter of writing down the details.

Cause of Success

This conception of selling can be applied to the detail of individual sales or to advertising and selling in the mass. It is because the big fellows have been able to apply these principles to their general advertising and selling policies that they have been able to attain the success that becomes the wonder of the smaller men.

The big fellow hires men to truck barrels, he also hires men to think and think in big ideas of merchandising that keeps the trucker in a job.

Never by any chance does he let these two classes get mixed up in their jobs. All too frequently we see hardware men wrestling with barrels, or bales of fence wire, when they should be concentrating their attention on ideas that would easily provide a job for some other fellow to push that truck.



Get Head Working

Muscular development is a fine physical asset, but is much less forceful in putting forward successful merchandising ideas than the right use of the head. Develop the muscles outside of business hours in whatever way your hobby leads you. The cost of somebody else's muscle for use in business hours against the loss of inactivity of your idea generator is insignificant.

When you set your attention on the paint department, remember that men and women do not buy cans of paint to set on the mantel or buffet. They are bought for service, with an idea of some accomplishment for personal benefit and satisfaction. The more such ideas can be promoted in the minds of your trade the more readily it will lead to paint or varnish sales, and I think you will find that advertising painting ideas is less costly and brings a greater volume of returns for each dollar spent.

PAINT, OIL AND VARNISH CLUB TO MEET

The first regular meeting of the Paint, Oil and Varnish Club of Toronto will be held next Tuesday evening. A dinner is being given at the King Edward Hotel, after which the business of the meeting will be proceeded with.

GLIDDEN CO. ABSORBS NUBIAN PAINT & VARNISH CO.

Announcement has been made of the acquisition by the Glidden Co., Cleveland, of the Nubian Paint and Varnish Co., of Chicago. It is understood that the deal involves over $1,250,000.

The Nubian company was established in 1879 and has specialized in supplying technical paints and varnishes for the industrial trade. The company also has made a specialty of supplying dull black varnish finishes to the stove and hardware trade.

The business of the Nubian company will continue to be operated in the same style and under the same management. The company owns considerable switching properties on which, it is stated, the Glidden Co. plans to build additional varnish fires and buildings to house tanks and equipment for storing and ageing varnishes for the accommodation of their trade in the West.

The Glidden organization now has seven factories, located as follows: Toronto, Can.; Reading, Pa.; San Francisco, Cal.; two in Cleveland, and two in Chicago.

WHY HARDWARE IS HIGHER

In answer to the question, why are castings and hardware high in price, the Thomas Devlin Manufacturing Company, of Philadelphia, says as follows:

"The reason is obvious. 172 3-5 per cent. is the average advance in labor since 1909 (and nearly all since 1914) in the wages of five of the important mechanics and laborers who produce hardware in our works and they are as follows:

Day moulders	advance	150%
Piece moulders	"	190%
Machinists	"	133%
Tool makers	"	157%
Laborers	"	233%

The method employed to arrive at the above percentages is as follows:

1909—Moulders received $18 per week—60 hours, at 30c per hour. No difference then in favor of piece moulders.

1919—Moulders (day) $36 per week—48 hours, at 75c per hour, or 150 per cent. advance since 1909. Moulders (piece) $42 per week—48 hours at 87½c per hour, or 190 per cent. advance since 1909, and the per cent. is even greater by extra help furnished moulders.

1909—Machinists, $18 per week—60 hours at 30c per hour.

1919—Machinists, $33.50 per week—48 hours at 69 79-100c per hour, or 133 per cent. advance since 1909.

1909—Tool makers, $18 per week—60 hours, at 30c per hour.

1919—Tool makers, $37.50 per week—48 hours, at 77c per hour, or 157 per cent. advance since 1909.

1909—Laborers $9 per week—60 hours, at 15c per hour.

1919—Laborers $24 per week—48 hours, 50c per hour, or 233 per cent. advance since 1909.

"In addition to the above percentage entering into the cost of hardware, there has been an average of 100 per cent. advance in raw materials, iron, coal and coke. There are still other additions to the cost of goods. War taxes imposed by the National Government commencing with capital stock tax, income tax, excess profit tax, transportation and other taxes, besides increased municipal taxes, and all know that to pay taxes it must be added to the cost of goods. Do you now wonder why goods are not and cannot be furnished cheap if bankruptcy is to be avoided?"

THE RUBBER SUPPLY

Rapid Increase As Result of Growth of Plantation Production

The cost of crude rubber has been steadily declining ever since 1912. In the year 1918 the average cost per pound was 44c, as compared with 84c in 1912. The explanation of this extraordinary decrease in price, and, incidentally, of the great increase in rubber company earnings, is to be found in the following record of the world's rubber production.

Year	East	Brazil	Other	Total
1906..	531	36,000	29,500	66,031
1907..	1,133	38,000	30,000	69,133
1908..	2,010	39,000	24,500	65,510
1909..	3,997	42,000	24,000	69,997
1910..	7,521	40,800	21,500	69,821
1911..	13,973	37,750	23,000	74,703
1912..	28,518	42,410	28,000	98,928
1913..	47,302	39,370	21,500	108,172
1914..	71,959	37,000	12,000	120,959
1915..	105,205	36,350	12,000	153,555
1916..	150,000	35,000	13,000	198,000
1917..	190,000	34,500	10,000	242,000
1918..	213,600	34,400	10,500	258,500

Thanks to the plantation rubber boom, which began in London around 1900, and lasted for more than ten years, the world's rubber output is now so great that even Mr. Ford cannot catch up with it. The left hand column shows the growth of plantation rubber, and this is where all the growth lies.

BOOSTING SALES OF CUTLERY

Continued from page 49

stated to HARDWARE AND METAL that by making a feature of pocket knives he has brought his sales in this one line up to more than 3,000 knives. He does this by frequent advertising, in which he features quality pocket knives at reasonable prices and by carrying a complete stock. He has a couple of silent salesman right up at the front of the store, and, neatly arranged in them, with each one bearing a price tag, is a variety of pocket cutlery that cannot be surpassed in this dealer's city. He carries no cheap goods, working on the theory that the man who wants to buy a knife of inferior quality had better buy it in some other store, as he will be dissatisfied with it in a very short time and then blame the dealer.

Shows Only One Line

"We always get excellent results from our window displays," he told HARDWARE AND METAL. "We have found that cutlery and silverware displays interest a very large number of people. They like to look at it, and, while we sell a lot of goods at the time we find that perhaps a month or more after people will still come in and ask for articles that were shown. One of the reasons why we get such good results is because of the goods themselves. There are few lines which are really more useful in a home, which look so well, or which will give such years of real service. Take carving sets for instance. We sell a lot of them and I have known cases where through one sale of good goods of this kind we have eventually made a dozen others, because the party who bought was so well pleased with the set and it was admired by friends and talked about. We sell a lot of these in June and at Christmas. We find that table cutlery, knives, forks, etc., is getting to be an all year seller, while many of the lines of silverware and glassware are the same. Sales of all these goods may be increased by window displays and advertising. We find we get the best results when we feature only one line. That is if we plan a drive on cutlery we put in a cutlery window and advertise cutlery. We think that if we put in a window that was all mixed up, with cutlery, tinware, tools, and other lines, that we would not get good results from any of them. The effect would be to scatter people's attention and the result would be that they would not buy, but by showing cutlery alone, or silverware alone, or glassware, we get most satisfactory results."

Keep It At Front

Many dealers plan their store arrangement with the idea of favorably impressing everyone the moment they enter the store, by having them face an attractive display of cutlery or silverware. Certainly the effect is a striking one if the arrangement is well carried out and the goods shown at once hold and interest women. A fine showing of shining cutlery, shining silverware or sparkling glassware right at the front of the store will, in the view of many dealers, impress prospective buyers more favorably with the service they may expect and the standing of the store than anything else will. They also state that keeping these goods at a point like this, where everyone who comes in or goes out cannot help seeing them, speeds their turnover appreciably.

PLANT IN CUBA

Reports would indicate that considerable developments are at present taking place in Cuba with a view to the adoption of oil fuel in place of coal, etc., for many industries. Oil companies are erecting large oil tanks; sugar mills, railway companies and cement companies are adapting their plant for the use of oil as a motive power, and it appears to be a suitable opportunity for firms making any description of plant using oil fuel to consider this new development as providing a market for their manufactures.

Varnish Selling

It is no trouble to sell any varnish once, but the one permanent salesmaker is quality.

The universal recognition of Berry Brothers label as a guaranty of quality is the reason why Berry brands require no sales arguments.

Liquid Granite Floor Varnish, Luxeberry White Enamel, Luxeberry Wood Finish, and Luxeberry Spar Varnish are a few of the many products that have made the name of Berry Brothers a household word.

It pays to buy "Berry" Finishes.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Sept. 11.—Anticipating an active fall business, the paint manufacturers are well prepared to take care of the business that may come. In the meantime there is no lessening of the difficulties connected with procuring seed for augmenting the supply of linseed oil. This is truly scarce and were it not for the fact that there is a somewhat limited demand from the trade, there would be hardship. Only one crusher is quoting oil, and it will be several weeks yet before there can be much supply. The Canadian yield of flaxseed is estimated at about 6,000,000 bushels, but it will be two or three weeks before much seed can reach the East. Putty and white lead in oil are very firm and some state that advances cannot be much longer deferred. Turpentine still is scarce and high and procurable only in 5 gallon lots.

New Crop Flaxseed Will Relieve Strain

Montreal.

LINSEED OIL.—The supply of flaxseed here is practically nil and the crushers are not hopeful of an improved supply being available for at least a few weeks. In view of the fact that business has quieted down somewhat, the trade is not so awkwardly placed, but it will probably be three weeks before new crop seed is crushed to any extent here. The price basis is nominal, with raw being quoted at $3 per gallon and boiled at $3.02½. Few are naming prices.

	Imp. Gal.
Raw—	
1 to 4 barrels	$3 00
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	
1 to 4 barrels	$3 02½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Early Advance Probable For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—It is freely stated that the present basis for white lead in oil cannot hold. Just what the future holds is not clear, but if it were not that sales are light at this time of the year and also that the time when schedules are considered for the year ahead is approaching, advances would be likely immediately. In the meantime the undertone is decidedly strong and both pig lead and linseed oil are holding firm at recent advances. The basis for standard lead is $15.50 per 100 pounds in five ton lots and $16 per 100 pounds for ton lots, while smaller quantities are selling at $16.35.

Little Turpentine; Small Lots at $2.65

Montreal.

TURPENTINE.—Prices are strictly nominal and there is really no easing of the difficulties in obtaining supplies from the South. The only price being quoted is that of $2.65 per gallon for 5-gallon lots and with package charges extra.

	Imp. Gal.
Turpentine—	
1 to 4 barrels	....
Small lots	2 65

(Packages extra.)

NEW BASE PRICE LIST—SHEET GLASS

Effective Sept. 1st, 1919

United Inches	Star per 100 ft. box	Double Diamond per 100 ft. box
10 - 25	19.90	22.90
26 - 34	20 80	24.85
35 - 40	21.80	26 40
41 - 50	23.50	30 00
51 - 60	24.60	30.80
61 - 70	26.50	32.70
71 - 80	29.70	35.10
81 - 84		45.45

91 - 94		49.80
95 - 100		58.55
101 - 105		65.35
106 - 110		73.10

Putty Holds Steady; Strong Undertone

Montreal.

PUTTY.—Business is of seasonable proportions and the outgo from week to week is fair. With linseed oil ruling high the undertone is naturally strong and no declines are likely to come at this time. The basis in this market is as follows:

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

All Makers Report Big Paint Season

Montreal

MIXED PAINTS, SPECIALTIES. — All paint manufacturers are delighted with the volume of business which has come to hand this year and records will, in many cases, be completely smashed. Just at the moment there is not a great deal of heavy buying. The makers are looking forward, however, to an active fall business, and in the meantime it is felt that the retail trade is looking toward a reduction of stocks to the minimum before again filling in broken lines. The tendencies are of a firming nature.

TORONTO

TORONTO, Sept. 11.—Linseed oil is higher again this week and reported very scarce. Crushers and jobbers are all shy of stock and look for no relief before new crop seed is available. Turpentine has reacted and quotations show a decline of 10c per gallon following a similar move in the Southern markets. Mixed paints are active and a firm market is reported in lead in oil and putty. Glass has declined and is quoted at 30 per cent. discount from list.

Higher Prices on Linseed Oil Named

Toronto

LINSEED OIL.—A slight advance is shown in prices on linseed oil this week with more factors withdrawn from the market altogether. Linseed oil is scarce and orders are accumulating in the crushers' hands which they cannot fill. The tendency is to cut orders down to small lots and secure wider distribution. It will be at least a month, and probably six weeks, before October seed will be available, and spot seed is unavailable. The demand is reported fairly good, which, under present conditions, does not add to the joy of crushers and distributors. Range of prices asked this week follow:

The Sign that says: "Here's a Quality Store"

The illustration above shows the B-H Metal Flange Sign whereby our agents are enabled to let the world know — by means of our famous "three can" display—that he handles the highest-quality paint and varnish line.

This sign has actually operated as a business-builder for every store that has displayed it—by reason of all that it *stands for* in quality of paint and in advertising co-operation by the makers of B-H Paint.

The B-H Flange Sign tacked over your door the day you start to represent us, is but the forerunner of a whole battery of advertising helps which will be at your disposal for your Fall and Spring paint selling.

Turpentine Reacts; Declines 10c *Gallon*

Toronto.

TURPENTINE.—Lower prices have been reached on turpentine this week following a reaction in the market in the South. What is directly responsible for this is hard to say, for the market seems to vary almost daily. One thing seems certain and that is that levels appreciably lower than those quoted are not expected. Should the overseas demand continue to come along, higher prices are possible; there would seem to be only about enough turps for domestic requirements now. To-day's price is shown below.

The finer grades of rosin are distinctly scarce and advices from the South would indicate that there can be no more fine grades made this year. Stocks are about equal to domestic needs, so any new demand will curtail amount available and tend towards a maintenance of high prices.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$2 45
2 to 5 barrels (barrel included)	2 44
5 gallon lots	2 55

White Lead in Oil Holding Firm

Toronto.

WHITE LEAD IN OIL.—A firm market is reported on white lead in oil with the movement to the trade generally considered pretty satisfactory. Higher prices are talked of, but no definite action has been taken in this regard. Prices are unchanged at following figures: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Mixed Paints In Fair Demand

Toronto

MIXED PAINTS.—Manufacturers appear to be well satisfied with the volume of business being done and look forward to a good movement of paint to the trade this fall. One manufacturer stated that business at hand would keep their plant operating until October 15 without another order, and to add to their difficulties, linseed oil is very hard to secure. Evidences are not lacking that a better fall trade is anticipated by the retailers and plans are being laid accordingly. Prices hold firm, but without change.

Window Glass Down; Putty Rules Firm

Toronto.

GLASS, PUTTY.—A decline in window glass is shown in the new discount named this week of 30 per cent. The list prices issued are the same as the list of March, 1918, except that the price has been advanced on the first three brackets of single thick in the September list. Otherwise it is the same as the March list. The necessity for altering this list is, it is said, to bring it into harmony with the factory costs which were made effective August, 1918. The new base price list appears in panel on second preceding page.

Putty prices are firm, but unchanged at following levels:

Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$ 35	$5 60	$5 95
Do., 100 lb. iron	6 20	6 45	6 80
Do., 25 lb. iron	6 45	6 70	7 05
Do., 12½ lb. irons	6 70	6 95	7 30
Bladder, in barrels	7 10	7 35	7 70

Welfare Scheme For Employees of Dominion Chain

"NO person can lead a normal, healthy human life whose mind is clouded by worries. It is in an effort to anticipate and remove the reasons for some of these worries that the association's plan of co-operative insurance between employer and employee has been devised by the American Chain Co." Thus A. G. Ross, manager for the Dominion Chain Co., Niagara Falls, Ont., summarized the motive behind the Acco Employees Society, which has been recently organized at this plant.

The plan insures the workers against sickness and old age, provides death and birth benefits, vacation and even free legal advice. Enrolment in the association is entirely voluntary. The worker pays an initiation fee of $1 and 50c a month in dues. The cost to the company is in the neighborhood of $300,000 annually.

Some of the Benefits

The scheme affords the worker health insurance ranging from three months to one year, according to length of service with the company.

In the event of death, a cash payment of $100.00 is made for funeral expenses, and in the case of a married man who has been employed by the company for one year or less, the widow receives $1,000, each dependent child, brother or sister, $200, and a dependent parent $500. These payments are graded upward until the maximum insurance payable to the widow of an employee who has served ten years or more, reaches the sum of $2,000. (plus the usual allowances for other dependents) and for a dependent father or mother, $1,000. In case there are no dependents, $500 is paid to the nearest relatives.

A cash benefit of $25 is paid for each birth in the family, together with the fees of doctor and nurse for a period of two weeks previous to the birth of a child and for as long after as may be considered necessary. The company have made arrangements with a number of doctors and nurses, so that the patient has a choice.

Vacations For All

Two weeks' annual vacation on full pay is given all workers, whether in factory or office. To aid the employee in securing the greatest possible pleasure and benefit from his holiday, a vacation bureau is being established which will endeavor to give the inquirer every assistance in making the most of the holiday.

In the case of an employee who has ten years' service to his (or her) credit, becoming permanently disabled, provision is made to pay a sum which will meet the individual case. Each problem will be decided by the Board of Managers, who have authority to do what they consider best under the circumstances.

Old Age Pensions

Persons who have been in the employ of the company twenty years (or more) and have reached the age of 65 years (in the case of a woman 55), are given a competence based on length of service and the average of the highest ten years' pay. 1½ per cent. of this amount is paid for each year of service. Twenty years' service would entitle a man to 30 per cent. of his highest pay.

Legal advice is provided not only in the case of the employee, but for any member of his family. The company will not, however, defend actions at law, unless in protection of a member.

Each person is entitled to a sick benefit of $2 per day, beginning on the fourth day of his illness, and continuing for the length of time to which his service with the company entitles him. Under unusual circumstances the Board of Management may at their discretion increase either the allowance or the period over which the payment extends. A visiting committee keep in touch with the employees who are ill. In cases where the Workmen's Compensation Act and the company's sick benefit come in effect together, both are not paid. The workman receives whichever grant would be the larger.

Under Local Board

The affairs of the association are managed by a board of seven men. The secretary, treasurer and two members of the board are nominated by the company, the four remaining members by the employees. The reserve fund, which covers these guarantees, will be invested in Victory and Liberty Bonds, thus insuring its reliability, although the Dominion Chain Co. holds itself responsible for the enterprise.

The affairs of the association will be administered with every regard for the wishes of the workers, who are invited to suggest alterations or improvements which may help the successful handling of the scheme and promote greater efficiency, co-operation and good fellowship.

Lowe Brothers Paints

Lowe Brothers LIMITED

PRODUCTION

THAT'S WHAT YOU WANT---FIRST AND LAST---IN YOUR BUSINESS

You get it by starting your paint stock moving off your shelves and **keeping it moving.**

By satisfied customers—By quality and service—By thought and work.

You have no time for anything but the **actual sale**—That's why our Service Department was created. It starts your stock moving **immediately** from your shelves and keeps it going to SATISFIED CUSTOMERS. Our Service Department **SERVES.** It FINDS and SENDS CUSTOMERS to your store and keeps them going there. It works and thinks ceaselessly for your Paint Department. It does not "go back on you" when you have been sold and

LOWE BROTHERS'
High Standard Liquid Paint

completes the service by its superiority. You wouldn't believe us if we told you it was the best. Don't blame you. **You would believe** if tests, made by yourself, convinced you High Standard can beat them all hands down. Write us about our scheme for increasing PRODUCTION in your store.

About
MURPHY COLORS
and the fourfold secret of their superiority

Colors like Murphy's are not produced by any mere chance formulae or perfected by haphazard manufacturing methods. Murphy Colors lead to-day because of four specific reasons, namely——

Purity of Pigments
Fine Grinding
Uniform Quality
Exactness of Shade

and added to this is a constant vigilance that precludes the slightest possibility of varying shades.

Murphy colors for customer satisfaction and better profit.

Japan Colors - Oil Colors - Paste Colors (ground in oil)

The Range that Simplifies Cooking

Offer your customers a range that can be depended upon always, a range that requires the minimum of care and attention—that bakes perfectly and is scientifically constructed to meet the demands of the average household. The ideal range for the purpose is the

British Crown Steel Plate Range

Exceptionally well-made and highly finished; it burns either coal or wood, and may be instantly changed to use either.

Special corrugated linings add life to the fire box and heating surface of the oven.

Fitted with high closet and white enamel splashers.

This range can be had either with or without a reservoir at a small extra cost.

The oven is 17½" x 11¾" x 21".	Weight without reservoir, 285 lbs.
Coal Fire box 18" x 7" x 7½".	Weight with reservoir, 310 lbs.
Wood Fire box 21" x 7" x 7½".	Price without reservoir, $46.35 Net.
4 9" covers. 2 5½" covers.	Price with reservoir, $51.95 Net.

We will be glad to tell you more about our stoves and ranges on receipt of a postal card.

Good Men

DO you need the services of a good retail salesman, traveller, or manager? The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

Stephens' House Paint Especially Adapted for Service in Canada's Extreme Climate

How much do jobs, on which poor paint is used, really cost? How many customers do you lose through selling certain brands of paints and varnishes on which profits are greater, but on which you have your doubts as to quality, wear, etc.?

Think it over.

If you are not satisfied with your paint for this season, if you feel that your increase will not be as great as you deserve, get in touch with us at once.

We have a special proposition to make you.

WINNIPEG, MANITOBA LIMITED

THE BIG MARKET

—*IS AT HAND*—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

THE EDEN DOMINATES ITS MARKET

Because its construction is time tested.
Because it has twenty-five inimitable and exclusive features.
Because it is nationally advertised.
Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Vacuum Washer

Easiest Lever Motion

This washer has some remarkably desirable features that appeal to every woman. It is operated by a wooden-handled lever, or by a foot stirrup provided to operate the machine while sitting.

The vacuum cups, shown in the cut, can be raised or lowered on the plunging shaft. This permits four different adjustments to suit large or small washings. This washer has been tested and proved. It's a sure and satisfactory seller. Write for information.

Products of Experience

Many years' successful experience in the Roofing Business has given us a thorough knowledge of roofing requirements. And we've used this knowledge in making Everlastic Roofings.

They are made with the greatest care and undergo the rigid inspection that we know to be necessary. They are made to satisfy and to give the kind of service that will bring customers back to your store.

For it is only satisfactory service from what you sell that will keep your customers. A roofing that won't last—no matter how cheap the first cost—is a costly buy for your customer. And he'll remember where he bought it and nurse a grievance.

Everlastic Roofings sell for a fair price and you can be sure that your customer will get satisfactory service from them; which means that your customers will have confidence in you and the goods you sell.

Everlastic "Rubber" Roofing

Thousands upon thousands of buildings are protected from wind and weather by Everlastic "Rubber" Roofing. It is made of high-grade waterproofing materials and is tough, pliable, elastic and very durable. It can be sold with perfect confidence that it will give satisfaction.

Made in 1, 2, and 3-ply weights, each roll containing enough to cover 100 square feet of roofing surface. Complete with nails and cement for laps will weigh about as follows: Light (1-ply) 35 lbs.; Medium (2-ply) 45 lbs.; Heavy (3-ply) 55 lbs. per roll.

Everlastic Slate-Surfaced Roofing

The most beautiful and durable roll roofing made. Surfaced with real crushed slate in soft shades of red or green. The slate not only makes a very handsome roof but one that is fire-resisting.

Remind your customers that this roofing requires no painting. The colors are fast. Comes in rolls 32 inches wide, weighing about 80 lbs. Nails and cement included in each roll.

Write nearest office for prices and further details.

Paints and Varnishes

WHATEVER it is that requires a coat of protection, there is a *Sherwin-Williams* product to fill the bill. There is a preparation for every purpose, from a chair to a church—from a barn to a bookcase, and the *Sherwin-Williams* label means that it is the best value procurable.

Easy to apply, economical to use, made from time-tested formulas with the best of ingredients, you should insist on getting *Sherwin-Williams* products—be it paint, varnish, stain or enamel.

There is a dealer in your town who sells the S-W line. Look for the sign as above and consult him.

Save the surface and you save all" *Paint & Varnish*

To Sherwin-Williams Dealers

The advertisement which is reproduced above in reduced form is appearing in large space in magazines circulating all over Canada.

It is only one of the many methods used by us to keep the S.-W. line prominently before the purchasing public.

We are advertising to produce business through your store. Are you ready to take care of sales? Is your stock complete? Look it over and send in your order for lines that are running short.

OWL METALS

We are continually being asked by mail order houses to fill orders for Owl Babbitt Metal. This business should be going to the local hardware dealer. Better keep a stock on hand.

OWL METAL CO., LIMITED, WINNIPEG

Make a Substantial Addition to Your Annual Profit

FIRE ESCAPES

To sell a fire escape is a good piece of business for one day. Many live hardware men are taking orders for our products, such as Fire Escapes, Marquises, Iron Fence, Memorial Tablets, Steel Lockers, Steel Cabinets and Shelving, Wire Window and Machinery Guards, Wire work of all kinds, General Builders' Ironwork and Ornamental Iron, Bronze and Wire.

Dozens of orders in these lines may be picked up without any trouble. Your profit is liberal, and we co-operate to the fullest extent, furnishing blueprints, diagrams and estimates where required.

Write for further information.

Mr. Merchant:

When you are finished with this paper pass it on to your clerks. It will help them to help you, which means increased business.

ADVERTISING to be successful does not necessarily have to produce a basketful of inquiries every day.

The best advertising is the kind that leaves an indelible, ineffaceable impression of the goods advertised on the minds of the greatest possible number of probable buyers, present and future.

"You should have used a DAYLO!"

Another Eveready Big Drive

DAYLO SAFETY FIRST WEEK, OCTOBER 4-11TH

In honor of Fire Prevention Day, Oct. 9th.

HERE is a big national event that Eveready has put to work for Daylo dealers this year.

"Fire Prevention" will be tied up tight to your store, the demand centered there, through a powerful chain of advertising co-operation that is bound to pull public interest *your way*. Newspaper, magazines and billboards are being linked together to put across Daylo as the cheapest and most certain form of fire insurance known.

See that your Daylo distributor supplies you immediately with ample stock to meet the resulting demand, not forgetting plenty of renewal Tungsten Batteries.

Mail the coupon to us today so that you can cash in on this big drive; you say the word and we'll send you all the store and window material.

CANADIAN NATIONAL CARBON CO., Limited, Dept. 213
Toronto, Ontario

You can count on strong store and window displays from me for Daylo "Safety First Week", if you will send the special sales helps and display materials promptly.

*Name*_____ *City*_____

*Address*_____ *State*_____

This Daylo "Safety First" medal design will appear in all October Daylo advertisements, and lithographed in full colors, in *your window*, if you send the coupon now.

Public Finance Disaster of Early Canadian Days

The almost forgotten experience of our forefathers, of which, to quote Sir Oliver Mowatt, "The effect was to diminish the value of municipal securities generally, and to corrupt the moral sense of the people with reference to moral obligations," makes a fascinating and thought-stimulating article as presented by Dr. J. Murray Clark in recent issues of THE FINANCIAL POST.

Dr. Clark, dealing with this Municipal Loan Fund of the fifties, says of its author, Sir Francis Hincks:

> He had in some respects genuine ability and, in matters which he understood, rendered considerable useful public service, but he was an idealist and a theorist without any practical grasp of the rigorous laws and unyielding facts of finance. He was patriotic and well-meaning, but his patriotism and good intentions did not save the country from the inevitable consequences of his scheme which those able to think clearly on matters of finance perceived from the beginning. He possessed in an eminent degree that fatal fluency of persuasive speech with which so many of our politicians are endowed, and swayed the people, for whom he expressed and probably felt sincere devotion, with superficial catchwords and glittering generalities not founded on the stern realities of economic laws. The confidence he inspired only enabled him to do infinitely more mischief than would otherwise have been caused by his scheme, and did not protect the people from the losses and distress resulting from disregard of sound business principles.

There is more here than an interesting story of early days. Here is a marking on the map of Canada's history by which all interested in the country should make their reckonings, should chart their course of action.

THE FINANCIAL POST is continually presenting such articles. Consider some which appeared in the early issues of August:

Grain Growers Condemned by a Retailer.
Bolshevism and Public Morals.
Some Alberta Oil Wells Are Showing Profit.
Bright Outlook for Canadian Pulp & Paper.
Why Henders Fell Out With Grain Growers.
Sawyer-Massey on the Road to Better Times.
Sir Adam Gets in Some Fine Work at Guelph.
Dominion Loan Campaign to Start Oct. 27.
Frank A. Vanderlip Continues His Vivid Survey of War-ridden Europe.
Make Maturities of Loans as Short as Possible.
Tariff Action by Liberals Step in Dark.
Canners' Head Gives Answer to Prof. Jackson.
Small Retailer Renders Service to the Community.
Reorganization of the Standard Reliance Corporation.
British Will Not Unload Their Canadian Bonds

You will find enlightenment in the balanced viewpoint of THE FINANCIAL POST'S articles and editorials. You will find its "Answers to Enquiry" department of value. THE POST is the paper for the thinker—be he rich or poor; the paper for the man who is eager to study not only what is best for his business, but what is best for Canada. This is the paper which you may receive weekly for one year at a cost of $3.00. Fill in the attached coupon:

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

EVERY JOBBER IS INTERESTED

in a Belt Coupler that requires only two tools to attach and brings satisfaction to users and repeat orders from dealers.
Chase Belt Couplers are doing it. They are quickly applied to all makes of traction belts. They hold; they save machinery; they make any belt an endless belt; they lie perfectly flat and the belt runs smoothly; they do not weaken or injure a belt; they give longest service.
Get full facts and prices, Mr. Jobber, and you'll want to "job" them because the Profit, like the Chase, is right.

GREB RIM TOOL

Operates all types of cross-split rims. "Wallop" your rim with a hammer to force it in or out of place and you are bound to have greater trouble next time. Do the sensible thing: Provide yourself with the best rim tool on the market and save time, trouble and rims. TEN DAYS' TRIAL.—If your jobber does not have them, we will send you one. Try it ten days. If not satisfactory, return it to us and we will refund your money. We also make the Greb Automatic Grip Puller.

Every Canadian Should Read
OCTOBER MACLEAN'S

The contents of MACLEAN'S for October will grip the interest of Canadians. There will be a big demand for the October issue. It will be a trumpet blast for a national awakening. It will mirror Canada's great West — politically, socially, industrially. There will be action in every section—plenty of it. It will be a red-blooded issue in every respect. Read this list of contents—then send in an order for a generous supply of October MACLEAN'S. Western dealers should order an extra supply.

"WANTED—A WHITE WEST"

***By* T. B. COSTAIN**

An article on the determination that has gripped the Western Provinces that no more aliens are to be allowed in that part of the Dominion. It includes the first complete story of the sensational labor developments in the Drumheller coal mines.

CONTENTS OF MACLEAN'S OCTOBER, 1919, ISSUE

"We Must Start Afresh,"
By Ralph Connor.
An article on the need for Canadians to gain a new viewpoint on things political, social and religious as a result of the war.

"Those Pesky Farmers Out West,"
By Hopkins Moorhouse.
An article on the grain growing movement and the way in which it is upsetting all political calculations.

"Fifty Years in the West,"
By Professor W. T. Allison.
A story of the remarkable business career of J. H. Ashdown, of Winnipeg, one of the earliest pioneers of the prairies.

"Solving the Problem of the Arctic,"
By Vilhjalmur Stefansson .
The last instalment of this remarkable exclusive narrative of his five years of exploration in the north.

"Grappling For New Holds."
By J. K. Munro.
The usual monthly review of political developments, giving inside information on the new line-up of the parties.

FICTION

"The Airy Prince,"
By Arthur Beverley Baxter,
Illustrated by E. J. Dinsmore.
A novelette, complete in this issue, by the author of "Mr. Craighouse of New York, Satirist," and "Klondyke Boyle,"—a delightful and witty story.

"Spanish Doubloons,"
By Camilla Kenyon,
Illustrated by Louis Royal.
The start of a new serial by a new writer, but one who promises to rival Mary Roberts Rinehart. It is a story of a treasure hunt written in rather high vein and with an engaging love story. It will wile away many pleasant hours for the reader.

"Ebb and Flow,"
By C. W. Stephens,
Illustrated by W. Goode.
The third and last instalment of this intensely interesting business story.

"His Majesty's Well-Beloved,"
By Baroness Orczy,
Illustrated by C. F. Peters.
The fourth instalment of this historical novel.

"The Banshee Bell,"
By Edith G. Bayne,
Illustrated by D. G. Summers.
A bright love story.

MAKE A BIG WINDOW DISPLAY

The dealers throughout Canada who are making a big success of MACLEAN'S are displaying the magazine prominently—talking about it and pushing it. They are taking advantage of the natural demand—using it as a foundation for profitable business. Make a display of October MACLEAN'S.

CARBORUNDUM PRODUCTS

IN THE SERVICE OF THE GARAGE AND REPAIR SHOP

Carborundum Valve Grinding Compound fairly eats away the Carbon deposits

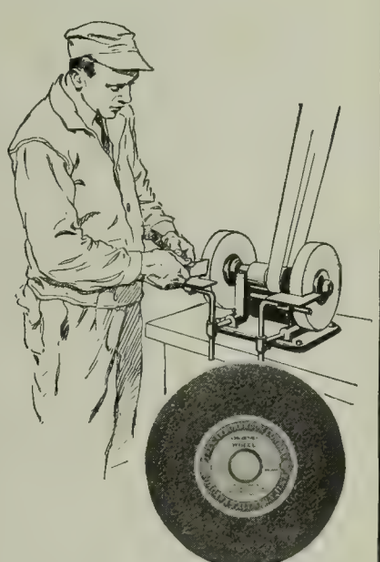
Here Is Profit!

EVERY garage, from the biggest to the modest little back yard affair, has use for these Carborundum Products.

Carborundum Valve Grinding Compound, the quick, clean cutting compound that does the work better, easier.

Aloxite Cloth — the cloth that cuts — for finishing parts — for general metal work—cuts faster, lasts longer.

For grinding tools, parts and fittings —for general grinding work, Carborundum Grinding Wheels and Carborundum Niagara Grinders.



Carborundum Products are Nationally Advertised

See that they are added to your stock. The demand for them is increasing every day everywhere. Let us send you folders to circularize your auto trade. Write us regarding Carborundum displays.

The Carborundum Company
Niagara Falls, N. Y.

Aloxite Cloth—the cloth that cuts faster, lasts longer—

Carborundum General Purpose Wheel for grinding parts, fittings and tools.

You can put the handy Niagara Grinder to a dozen and one uses.

Oatmeal In The Radiator

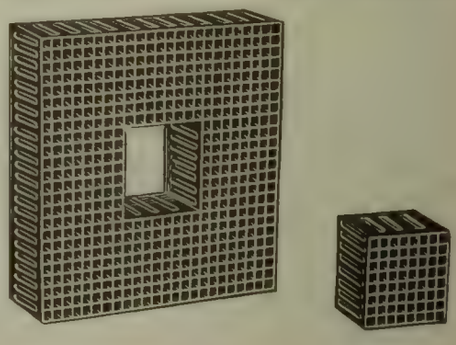
is an old-fashioned method of trying to stop leaks. It only works once in a long while, and then by mere chance.

What your customers really want is a radiator that DOES NOT leak at the slightest opportunity. Or, if it does, through some unforeseen circumstances, can be repaired at very short notice.

Engineers have decreed that Cellular Radiators are the best because they do not leak easily. But there is a difference between cellular radiators (some are, and some are not) but,

McKINNON RADIATORS

Are



"Really Cellular"

They are simply a combination of individual cells. Each rectangular section is made by wrapping the metal around the forming mandrels, not stretching or drawing it around the core, the very method that hardens the metal and makes it crack so easily.

Corrosion is also one of the evil influences of water on the radiator. Overcome this by carefully tinning the inside and outside of McKinnon Radiators. The sides are straight downward and corrugated so that the water is constantly in agitated action, carrying sediment away from the sides, so that the heat can be transferred to the sides and carried away by the cool air passing through the air cells, keeping the engine cool.

The water tubes are also constructed to permit of an outward strain many times before a burst will take place.

McKinnon Radiators do not leak unless they are forced to. But should this happen, the motorist would just plug up the leaking section with tire dough, or wood plugs, refill the radiator and drive on. Later, the repair man would simply replace the broken section with the new cells.

Vibration has no terrors for the McKinnon Radiator —because it is a solid unit, not an aggregation of tubes, fins and separate pieces.

This is one line every garage man and dealer should carry. We invite correspondence.

Have You Seen Our New Sales Helps?

JUST off the press! A series of advertisements written, drawn and made into plate form for the Hardware Merchant's special use.

Exclusive use is given for the requested plates, except in cities where merchants intend to use them on pamphlets.

The advertisements were illustrated by one of the best artists, the copy was written by the same experts who are responsible for the successful O-Cedar Advertising.

You now have the opportunity to unburden yourself of the hard work of getting up "ads" for your local paper. All the advertisements are seasonable, attractively arranged and are sales producers.

If you have not received an "O-Cedar Sales Help," please ask for one. Take advantage of this free service and its use will result in your benefit.

The first merchant to make a request gets first choice of advertisements. Send your request to-day.

Just as Important

to keep cold out as to keep heat in

WITH the prospects of a severe winter ahead and the uncertain delivery of coal, you will be wise to put in a substantial stock of weatherstrip and advise your customers to get busy putting it on. Every window and door protected against winds entering and heat escaping means pounds of coal saved. And coal means not only money these days but trouble in trying to secure it. We carry such leading makes of weatherstrip as the following—

"ZERO"

the regular felt and wood strip, probably the most used strip on the market.

"CLINCHER"

which is also of felt and wood construction, but made as shown in illustration so that the nails hold both felt and wood.

"FROST KING"

This is always a popular seller, made of felt with the heavy reinforced edge. Sold by the yard. This is made for windows and doors.

THE "BEST"

In two styles. The first is a spring bronze strip 1¼ inches wide in coils; the second is the patented "Best" strip, sold in proper lengths for windows. This strip (shown in illustration) is a most effective protector, the kink or spring which holds the window tight never comes out owing to the construction. Can be applied easily by the merest amateur. Sold over the counter.

Another Coal Saver—*Samuel's Ash Sifter*

There is no question about the advisability of saving coal this year. The question is how can I most easily do it?

The Samuels' Ash Sifter is probably the best means—enables a child to do the sifting necessary; is as nearly dustless as any sifter on the market. More so than most kinds. Efficient in operation.

Order your stock of coal savers from the "Rice Lewis" man when he calls, or write direct. Don't leave too late.

GARAGE HARDWARE

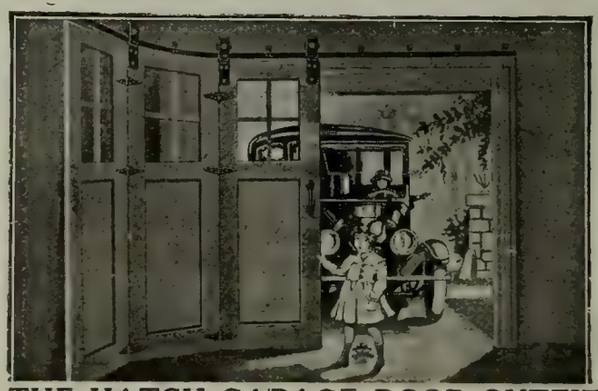
The swinging type of garage door has the advantage of easy operation, economy and weather proof construction. This popular set has a loose-pin, reversible "T" hinge. It may be used as a full surface hinge, or the T part can be reversed and mortised in the jamb when used on a brick building. After installing, the end of the pin may, if desired, be slightly riveted, preventing removal.

One set consists of the following packed in a neat, strong carton, with screws:
3 pair 8-inch Reversible "T" Hinges.
1 only No. 820 Chain Bolt.
1 only No. 830 Foot Bolt.
1 only No. 5 Door Pull.
1 only No. 29 All-Steel Latch.
Set No. 801 same as above, except a No. 27 Latch, instead of No. 29 All-Steel Latch.
The following finishes are carried regularly in stock: Japan, Dead Black Japan, Sherardized, Sherardized and Dead Black Japan.
Weight, per set, 12½ pounds.

800-801 Garage Door Sets

The demand for these well-liked sets is steady and consistent.

The production of automobiles cannot keep pace with the sales. This creates a need for new garages all the time, and a continuous demand for garage hardware.



Are you taking advantage of this situation by handling National Garage Hardware?

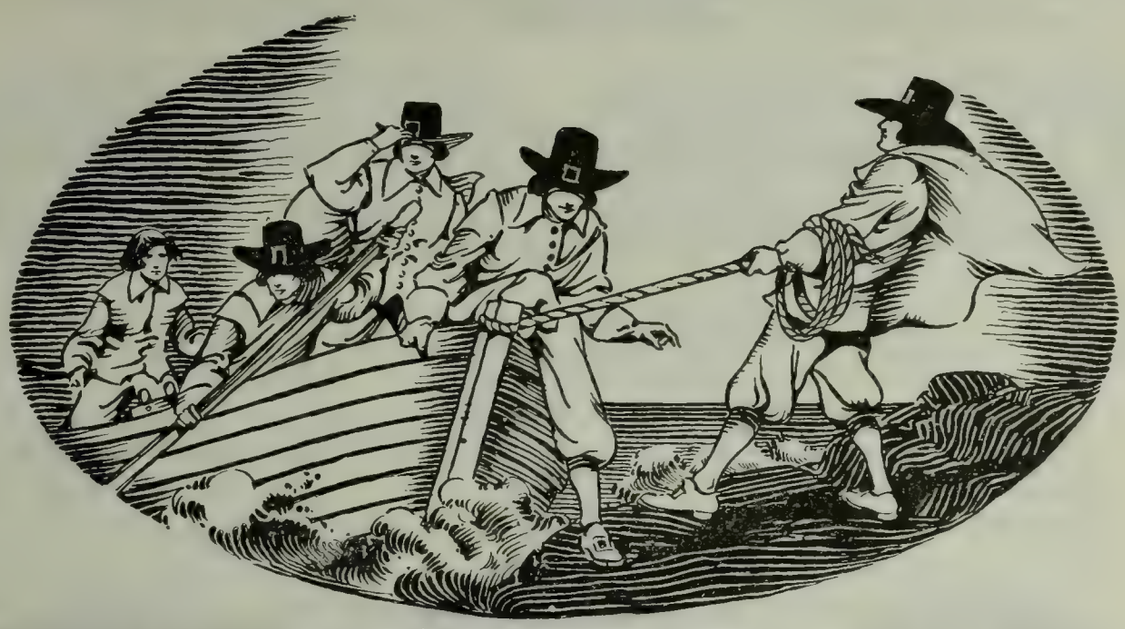
Why the

"Premier" Ranges



Sell

Its appearance, its conformity and its value appeal to the buyer.
The nickeling is just sufficient to give it a bright, attractive appearance.
The conformation is attractive.
The value is there on account of the material used, and the skilled workmanship put on it.

The oven, fireplace, warming closet and reservoirs (either right or left), receive expert attention, and everything is RIGHT. It is a repeater. Try them.

The Thomas Davidson Mfg. Co., Ltd.

THE FIRST ARTICLE THAT CAME TO PLYMOUTH

THE first article to come to Plymouth was a piece of rope. It was the painter of the small boat held in the hand of the first member to step ashore of that band of explorers sent out by the Mayflower to find a proper landing place.

It was a natural act, and became significant only in the light of after history, when two hundred and four years later was established at Plymouth a ropewalk destined to become the largest in the world.

For ninety-five years Plymouth has been making and shipping to every part of the civilized world, rope—good rope—"The Rope You Can Trust."

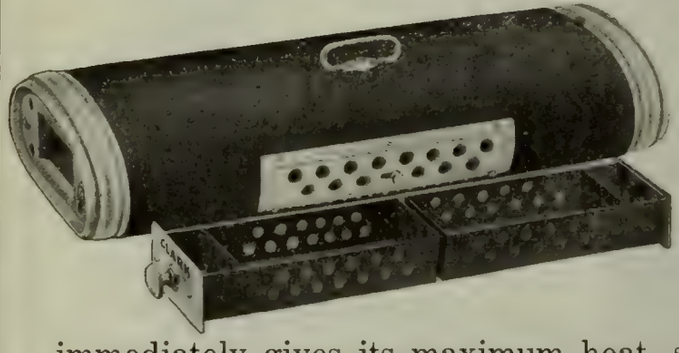
CLARK INDESTRUCTIBLE STEEL HEATERS

Opens Soon. Are You Ready?

A stock of Clark Heaters and Clark Carbon Fuel represents but a small investment for a quick turnover and good profit.

The No. 7-D here shown is very popular Clark Heater



There are several other styles. All good sellers.

The Famous No. 7-D Clark Heater

Indestructible steel body, slanting top, 14 inches long, asbestos insulation, covered with dark green Brussels carpet. All outside metal parts nickel plated and polished. Side and end controls for regulating heat. An excellent heat-giver of attractive appearance. Weighs 6 lbs. Price attractive.

For everyone who drives in cold weather. Inexpensive and the cost of operating a trifle.

CLARK CARBON--THE WORLD'S BEST HEATER FUEL

Densely compressed into brick form to concentrate the maximum heat giving properties in the smallest volume and to produce a fuel so compact as to last all day, giving off a continuous and satisfying amount of heat.

A brick of Clark Carbon is placed in any fire or flame for two or three minutes until red, then placed in the heater drawer and immediately gives its maximum heat, so the drive can be started immediately and with the assurance that should you be gone all day you will have a satisfying volume of heat without recharging.

Handle the Genuine Clark Heaters and Clark Carbon. Standard for over 25 years and cost less.

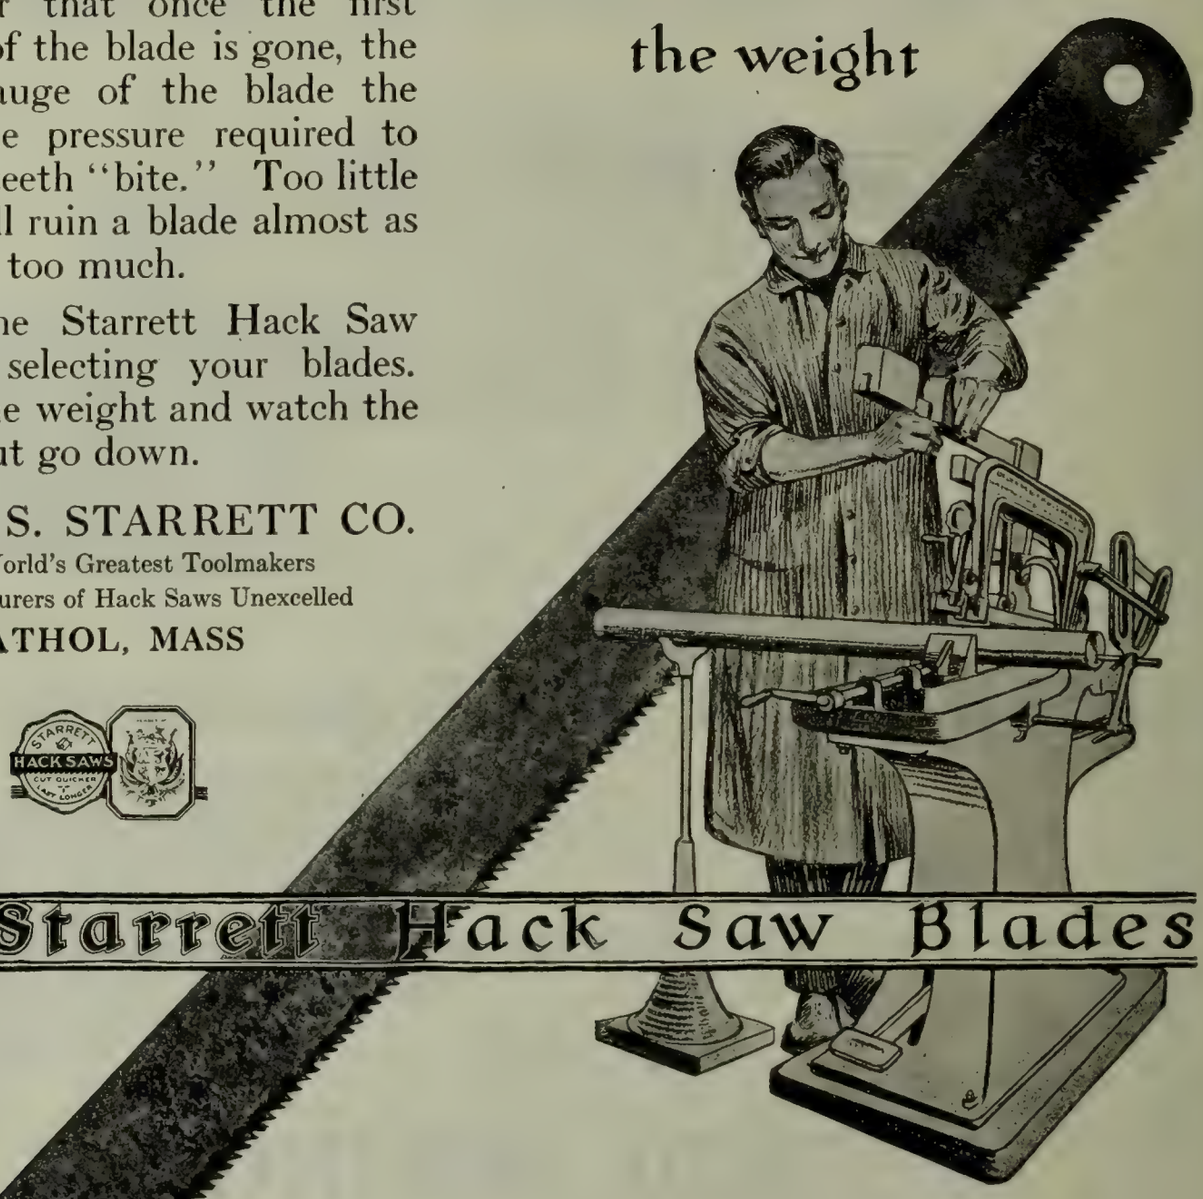
To cut down the cost per cut

Put on the Weight



If you're cutting with a medium or heavy power machine, start out with a good, full, 45-pound pressure after the first two or three strokes. As the number of cuts progresses, increase your weight. Remember that once the first keenness of the blade is gone, the heavier gauge of the blade the greater the pressure required to make the teeth "bite." Too little weight will ruin a blade almost as quickly as too much.

Follow the Starrett Hack Saw Chart in selecting your blades. Put on the weight and watch the cost per cut go down.

The Perfect Drive

A good hammer is a lot more than a chunk of metal on a wooden handle.

A "W & B" Adze Eye Nail Hammer is designed as carefully as a piece of fine machinery.

The head is drop forged for density, toughness and striking or pulling strength.

The claws have a sharp, tapering grip that will take a bite on any part of the body of a nail and pull it through and out—forward or backwards, head on or head off.

The handle is air dried, straight grained white hickory, fully able to stand the heavy leverage that a strong arm puts against a stubborn nail.

The whole hammer is delicately balanced so that the workman gets the big drive or the hard pull with the least expenditure of force.

All "W & B" Adze Eye Hammers are uniform in size, weight, balance, quality, and all are made in Canada under an organization policy that guarantees good goods and complete satisfaction.

"Make it better than anyone else can make it, put your name on it and stand by it."

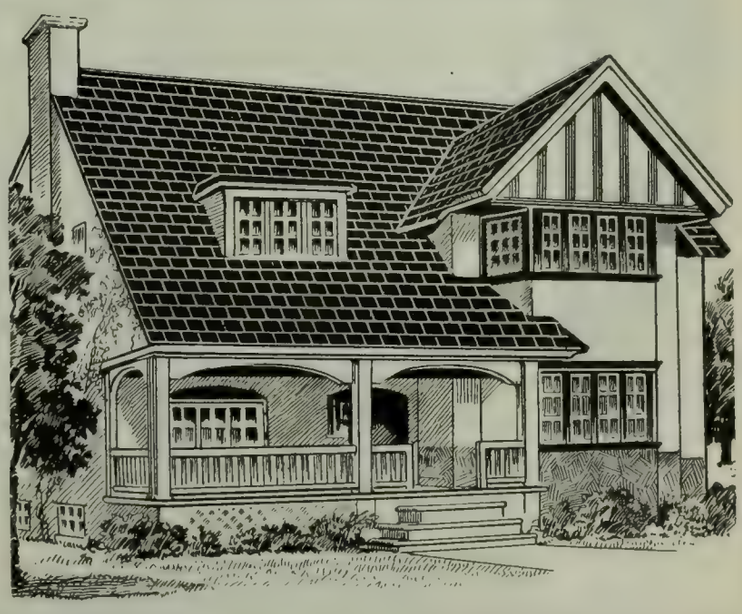
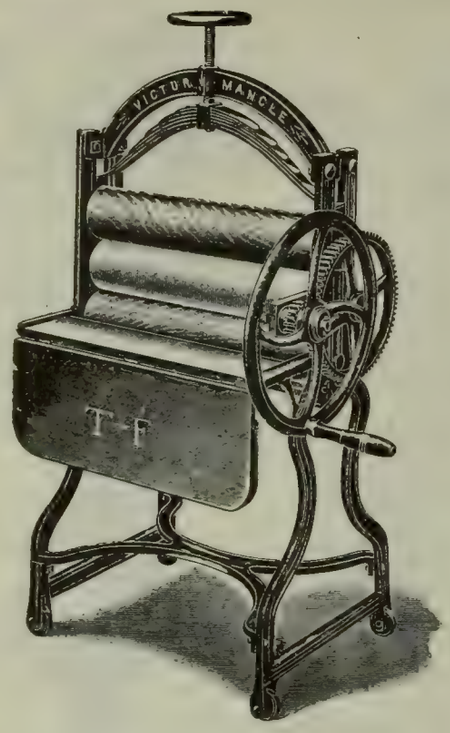
Brantford Asphalt Slates in big demand



The output of Brantford Asphalt Slates in 1917 was double 1916—1918 double 1917. This indicates that there is a big, growing market for this artistic, durable, fire-resistant roofing.



Progressive hardware dealers who push the sale of Brantford Asphalt Slates will find it a very profitable line. In fact, there are good profits to be made in the entire line of Brantford Roofing—

Asphalt, Rubber, Crystal, Leatheroid and Standard Mohawk in rolls—Asphalt Slates in individual size shingles, and the Asphalt Slab Slate, which is four shingles in one—and Climax Sheathing Paper, a big seller.

The hardware dealer can meet every roofing requirement with this line of nationally advertised, first quality roofing.

"The Holders that Hold"

TO keep pace with the rapid progress of the metal-working industries, speed—and hence economy—in production is essential. In modern shops, using heavy cuts and continuous high speeds, Williams' "Agrippa" Tool Holders meet the most exacting demands satisfactorily.

They are sturdy, dependable tools, the result of nearly half a century of experience in the specialized production of *Superior* Drop-Forgings, and are made in a wide range of sizes for all regular machining operations:—Turning, Boring, Planing, Threading, Knurling, Cutting-off and Side Work.

Our Booklet describes them fully—may we send it?

"Agrippa" Turning Tools are furnished in either Cam or Set Screw Pattern.

4 Good Reasons --READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 18 per cent. greater strength than Cut Thread Bolts.

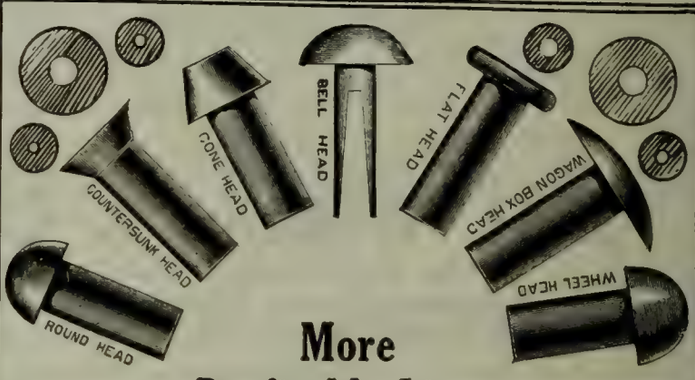
NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

THE NORTHERN BOLT, SCREW AND WIRE COMPANY, LIMITED - OWEN SOUND, ONT.

VOL-PEEK

FIRST AID IN THE KITCHEN-



IN EVERY HOUSEHOLD

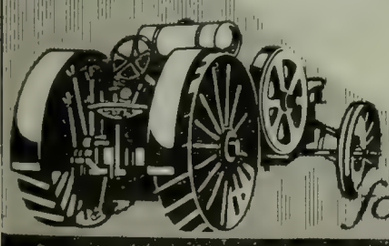
"for Oil Heaters"

"for Oil Cookstoves"

SELL *the* OIL *thats* BEST *and* CHEAPEST

The conditions are favorable for a large increased use of coal oil as fuel this year. Are you selling Imperial Royalite Coal Oil? Imperial Royalite Oil is worthy of your best selling efforts and constant recommendation.



Considered from the consumer's viewpoint, Imperial Royalite Coal Oil gives more heat, light and power than any other oil on the market. Customers buy it for less per gallon. Thus it combines two all-important features—**superlative quality** and **lower price**—big, vital considerations to every user.

Considered from your viewpoint, Imperial Royalite Coal Oil is a quick, easy and steady seller. It costs you less to buy than other oils. That makes its margin of profit as great or greater. Buying for less you sell for less. That sells more gallons.

Imperial Royalite advertising will help you make sales. The name and reputation of Imperial Oil Limited and its valuable facilities for producing, refining and marketing back Imperial Royalite quality. Imperial distribution insures you a ready supply of Imperial Royalite Coal Oil at all times. Place it on your stock list to-day. Tell new customers about Imperial Royalite Coal Oil —induce them to try it. Good for them, good for you.

PEERLESS POULTRY FENCE

The kind that endures—in place to stay and please — because it lasts. It looks well and is always in place — "it stays put." It's the dealer's friend. You can put up the strongest kind of a guarantee—we back you up.

We build this fence of open hearth steel wire with all the impurities burned out and all its strength and lasting qualities retained. Peerless poultry fencing is extra strong, heavily galvanized, can't sag, won't rust, never gets out of shape, keeps in and keeps out—both great and small.

Poultry Will Pay the War Debt

The Peerless Lock holds the intersecting wires in a firm grip that is non-slippable. Compare it with any other poultry fence. The Peerless fence is built to stand any test. It is durable.

Note the extra close spacing at bottom, no base boards required. Turns the small chicks, keeps small animals in or out.

WRITE FOR DEALER'S PROPOSITION

We show you where the big trade is for parks, lawns, cemeteries, fences plain and ornamental for farms, ranches, all purposes. **Write for Catalog.**

Canada ranks high in the poultry business. A well fenced poultry farm means larger profits when Peerless fencing is used.

NEW IDEA WARM AIR FURNACE

The furnace that enables you to give your customers a heating unit that entirely fulfils every demand. It thoroughly heats every part of the house with pure, dry, warm air. The New Idea warm air furnace is exceptionally well made, and is guaranteed. Economical in fuel consumption—there is no waste or clinkers from either hard or soft coal. The New Idea Duplex Grates (patented) work so efficiently that every scrap of fuel is consumed.

An extra large ash pit prevents ashes from banking up and burning out grates.

Fire pot, one piece, guaranteed for five years, with deep flanges, adds one-third more heating surface—an advantage where quick heating is required.

Made in seven sizes to suit every description of building. The New Idea Warm Air Furnace offers dealers an opportunity to build up a sound profitable furnace business.

We will be pleased to submit farther particulars and interesting prices on request.

The Canadian Who Bullied the Bolsheviks!

WHEN war broke out, Colonel "Klondyke" Boyle took across, at his own expense, 200 staunch Yukon volunteers. He was sent to Southern Russia, and in six weeks turned the transport system there from chaos into efficiency. He fed the starving Russian and Roumanian armies. He arranged temporary peace terms between Bolsheviks and Roumanians. Aided by twenty Chinese murderers and a brave Canadian girl, he bluffed the Bolsheviks and Austrians, in a tremendous exploit which won for him the title "Saviour of Roumania," and the personal thanks of the Roumanian royal family.

Read this story of "Klondyke" Boyle, by Arthur Beverley Baxter, in September MACLEAN'S—it starts on page 13.

"Growing Under Gouin"

—tells the amazing story of development of Quebec Province during the past fourteen years —in road-building, finances, industries and education.

"Meet Mr. Habitant"

—What does the rest of Canada know about the Habitant of to-day? Does he talk like Drummond's poems? This article, by Thomas M. Fraser, forcibly depicts the assets Canada has in French-Canadian stability and thrift, and will go far to remove any lingering prejudices which may exist in some minds.

Other Big Features

The Crowning of the King—By J. K. Munro, the pungent, pithy, political pundit.

Nuorteva's Propaganda—By C. H. Cahan, K.C., recently Director of Public Safety.

The White Eagle at Niagara—By Major C. R. Young, late adjutant Polish Army Camp.

The Problem of Our New Canadians—By Nellie McClung.

His Majesty's Well-Beloved—By Baroness Orczy.

Canada's Great National Asset—By D. B. Hanna, president Canadian National Railways.

Teddy Bear—A wonderful, poignant, Robert W. Service poem.

On Leave—A light, frolicsome story by Harry Bailey.

Evil Spirits—Another Bulldog Carney story, by W. A. Fraser.

Ebb and Flow—A new story by C. W. Stephens, who wrote "Man and Wife."

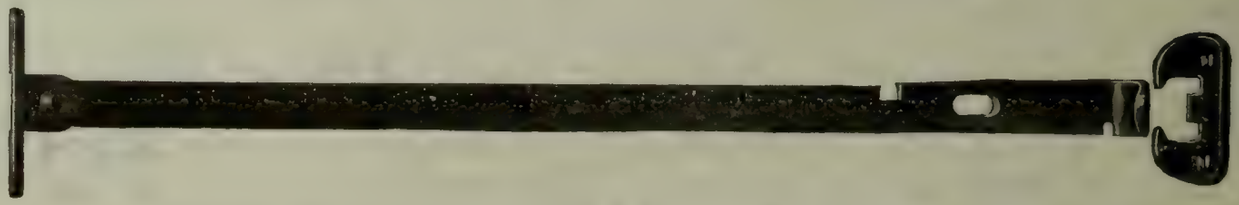
First we will tell about

STANLEY STORM SASH HARDWARE

No. 1715 is the best selling Stanley hanger. An angle on the hook and eye guides the eye up and over the hook so that the sash can be hung quickly from the inside. These hangers hold their storm sashes snugly to the window frame.

Fastener No. 1719 hold the sash open firmly for cleaning and ventilation, lock it securely and are heavy, strong and easy to apply and operate.

Here's a suggestion. Let your customers know that they can cut down their coal bills by equipping all their windows with storm sashes. Every additional storm sash put up in your locality means increased sales in glass, putty, paint and Storm Sash Hardware.



We are helping you sell more Stanley Storm Sash Hardware this fall by advertising it in farm papers and other publications, such as the Literary Digest.

It isn't any too early to order your stock of Stanley Storm Sash Hardware. Put it down on your want book to-day.

Vol. XXX. TORONTO, SEPTEMBER 20, 1919 No. 38

Japanese Trade Pirates Get Set-Back

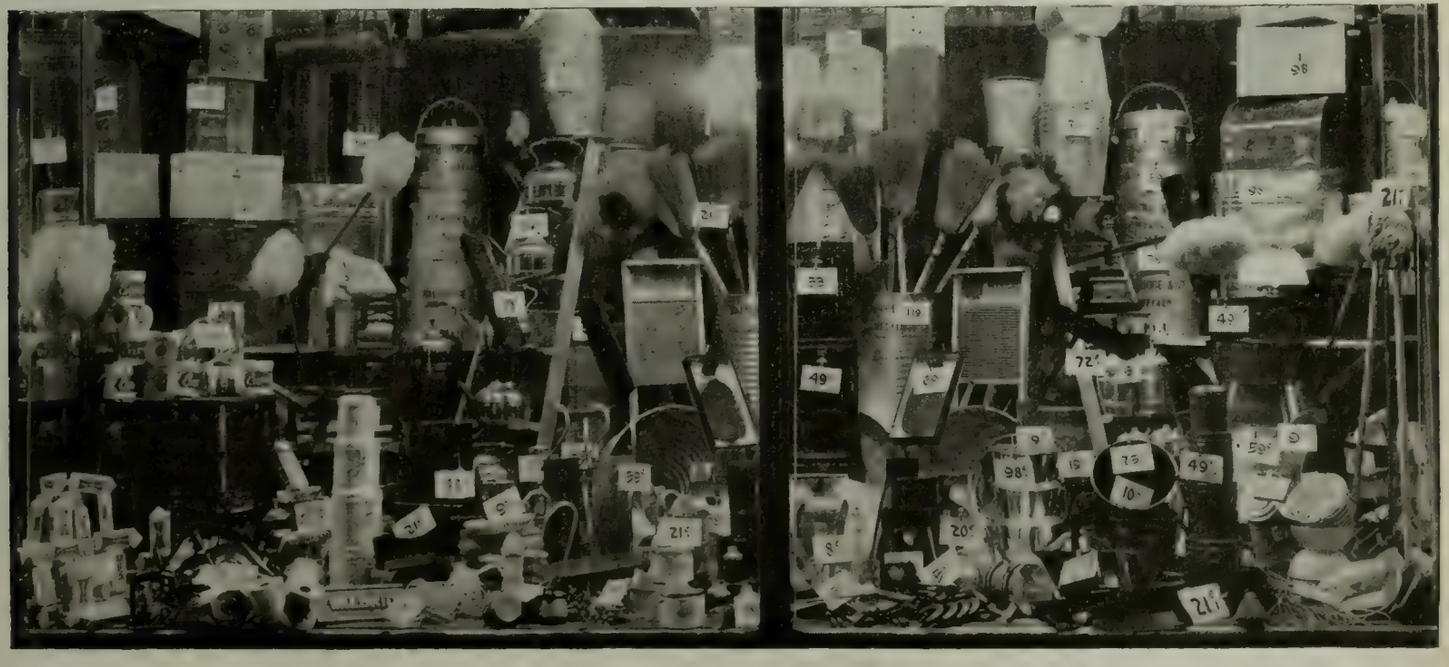
Decision of Supreme Court of Japan on Trade-Marks of Far-Reaching Importance—Lock Manufacturer Wins Out.

HARDWARE AND METAL has on several occasions referred to the great difficulties which were being experienced by Canadian, United States and English manufacturers whose trade-marks were being unscrupulously pirated by Japanese manufacturers. A great many lines have been affected, including razors, pocket and table cutlery, electrical goods, fountain pens, locks, and a wide range of goods in which the hardware traed is interested.

One illustration of how the Japanese have been using any and every means to extend their markets is shown by the reports regarding razors, which are being offered to the trade in India, and which was referred to in HARDWARE AND METAL of Aug. 9. The razor is attractive in appearance, and is also neatly made, finished and cased. The quality of the steel, however, is poor and the blade is not calculated to cut well after using a short time. The blade is of full size and ground nearly full hollow, and bears the trade-mark of one of Sheffield's oldest and best-known cutlery firms, although it is marked "Made in Japan" on the reverse. The blade also appears to have been nickel-plated. At any rate all of it with which the grindstone has not been in contact, such as the back and the tang, has a nickel coating and looks very well.

Many other imitations have been referred to in this paper from time to time. One Canadian manufacturer of electrical devices has had a great deal of trouble over imitation of his lines, and the same may be said of many other hardware lines.

Decision of Supreme Court



The Supreme Court of Japan, in a suit instituted by a Philadelphia manufacturing company for the protection of its trade-mark rights, has handed down a decision which must rank as epochal in international trade.

The decision, in unqualified terms, upholds every essential of trade-mark rights guaranteed under Japan's treaty agreement with the United States. It safeguards not only American trade-mark owners, but owners also in every other country having similar treaty agreements with Japan. It places the spirit of the law of Japan on a plane equal to that occupied by Western peoples, and it affects, directly and most favorably, manufacturing interests involving annual production amounting to billions of dollars.

The trade-mark concerned in the litigation is that of the Miller Lock Company, of Philadelphia. The very existence of this mark is due to the evil practice of piracy of good will, as good will inheres, in a trade name representing the consuming public's sole means of identifying any meritorious article or product.

Use of Trade Name

For a number of years the Miller Lock Company manufactured a line of padlocks branded "Protector, Jr." Sale of Protector, Jr., padlocks, in several sizes, became general not only in the United States and Canada, but throughout the civilized and uncivilized countries of the world. In 1904 a European manufacturer produced padlocks of the same shape, named them "Protector" and registered trade-mark rights in the stolen name. The Miller Lock Company having at the time no registration of

Above offers a good suggestion for a full window display of household goods.

its "Protector, Jr." mark in that country, was compelled to change to a new trade-mark, in the form of a scroll containing the name "Miller." This trade-mark was registered in the U. S. Patent Office, October 8, 1906, and in 36 other countries, date of registration in Japan being March 26, 1907.

The discovery was made in 1916 that the Crown Lock Company, of Tokyo, Japan, was manufacturing imitations of the Miller padlocks and stamping them with a facsimile scroll containing, in one instance, the word "Crown," and, in another, the world "Million."

Beginning of Suit

Legal proceedings against the infringing company were begun in the Japanese Patent Office at Tokyo, and the fight undertaken with a stern resolve to end definitely, if possible, all invasions against trade-mark rights, was based upon the weakest aspect of the owners' contention. Instead of alleging infringement by the scroll containing the word "Million," they claimed redress against the infringment committed by means of the scroll containing the word "Crown."

The Miller Lock Company's averment, therefore, claimed practically on the scroll alone and risked much by its voluntary choice. But, on the other hand, it put squarely up to the administration of Japanese law and treaty rights the essential principles involved in trade-mark suits, and called for a definition of unfair trade competition which must be on a par with the spirit and the administration of the law in the most advanced and just of Western countries. In a word, the fight was not one wholly of self-interest.

The material interests directly involved had grown, meanwhile, to world-wide magnitude. The Crown Lock Company's imitation padlocks were being exported and sold in competition with the genuine article in China, India, Australia, South America—wherever a market could be made on the strength of the good will created by the genuine trade-mark and the genuine padlocks.

American Claim Sustained

The Japanese Patent Office sustained the American owners of the trade-mark. The Crown Lock Company forthwith appealed to the Supreme Court of Japan to set aside the decision of the Patent Office. The litigation then appeared in its true light, as a fight for the essential principles underlying trade-mark treaty rights. A decision favorable to the American owners implied the absolute prohibition, under full penalty of law, of Japanese infringement of foreign trade-marks registered in Japan. The most distinguished legal talent of the Empire was engaged in the struggle, and court and Patent Office records were searched exhaustively for precedents. The decision reaches the United States at the time when Japanese padlocks, bearing a fraudulent scroll, are invading Canada.

It may be stated, briefly, that the Supreme Court of Japan, in its decision, has taken a liberal view of the Japanese Empire's trade-mark agreement with the United States—a view which is in full accord with the attitude of the courts in this country. Every American owner and, indeed, every other owner of a trade-mark duly registered in Japan is assured now that the courts of Japan will give him protection in the broad spirit of the treaties and the law.

Court Took Liberal View

The question at issue was not one of the Japanese Supreme Court's readiness to enforce literally the terms of the trade-mark treaty agreement, but rather, whether the Court's interpretation of those terms would be in the broad and liberal spirit of American and other Occidental courts. Thus the Supreme Court at Tokyo might have held that a trade-mark registration showing a scroll and name "Miller" was to be protected only as against an imitation of both scroll and name in combination as being both and jointly features essential to the trade-mark. Such could have been a strict view of the scope of the registration. Instead of so holding, the Court considered the question to be whether or not the imitation mark, notwithstanding the substitution of different English letters as embodied in the word "Crown" for the English letters constituting the word "Miller," would be sufficiently close to the registered mark to cause confusion in the minds of Japanese purchasers.

A decision so clear, in a case so representative, must be regarded as one of very great importance to all who are concerned with products bearing trade-marks having Japanese registration or having export possibilities calling for Japanese registration.

Menace of Oriental Imitations

During the past twenty years every trade and commercial body of the world has been confronted with a rising tide of Oriental imitations of widely known, high-grade Occidental products. It made little or no difference, apparently, whether or not the article imitated bore a trade-mark. But wherever it was trade-marked the injury inflicted by the imitation was doubled, because a very high proportion of the good will constituting the value of the specialty was not only utilized as stolen capital by the common trade enemy, but was, at the same time, lessened in value by the substitution of the inferior for the superior article, with inevitable injury to the reputation and good will that had been established on the basis of quality and trade-mark publicity.

The consequences of the long-standing evil have not been borne by Western peoples alone. It has weighed very heavily upon the Japanese themselves, injuring their reputation in international trade to an extent which, had it been permitted to proceed, must have affected even those high-class and reliable products—such as silks, teas, potteries, lacquers and enamels—for which Japan has so long been famed.

The decision should definitely re-establish Japan and the Japanese in the esteem of the business world, for it is Japan's formal, legal announcement that Japanese trade ethics are identical with those held by Western peoples.

Roofing Business Is Active Now; Manufacturer Looks for Busy Six Weeks

THE prepared roofing movement at the present time is a very brisk one, and this, according to a large Montreal manufacturer who expressed his views to HARDWARE AND METAL, will likely continue for another month or six weeks.

"It is really quite a difficult thing to keep pace with the business and to secure the required quantities of raw materials. We have been able to do this so far, and yet it gives us a great deal of concern. Orders have been coming to us in large numbers and it has been an excellent season."

This expression tells the tale—a different tale than that which some expected could be written a few months ago. It reveals the important fact that Canada has been prosperous, for the factor above referred to has an immense production capacity, and with this taxed to the very limit it is indicative of the activity in building. It emphasizes what investigation by HARDWARE AND METAL from week to week has revealed—that rural building in particular has been conducted on an increasingly heavy scale in recent weeks. It augurs well for the remaining weeks of the fall season.

Prices to Hold

In seeking to ascertain the tendencies as to price, HARDWARE AND METAL was given to understand that, unless something unseen turned up, there was little probability of any increases in price. There is just as little likelihood however, of declines on prepared felts or roofings, it was pointed out, the scarcity of necessary materials making it improbable that supplies could be secured for less money than at present.

BIG SALES NOW FOR CARPENTERS' TOOLS

"There is a large sale just now for carpenter tools, and this applies to all parts of the country," said the representative of a large hardware manufacturer to HARDWARE AND METAL this week. This informant handles several lines of cutlery and plated ware, but in no department is there a greater growth of demand than in the tool section. The business was such as to eclipse all outturn for several years past.

As HARDWARE AND METAL pointed out, there is an increased building programme all around and this is harvest time for the aggressive retailer.

Time for a Change

Parcel Post System Working for Mail Order Houses and Retailers Helping to Pay the Shot—A System That Should Be Changed.

THE fact that the mail order houses are expanding again draws attention to the conditions under which they are working, so far as the postal service is concerned. The expansion of the two leading mail order houses in Canada during recent months, whereby both Nova Scotia and New Brunswick have been invaded, shows that this question is to become a very vital one in the near future. The two mail order houses situated in Toronto have now large branches in various parts of Canada, so that they are in a strategic position to cover the whole Dominion. There will be no limit to their expansion, so long as there is profitable business in sight.

It is a matter of common knowledge that the enormous business which the concerns mentioned are doing in Canada, has been done largely at the expense of the local retail merchant, and with the aid of the parcel post system of the Dominion. It is known that the parcel post system is being operated at a loss. The retail merchants of the country have to bear their proportion of this loss; and when they realize that the loss is caused by reason of postal convenience extended to their competitors in business, it is scarcely to be wondered at that they feel aggrieved.

In addition to the goods carried by the postal service of Canada for the mail order houses it is well known that the mails are weighed down with their bulky catalogs. It was thought that this grievance would be remedied under the zone system, by which the farther mail was carried the greater was the charge made by the Post Office Department; but the mail order houses got around this by shipping their catalogs by freight or express to the point where they could be mailed most cheaply, and the mails are still burdened with them.

It is difficult to get a satisfactory statement from the Post Office Department showing separately the financial statements of the parcel and letter carrying services, respectively; but it is well known that the letter service, particularly at the three-cent rate, pays well, while the parcels post is operated at a loss, which the general public must bear.

There is no sufficient reason why the mail order houses of Canada should have the Post Office Department as a silent, and unpaid, partner in their business. The Retail Merchants' Association of Canada has compiled statistics showing how money is being taken out of the treasury of Canada in order to foster competition against country merchants, who would have a hard enough time to compete against the mail order houses in any event. If there is to be a loss made in any branch of the postal service, it would be far more in the interest of the general public that it should be made in the letter-carrying service.

It will be noted that the letter postage has been retained at three cents, instead of being returned to the old rate where it was before the war. "In other words," as Mr. Trowern, of the R. M. A., puts it, "the entire commercial community, when they place postage stamps on their letters, are helping one or two large mail order houses to carry goods all over Canada to the detriment of the retail merchants of Canada, as well as to the consuming public, who are anxious to have thriving towns and villages in their midst."

The mail order business in itself is a perfectly legitimate one, although it has not always been carried on with the nice regard for the ten commandments of commerce we should like to see. Apart from certain lines, used as leaders and priced accordingly, the average buyer can do better for cash in his own community; and the saving he effects in certain lines is inconsiderable because the low-priced lines are made up for by higher prices on something else. The buyer who confines his business to the one or two leaders which the mail order houses occasionally offer, may effect a saving on those articles, but very few buy so judiciously.

This matter of the parcel post is one of interest to all the people of Canada. It is being operated at a loss, and a large part of the trouble is well known to the department and to the Government. It is more than time that the favors which have been extended to certain individuals, great in resources but few in numbers, should be stopped, and the department put on a sound basis.

The Two Per Cent. Class

The Poor-Beer Class of Merchant Received a Shock—Retiring Traveller Does Good Missionary Work for His Brother Knights of the Grip

Written for Hardware and Metal by T. M. FRASER

ABOUT 98 per cent. of the retail merchants of Canada are of the right sort. If the percentage who meet their drafts promptly is not quite so high as the above, it is not because of lack of desire to do so; and very often the ones who are a little slow about their drafts have so many other virtues that the traveller, at least, has a warm side towards them, however the house may feel. But there is not more than two per cent. whom the traveller would put down in his black list; and they would be classed in the same way by their fellow business men townsmen.

Usually the trouble with the members of this two per cent. class—it is a good name for them, because they are what Shakspeare calls "small beer"— is an incurable case of ingrowing grouch. They must have virtues, too, although they are not visible to the naked eye; because they stick in business long after everyone has got tired wishing they were dead. There is nothing quite so depressing to the cheery young traveller as to run up against one of this class of business men early in the day, or early in his travelling career. If he strikes them early in the morning, they are likely to unfit him for business during the rest of the day. The grouchy customer should be taken not oftener than once a day, and preferably, after meals. Needless to say, he should be well shaken.

We have all seen the cheery traveller blow in on one of this kind. He gives him the best he has in the way of fellowship; but the response is not visible to the naked eye. The most he gets back in return is an expression like a pan of sour milk. The Bureau of Statistics at Ottawa reckons that the comparatively large mortality among travellers is due to compression of the vitals from having to meet this class of customer, and restrain the desire to kill him.

There is no known antidote for him. However, there is one thing about him; he knows it all. That is, all that is worth knowing. What he does not know, isn't knowledge, anyway. He never leaves his home town; he stays there and the experience of the outside just naturally comes pouring into his lap. Then when any question comes up in the place, or if any traveller has the temerity to start a discussion with him on any subject, he can settle it at once by giving his judgment. What all the other people have is merely an opinion.

I used to know one of these fellows once; but, fortunately, he got cured. It was this way. There was one traveller who had to call on this fellow, not because he liked the job. In fact, he dreaded it. It was the black-letter day in his calendar four times a year; but the man was a reasonably good account, and was fair pay; and the firm only got a taste of his sourness in his letters. He took most of it out on the traveller.

Every time this traveller used to come to the town he would engage in prayer very earnestly in the morning, to be given strength to endure the trial of the day, and to be helped so that he would refrain from yielding to his natural desire to put his customer's head under the bacon slicer and get a head off him for once. And the strength was vouchsafed unto him, so that, for years he put up with the sour looks, and the crabbing of his samples, and the insufferable air of conceit, and all the rest of it, and never answered back. But as soon as he got outside the store he used to have to go around the corner and curse steadily for as much as ten or twelve minutes; otherwise, as I have already pointed out, he would have died from that terribly fatal disease, compression of the vitals. It comes, you know, from holding yourself in.

At length, this traveller was ready to quit the road. His aunt had died, or he got a Government job or something; I forget just what it was. Before leaving, he told the firm he wanted to make one more trip, particularly to say farewell to good old Persimmon, down at Alumville. And he did something he had never done before; he wrote Persimmon a very confidential note, saying he was coming, and adding: "P.S. Keep everything possible for me. I will have something to show you this trip you never saw before."

He got to Alumville; and this time he did not pray in the morning. Instead of that, he sought spiritual consolation elsewhere. It was in the days before people stopped buying liquor by the glass and began to buy it by the case. He took two stiff shocks, of twelve hundred volts each, and felt ready for anything. Then he went right over to see Persimmon.

Persimmon was busy. He was always busy when a traveller called. Perhaps he would be busy looking out the window, or reading the paper, or just thinking; but whatever it was, it made no difference in his manner with a traveller. He never made any response to the cheery greetings they gave him, but just looked over their shoulder at something three-quarters of a mile away, and went on with whatever he wasn't doing. After a while, when the silence became so dense that you could have heard a violet opening, he would look up and say: "Well, what is it to-day?"

Just before he died, when the traveller called for the last time, he was actually doing something. He was preparing his deposit for the bank, and making out the slip; and, of course, he gave no sign of consciousness when the traveller blew in. But he woke up. This was the greeting he got:

"Well, old Angel-face, still at the old game, eh, making a meal for the moths? Why don't you quit it and wake up for a while, and go away and see something outside of Alumville?"

What followed was very much like what used to happen to the travellers after an interview with Persimmon. There was a sort of internal explosion, owing to his emotions getting mixed up and choking him. All he could do was to point to the door, and make signs indicating that the traveller need never come back.

"Don't worry, Persimmon, old man; I've come to say good-bye to you. I've been saving this scene up in my mind for years. Every time I had to put up with your sour face and your boorish manners to travellers and your general ignorance of what it means to be a human being, I have got consolation out of picturing this scene to myself. And it is far better than I ever expected it would be. It washes out my soul to see you all tied up in a knot like that. Let us have a few moments for silent meditation while I look at you, and think that I do not have to ask you for an order in a minute, or ever any more.". . . "Now, let us proceed. I have always been allowing to deal gently with you at the last; because you probably do not realize just what sort of a worm you are. So if you will promise me to go right off and take a month's vaca-

B.C. Retailers Meet in 2nd Convention

Dealers From All Parts of Province Gather to Discuss Subjects of Vital Import. Some Striking Resolutions Passed

IN the Observation Parlor on the 14th floor of the Vancouver Block, with the panorama spread before them of the entire city of Vancouver, the busy harbor with the steamers coming and going to all ports of the Orient, backed by the snow-capped mountains, the second convention of the B.C. Retail Merchants' Association opened at 10 o'clock on September 8th, 1919.

Accredited delegates representing all the outposts of the Association in B.C., with one or two exceptions, responded to the roll call.

T. F. McDowell, Provincial President, was in the chair.

W. A. Moore of Silverdale, brought up the question of cartage on country shipments, claiming that whereas the jobbers in Vancouver would deliver free to many parts of Vancouver, they would not deliver free to the railroad depots when the out-of-town merchants ordered forward their requirements.

Another delegate complained that several tobacco, knitting and other jobbers made special prices to favored retailers.

There was some discussion by delegates from Duncan and Port Alberni that the Soldiers' Settlement Board, in erecting buildings for the soldiers, instead of buying their hardware and groceries from the local merchants, bought in the big centres.

It was also brought up that the collection of fees be discontinued in connection with the inspection of Weights and Measures.

Prince Rupert also reported that they had attempted to close up several fruit establishments who were open after the other merchants were compelled to close every evening, and expose for sale articles that otherwise could be procured in the stores that were closed. The magistrate dismissed the case, classifying fruit vendors as refreshment houses.

It is proposed to amalgamate the three Vancouver Societies, viz.: The Butchers' Association, the Grocers' Association, and the Vancouver Branch of the Retail Merchants' Association into one association.

The treasurer's report was read and adopted.

The President Tells of Year's Work

Calls Attention to the Inauguration of a Co-operative Fire Insurance Plan. Certain Advertising Schemes Condemned —The Advertising Trade.

AS President of the British Columbia Board I wish to deal with the present and the future more than referring to the past in my report to you for this, our second annual convention. It gives me great pleasure to mention a few items during my tenure of office. I can assure you that my enthusiasm in association work (which after all is the best medium of helping my fellow-merchants) has never slackened since I assumed the chair at the birth of the board on March 1st, 1918.

In association work there is no one merchant, no matter how popular he may be in his community, no matter how much time he devotes to the work, no matter how brainy or what foresight he may possess, can spell success—sucesss of the association is attained by the co-operation of every merchant that signs his membership card. Kipling wrote during the war this verse:

It ain't the individual,
Nor the Army as a whole,
But the everlasting team-work
Of every blooming soul.

So you can see very plainly, gentlemen, that this convention here assembled must be team-work. You, the accredited delegates from the branches of this board, and the individual members, hold in your power the future success of this association in British Columbia.

This is your convention. This is the place to straighten out sixes and sevens—the place to construct and the sphere of the convention should be sweet and wholesome. We cannot have team-work if we yap out a lot of destructive criticism. We invite criticism, but let it be constructive. I have said this about the members.

The Secretary Can Help

May I refer briefly to the Secretary's office. The duties of this office is the key to the whole situation. We as merchants can build up and find material. Your executive can plan and direct the work to be done from the merchants' standpoint, but the carrying out of the details rests with the secretary. Every branch in this province should use the office to the utmost. It is encouraging for the executive to have enquiries to come in. Country and town merchants have problems different to larger centres, and the secretary invites confidence in order to assist in your difficulties. I believe the association is large enough for a budget which will pay a secretary a remunerative salary. There is a tendency to run the office on a cheap plan. I say dig down and pay, and I will go on record as saying you will get results.

We have a spirit for association work in this province greater than ever before. Now provide a 1920 budget large enough to give a secretary a respectable salary. He is a paid official and often his enthusiasm and tenacity is dampened when pay day comes. During the past year I had the pleasure of visiting the branches of Chilliwack, New Westminster and Nanaimo. All of them I found not only enthusiastic in association work, but having a good amount of community spirit. In my address to these branches I touch on two subjects. First, the need of the retail merchants' activity in municipal government in his community; secondly, the Oriental in British Columbia.

The Co-operative Fire Insurance Move

The months of November, December and January were trying months on account of the flu epidemic, but early in February we took up fire insurance with the Northwestern Mutual Fire Association with a view to cheaper fire insurance for our members. We looked with envy at some of our brother merchants across the line, sharing in that $2,500,000 returned premiums which the policy-holders enjoyed from this company in seven years. To be brief, we have a service for you to-day with this company known as the Retail Merchants' Fire Underwriters' Agency of British Columbia, and you, gentlemen, can share in the dividends to the extent of 30 to 45 per cent. of your premiums.

We had considerable correspondence with the Canada Food Board. Flour and food dealers were being unfairly treated, and as a result of the association's activities, many of these unfair regulations were amended.

I made two trips to Victoria with your secretary to the Private Bills Committee in connection with the Vancouver business tax. While this was purely a local affair, both your secretary and myself could see the danger of allowing this bill to proceed without our protest, and while it went to the House for debate we feel that our association shares in no small degree the honor of defeating that bill.

The Auto Contest in B. C.

One morning in March we discovered a get-rich-quick artist in Vancouver. Yes, he hit Vancouver because in a large city they can arrange their preliminaries and get a start. He visited our office with a view to sizing up the layout, and left an odor, and Corley had a hunch something was wrong. Later on in the day the secretary discovered that the visitor of the morning was no other than one of the principals of the Auto Contest Co., of whom we had been warned by the Saskatchewan Board. The Provincial Executive immediately took steps to notify the various branches and individual members of this scheme, advising them of the unsatisfactory results obtained by the Saskatchewan members. Vancouver merchants at this time did not have a branch, but certain merchants came forward and gave their support to suppress the scheme. Our association laid information with the Vancouver police. The Auto Contest Co.'s office was raided, and everything seized. The case was contested in the Police Court, and after a stiff fight two of our largest merchants were fined $50 and costs for violating the Trading Stamps Act. An order was issued by the Vancouver police for the arrest of the principals of this scheme, but to date neither of them have shown up in Vancouver. The merchants were saved many hundreds of dollars, and I want to emphasize right here that your secretary, Mr. Corley, deserves great credit for his ability in handling the case for the association.

The Danger of the Oriental Trader

As your representative I attended the Industrial Commission held in Vancouver. Their queries were very much on the high cost of living. I seized the opportunity to tell them of the unfair Oriental trader, reminded them that British Columbia is the Mecca for such a people, and for them to remember this when making their report to the Government.

It became necessary in June to call representatives from several of the branches to talk over the congested condition of the office. It was apparent that the service to members was unsatisfactory. The situation clearly showed that too much work was piling up on the secretary; also, that in order to continue association work in this province Vancouver must be organized. Greater membership must be obtained, and Vancou-

ver was the most logical place to tackle first. The result of this conference was that your executive withdrew the organizer from outside and loaned him to the Vancouver branch for a period of three months. The achievements of this venture will be shown in the organizer's report.

I would like to dwell more on other subjects, but I feel that the present and future deserve space in my reports. The French in Napoleon's time contemptibly spoke of the British as a little nation of shopkeepers. Are you not proud that you are a shopkeeper, for Britain has led the way in the character of her trades people? To-day our country is flooded with Orientals and Southern Europeans. They are forming a large section of our commercial community. Their standards of living, their character of trading, is un-British. We must face this situation and deal with it now. Their emigration must be limited.

Britain has vested this power with our Government. We must have an association from the Pacific to the Atlantic and act with a united front on a policy for a white man's country. Canadians fought and died for Canada in that awful conflict in Europe, and while commercial life was disorganized this Province had a very much larger Oriental population to deal with than any other province in Canada, many of them enjoying the business of those who had gone to the front. What is the result? Orientals here, there and everywhere in business, and patronized by our own Canadian people, who pressed by the high cost of living trade with the Oriental on account of price. The Government must bring up the Oriental standard of living or limit their activities, for the Occidental cannot trade on the same level.

In closing I want to emphasize the need of greater association work in this province. I refer to taxation. Canada has a tremendous war debt, and it is still climbing. The greatest financiers of our country are at their wits' end to know how to collect taxation on a fair and equitable basis. We all want to pay our share, but the retailer has no means of entering a protest against unjust taxation, unless he is organized.

The Retail Merchants' Association of Canada is the machinery. The officers of this association are big men, men who live for their country, men who give their time freely and without price. Surely this democratic principle warrants the support of the individual merchant.

I trust this convention will be a great success. It rests with you to make it such. Your Executive Board has not had conditions as rosy as it may appear, but we have arrived at a psychological period in our association. Let us pull together.

Convention committees were named as follows:

Resolutions—J. H. Ashwell, Chilliwack, M. J. Phillips, New Westminster; Geo. H. McRobbie, Vancouver.

Reports—H. Murphy, Nanaimo; B. S. Ross, New Westminster; F. Y. Cox, Port Alberni.

OFFICERS FOR THE NEW YEAR

The following officers were elected for the coming year: President, G. H. McRobbie, Vancouver; First Vice-president, M. J. Phillips, New Westminster; Second Vice-president, Harvey Murphey, Nanaimo; Treasurer, Dayrl H. Kent, Vancouver. Secretary will be appointed by joint action of the B. C. executive and the Vancouver Branch executive, when formed, as he will occupy the secretaryship of both offices.

Finance—Mr. Jacobson, New Westminster; R. H. Ormand, Nanaimo; R. Fox, Chilliwack.

Resolutions on Various Subjects

The Resolutions Committee brought forward the following resolutions:

This convention of the British Columbia Branch of the Retail Merchants' Association goes on record as protesting against the Government's action in putting an embargo on foreign sardines, etc. In the judgment of the convention there is a legitimate demand in Canada for the very best sardines, and that these should be procurable wherever located.

Also the convention asks that the onus in connection with the Food Board's regulations should not be borne by the retailer, but should be borne by the manufacturer. The secretary pointed out that within the last week several prosecutions had been made by the authorities in Vancouver of various merchants in connection with the sale of maple syrup. Of this particular commodity, it is pointed out, that the maple syrup is bought by the retailer in good faith as pure maple syrup, labelled as such, and in some cases the local representatives have letters from their principles assuring them that the product is all that it is labelled to be. In other words, after a retailer has satisfied himself to the best of his ability that the product is a bona fide article, he can still be summoned into court, his name coupled in the newspapers with the selling of adulterated goods, and in the cases referred to the merchants having to pay a fine approximating $50 each. The complaint of the pure food inspector in this case was that the maple syrup contained a solid matter in small quantities which pure maple syrup is not supposed to contain.

The Government apparently on various occasions informed the retailers that if they wish to protect themselves they should procure a special warranty form signed by the jobber in connection with any goods that the retailer buys from the jobber, and on which he wishes to be safeguarded. The secretary pointed out that in order to be protected the retailer would require to have from his jobber a special warranty form for every single item of every single delivery made to his store. He also pointed out that it had been suggested that the said form be either printed on the back of all the jobbers' invoices, or affixed thereto with a rubber stamp, so that if exception were taken at any time to any line of merchandise the retailer carried in good faith, he would simply have to turn up the invoice for it and be protected by the warranty form on the invoice. This proposition was made to the authorities at Ottawa and met with their approval, but when the proposition was made to the wholesalers in Vancouver they refused to accede.

At this point one of the delegates amused the meeting by recalling how in one small town, when he was having hot cakes and maple syrup, he questioned the waitress as to whether the syrup was absolutely pure maple syrup. The waitress was highly indignant, and exclaimed: "Pure, I should say it is! We make everything on our own premises."

This convention urges upon the Dominion Executive the greater need of an amendment to the Food Adulteration Act whereby the retailer and the public receive better protection.

The convention committee brought in a resolution which was adopted, to the effect that the Provincial and the Vancouver Branches should be combined in one office with a joint secretary, and such help as should be found necessary, the expenses to be equally divided.

Also that the office of secretary be left open for the incoming executive to have a conference with the executive of the Vancouver branch as to the appointment.

A budget of $5,000 was presented for the secretarial work of the two branches, making the expenses $2,500 apiece.

Also, the incoming executive will be requested to ascertain from Mr. Corley whether there is any commission due to the provincial office for the increased advertising since the B. C. Retailer was made the official organ of the Provincial Association.

Percy Shallcross, past vice-president of the Board of Trade, welcomed the out-of-town delegates to the city, at the luncheon tendered by the Vancouver Branch and held in the banquet room of the Hudson Bay. In the course of his remarks Mr. Shallcross stated that a convention such as the present one was a movement greater than simply trade interests, but was a move for the good of the community, for the backbone of the community was the retail tradesman. He stated that at a time when every link in the merchandising chain was attacked with destructive criticism, there was one thing sure, that the manufacturer, and the retailer would always be in business. Each guest was asked to rise to his feet in turn, and state his name, his home town, and the

A group photo of the delegates to the British Columbia R.M.A. Convention, the figures marked are as follows: 1. G. H. McRobbie, new president; 2. D. H. Kent, new treasurer; 3. T. F. McDowell, retiring president; 4. G. A. Howker, retiring treasurer.

nature of his business. The company was amused when one druggist rose to his feet in turn, and after his name and business mentioned "two stores." Not to be outdone, a grocer shortly announced "three stores," and a Vancouver druggist then rose and announced "seven stores, nine telephones." It was generally conceded that the first man doesn't have a chance in an assemblage of this nature.

T. F. McDOWELL,

The retiring President of the British Columbia R.M.A., who presided at the Convention.

Discriminating Between Retailers Causes Hard Feeling

The temper of the convention was very pronounced in regard to certain manufacturers, who were named, who, it is stated, discriminate between retailers in various centres, selling one at wholesale prices and another at manufacturers' prices. The plans outlined in case these manufacturers cannot be made to see the light will undoubtedly achieve the desired result.

Considerable discussion was occasioned by a resolution presented dealing with the Soldier Settlement Board buying entirely in large centres, to the loss of the merchants in the districts where the dwellings are being erected. Many merchants contended that as the Government was buying in the cheapest market, the greatest good for the community as a whole would be attained. This view would have been unanimous had each delegate present felt assured that the whole saving in every case would go to the soldier. Premier Oliver in addressing the Rotary luncheon stated that when the Government spent money they got about fifty cents' worth for every dollar—that the other fifty cents was simply lost between places. It was stated that the hardware men in the province had taken strenuous exception to the Government's action, and that the actual case should be looked into by the incoming executive. It appears in cases of this kind that clothing men are very patriotic when the Government is buying groceries, and grocers can view with equanimity the Government handing out to discharged men $35 worth of ready-made clothes, but in our recollection there is great exception taken to the Government going into competition to any retail business by the trade concerned, and rightly so.

Discussion of Garnishee Act

A resolution was also drafted asking the Dominion Executive to get an amendment to the Garnishee Act making civil servants on the same status as any other delinquent.

A resolution was also presented asking that the charging of fees for the inspection of weights and measures be abolished. It was pointed out that the accuracy of scales was just as much an advantage to the retailer as to the public. It is worth a fee to have the onus off the grocer, and make the public feel that weights and scales are not matters of suspicion.

It is also complained that the present British Columbia Garnishee Act is absolutely worthless for the purpose. It exempts $40 of a delinquent's pay from garnishment, and does not state whether per month or week. When the common usage was to pay by the month it was possible to recover a debt by garnishment. Now when a man is paid fortnightly, or often weekly, and $40 is exempt from whatever is due, in most cases the whole wage is covered. A man might be paid $40 per week and be paid weekly, and not a cent could be garnisheed. As this law works as a protection and encouragement to the dead beat, it is asked that the Attorney-General be again asked to draft up an improvement. This matter was brought to the attention of the Attorney-General's Department more than a year ago, and the Attorney-General expressed himself as quite in agreement that the present Garnishee Act does not function, but nothing has been done.

Freight Rates Considered

The matter of high water freight rates in British Columbia has been discussed at various times. The various steamship companies at present operating between the mainland and Vancouver Island, as well as on the lakes in the interior and on Fraser River, have been approached for revision of tariff at many times without avail. It would be gathered that the Fraser River rates, having to meet the competition of the B. C. Electric and the C.P.R., are most reasonable—the others may be judged from the statement of one delegate from Vancouver Island, "It costs twice as much to ship freight to Nanaimo, forty miles across the gulf, as to bring freight eighty miles down the Fraser River. This is a rate four times as high. There is no competition with the boats across the gulf, and the matter does not come under the jurisdiction of the Railway Board. Whether it comes under the new Public Utilities Commission will be ascertained, otherwise the Dominion Executive will be asked to request a special board appointed to take care of water freights in British Columbia.

Foodstuff Handlers to Be Physically Sound

A far-reaching and sorely needed service is covered by the following resolution:

"Resolved, that all persons handling foodstuffs be compelled to undergo an examination satisfactory to the city health officer; failure to undergo satisfactory examination being grounds for refusal to grant a license to operate."

If the various foreign peoples in our Dominion are not particular as to the handlers and handling of the food they eat, they should be compelled to observe our standards when they have anything to do with the food we eat.

Certain statements which appeared in the B. C. Agricultural Journal were deemed to reflect unfairly on the retail trade. A resolution was made that the attention of the Minister of Agriculture be drawn to the article in question, and an apology and correction made.

It is the habit at this time for various privately-owned papers to permit their wordsmiths to make gratuitous attacks on the retailer—probably because popular prejudice requires a goat—and the wholesaler and the manufacturer are never in a position to cross the consumer. It is not thought the province of a Government paper to attempt to discredit any branch of the present merchandising system.

The Secretary's Report

IN submitting my second annual report for your consideration I shall endeavor to be brief and to the point. I realize that there is a great deal of work before you and that some of the subjects, especially that of the treasurer's report, will require your closest attention and earnest consideration. I mention the treasurer's report now because it is my opinion that his report is by far the most important subject to be considered at this convention. The future of your association depends directly upon your action in connection with it.

To commence with, I wish to submit a few statistics. The membership of the British Columbia Board at the time of our last convention was slightly below 200, 198 to be exact. At the end of last month the membership for the whole of the province, including Vancouver, was 413. We have more than doubled the membership in twelve months and it is still growing. Actual resignations for the twelve months have been less than ten.

Your Executive officers have held 20 meetings during the period. Some of these meetings have consisted of two sessions and on one occasion three sessions totalling nearly twelve hours were necessary in your interests. The total time spent by your Executive officers in attending meetings at Provincial headquarters has amounted to something like 75 to 80 hours, about ten working days. This does not include trips

to various local branches in the interests of organization and delegations to the Provincial Government.

Your office staff has consisted of myself and stenographer, in each case part time, and the organizer. The work of the organizer speaks for itself in the increased membership. Organizer Hougham, however, will go into this in detail. The actual office work has occupied a great deal more time than has been paid for. The remuneration for the work done has been entirely inadequate. Yet there has been a great deal of work left undone. No one realizes the shortcomings of the association's present equipment more than I do myself. It should be kept in mind, however, that those shortcomings are the direct result of other shortcomings which are beyond our control. Your treasurer will, I believe, bear me out in that statement.

There are now 10 properly organized local branches in the province, consisting of 368 members, besides 45 members in more or less remote districts, who are not yet attached to any branch.

During the past few months strenuous efforts have been made to organize a Vancouver branch and I am glad to be able to report very satisfactory progress. This matter will also be dealt with in the organizer's report.

Regarding our office service departments it is gratifying to know that the collection service is being used increasingly by members, and that it is proving to be efficient and satisfactory.

The basis on which your collection department is operated is a commission one. The collection manager, Mr. Cotton, receives a commission on all amounts collected and the association pays for postage, stationery and printing used in connection with the work. By this method the greater part of the cost of operating the department is paid by those members who receive direct benefits from it.

The freight adjusting department, I regret to report, has not made the progress we anticipated. The manager of this department started off with great expectations, but our members did not rally as it was hoped and expected they would. Mr. Coy, who managed the department, was a man of undoubted ability in freight matters, but he became discouraged at the lack of support and gave it up. We are endeavoring to make arrangements for having freight bills checked by some good man who is well up in that work, but the great difficulty will be in obtaining a complete list of tariffs, as owing to the great number of changes that have taken place in freight rates during the past year or two, it requires a library of considerable proportions. Mr. Coy's list of tariffs cost him over $300 and an enormous amount of time to collect from various sources.

Some months ago your Executive approved the appointment of Mr. L. D. Jones as solicitor and legal adviser to the association. Mr. Jones is a young man and a returned soldier, and a native son of British Columbia. Mr. Jones has already given the association very good service and the cost has been very reasonable. In fact, he has given his services in some cases. He is anxious to make a special study of the retailers' problems, and it is most necessary in a legal adviser for an association of this kind that he should endeavor to see the retailers' point of view clearly and intelligently.

If there is one service department that has excelled others it is the fire insurance department. The arrangement recently arrived at with the Northwestern Mutual Fire Association, and which you will be asked to approve, has made this service very popular, and deservedly so, with our members. By this plan those of our members whose risks are accepted by the Northwestern may save from 30 to 45 per cent. of their fire insurance premiums. And that is reckoning on the regular "board" rates. In no case does the Northwestern charge more than the board rate and in some cases less. Yet in all cases the rebate is made.

The plan adopted by your Executive for handling this work has necessitated the formation of what is known as the Retail Merchants' Fire Underwriters Agency. This is simply a matter of convenience. It is the name that is used for writing fire insurance for members only of the R. M. A. in British Columbia. Applications are handled by the Agency and policies issued. Inspections are made by the N.-W. and all risks are subject to the Northwestern's approval. No commission whatsoever is paid by the Northwestern to any person, nor to the association for any business coming from our members, nor does the association make any charge to members placing insurance through the agency. The whole of the rebate is passed on direct to the member. Great interest is being taken in this plan, not only by our members, but by other associations in British Columbia and in the states to the south. The local insurance companies are also beginning to wonder where they are going to get off. I have no hesitation in saying that the association's fire insurance scheme is the most progressive and co-operative plan of its kind being operated by any business organization in Canada, and is something our members have every reason to congratulate their Executive upon. In this connection I would like to remind those who are interested that a special meeting to discuss the fire insurance feature will be held at 10 o'clock on Wednesday morning in the Provincial board room.

Coming now to legislative work, a number of resolutions were passed at last year's convention, and I shall endeavor to give a brief account of the progress made upon them. In the first place there were a number of resolutions dealing with the Provincial Weekly Half-Holiday Act. Many letters and wires have passed, and several personal interviews with members of the Provincial Government have been had in an effort to have our recommendations adopted. The Government has not yet seen fit to prohibit the sale of goods in stores not compelled to close by law, when such goods are sold in other stores which are compelled to close. The resolution requesting that statutory holidays be specified for the purposes of the Weekly Half-Holiday Act was pressed before the Government, and I am glad to report that the improvement was made. The Act now contains the required list of legal holidays.

The resolution dealing with the recovery of debts from civil servants was referred to our Dominion Board and has received considerable attention in that quarter. Every opportunity is being taken advantage of, I believe, towards having civil servants brought under the law in common with other citizens. As this is a matter that strikes almost at one of the fundamentals of the British Constitution, it will be realized that it cannot be easily brought about. These, however, are times of great changes, and a change of this kind is much more likely of realization than even a year ago.

In connection with the collection of provincial taxes I am given to understand that more strenuous efforts are being made by the Government in that direction. Some changes have been made in the taxation department, and there is every evidence that this matter is receiving considerable attention. There should, however, be no let up in our efforts to see that tax evaders are brought into line, and as our vice-president, Mr. Fink, expressed it last year, all members of the Association should render every assistance possible to the Government by directing attention to those who it was known were evading payment.

In regard to the resolutions covering Capias Law, Attachment of Debts and Small Debts Court Act. A delegation consisting of Mr. Howker and myself waited upon the Attorney-General some months ago and spent considerable time with him in a discussion of these matters. Our recommendations regarding judgment debtors were not favorably received, nor was the recommendation that in the case of judgment debtors an order should be made by the Court requiring the debtor to pay a specified amount at stated periods instead of the present law which requires the creditor to repeatedly bring up a debtor for examination at the creditor's expense. It would seem that the Attorney-General's opinion was the natural outcome of a legal mind and entirely out of sympathy with the retailer's point of view. The Attorney-General's summing up of the whole situation was that retailers should exercise more care in extending credit. It is needless to remark that your delegate took good care to place the retailers' viewpoint of this matter before the Attorney-General.

Our recommendation that the Attachment of Debts Act be amended so that the amount exempted from the salary or wages of a debtor should be by the week or month, was more favorably received, and the Attorney-General promised that this should be looked into, as he also did in reference to our suggestion that the Small Debts Court maximum should be raised to $200 instead of the present $100. So far, however, no amendment has been passed.

The resolution dealing with the sale by wholesalers to consumers has received considerable attention from time to time, and I believe that some improvement has been noticed in this respect by our members. Nevertheless there is still considerable room for improvement, not only in this direction, but in the matter of special discounts and other privileges allowed to favored retailers by the wholesalers, thus encouraging unfair competition.

Passing from the work outlined at last year's convention we come to the activities and happenings with which our Association has been connected during the past twelve months. Probably the most important event has been the establishment by the Dominion Government of what is known as the Board of Commerce. For several years our National Association has urged the Government to establish an Inland Trade Commission with powers in connection with the manufacture and distribution of merchandise similar to those of the Railway Commission in connection with railroad affairs. This practically is what the Government has at last found it necessary to do. It is true that at present the Board of Commerce seems to be, if anything, in opposition to the retailer. It is sincerely to be hoped that the Board will execute its duties in a strictly fair and impartial manner. There are unbounded possibilities for good in such a body for all concerned, and it would be a crime if by reason of the blind prejudices of even one member, the splendid work that might be accomplished by a commission of this kind should be stillborn.

It is hardly a matter for congratulation that a commission of this kind, dealing as it must with very material matters, should not have at least two legal men in its composition. The third member of the Board has not yet been appointed, and our Association is making every effort to have a good business man as the third member. It would seem only fair that the tremendous body of business men represented in the manufacture and distribution of merchandise should be represented by one member of the three. I venture to predict nothing but abortive results unless this is done. In the meantime it is gratifying to record that the Government has found it advisable to carry into effect something which our Association decided several years ago would be necessary, and it is not too much to claim that had the Government acted upon our suggestion when it was first submitted, much of the trouble in connection with increased prices would have been avoided. The work of the Board will now be to cure what could have been prevented.

The Bankruptcy Bill placed before the Dominion Government last year has not yet become law. It is entirely different in many respects to the Bill first drafted. Our As-

sociation became very active when this Bill was brought to its attention, and many clauses that might have inflicted severe injustice upon the retailers were eliminated. This is the class of work the full value of which will probably never be even partially appreciated by the large majority of retailers. The prevention of unjust legislation is, however, a most important part of the work of your organization. The proposed Bill provided that you could be declared in a state of bankruptcy if at any time you were unable to pay a bill for $200 or more when it became due. Such provisions and many more as unjust would have been passed but for the watchfulness of such men as our Provincial Treasurer, Mr. Howker, who was present representing our province at the Dominion Board Convention when the Bill was first considered.

The first successful prosecution under the Trading Stamp Act, a measure enacted by the Dominion Parliament at the request of our Association in 1905, took place in this province when firms in New Westminster and Vancouver were convicted and fined for taking part in what was known as the Auto Contest. Our Association published warnings in the press and in the B.C. "Retailer" to the effect that this contest was illegal. There were those, however, who thought they knew more about the Trading Stamp Act than the officers of the Association which drafted it. Our only regret was that we were unable to capture the promoters of the scheme. They made their get-away; they also made a clean-up at the expense of a number of foolish merchants. There is still a warrant out for the arrest of the promoter, and he will find B.C. an unhealthy place if he ever arrives here beknown to certain people.

During the early part of the year your Executive Officers visited a number of local branches situated within easy reach of Vancouver. Excellent meetings were held, almost every merchant in the cities visited turning out. This move seems to have been a very successful one, and has created a closer feeling of friendship and co-operation between the branch members and the provincial office. It is to be hoped that the Association's finances will permit of this work being continued in the future on even a more extensive scale, and that other branches more distant will be visited.

Among the more recent activities of the provincial office was the matter of certain articles which appeared in a recent issue of the "Agricultural Journal," a publication issued by the B.C. Dept. of Agriculture. In this journal most unfair attacks were made upon the retailers of this province as a class and upon this Association. The matter was promptly taken up with the Premier, but owing to his absence in the East it has not yet received his attention. He has now returned, and in all probability we shall hear from him very soon. A communication was forwarded to him just a few days ago in connection with this matter.

While on this subject I would like to draw the attention of the delegates to the prominence given to co-operative societies in the "Agricultural Journal." In some issues several pages are devoted to boosting consumer co-operative societies, designed to eliminate the retailer. It seems hardly fair that the money paid by retailers in taxes should be used in attempts to put them out of business. I say attempts advisedly. I do not think they can succeed. I would suggest that this matter receive the further attention of your Association.

Amongst other matters I would suggest should receive the consideration of this Convention, are double cartage charges by wholesalers, the policy of collective buying, Discrimination by Imperial Tobacco Co., and other firms, medical inspection of persons handling food for sale. Most of the delegates are well in touch with these matters and will be dealing with them.

Before making my concluding remarks I wish to make special mention of the manner in which your Executive Officers have supported me. I refer to T. F. McDowell, your president, and Geo. A. Howker, treasurer, and I may say that but for the encouragement and advice I have received from them at most discouraging times I would not have been submitting the secretary's report at this Convention. I feel that the members of the Provincial Board cannot give too much credit to the two officers whose names I have mentioned for the work they have done during the past 17 months, for it should be remembered that they have carried on since the inception of this organization in B.C. In that time they have held over thirty meetings. Not one cent of remuneration have they received, nor did they expect it. Their work was done for the benefit of their fellow retailers, and I feel that I cannot offer a more fitting suggestion in the interests of each individual delegate present and of the Association as a whole, than that each retailer make a firm resolve that from now on he will endeavor to follow the excellent example set by the executive officers of this Board and give at least a little time and effort in the interests of his fellow retailers.

ORGANIZING THE B.C. MERCHANTS

The Report of the Organizer At the British Columbia Convention of the R. M. A. Gives a Very Optimistic Outlook for the Future Welfare of the Association

IN presenting the story of the activities of your organizer since the 1918 Convention I may as well admit that I am out to completely spoil my reputation, that is as I understand my reputation to be. I may say that I understand my reputation to be by suggesting that it is not a reputation for brevity.

I will touch upon facts and figures merely as illustrations and not simply as a recitation because facts and figures, and more particularly figures, can convey no adequate picture of what organization work in B.C. has involved since last September.

The first trip made by your organizer following the Convention was planned to cover the Okanagan territory, and was started early in October.

Defunct Association a Stumbling Block

The towns visited on this trip were Kamloops, Enderby, Armstrong, Vernon and Kelowna. In Armstrong and Enderby branches were established representing practically the whole of the possible membership. I spent quite a while at Vernon, but found it impossible to accomplish anything at that time, owing to the fact that "they had once had an association." This "association," like too many similarly ill-fated ventures, had gone to pieces around 1914, and had not yet had the decency to pay its own funeral expenses. These expenses were still owing to sundry creditors in the town, and the merchants did not seem to think it possible to start a branch of the R.M.A. of Canada without first paying the debts of their old local association, and nobody seemed to be particularly anxious to pay said debt. I pointed out to a meeting that I addressed at the City Hall there that it was hardly fair to penalize the R.M.A. of Canada for the sins of the Vernon Retail Merchants' Association of 1914, and had I been able to stay on the ground long enough to have given time for a committee to have canvassed the local merchants and paid off their old debt I am confident that we should now have a large branch in the Queen City of the Okanagan. The treatment accorded me there was entirely courteous and cordial, and several merchants expressed their intention of lining up with the R.M.A. of Canada as individuals, if their fellow merchants did not decide to establish an accredited branch. I judged it in the best interests of our Association, however, not to accept such applications at that time, as I felt it might hinder the larger programme that we had in view, because there is always a better chance of an organization standing together if it is properly organized at the start.

A Nucleus at Kamloops

The time limit under which I was working was again a handicap at Kamloops upon my return journey. I found it very difficult to get a hearing at Kamloops, for the reason that they also had once had an association, but I succeeded in getting five members as the nucleus of a future branch, and I was assured by these five that as soon as I could return to that field they would assist me in getting the merchants out and having a properly organized branch of our Association established there. Unfortunately for reasons entirely beyond our control I have never been able to revisit that territory, nor have I been able to cover the field further east and south, which had been my intention, so that it may fairly be stated that the possibilities of the interior in Association matters have scarcely been tapped.

Prince Rupert Has Branch

However, some signs of interest in our Association work having been evinced at Prince Rupert, a visit was made there, and a branch established, beginning with some eighteen members, which has since increased to thirty-three. Preliminary work was also begun in the month of December in the City of Vancouver itself, a meeting being held on December 6th at which the Vancouver branch came into existence. No further work was possible, however, in Vancouver on a part time basis, as this field is too large and complicated to be properly organized half-heartedly. I will deal with the organization of the Vancouver branch as a separate matter, but it is in order in this connection to mention the fact that the establishment upon an efficient basis of a branch in this city has been and is yet the biggest problem that the Association has to face in this province.

New Westminster was the next field for attention, and with the co-operation of local Secretary Ing, who worked unselfishly to give the New Westminster merchants a form of organization which he felt to be in their interest, we succeeded in establishing a branch there of some thirty-seven members. Mention might also be made here of a flying trip made from Nanaimo to Port Alberni, around the first of the year, at which a branch of our Association was established with a membership of fourteen, which is about one hundred per cent. of the possibilities in that district. Without knowing the geography intimately I would think that the British Columbia Board has at Port Alberni its farthest west branch and at Prince Rupert its farthest north branch. During the month that followed my attention was about equally divided between Vancouver and Nanaimo, and at Nanaimo we

were able to increase our membership from twenty-two to fifty-six members, and what was more important, end a condition that had hitherto existed under which we had had a local association and a branch of the R.M.A. of Canada operating in the same office.

Interested in Association

Other points visited have included Chilliwack, Duncan, Courtenay and Cumberland, while a trip was also made to other Fraser Valley points as far up as Mission. During the year numerous enquiries have come through from merchants both in the towns and country places asking for information as to membership in the Association. Some of these replies have been sent stating that the organizer would visit them in due course, while in others application cards have been sent, inviting them to take out membership by mail, which in several cases has been done. This method has only been adopted where the expense of a personal visit made it impossible to reach the merchant. An example of this is the case of a merchant at Willow River, which to the best of my knowledge is somewhere around the Prince George district, while we have another membership to recall from the top of Crow's Nest Mountain, this membership being entirely unsolicited.

A number of different attempts have been made to get a hearing of the merchants at Victoria, but so far entirely without success.

A Branch of Fifty Members

Early n 1919 the Provincial Secretary and I waited personally upon a number of representative retailers with a view to having them come to a meeting and hear for themselves what the claims of the R.M.A. of Canada actually were. In addition to this, some five hundred invitations were sent through the mail calling a meeting on a certain date, the result was an attendance of about fifteen. From that beginning a branch of approximately fifty-five members has grown, but it has taken many months to accomplish that result, and if this Convention regard Association work simply as a dollars and cents proposition, then I have to say that the organization of the Vancouver merchants has absorbed more money and time than the results would appear to warrant. I feel confident, however, that no such narrow viewpoint will be allowed to color discussion of this report, for it will be realized at once that an organization of retailers in B.C. cannot be said to be representative until a strong branch is well established in the chief city of the province.

I do not claim that such a result is yet apparent, but I believe that the results in Vancouver for the ensuing year will more than justify the effort that has been put into it during 1918 and 1919.

In this connection I think it is in order to say that although Vancouver has perhaps been slow in coming forward, the executive officers of its branch have rendered splendid service to Association work in this province since they were elected, and are even now committed to a policy of organization in the city which will place the Vancouver branch upon an efficient basis, in that it will bring all sections of retailers in this city together in a way that they have never been brought before. I mention this here because while I realize that your organizer's time, which is your time and money, has been almost wholly spent in Vancouver for several months, I do not think that you would have even the possibility of a satisfactory solution of the Vancouver Association situation in sight had it not been for the close attention given to this field by your organization department.

Meanwhile, it seems to me to be a matter for satisfaction that in every case but one, branches organized in 1918 have renewed their membership this year, and in most of these cases the membership has increased.

Growing Enthusiasm

This applies, for example, to Chilliwack, where we established a branch in June, 1918. This branch is now easily fifty per cent. stronger than when first started, and this increase was voluntary. Altogether, surveyed from the viewpoint of numerical membership, the B.C. Board of the Retail Merchants' Association of Canada stands 100% stronger than it did at the 1918 Convention, while its possibilities in this direction are as yet hardly exploited.

This observation brings me to the conclusion of my report, and in presenting it for your consideration, I have simply this to say, you have in British Columbia today the nucleus of an organization of retail merchants. It has been brought together despite many difficulties and discouragements. It is, however, your organization, and you can make of it an efficient machine functioning in your interest and in the interest of the community whom you serve, if you wish and will. If, however, this purpose is to be achieved, you must here and now, at this Convention, decide to spread the burden of responsibility over more shoulders than have borne it to date. Executive officers must be elected who can and will give the work the time and attention it involves. I do not mean by this that your present officers have not given it that time and attention, but I do wish to emphasize the necessity for a careful selection of officers for the ensuing period, which in my judgment will be the testing time for Association work in this province.

Among the resolutions dealing with the organizer's report were the following:—

It is recommended that the Vancouver branch have a paid Secretary of their own.

It is recommended that the present organizer be freed from secretarial duties and resume organization work.

At this point the Vancouver delegate asked that the organizer be left on the Vancouver field for at least a couple of months —this request was acceded to by the Board of the Convention.

The Committee also pointed out that one of the most vital items of the Committee's report was the organization of Vancouver city. As one speaker put it, "Vancouver is the very anchor of the whole B.C. organization, and unless the Association can show strong organization and real service rendered in Vancouver the work of the organizer in the outside field is rendered exceptionally difficult."

A full explanation of the new insurance service of the Association was given at the evening session Tuesday. It has not been found advisable to attempt to found their own insurance company as has been done successfully by the Saskatchewan branch, but a close working agreement has been reached with the North-Western Mutual Fire Association of Seattle, whereby the Association conducts their own agency for the writing of the members' policies, and members only. The Association policy holders are guaranteed a rebate on each year's premiums of from thirty to forty-five per cent., depending on the risk. The saving at all times to be thirty per cent. or over, what the premium in a board company would be. It is also claimed that all of the money paid into the company in premiums will stay in Canada, being invested in Canadian securities. The standing of the company, reserve, and past history, was obtained both from Washington and the provincial office of the Government, in Victoria, and was found to be satisfactory. The B.C. agency will be known as the Retail Merchants' Fire Underwriters Agency of B.C.; they have written several policies already, and the forms were received on Monday.

The actions of the executive in negotiating with the North-Western Mutual were endorsed by the Convention.

A glowing tribute was paid to the untiring work and zeal of the retiring president, T. F. McDowell. Mr. McDowell pointed out that according to the constitution the retiring president was still a member of the executive, and that he would work just as hard as while in the chair.

A Tribute to the B.C. Secretary

In T. J. Corley the merchants of British Columbia have a whole-hearted, enthusiastic Association man, to whose untiring efforts much of the present gratifying progress of the B.C. Board of the Retail Merchants' Association of Canada is due. When he took charge of the two organizations extant in 1914, the Vancouver Retail Grocers' Association, and the Retail Merchants' Association of B.C., he realized that a much greater field would be opened and much more progress would be possible if the Associations in this province were allied with similar Associations throughout the balance of the Dominion. The logical way was to have the existing Associations gradually merged into a Board of the Retail Merchants' Association of Canada and late in 1917 things began to shape up this way. With the able assistance of Mr. Haugham, an organizer of a magnetic and genial personality, a board was formed; many of the outside points in B.C. have their own local association of the R.M.A., and we may shortly expect to hear that the Vancouver Retail Grocers' Association and the Vancouver Butchers' Association have been merged into the Vancouver branch of the R.M.A. With this strong pivotal branch in good working order, the greater success of the organization of the remainder of the province of B.C. may be engineered. If further need might be urged for organization it need only be pointed out that the Oriental traders have the very strongest kind of an organization. The Japanese merchants were the only ones to, as an association, have a float in the recent peace pageant. The Oriental Association hired the best K.C. in Vancouver to fight for their interests during the city's attempt to collect business license fees—and they had a measure of success.

Convention Briefs

Professor Struthers gave an illuminating address to the delegates on "Character analysis at first sight." He gave a very interesting and correct reading of the natures of Mr. Phillips, of New Westminster, and Mr. Daykin. At one point the whole convention was thrown in an uproar when the Professor said, speaking of Mr. Daykin, "I should say that you would appreciate a droll, quiet, subtle witticism, whereas Mr. Phillips might enjoy a more hilarious joke." From the laughter this provoked we could but wish we had heard the jokes with which Mr. Phillips must have been regaling some of the delegates.

Mr. Murphey, of Nanaimo, seemed loth to remove his hat. It's no disgrace, Murphey, you never see grass on a busy street.

At the banquet at the Hudson's Bay, Professor Harper sang his own song, "Here's how, Vancouver." He was under a handicap, as no piano was available. However, Mr. Howker, Ernest McTaggart, and a few other lusty thrushes helped out splendidly.

The member from Port Alberni was so engrossed in watching the fireworks above the fair grounds that he pretty nearly moved an amendment to the motion to adjourn.

When the time came to sing "God Save the King," the entire assemblage voted that the Second Annual Convention of the B.C. Branch of the Retail Merchants' Association of Canada was an unqualified success.

Those Present at Convention

Among those present at the Convention were the following:—

K. Evans, South Vancouver; M. J. Phillips, accredited delegate, New Westminster; R. Fox, accredited delegate, Chilliwack; G. H. McRobbie, accredited delegate, Vancouver; R. H. Ormond, Nanaimo; F. G. Fox, Port Alberni; R. A. Thorpe, Duncan; Mr. Whitehouse, Armstrong.

Visitors who registered were as follows: G. A. Howker, prov. treasurer; D. H. Kent, President McDowell, W. M. Carson, H. C. Wilson, D. Shantz, J. Harkness, J. F. Merrilees, S. Des Brisay, A. T. Bridgeman, M. Rikson, E. R. Wilson, J. T. Crowder, T. H. White, E. R. McTaggart, E. A. Davey, C. Clarke, F. Cluff, J. W. Cornet, R. M. Tod, D. O. Bowen, J. M. Watson, H. Morrow, E. G.

Let Money In Through Show Windows

Great Changes Wrought in Display of Merchandise — Cultivate Individuality — Display Must Create Desire to Buy—Points to Bear in Mind—Change Often—Specialize—Give Prices

Written for HARDWARE AND METAL by Chas. Byford, of the Mills Hardware Co., Hamilton, Canada.

SOME time ago about 500 of the leading merchants of the United United States were asked this question, "What plan of advertisement would you retain if you were forced to choose one method and to give up all others?" More than 95 per cent. of the merchants answered in favor of displaying their goods in preference to all other forms of publicity. Investigation of the sales in a large number of retail hardware stores has shown conclusively that one of the least expensive, but at the same time one of the greatest return-bringing methods of advertising is obtained through using the right kind of window displays.

Great Changes

Improved commercial conditions, together with keen competition within the past few years have wrought great changes in the displaying of merchandise. These changes have increased the importance of the show window to such an extent that to-day it is perhaps the strongest, as well as the most vital element of retail merchandising.

The display window is rightly termed the "Silent Salesman," doing duty 24 hours a day, seven days a week, attracting every passer-by and drawing within the store hundreds that otherwise would not think of buying. It reminds the great buying public of its needs and keeps them informed on the various lines of merchandise and the prices. The average man, it is said, in two cases out of three, sees what he wants in a window display and decides to buy before he enters the store; with the goods before him in the window he can make his choice at leisure. Women are guided and influenced by window displays perhaps even more than men.

Cultivate Individuality

To make your store individual in character is to establish a difference between your place of business and that of any other hardware store in your community.

The easiest and most successful method to accomplish this is through premeditated and carefully planned window displays.

The old-time idea that hardware does not present the attractive and alluring displays that some other lines of merchandise do has gone into the discard. Merchants have wakened up to the fact that it is not only necessary to display goods in such a way that they will be interesting and agreeable to the eye, but that the display must also create the desire to buy. Creating the desire to buy is the goal of all advertising; the closing of the sales is entrusted to the salesmen on the floor.

By establishing personality and individuality in your show windows you unconsciously impress those same characteristics upon your store and your method of doing business, thereby raising your prestige and commercial standing.

It is a safe rule that the oftener you change your displays the more attractive your windows will become and the more marked the individuality of your store.

Advance in Display Methods

The up-to-date hardware store to-day is as pleasant a place to shop in as any other store. This can be made known through the proper use of the show windows. Anyone interested in window trimming will have noticed the great change that has taken place in the last decade regarding the methods of displaying hardware.

The window display contests of the past few years have proven that hardware can be displayed on the same high level as that of any other merchandise. Much of the fancy work, such as puffing and pleating, etc., on the backgrounds is now discarded, giving place to a neater and more dignified design.

Public Educated

The public have been educated to look for good hardware window displays, and the majority are interested and will appreciate a good display that will command their attention.

Continued on Page 120

In speaking of the results obtained from the cutlery window display of the Mills Hdwe. Co., Hamilton, shown on the preceding page, Chas. Byford said:

"It is customary for our windows to be changed every week, but this cutlery display proved to be profitable and it was decided to leave it in for two weeks.

"After the display was taken out the sales were checked up and showed they had amounted to over $100: the sale of pocket knives was far above our expectations. What is most exceptional, is that the sales for the second week of the display were nearly twice as large as those of the first week, which demonstrates that it is profitable to leave some displays in longer than the usual allotted time.

"The accompanying tool display was shown at the same time as the cutlery, and the background and colors of the two displays were identical. This display of tools was, like the cutlery, a good stimulant to our tool trade.

"The result from these two displays proved to us that 'there is profit in our show windows'."

Successful Merchant Tells How Retail Business Can Be Increased

By LLOYD P. SOUDERS

President, Parsons-Souders Co., Clarksburg, W. Va.

Honest advertising, consistently and persistently pursued, with liberal injections of brains, supported in the store by fair dealing and honest merchandise, will make any establishment grow; tested it out by stopping his own advertisements, noting receipts fall and then watching them rebound when he resumed printed bids for custom.

Reprinted by courtesy Associated Advertising, New York, N.Y.

THE merchant of to-day who is not a commercial athlete, in constant training, eternally alert, quick to act, and equipped with modern strategy and skilled in merchandising, advertising and salesmanship, must be content with a diminishing volume of business and very precarious profits.

What is advertising?

Advertising is the power of an idea, multiplied.

Other powers lose by expansion. For instance: Steam is power only when confined. Electricity radiated and diffused becomes nothing. Sound dies with distance.

But the great power of advertising increases by expansion. Diffusion is its very life. It grows upon what it imparts.

Must be Genuine

Advertising to be a power must be genuine, vital and related to the function of a meritorious business, and means of its furtherance must be carefully chosen.

Advertising is not merely to sell goods. It should be educational, thus enabling people intelligently and economically to buy goods.

Advertising, when efficient, aids distribution and lowers the cost of commodities, because it becomes the thousand-tongued salesman, making possible the multiple merchant, who reaches tens of thousands of people at less cost and effort than the store that does not advertise could reach one or a dozen.

Advertising must be an asset to business, not an expense.

Advertising must produce, and not consume.

The prosperity of any community depends upon its retail business. The farmer may grow and the manufacturer can make only as the merchant sells, and the merchant can sell only as the people buy. When merchants sell and people buy, then money and merchandise are kept in motion. Thus the whole community is prosperous.

I asked a merchant the other day why he didn't advertise, and he said: "I don't know how to advertise." "Well! Would you if you did?" "I certainly would. I'd go straight and contract space in papers. Other merchants would, too, but are just like me, not knowing how, have just let the matter go."

"Just letting the matter go" has cost merchants tremendously.

It is never safe, and the bad effect of it is usually felt just at the wrong moment for the business to stand it.

The biggest thing I have observed in the last twenty-five years of continuous hard work is that humanity needs to be prodded continuously to get done the thing it knows it ought to do. If we do not prod forward, we slip backward. Every time we "just let matters go" is just another slip.

The hardest person in the world to prod is yourself, to get done the things that you know must be done.

If I were to ask, "Is there a merchant but that would be willing to spend two cents to make ten cents?" he'd say, "No! Any merchant would do that."

Well, I'll tell you how to do it—advertise! Spend two per cent. of your sales, and every additional dollar added to your business there should be, and if you are a good merchant there will be ten cents net in it for you.

To Enormous Profit

I can take any retail business having the confidence of the public that has not heretofore advertised, and with three per cent. of its sales the first year, consistently spent in printers' ink, so increase its volume that at the end of the second year, using only two per cent. of sales will double the business.

I know it can be done; have seen it done time and again, and what can be done by one can be done by another.

There is nothing magic about an advertisement. Let me briefly define what an advertisement is:

It is simply sending out word to the public about something you have to sell. It must be seen. It must be read. It must be understood. It must be believed. And to be believed it must carry with it a reputation so that the person seeing, reading, understanding, believing, will want to possess the thing you have to offer:

Does advertising pay? Generally speaking, yes. Specifically speaking, yes and no. It all depends on the How, When and Where.

Seventeen years ago I came to Clarksburg, bought out the Jacobs store. His was the only store that advertised, spending $12.50 a month for it. He claims to have sold $5,000 a month. We immediately contracted with the four newspapers for a page, costing $100 a month total, and increased the sales to $8,500.

In other words, spending $87.50 increased the business $3,500—and that is less than two per cent.—just about half of it.

This additional business did not come from our competitors, either, because $2,500 was in women's outer apparel, and no other store carried ready to wear.

This is not all it did.

It started other merchants to thinking—and advertising.

It brought people to town to buy that never came before.

DOES ADVERTISING PAY? GET THIS:

In 1907 I tried an experiment. Our ready-to-wear department for the four and one-half months of the Spring season was running ahead 81 per cent., and not at the expense of profits, as the records showed 85 per cent. From June 15 to July 31 we cut out entirely advertising to see the effect. There was a drop to 50 per cent., a clean-cut loss of 31 per cent. for the season.

On August 1 we again started to advertise the department, and I'll admit, worked a little overtime to regain what we had lost. At the month end the sales showed an increase of 300 per cent.

That convinced me as nothing ever did that advertising does pay—and pays big to the one who knows how to use it.

For upbuilding a retail business no promotive force has been discovered that compares with advertising. Nowhere in store activities will intelligent endeavor yield more definite and gratifying results. Yet the subject has been given little study by owners of business.

Merchants must study the principle of advertising themselves, and must either find the time to do it or find someone competent to take care of it.

There are many helps to be had that should broaden the advertising vision of merchant and manager, directing them to the vital points in planning, writing, printing and following up the advertising of a modern store.

That Day is Gone

The day of haphazard money-making in retail stores has gone. In the good old days, when every merchant started "from scratch" with nothing but his own wits to help him win, there was enough easy business to provide a satisfactory volume, and sufficient net profit for almost any man who went into the game.

To-day competition has grown to a state bordering on ferocity, and modern methods of efficiency, salesmanship, advertising methods and service have produced powerful allurements to attract the public.

The merchant of to-day who is not a commercial athlete, in constant training, eternally alert, quick to act and equipped with modern strategy and skilled in merchandising, advertising and salesmanship, must be content with a diminishing volume of business and very precarious profits.

Self interest, as some merchants interpret it, prompts them to falsify in their advertisements to sell shoddy goods.

Honesty Means Success

Contrasted with them are the wise merchants who know that honesty is the cornerstone of success. Self-interest prompts them to take precisely the opposite course.

Enlightened self-interest is the greatest ally to the truth-in-advertising movement, and truth wins trade.

If we are to win the trade of all the people we must not only advertise, but we must advertise truthfully.

The first necessity for good advertising is to have some event to exploit or some exceptional merchandise to tell about. Simply listing goods is wasted energy, loss of time and money. It is better to have no advertising at all than to print commonplace stories about ordinary merchandise.

So exploit your merchandise that people will not only read your advertising, but will buy your goods.

To be really "good," your advertising must sell the maximum amount possible. It must sell the goods so that they will stay sold.

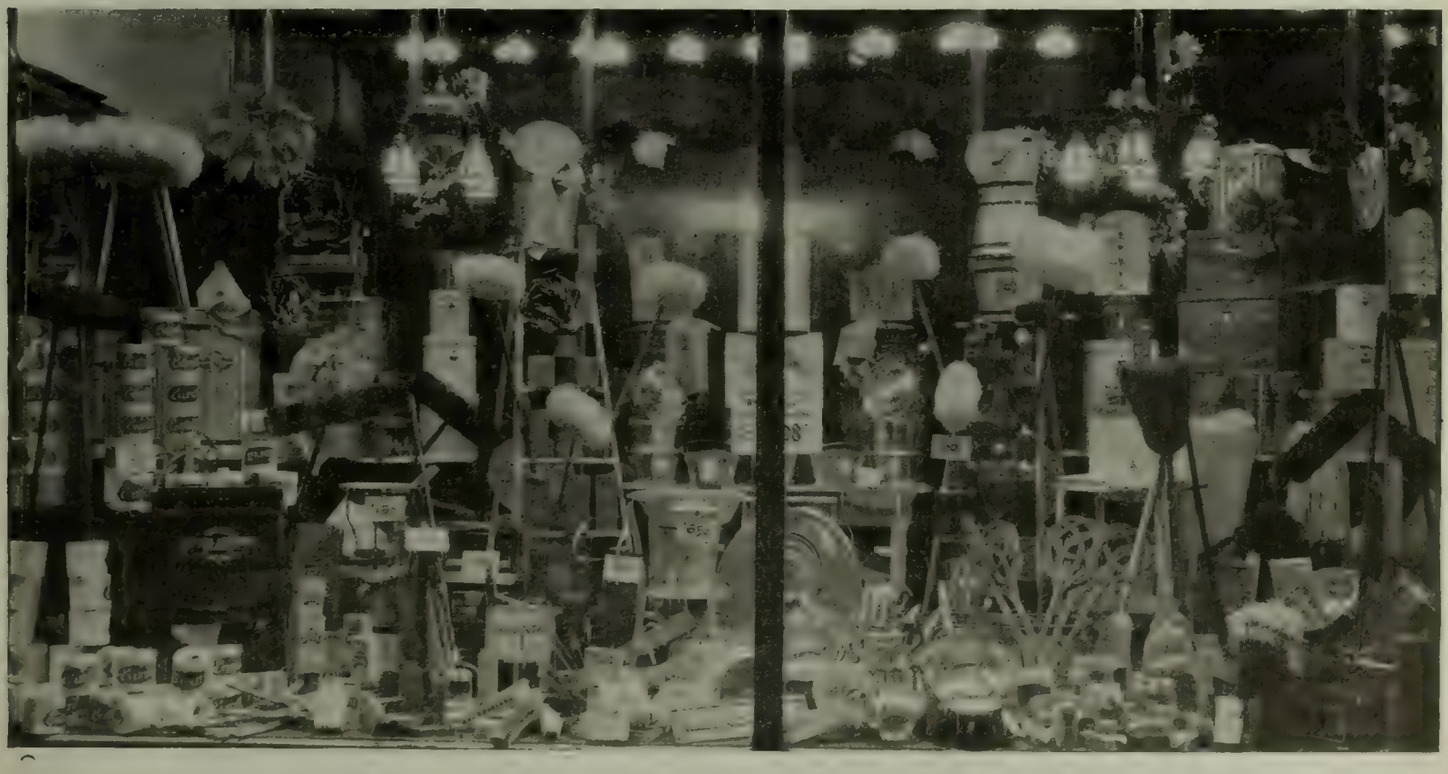
Good advertising not only makes immediate sales, but it should create a definite amount of good will, leaving with the purchaser a favorable impression that will bring him back again.

Must Know the Goods

Let the foundation of your advertising copy be complete knowledge of your goods. Fill yourself full of the fact about their merits. Write the story in the powerful words of truth. Gild the tale with honest enthusiasm. Endeavor to sell the goods to people who will most appreciate their possession. Thus sales will vastly increase, you will have a prosperous business, and satisfied customers, and you will take a new joy and pride in the results and spur you on to larger fields of merchandising.

Every advertisement should be sent to the printer with a layout in full detail —showing the space to be devoted to each paragraph, the arrangement and the type face (in different sizes) that are to be used.

Select a definite space in the paper; use one type face for all your display headings, and demand that no other style be used or mixed with it. Likewise the type face for your body matter.



Make good use of white space, and when illustrations are used have only the best. For a few dollars a month an illustration service may be had, representing your particular business, thus giving harmony and producing a pleasing effect.

The advertising copy must be "good," must faithfully, completely and enthusiastically describe the goods for sale. It must be written intelligently and interestingly, in words that will be clearly understood, which will make the merchandise alluring to readers.

The headline must convey that information which will catch the attention of people most likely to buy that particular kind of goods, and it should arouse curiosity and interest, so that the matter following will be read.

BOOKINGS AHEAD OF PREVIOUS YEARS

The outlook for excellent business next year is already evident, according to George C. Davis, managing director of Frothingham and Workman, Ltd., Montreal. "Bookings have never been so good as they are at the present time," said Mr. Davis, "that is, for spring delivery." Mr. Davis pointed to the fact that present business was also very satisfactory, and stated that the general outlook indicated a large increase as likely in actual business during the coming months.

Another good suggestion for fall display of household goods is shown above. Note the use of price cards.

EDITORIAL COMMENT

THE things that make up the barrier between men and employers are suspicion, lack of knowledge or real facts, and selfishness. Neither side has any monopoly on these things.

* * *

THE explosion in the elevator at Port Colborne seems to have been due to the fact that blowing dust out of wheat makes it lighter. Being lighter, there is a loss of money. Therefore, the dust must stay. Dollars and dust win out against lighter grain and safety. The coroner's jury whitewashing all and sundry is a poor compliment to the intelligence of the community. It is certainly the bounden duty of some official of the Government to explain why they are afraid to order the dust blown out of wheat.

* * *

MEMBERS of the Dominion Government are working hard to qualify for sessional indemnity of $2,500 each. They have got to get in 30 days, by hook or crook. And so the country faces the beautiful spectacle of a House held in session, with, at times, speakers blazing away to 16 of the 230 members, hoping and praying that they can stick it out long enough to get the $2,500.

MEETING MAIL ORDER COMPETITION

THE only merchant who needs to fear mail order competition is the merchant who is inefficient. The inefficient merchant must educate himself and his sales staff; he must buy and sell intelligently; he must study the market to keep his stock up-to-date; he must advertise intelligently. To survive, he must meet mail order competition under equal conditions and he can if he wants to. The average merchant can take a great many lessons from department stores and mail order houses. These stores are keyed up to the utmost limit of efficiency. Their window trims are among the best in the country, they display their merchandise on tables and counters, where it can be easily seen and handled by customers. They use plenty of price tickets and they mark their prices in plain figures and stick to them.

They work on the principle that stock should be turned rapidly. They clean out old stock promptly. They have training schools for clerks, and this is where many retailers fall down. There are very few hardware stores where sales could not be speeded up 40 or 50 per cent. without additional help. There is too much lost time in the average store. If the average merchant could speed up the efficiency of his sales staff, and his selling helps, he would greatly increase his income.

INSIDIOUS INFLUENCE OF THE MOVIES

WE do not know whether the literary genius of the Bolshevists is being employed to write the scenarios of the motion picture dramas which deal with social problems, but it might well be to judge from the way in which class feelings are worked upon on the screen to create animosity between workers and employers. Through reel after reel the poor worker is portrayed as a paragon of all the virtues and the millionaire employer as a monster of most of the vices; the dove of peace can almost be seen above the lintel of the cottage and the nest of the vulture upon the doorstep of the mansion; theft as committed in the slums is usually by the down-trodden hero forced from the paths of virtue, while grand larceny in the upper circles is a business and a pastime.

One of the latest of the high-class productions, featuring a deservedly famous little actress, shows a meeting of directors where the head of the concern defends himself for having had the fair-haired hero sent to jail. The audience does not have to imagine what he says, it is made the subject of a caption:

"Great Industries Like Great Nations Are Built on the Bodies of Human Victims."

Of course, it is the popular thing to thus play upon a weakness of human nature. The majority like to believe that the poor are virtuous and the wealthy wicked, even in the face of confounding criminal statistics. They also like to believe that corporations are bloodless monsters. But where is all this leading us? The people are already beginning to take for fact what is intended for entertainment. The benefits of quantity production in bringing the fruits of industrial genius into the lives of the great mass of people are being forgotten, if they were ever understood or appreciated. Is it not the duty of the Government to do something to overcome this insidious influence in creating race dissension?

There is a board of censors which must take responsibility for this condition of affairs. It, no doubt, prides itself upon prohibiting the promiscuous display of hosiery—when worn—and closely studies

the styles in bathing suits. But it is straining at a gnat to swallow a camel when it devotes itself to such things and allows pictures to appear which must do much to cheer the cause of the red revolutionaries.

CONFERENCES THAT WORK INJURY

AT this time, when conferences and proposed conferences are the subject of wide discussion in Canada and the United States, the *American Metal Market* directs attention editorially to a phase of the situation that has not been given the attention it deserves:

"Many men from the ranks of 'those who direct labor' are justly indignant over the plan of representation proposed for the forthcoming White House conference of labor. The plan contemplates the admission of 15 men to be selected by American Federation of Labor and indicates no intention that unorganized labor shall be represented. There are to be 15 men selected by commercial bodies of various descriptions, and these men will, of course, be representatives of 'those who direct labor.' Then there are to be 15 men, or approximately that number, to be selected by President Wilson. One cannot absolutely deny the possibility that the President will select men truly representative of that form of labor that is 'unorganized,' but one may certainly be pardoned for entertaining doubts. It is more likely that the men thus selected will very largely be theorists. One can readily guess what would be the outcome. The theorists would say the largest number of words in the conference while the ideas that would operate after the conference would be those of the practical men, the 15 representatives of employers and the 15 representatives of organized labor.

"For the *American Metal Market* has no thought that the representatives of organized labor, the union officials and organizers, are not practical men. They are eminently practical men. They hold jobs because there are unions and they are intelligent and painstaking in their efforts to make unions necessary.

"It will be an egregious blunder if unorganized labor is not fully and directly represented at the labor conference. Only trouble can result from the omission. The object is to bring together 'labor and those who direct labor.' It is admitted thus that there are two parties. The one party cannot represent both itself and part of the other party. 'Those who direct labor' can represent only themselves. They cannot represent their employees. Will the representatives of the American Federation of Labor be expected to represent not only organized labor but those who employ organized labor?

"It may be admitted frankly that while representation of unorganized labor is altogether feasible it is not as easy as it might be, if an inefficient opportunist policy had not permeated the counsels of so many manufacturing concerns, whereby the organization of company unions has been avoided so much more than it has been undertaken. In substance, the opportunist employers 'thought they could get along without it.'

"What the workman should have is participation in that part of the works management that directly concerns him, and payment for precisely what he accomplishes. The workman is concerned with his immediate surroundings but labor organization concerns itself only with the surroundings of all men who belong to the class. The workman is entitled to payment for what he does, but organized labor makes it that he is entitled to payment, not for work but for 'time.'

"Why are a great many men organized and a still greater number not organized? There certainly must be something in the unorganized condition or all men would be organized. There has been ample time for the process. Generally speaking, the attitudes of the two classes of men are diametrically opposite. The one man depends upon the union for results, the other upon his own efforts. Are not these unorganized men entitled to full and direct representation at the labor conference?

If employers deal with their employees fairly, in the broadest sense of the word, there is no need for unions. If they do not, the remedy is not unions, but that the employers should treat the men fairly. The combination of the two wrong conditions cannot make a right condition. Labor 'leaders' profess to have their feelings outraged by a thought that labor is a 'commodity,' yet they go further and make a commodity not of the labor but of the mere time of the workman. It is an eight-hour day or a six-hour day or a 40-hour week, and nothing about performance.

Presidents of corporations, salesmen, superintendents, are paid by results. Why not workmen? The labor leaders firmly believe in payment by results, but for themselves, not for the workmen. The results are new unions formed, larger memberships, results that bring more pay to the labor officials. That is the kind of payment by results the labor leaders believe in, and in order that this kind of payment by results shall flourish the payment of workmen by results is condemned and prevented. And these, apparently, are to be the only direct representatives of workmen in the proposed conference between 'labor and those who direct labor.' The conference is going to work an injury in the long run to American workmen and American industries instead of benefit if it is not placed upon a better basis than now seems to be contemplated."

Getting the Home-Makers' Trade

Figuring Out the Needs of a Prosperous Residential District is Not as Easy as It Looks —The Man Who Can Do It is going to Cash in on a Lot of Good Business —How Everton McNichol of Toronto is Ging After Trade

Based on an interview by C. E. PARSONS, of Hardware and Metal, with Everton McNichol

THE hardware store of Everton McNichol, Toronto, is located in a residential section that has built up within ten years. Mr. McNichol's store has grown up with the district, and he has seen it develop from a section in which there were only a few dwellings to one of the finest residential sections in the city. It might seem a comparatively easy matter to develop a nice business in a district of this kind, but to develop the kind of a business that Mr. McNichol wanted to develop has meant a lot of thinking and planning. It has meant constant looking ahead in order not only to keep up with but to keep ahead of the buying tastes of a class of people who not only demand the best, but are prepared to pay for it.

A Good Fault

Now, after having solved these problems and built up a steadily growing trade, one of Mr. McNichol's chief troubles is that his store is too small. It is too small in more ways than one. It is not big enough to handle the business he is doing and there is not sufficient room to allow the proprietor to display his goods in the way he wants to display them.

Mr. McNichol is a thorough believer in keeping his stock out where people can see it. In following out his ideas along this line he has three display windows, two all glass silent salesmen right up at the front of his store and he has turned the front end of his counter into a display table.

Everything is Priced

Everything on the counter, in the display windows, and on display in the store is price marked. It is marked in large figures, too, so that prospective buyers wont make any mistake as to how much it will cost them. In a great many instances Mr. McNichol goes even farther. He has the name of the article printed on the card, his own name and the price. There are a great many articles that the average buyer does not know about. By putting a card on them Mr. McNichol tells them at once, without their having to waste his own or his clerk's time in asking just what the article is and what it is for, and also how much it is. By adding his name to the card he impresses his store in the mind of the buyer unconsciously. It is funny, but a name impressed in this way has a habit of sticking when other things are often forgotten.

Changed Regularly

"Our three windows are real producers," said Mr. McNichol to HARDWARE AND METAL. "I cannot say too much about the really excellent results we always obtain from window displays. We make it a point to keep seasonable lines in them all the time. The two main windows are changed each week. On everything shown we mark the prices plainly. I think this is a good plan. It saves us a lot of time and people like to know. Very often we find that people will come in weeks after a window display has been in and describe accurately such and such an article. They invariably remember the price. We find that people are always interested in good window displays. They look for our window changes, and we find that no sooner is a line of goods on display than people start to come right in and ask for it."

Located on Corner

Mr. McNichol's store is located on a corner. One of his windows is so arranged that it shows on both streets, the main street and a side street. The other shows in the main street only, and the third shows only on the side street. This third window, which is smaller than the others, is certainly not a "slacker," in fact it works overtime.

"This spring," said Mr. McNichol, "I more than trebled my sales of garden seeds through that window. Early in

View in McNichol's hardware store, Toronto.

the season we filled it with earth and planted green stuff in it. There is in the window a drain for washing purposes, so we had no trouble at all to keep the earth moist. The window faces the south and gets the morning sun, so the seeds grew splendidly. Early in April the stuff was up and growing nicely. Hundreds of people who saw that window watched the stuff growing, and it gave them the idea to have a garden of their own. Our seed sales grew and grew, and broke all past records. It was a simple plan, but it worked, and by getting the stuff in good and early we were able to impress people for a longer time than usual with the gardening idea.

Sells Fishing Tackle

Just at present the window is filled with fishing tackle. A couple of miles past Mr. McNichol's store is the Humber, where all the fishermen in the district go when they want a little sport. The aforementioned fishermen include a small army of small boys, and by his window displays Mr. McNichol has succeeded in getting a great deal of this trade, and says that his business in fishing tackle has shown a steady increase. A little later he plans to put in this side window a display of sporting rifles and ammunition. This is to catch the eye of the hunters. In the district in which the store is located there are a great many men whose idea of a real outing is to spend a few weeks in the north woods shooting bear, deer and other game. Mr. McNichol is one of those to whom this class of sport is dear, and as a result he is in close touch with a large number of hunters. This means a lot of good business in this line for him, and the fact that he can discuss

Window display in McNichol's Hardware Store.

with them all the small details of this or that make of rifle or ammunition, and swap yarns with them about this or that hunting camp, gives him a personal interest with the customers that is a strong link in bringing them to his store whenever they want rifles or supplies. Not only that, but the sons of these men hear about McNichol's store, and when they want sporting goods, go there for them. Mr. McNichol states that his trade in such lines as baseball goods, etc., has expanded steadily, and he is going more heavily into it every year.

A Big Seller

Auto accessories he regards as a most promising line. He started a couple of years ago by handling tires and has been gradually adding to his lines until now he has reached the point where he finds it is necessary to carry a complete stock if the best results are to be obtained.

"I wanted to go cautiously on accessories," said Mr. McNichol. "It is a line that needs a good deal of knowledge of the goods. There are so many novelties coming out all the time that one can easily get in a stock of stuff for which there is no demand. I have tried to avoid any trouble of that kind and have gone ahead rather slowly but surely. In the last couple of years I have learned quite a lot as to what is called for and about what the car owners are likely to want. This helps a whole lot. I have found that handling accessories is a nice business and carries a good profit. When

EVENTS IN THE TRADE

Business Changes

Thamesford, Ont.—John Williams, tinsmith, has discontinued business.

Prescott, Ont.—G. S. Williamson, for the past two years on the editorial staff of HARDWARE AND METAL, Toronto, has purchased the hardware business of N. Williard & Co., and takes possession in a short time.

Montreal News

W. S. McLennan, sales manager of Brandram-Henderson, Ltd., is in Winnipeg this week.

O. N. Parent, of the Canadian Yale & Towne Co., St. Catharines, Ont., was this week in Montreal.

R. M. Smith, representative of the Canada Paint Co., Ltd., at Toronto, was in Montreal early this week.

George Henderson, president Brandram-Henderson, Ltd., returned on Monday from a trip to Halifax.

Oliver Chown, of Edwin Chown & Son, Ltd., Kingston, Ont., was a Montreal visitor on Wednesday of this week.

D. A. Whittaker, assistant to the managing director, the Sherwin-Williams Co., of Canada, Ltd., Montreal, is holidaying at his old home, Morrisburg, Ont.

W. S. Leslie, president of A. C. Leslie & Co., Ltd., wholesale metals, Montreal, is this week visiting Toronto, London and Hamilton.

J. H. Gordon, secretary-treasurer of the Sherwin-Williams Co., of Canada, Ltd., has returned from a trip to the Winnipeg office.

The many friends of A. H. Jenkins, of A. C. Leslie & Co., Ltd., will regret to learn of his father's death. Mr. Jenkins Sr. had attained the age of 78, but had been in somewhat failing health for while past.

Winnipeg Personals

Henry Barker, manufacturers' agent, spent a few days in Winnipeg on business.

Benjamin Love, representing the Carborundum Co., of Chicago, spent several days in Winnipeg calling on the jobbing trade.

Mr. Adcock, representing A. McFarlane & Co., Montreal, is in Winnipeg this week with a full line of samples, calling on the jobbing trade.

W. H. Parker, formerly of Merrick Anderson Co., has disposed of his business (The Wood Hardware Co., Regina) to his brother-in-law, Mr. Wood.

Sudden Death of W. C. Gurney

Prominent Toronto Business Man—President and General Manager Gurney Foundry Co., Ltd.

W. Cromwell Gurney, president and general manager of the Gurney Foundry Co., Ltd., collapsed suddenly Wednesday afternoon while visiting the office of his physician for routine treatment. In spite of the efforts of two other physicians present, resuscitation was impossible,

THE LATE W. C. GURNEY

Who died suddenly in Toronto this week.

and Mr. Gurney passed away from heart failure.

Earlier in the year Mr. Gurney suffered from influenza, from which he had not made a complete recovery. The sudden death of his mother only last week affected him profoundly, and since that tragic event he had been upset and unlike himself. The news of his death came with shocking suddenness, as he lunched yesterday, apparently in good health, at the National Club in company with business associates.

Mr. Gurney, who was in his 46th year, was the son of the late Edward Gurney, whom he succeeded as president of the firm upon the latter's death a few years ago. He was educated at Upper Canada College, and then entered the Gurney Foundry Co. He was a member of the National Club, Lambton Golf Club, the Canadian Manufacturers' Association, the Board of Trade, and was one of the best-known of Toronto's business men. He was also a member of the Metropolitan Church.

He is survived by his wife and three children, and also one brother, E. H. Gurney, and three sisters, Mrs. Sanford Evans, Ottawa; Mrs. E. B. Ryckman, Toronto, and Miss Gladys Gurney.

APPOINTED NEW S.-W. P. ADVERTISING MANAGER

The Sherwin-Williams Company of Canada, Limited, have appointed W. L. Massiah as advertising manager in succession to F. A. Mann. Mr. Mann's duties have so increased of late that the appointment of a successor was necessary in order that he might devote his attention to sales promotion work as trade sales manager. Mr. Massiah has been with the Sherwin-Williams Company for many years. For ten years he represented the firm in the Ottawa Valley, and for a number of years has been connected with the head office at Montreal. Here he was associated with the advertising work, and this will afford him an advantage in undertaking the new duties which will now devolve upon him.

MOVEMENTS OF CANADIAN TRADE COMMISSIONERS VISITING CANADA

The following table gives the movements of the visiting Trade Commissioners:

B. S. Webb, Buenos Aires—now traveling in Ontario.

D. H. Ross, Melbourne—now traveling in Ontario.

W. A. Beddoe, Auckland—traveling in Ontario.

W. J. Egan—now in Toronto.

Harrison Watson, London—will arrive in Ottawa about September 21.

H. R. Poussette—will leave Canada in September on a trip to Oriental countries.

Canadian manufacturers wishing to communicate with any of these Trade Commissioners may address them, care Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

Death of W. L. Haldimand

Within a few days of his ninety-second birthday, W. L. Haldimand, Sr., veteran hardware man of Montreal, passed away at his home, 240 Bishop Street, after an illness of several weeks, on Monday last.

It was the pleasure of the Montreal editor of HARDWARE AND METAL to interview the late Mr. Haldimand less than a year ago at his home, and to secure the basic facts of his hardware experience in Montreal, and which covered a period of sixty years.

The inception of the Haldimand business in Montreal dated from 1832. In that year Mr. Haldimand's father opened a store at the corner of St. Vincent and St. Paul Streets. This location was near the water front, and at that time, as to-day, it continued to be the centre of a great deal of Montreal's commercial development. From the above date forward, and until the year 1880, the business was conducted on a wholesale and retail basis. Giving the matter careful study then, Mr. Haldimand decided on a new step and engaged in the manufacturers' agency business. His long experience and connection with trade and trade conditions in the eastern section of Canada commended him to many of the leading manufacturers of Canada at that time, and for them he secured a large volume of business. Not only so. Transportation conditions were such then as to make importing from the Old Country a profitable and satisfactory proceeding, and a great quantity of several commodities was handled by the Haldimand firm. The agency business was conducted at, or near the above location, for nearly thirty years.

Original Business Continued

The manufacturers' agency business begun in 1889 by Mr. Haldimand was shared by his son, W. L. Haldimand Jr. Retiring from active participation a few years ago, the son conducted the business until 1916, ill-health requiring him to reside in California. In August of 1917 Mr. Haldimand Jr. died, and subsequently the business has been continued at the old premises by John R. Anderson, many lines handled previously still being those now carried by Mr. Anderson. The funeral took place Wednesday afternoon at 2.30 from 240 Bishop Street, the attendance being large and the floral tributes many.

Mr. Haldimand is survived by his widow, formerly Miss Mary Annie McKenzie, daughter of the late Roderick McKenzie. Mrs. Haldimand is eighty-nine years old. Four sons, all living in Montreal, also survive.

MONTREAL MERCHANTS' ASSOCIATION HOLDS FIRST ANNUAL

The Merchants' Association of Montreal held its first annual meeting yesterday afternoon, Mr. E. E. Wallace presiding. The work accomplished during the first year of the association's existence was reviewed at length in the report of the manager, Mr. J. J. Fitzgerald, and was found very satisfactory by the meeting.

During the year the membership of the association had been increased to 229, and the activities of the organization were many. On behalf of the members, 103 cases were handled before the criminal courts, while co-operative work was done in connection with other cases which were not brought before the courts, as well as progressive propaganda.

Among other matters taken up by the association was the recommendation to the city commissioners for amendments to the by-laws controlling second-hand and junk dealers. Steps for the prosecution of those who fail fraudulently and the association's activities in connection with straw bail cases were also among the organization's activities during the year. Another important achievement was the securing of a change in the criminal code which will prevent abuse in the matter of changing from the Court of King's Bench to the Sessions.

At the meeting yesterday the following were appointed a nominating committee to select names from which a directorate will be chosen: Messrs. Smith, J. H. Armstrong, F. W. Stewart, C. E. Dumaresq and Dugal. The election of officers will be held in October. The future programme of the association was discussed by the members and among other matters given consideration was a line of action with a view to suppressing fraudulent advertising.

THE GLIDDEN COMPANY SALES CONVENTION

The merchant sales department of the Glidden Company held their annual convention at the company's Cleveland plant September 2, 3, 4. Representatives from all over the country were present to hear the new sales and advertising plans for 1919-20. The growth of the concern was portrayed by the group of salesmen and branch managers in attendance as compared with the convention only a year ago.

The meeting was opened on Tuesday morning by addresses of welcome from Mr. Adrian D. Joyce, president; Mr. O. A Hasse, vice-president; and Mr. R. H. Horsburgh, secretary and treasurer. Mr. Joyce brought an enthusiastic applause at the announcement that the Nubian Paint & Varnish Company of Chicago had been taken over by the Glidden Company. This gives the company a much needed varnish factory and paint factory in Chicago to take care of their increased business. The Glidden Company now has seven factories in the United States and Canada. In addition to these factories the company is rapidly establishing branch warehouses and sales offices in all principal cities. Every city in the United States of 50,000 population or more will soon have a retail store operated by the Glidden Stores Company, an organization whose purpose it is to distribute the products of the Glidden Company and its subsidiaries.

Mr. M. F. Emrich, general manager of the Glidden Stores Company, explained the purpose of these stores in his session of the convention on Wednesday afternoon.

These stores will serve painting contractors and architects. Also decorative artists will be employed in each store to give practical suggestions to consumers.

The convention concluded with a banquet at the Statler Hotel. At this meeting the men all received gold and enameled buttons inscribed E.O.E., and were initiated into the E.O.E. of the Glidden Company.

BUSINESS SHOWING INCREASE

While the shares of this enterprise have reached a level that makes them hardly of interest to the ordinary investor, let alone the speculator, yet those, and they make no mistake, who believe that the best in any line is the cheapest, will note, with much interest, the tremendous strides that this, the greatest of the mail-order concerns, continues to make. The gross sales for August show an increase of $4,000,000, or nearly 30 per cent. over those of 1918, and for the year to date, a gain of $34,000,000.

If this same rate of increase is maintained through the balance of the year, the company will do a gross business of $235,000,000, which will compare with $198,500,000 last year. This would be an increase in four years' time of no less than 120 per cent.

The question of share profits for the stock will depend on two factors—the ratio of expense and the amount set aside for taxes, reserve, depreciation, etc. Until last year the company's cost of doing business had remained very steady at around 88 per cent. of the gross earnings. If this rate were maintained for the current year, and its allowance for taxes were the same as last, which would seem to be ample, its "per share" profit on the common stock would be just about $20 per share. This would not be a new high figure, as it has made larger per share earnings in past years on a smaller capitalization.

Last year, however, the company's proportion of expense to gross dropped to 79 per cent. If it could maintain the same figure this year, and were to allow $15,000,000 for taxes, the final balance for the common stock would be no less than $40 per share.

The company is committed to an expenditure of about $5,000,000 for distributing stations in Chicago and Philadelphia. At the close of last year it had a net working capital of about $25,000,000, of which over $12,000,000 was in cash and Liberty Bonds.

On the other hand, its borrowings were heavy, its total current liabilities being nearly $47,000,000. Evidently it can make very good use of its surplus profits as working capital in carrying on its enormous and increasing volume of business.

GETTING THE HOME MAKER'S TRADE

Continued from page 61

I only handled tires and a few small lines I found car owners continually inquiring for other goods that I did not have. I have been learning just what they want. Now one of the big oil companies is erecting a large supply station just across from my store. That will mean that more car owners than ever before will be in this vicinity, and I am going to go right into the auto accessory lines. It looks to me as if there is a big field there and a profitable one."

Sells Many Washers

Located as he is in the heart of a prosperous residential section, Mr. McNichol finds a big demand for washing machines. He sells both electric and power machines, and finds the demands increasing steadily for both. He goes after this business systematically. Each month a circular telling about the various makes of washers and giving the prices is sent out to the homes in the district. These always produce results, and all inquiries are closely followed up.

"There is no advertisement like a satisfied customer," said Mr. McNichol, "and that is especially true in regard to washing machines. I sell all our machines on a guarantee. If they are not exactly as we represent them, and if they will not do everything we claim for them the buyer can bring them back. There is a whole lot in being able to stand behind a line of goods and give a broad guarantee. It gives the dealer a solid foundation on which to base sales talks. We can trace many sales to our satisfied customers. Women who have found a machine giving them good service and saving them all kinds of time and hard work are not slow to tell others about it. Our washing machine sales have doubled in three years, and a lot of the business has come to us through people who have sent their friends or talked about their machine to others. In addition we frequently have a window display, and always keep a washer on exhibition right up in the front of the store."

Paint Sales Brisk

As might be expected in a section where nice homes are numerous, Mr. McNichol sells a lot of paint. This season he stated his sales are fully twenty-five per cent. ahead of last year.

"Women," said Mr. McNichol, "are buying more paints to do various jobs around the home than ever before. While the spring is the big season with us we find it an all-year-round business, and it is growing all the time. Our sales of auto finishes have been increasing steadily. This year paint sales have broken all records. I do not think this is all attributable to the advertising that was done by the manufacturers, as to my mind they started their campaign too late."

The paint department in Mr. McNichol's store occupies the rear section and one side. The show window mentioned above provides it with abundant light. The stock is kept neatly arranged and in spotless condition. Brushes are shown on the counter.

Another Big Seller

Another big seller in this store is kitchenware. As shown in the illustration, one side of the store is devoted to showing these lines and the neatly arranged shelves of enamelware and the shining aluminum goods make a striking and very attractive showing.

"We turn our stock from three to four times a year," said Mr. McNichol, "and the amount of goods handled is steadily increasing.

He commented also on the fact that there is a decided tendency on the part of the buying public to demand the best goods regardless of prices as long as they are reasonable. Just here is where Mr. McNichol has had to use a lot of judgment. With a market of this kind available he has had to use particular care not only in selecting a stock of high quality goods but in keeping everything up to date. An instance which occurred while HARDWARE AND METAL was in the store may illustrate this.

Keeps Up-to-Date

A woman came in and asked to look at kiddie cars. Mr. McNichol had them, yes, certainly, and would she just step over and look at the very latest model he had just got in. The model happened to be of an aeroplane design, with a propeller on the front, wings like a biplane behind it, and a sliding seat. Mr. McNichol emphasized all these points and also explained to the woman just what an advantage it would be to her to buy the latest model, because her boy would then have something that was absolutely new, and the only one of its kind in the neighborhood. It would be the envy of all the other lads, and only cost 75 cents more than the ordinary kind. In addition to being the latest model it had the advantage of not upsetting easily. Did the woman buy? She certainly did. There was never any question about the new model being 75 cents more than the ordinary kind. Apparently she never even considered that part of it.

Same in Other Lines

This idea of keeping up with the latest and best goods for his customers is followed out by Mr. McNichol all the time. He does not want his store to be known in any sense as a "cheap" store, but he aims to have it known as the place where quality goods can be secured and where good service is given all the time. It is no trouble, he says, to sell, providing you have the right kind of goods. He showed HARDWARE AND METAL a line of boys' express wagons he is handling. They are nice-looking wagons, well built and strongly, with rubber tires and everything fixed up in a manner that would make any healthy, growing boy want one.

"We sell a lot of those," said Mr. McNichol. "They retail at $10 each. When I was a lad if anybody paid $3 or $4 for a wagon it would be considered pretty high. People in this district want what they want, and if I have the goods a dollar is neither here nor there."

Sells For Cash

With the exception of his factory accounts, Mr. McNichol conducts his business on a cash basis. This he finds is most satisfactory in every way.

Speaking of the big mail-order houses in Toronto, he stated that he has no trouble whatever in meeting any competition from that source. While it exists he can, if given a chance, more than beat the mail-order firm every time in quality and price.

THE TWO PER CENT. CLASS

(Continued from page 48)

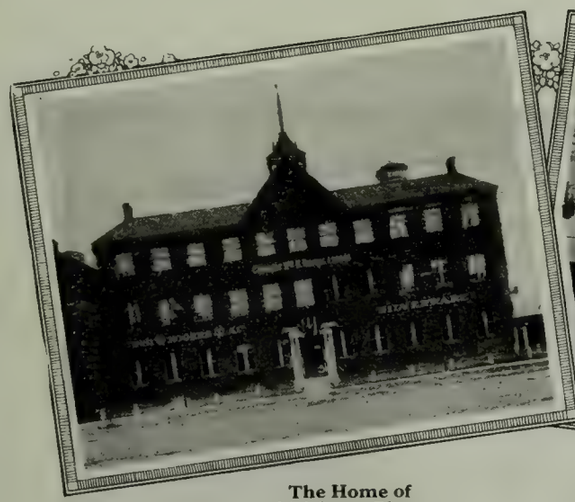
tion, and realize that there is something else outside of this place, and some people in the world of equal or more importance than yourself, I will let you off this time. You will? Silence gives consent. I knew you would be reasonable at the last. Then farewell, Persimmon, farewell, forever! But remember, if I do not hear good reports from the boys about your conduct, if you do not let a little of the condensed milk of human kindness soak into your soul, I'll be back here to spend my vacation, and I'll come in here every morning just as if I had to sell you goods, and then, instead of asking you for an order and listening to your grouching, I'll round on you like this. Remember!"

I do not mean to say, of course, that Persimmon actually died. But when he came to, he certainly was another man, and the greetings to travellers to-day are not of the type experienced in this store a few years ago.

ORGANIZING THE B.C. MERCHANTS

Continued from page 54

Harris, S. Pritchard, E. L. Brisbin, P. J. Burch, R. M. Millar, S. Scott, J. T. Cahill, G. E. Trorey, T. J. Corley, provincial secretary; G. S. Hougham, provincial organizer, all of whom were from the City of Vancouver; T. Willcox, of Kamloops; J. H. Ashwell, Chilliwack; J. F. Edge-Partington, A. C. McFire, Port Alberni; Harvey Murphy, Nanaimo; W. R. Gillbert, Chilliwack; R. A. Thorpe, Duncan; W. F. Ing, New Westminster; C. Muirhead, Chilliwack; K. Evans, South Vancouver; G. H. Jacobson, New Westminster; J. Mercer, New Westminster; B. S. Ross, New Westminster; J. C. Dakin, Nanaimo; A. P. McDonald, New Westminster; D. M. Welsh, New Westminster.



One of the most prominent guests to the Convention was John Impey, of Vancouver. Mr. Impey was the first organizer employed by the Dominion office of the Retail Merchants' Association. He is eighty-nine years old, and his knowledge of Association matters going back a few decades was of great help.

MONTREAL HAS BUILDING INCREASES

Indications are that the building activities in Montreal will considerably exceed the amount of last year. The total amount inscribed for building permits in 1918 was $4,883,633. This year from January to September the estimated value of construction work for which permits were issued was $5,913,668.

'HEIRLOOM' PLATE

The Home of Heirloom Plate

Down-Town Show Room Kent Building, Toronto

ONE of Toronto's best known landmarks is the plant of the Canadian Wm. A. Rogers, Limited, the home of Heirloom Plate. This beautiful, ivy-covered building, is situated on King Street West, and dealers who attended the Exhibition will readily recognize it from this illustration.

The building shown is but a small part of the plant. The main buildings are in the rear. A large showroom is maintained in the Kent building, on Yonge St., for the convenience of Canadian Wm. A. Rogers dealers.

TORONTO—the buying centre of Canada

Toronto the "Place of Meeting" for Canada's Buyers of Hardware

TORONTO is an Indian name meaning the "Place of Meeting." It is well named, for it is the meeting place of buyers from all parts of Canada, and from its multitude of factories and warehouses goods are shipped from coast to coast.

The central location of Toronto, the network of railways which serve it, its shipping facilities by water, and its importance as a banking centre make it the clearing house for the most extensive buying territory in the Dominion.

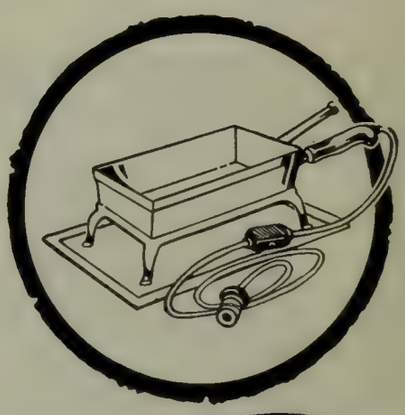
BECAUSE it gets electrical power direct from Niagara Falls at rates comparing favorably with any other city in the world, Toronto has exceptional attractions which scores of manufacturers have not been slow to appreciate. Well over 100 American firms have located their Canadian branch factories in Toronto. Among these are some of the largest firms in the world.

The great Welsh tin plate makes, the Baldwins, have selected Toronto for the location of a new plant which will cost $3,000,000 and employ several thousand men. The firm secured the property of the British Forgings, Limited, located in the new industrial district on the waterfront, and will build one of the largest plants of its kind in America. This will make Toronto the centre for this important industry.

IN order to keep pace with the rapid commercial development of Toronto and provide facilities for its future growth the Toronto Harbor Commissioners are expending $19,000,000 on the Harbor Terminal District. In this section sites will be provided for new industries. This work is progressing steadily and when completed, in addition to the land available for factories, there will be a harbor having a depth of from 24 to 32 feet, with a modern system of public and private dockage, and a large number of slips each having a width of 200 feet.

Each of the new docks is being provided with ample railway siding accommodation and facilities for transferring freight quickly and with a minimum of handling. Arrangements have been made with the railway by which switching will be done free by the Harbor Board.

IN addition to the advantages mentioned above Toronto has natural advantages which combine to make it the buying centre of Canada. Its location makes it the gateway through which millions of dollars' worth of merchandise goes to enter the great Northwest. Its location makes it also the distributing centre for the richest sections of Ontario and the areas where the greatest population is located.



Backing all these is the spirit of Toronto itself. Men of energy and enterprise have brought the city to the important place it now holds, and men of energy and enterprise are busy building for a still greater city. Because they are aggressive each year sees a substantial advance in all the city's activities, especially from a commercial standpoint.

Line Up with the Line the Women Want

THERE is no question about the popularity of Washing Machines. It's growing! The scarcity of domestic help and the high cost of laundering combine to make the Washing Machine practically a necessity in every home to-day. But women are quick to learn that there are Washing Machines AND washing machines—they are being told about the superior features of

"1900" WASHERS

and when they come to investigate they find that all our claims as to their supremacy are true.

Dealers handling even an inferior line may get **some** business.

Dealers handling a mediocre line will find a moderate demand for it.

But to cash in big on the present-day tendency to install Washing Machines, you need to line up with the line that includes every type of Washer—each giving wonderful satisfaction—each mechanically perfect.

We make the "1900" Cataract Electric, the "1900" Agitator Electric, the "1900" Agitator Water Power Washer and the "1900" Gravity.

Our Company is launching a continent-wide publicity campaign—this will bring a vast number of inquiries—and these inquiries will be turned over to "1900" Dealers.

A liberal profit for you on every "1900" Machine you sell.

Write—whether you are without a line of Washing Machines—or whether you are looking for something better than the line you now handle.

YOUR CUSTOMERS ARE ASSURED OF SATISFACTION

Every time you sell a V.D.L. Tire you can rest assured that your customer receives an article of merit. It is only natural to expect that where only the finest material is used, combined with painstaking care and strict inspections, that only a product of worth can be the outcome.

So it is with V.D.L. Tires; not resting content with saying it's the best, we strive to make each one a little better than the best.

Supporting our efforts with consistent advertising, proper distribution and dealer co-operation we aim to help you to our utmost in making a success with V.D.L. Tires and Tubes.

The following Distributors throughout the Dominion make it easy for you to buy stocks:—

Codere et Fils, Sherbrooke
A. Chown & Company, Kingston
Crowell Brothers, Halifax
Eug. Julien, Limited, Quebec
Kloepfer, Limited, Toronto
Merrick-Anderson Co., Ltd., Winnipeg
Miller-Morse Company, Winnipeg
2 in 1 Tire Company, Montreal
Wood, Vallance & Leggatt, Ltd., Vancouver

Write the one most convenient to you--He is a V.D.L. Booster and will do his utmost to help you.

If you care to have a cut of the illustration shown in the advertisement we will be pleased to send it to you free of charge so that you may insert it in your local paper with your own name inserted at the foot in place of ours.

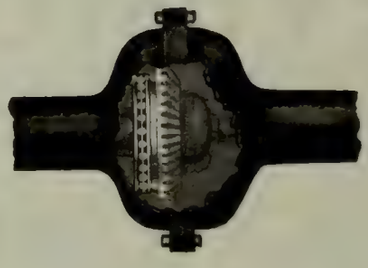
Chapman Bearings



Backed by Sales Making Advertising

See These

Close Up

Chapman Roller Bearings

A Ford or Chevrolet car is subject to rapid wear in the cup and cone bearings of the front wheel, because the hub is too small to take a cone bearing with a sufficient factor of safety.

Chapman Roller Bearings overcome this difficulty and are easily installed.

Every Ford and Chevrolet is a prospect.

Chapman Differential Thrust Bearing

Readily substituted for the plain flat washer in the differential of Ford or Chevrolet. The flat washer wears out due to heavy end thrust. When worn there is lost motion in the gears and incorrect contact of teeth, causing extreme wear, and noise.

The Chapman Differential Thrust Bearing exactly replaces the washer with no other changes required.

It takes the pressure on steel balls, reducing friction to a minimum and holds the gears in perfect mesh.

Get our dealer proposition by a post card to-day.

This photo of the main entrance of the Canadian National Exhibition gives some idea of the crowds that thronged the grounds for the whole two weeks.

CANADIAN NATIONAL EXHIBITION GOES OVER MILLION

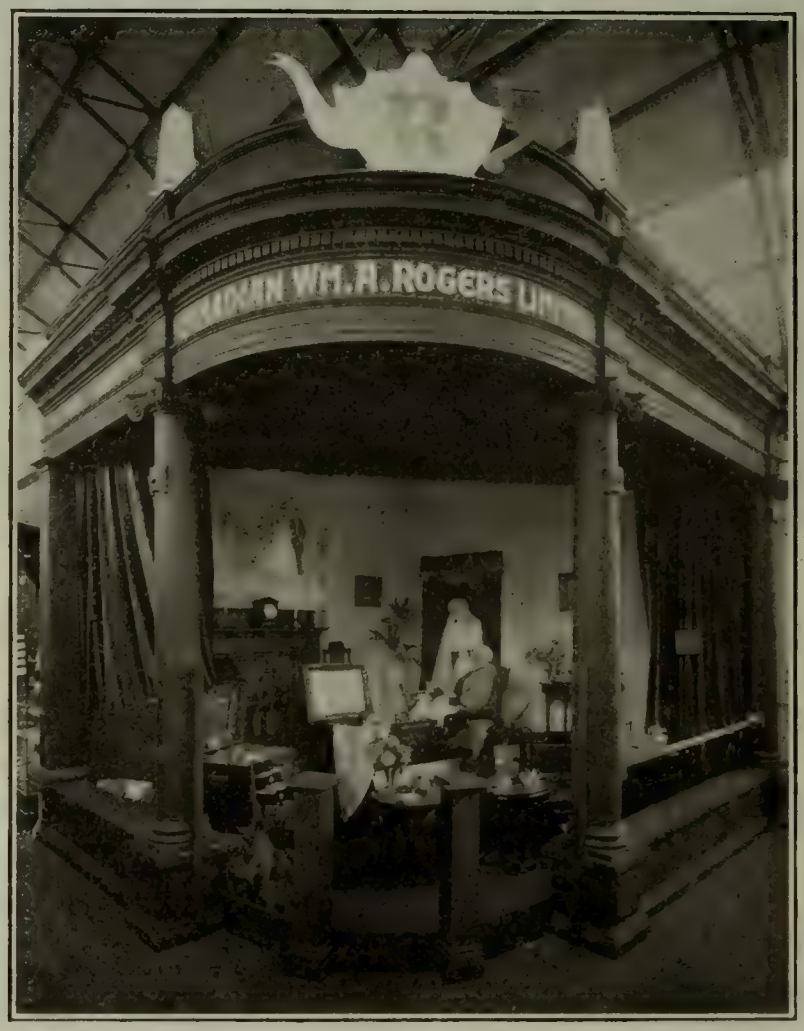
THE Canadian National Exhibition closed this year the record year of its history. Ever since 1913 the effort has always been to once again reach the million mark, but during the war years it has been impossible to equal the figures of the pre-war record. The Peace Year Exhibition, however, not only equalled the old figures, but far outstripped them, and very nearly reached the objective of a million and a quarter.

It was a really unusual Exhibition in every way. It was opened by His Royal Highness the Prince of Wales amid a scene of enthusiasm that has never been equalled in Toronto, and it carried on in a high tide of enthusiasm through the course of two weeks, and it closed with a grand total attendance of 1,201,500.

There were many items of peculiar interest this year that helped in a large degree to make the Exhibition an unqualified success. While the war is over, the memory of it is very near, and anything associated with it is of very real interest. The collection of war relics that was brought together at the Exhibition this year were of surprising magnitude and variety. Immense engines of war were everywhere, and visualized to those visiting the Fair more than anything else could have done the magnitude of the great struggle. The war paintings and photographs, too, were also eagerly visited by thousands and hundreds of thousands. The evidences of the onward march of the times were evident everywhere; in the high speed boats on the lake, and in the gathering of aeroplanes of every description, that daily gave exhibitions of flying over the Exhibition grounds. But even more than in these things was the progressive spirit of the times illustrated in the variety and interest of the exhibits themselves. Such a demand was there for space in the various buildings that long before the date of the opening arrived all the available space had been exhausted and a multitude of manufacturers were unable to be represented, owing to the lack of facilities for displaying their goods. Never before has the comparatively limited space been made so manifest as it was this year, an ample illustration that business in Canada is flourishing, and that business men are awake to the possibilities of the future, and are preparing in every way possible to cultivate the business that is offering. The success of this year's Exhibition is

View in the Exhibition Grounds.

an indication of the sound condition of Canada and a promise of a still more prosperous future.

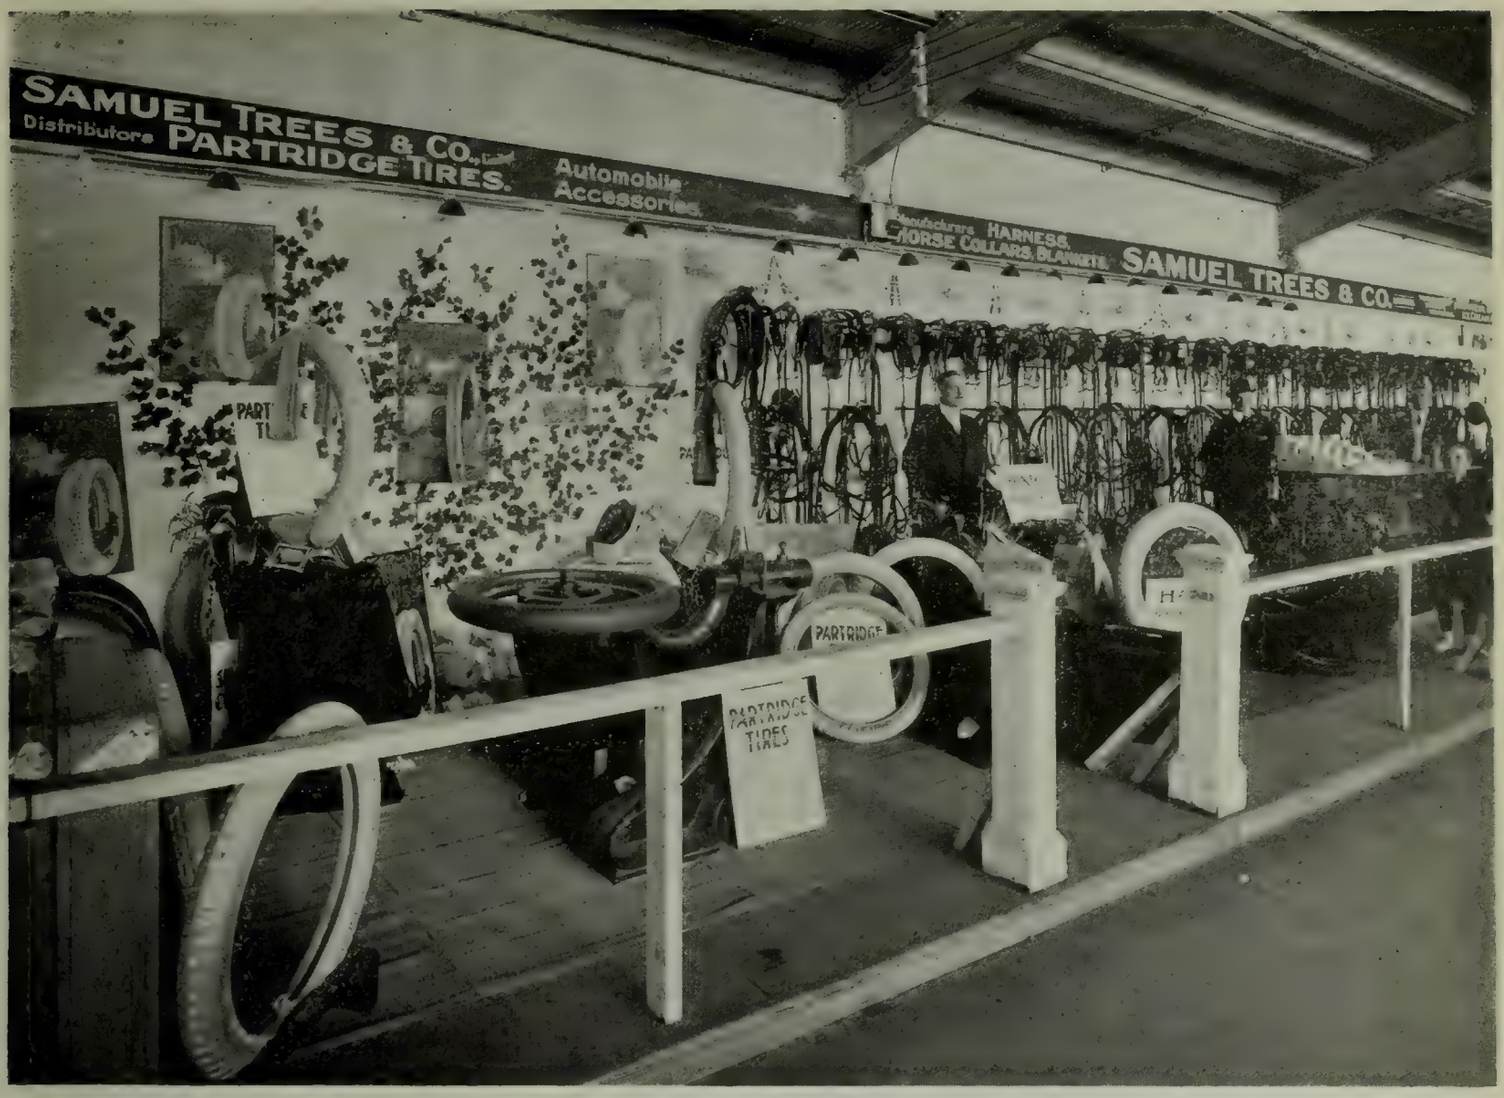


Many manufacturers of hardware lines were exhibitors at the Exhibition, and displayed their wares to the many thousands of visitors from all parts of Canada, and from other countries. The publicity thus secured will prove of assistance to retailers who take advantage of it. Many of the ideas will be adopted, in a smaller way, by retailers at the local fairs.

It is quite evident that the already extensive grounds and buildings of the Canadian National Exhibition will of necessity have to be greatly enlarged in order to provide for future requirements. The electrical trades claim that they alone could use all space that could be provided in an "Electrical Building." The great growth of the automobile and accessory trades has made it obvious, that despite the present large transportation building, more space is urgently needed. The Exhibition is truly national in its scope, and those who attended this year are almost a unit in predicting tremendous growth in both features and attendance at Canada's National during succeeding years.

The splendid buildings at Canada's National Exhibition impress the visitor with the permanence of the Exhibition.

'Heirloom' Plate



"Grandmother's Dream" was the title of the main feature in the Canadian Wm. A. Rogers Limited booth at the Exhibition. The sentiment and romance attached to this display proved a decided attraction to all visitors who passed through the Manufacturers' Building.

"Grandmother's Dream" portrayed, in a most life-like manner, Grandmother making a selection from her chest of treasured silver and dreaming of bygone days when she as a bride had been presented with these attractive pieces of plate which she was now presenting to the new bride. The use of wax figures and the general plan of decoration gave a most realistic appearance to the exhibit.

The attractive and pleasing way in which samples of Heirloom Plate were displayed throughout the booth resulted in thousands of visitors carrying away a lasting impression of the Canadian Wm. A. Rogers Limited Heirloom Plate.

This impression will be of untold value and profit to all dealers who carry Canadian Wm. A. Rogers Limited Heirloom Plate.

WHERE HORSEMEN AND MOTORISTS MET ON COMMON GROUND

He is a wise man who recognizes his limitations. There was a day when man's faithful servant, the horse, was credited with being indispensable, when all local transportation called for his use.

To-day the automobile and the motor truck have, to a very great extent, replaced the horse, making his appearance on the street or country road the exception rather than the rule.

He is a wise man, he who champions horseless transportation when he recognizes that even it has its limitations and that there are places where man's faithful friend must still hold his place. There is no possible chance of the horse becoming extinct and so long as the horse is used must harness and harness accessories be made and sold.

Samuel Trees & Co., Limited, Toronto, recognized the gradual evolution in the matter of transportation and though pioneers in the harness business, foresaw the tremendous possibilities in automobile accessories when handled in conjunction with harness. Evidence of their wise decision is shown in the excellent business they have succeeded in building up in all parts of Canada.

Added to their novel harness display under the grandstand at the Toronto Exhibition, Samuel Trees & Co., Limited, this year showed a most impressive exhibit of Partridge Automobile Tires in the centre of which a tire-maker demonstrated the process used in manufacturing these much-heralded Guelph tires. He showed how the tire was built up right from the first layer of fabric to the tread; how the bead was built in, and every step of the whole process was laid bare before the hundreds of thousands of interested visitors. The final curing was the only part of the process not shown, as this space would not permit of.

From the way the west end of the south aisle of the Industrial Building, No. 2 (under grandstand) was crowded at times, one could safely vouch for the success of the "Samuel Trees" exhibit.

Perhaps the most attractive merchandise shown in the harness end of the display was the excellent range of automobile rugs and robes. These were there in a variety of designs, colorings and sizes which we could safely say would be sufficient to meet every demand of motoring Canada. Some very handsome robes were shown in perfectly plain monotone effects, not heavy, but from their construction one could readily see how they would, with thick, plush-like pile, withstand almost any kind of Canadian winter — wind, rain, snow.

This picture above does not in any way do justice to this fine display, but serves to give hardware dealers an idea of its size and the variety of goods Samuel Trees & Co., Limited, are showing to the trade.

It will pay merchants interested in auto accessories and harness to have a "Samuel Trees" representative call at an early date.

THERE IS ONLY ONE "RUBBERSET"

Like "Kodak," which has long since become the public's name for a distinctive kind of picture-taking machine, the name "Rubberset" has become the buy-word for brushes of superior make—brushes, whose bristles are so securely fastened in by the "Rubberset" process that absolute satisfaction is always obtained.

A very handsome display of Rubberset Brushes was arranged in the Industrial Building at the Canadian National Exhibition which came to a successful conclusion on the sixth of September, after reaching a record attendance of 1,201,000. The Rubberset booth was located in a section which got a great deal of attention from the hundreds of thousands of interested brush users who attended the "big fair," and who came in personal contact with the salesmen in charge of the exhibit.

Many were the remarks heard on all sides as the visitors would stop to see the bull terrier unsuccessfully try to drag the bristles from a RUBBERSET brush. This was a mechanical centre-piece in the background, which told the RUBBERSET story at a glance. It was evident that this ingenious device, added to the imposing arrangement of brushes of all kinds, shapes, sorts and sizes, realized the desire of the Rubberset Company in getting the attention of the people, for the salesmen were kept busy showing interested users the many distinctive features of the brushes and explaining the Rubberset process.

RUBBERSET Brushes have won an international reputation in the face of competition with the whole world, and to-day enjoy a steadily increasing demand, which is evidence of their uniformly superior quality.

No matter for what purpose the RUBBERSET brush is used—painting, varnishing, kalsomining, shaving, the result is just the same—absolute satisfaction. With the RUBBERSET process, and standard of manufacture no other result is possible. RUBBERSET on a brush means efficiency and service—that the brush must make good or **be made good** by the manufacturers, The Rubberset Co., Ltd., of No. 3 Sullivan St., Toronto.

Users of brushes have learned from experience that they can trust RUBBERSET goods absolutely.

Merchants in all parts of Canada should follow up the work done by the Rubberset Company at the Exhibition by showing a complete line of Rubberset Brushes in their windows and cash in on the desire to try out this famous line of brushes.

THE GURNEY FOUNDRY CO. EXHIBIT

AS crowds upon crowds of Exhibition visitors filed through the Stove Building, a beautiful silk flag was seen flapping in the breeze by one of Fredericton, N.B.'s leading merchants.

The flag in question was mounted on a nickel staff near the centre of the Gurney Foundry Co.'s fine stove exhibit, and was made to wave by a generous supply of breeze from an electric fan.

A few days ago this flag and staff were shipped to this hardware dealer as a result of a request to buy such a flag. It had done its duty for it served to draw the attention of thousands of Canada's users and prospective users of stoves to the excellent exhibit of Gurney-Oxford Heaters, Stoves and Ranges, and gave the salesmen an excellent opportunity to point out their many advantages.

The showing consisted of ranges of every popular variety, ranges for every fuel—coal, wood, gas and oil, and one which is shown in the foreground—the 1920 model, used both coal and gas. This model is one which is adapting itself splendidly to city use where the housewife is often at her wits' end to get a meal in a hurry when the gas pressure is low, as it very often is. Then, too, the trouble has been during the past winter or two, and we do not know that we are out of the woods yet, to get a supply of small coal. To be on the safe side householders have in the past installed two ranges, but to-day, with the kitchenette in vogue, this is almost impossible. The Gurney-Oxford combination range steps into the breach as the solution and evidence of the popular approval was heard on all sides from the fair sex as they looked this handsome range over and sized up its advantages.

Just as you came along the centre aisle of the Stove Building, a black and white sign caught your eye, "Made by Gurney, 1843," and your attention was attracted to a strange looking box arrangement surmounted by pillars with a sort of pagoda top. You could see at a glance that it was not a modern piece of heating furniture, and only a few of the "Fair" visitors had ever seen anything like it. This was a wood heater built by Gurney's away back in 1843. Very few firms in Canada can claim existence for more than three-quarters of a century.

There is no doubt that hardware dealers selling the Gurney-Oxford line will feel the effects of the splendid advertising done by the Gurney Foundry Co. during the record-breaking Exhibition of the Canadian National.

The best way to take advantage of this good work is to show prospective customers the stock by devoting space in the display window, using some of the handsome display cards and advertising furnished by the company.

Out of the 1,201,000 people who attended the Exhibition there will be very few localities which were not represented. It's worthy of an effort to cash in on the effects of this advertising.

THREE STOVES IN ONE AT THE "EX"

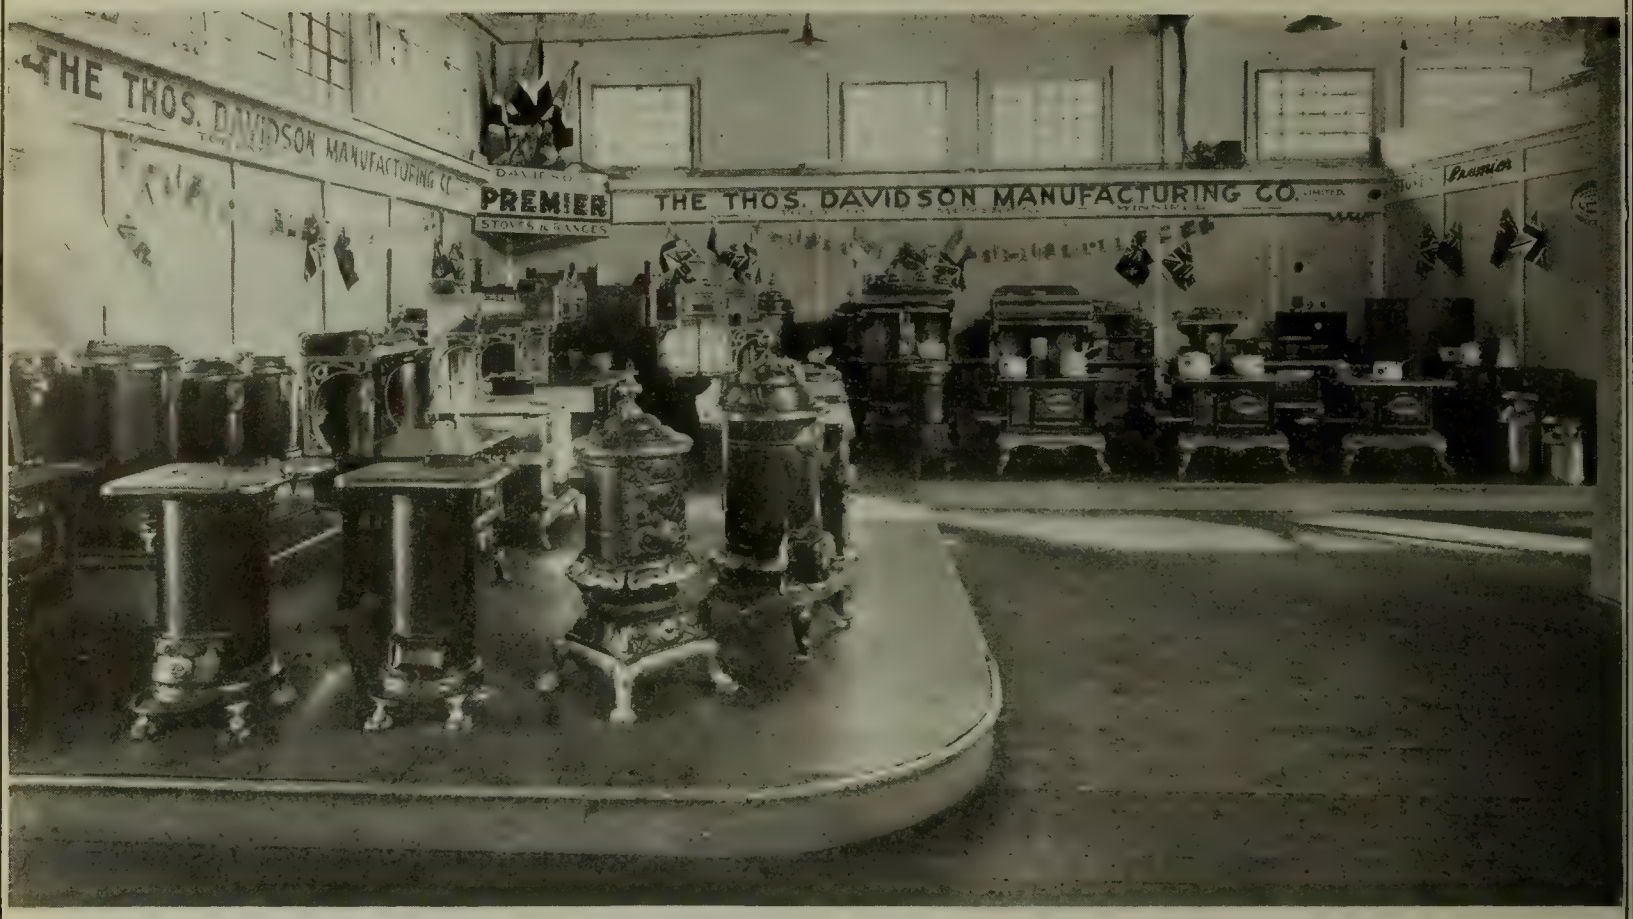
The Triplex Jewel Range, combination for coal, wood or gas, shown at the Canadian National Exhibition by Burrow, Stewart & Milne Co., Limited, of Hamilton, Ont., aroused the keenest interest among thousands of visitors who are trying to solve their fuel problems. The Triplex Jewel, it is stated, embodies all the latest and most modern features yet known to stove manufacturers. It is of exceptionally attractive appearance and design and the comments of the thousands of visitors to the fair who inspected the Triplex Jewel were ample testimony that they were favorably impressed. The firebox is large and well proportioned and is equipped with easy revolving duplex grates, which will burn either hard or soft coal or wood.

In almost all other combination coal and gas ranges it is necessary if gas is to be used to remove a heavy baffle plate and replace it again if it is desired to use wood or coal. The Triplex Jewel is so designed that by a simple movement of a lever the combined burner and baffle plate are automatically placed at the rear of the oven. The size of the baking oven is not reduced by the burner when rolled back as the Triplex Jewel is so built as to accommodate same.

The Burrow, Stewart & Milne Co., Limited, included in its exhibit handsome displays of stoves, ranges, warm air furnaces and scales. The splendid finish of these lines, the good workmanship apparent throughout in the goods and the splendid quality attracted home-makers to the company's display space in hundreds. It not only attracted them, but held them. This is one of the best tests for the dealer who is handling stoves to apply. It means that the article, by its appearance and obvious utility and good quality helps sell itself. There is going to be an enormaus demand for stoves this season and the Burrow, Stewart & Milne Co., Limited, have the goods which will win the trade for dealers who are looking for a live proposition.

T. S. SIMMS & CO., LIMITED

A striking exhibit of "Better Brushes" at the Canadian National Exhibition was made by T. S. Simms & Co., Limited, of St. John, N.B. In the handsome showcase shown above more than 150 shaving brushes were displayed. No two of these were alike and yet the exhibit only comprises less than half of the lines made by T. S. Simms & Co., Limited.



This firm was the first in Canada to make brushes set in rubber. It was also the pioneer manufacturer of paint brushes with the compressed ferrule, which took the place of the wedge driven handle, formerly the only style of brush made in Canada for painters' use. T. S. Simms & Co., Limited, were also the first firm in Canada to use machines for drilling the holes and filling same, in scrub, shoe, stove and floor brushes and for putting in the bristles which were until that time sewn in by hand.

The company has the largest brush manufacturing plant in Canada and it is claimed that it is the most up-to-date brush-making plant on the continent, especially so in the woodworking department. This is accounted for by it being the most recently erected plant.

"Better Brushes" at popular prices has been the slogan of T. S. Simms & Co., Limited, who have built up a large and steadily increasing trade in all parts of the Dominion. Their goods have won favor with the better class of dealers and users because they are absolutely dependable.

One of the brushes featured in the exhibit at the Fair was the Dutch Kalsomine brush. This brush has special features in its construction which result in it holding more color, spreading it easier and turning out a smoother job.

Simms set in rubber brushes may be used in anything in which a brush should be used. They are not mere brushes, but "Better Brushes," made to give maximum service and at popular prices.

Davidson Exhibit

The Famous "Premier" Five

PREMIER LEADER

This popular range is really a "leader" in efficiency and appearance, built by skilled workmen, of heavy polished steel, hand riveted with cone-head rivets. The oven is substantially braced and not too low. The contact reservoir can be supplied in either right or left hand. Premier Leader is handsomely finished in nickel trimming. Can be supplied fitted with legs or attractive nickelled base.

PREMIER MARATHON

This high-class, modern steel range embodies every feature of construction that tends to make it both attractive in appearance and efficient in operation. The name "Marathon" is indicative of its endurance. Extra heavy Wellsville steel, protected by asbestos and hand riveted with cone rivets; a heavy top; centers and covers ribbed; duplex draft; and a braced oven are features of Davidson construction in this durable range.

PREMIER ROYAL

A wonderful range constructed of the best material procurable. The "Royal" is specially noted for its fuel economy and its superiority in baking and cooking. Built on graceful lines, handsomely trimmed in nickel, it is unexcelled in appearance. Exceptionally heavy Linings and Duplex Grates are an excellent feature. The nickel bands are removable for convenience in cleaning.

PREMIER CHIEFTAIN

Is a much-liked moderate-priced range of first-class material and of the same careful workmanship as our higher-priced ranges. Duplex grates. Nickel trimming.

PREMIER ARGUS

A neat steel range; the body has an extra lining of sheet asbestos. This range is made in two sizes without nickel trimming.

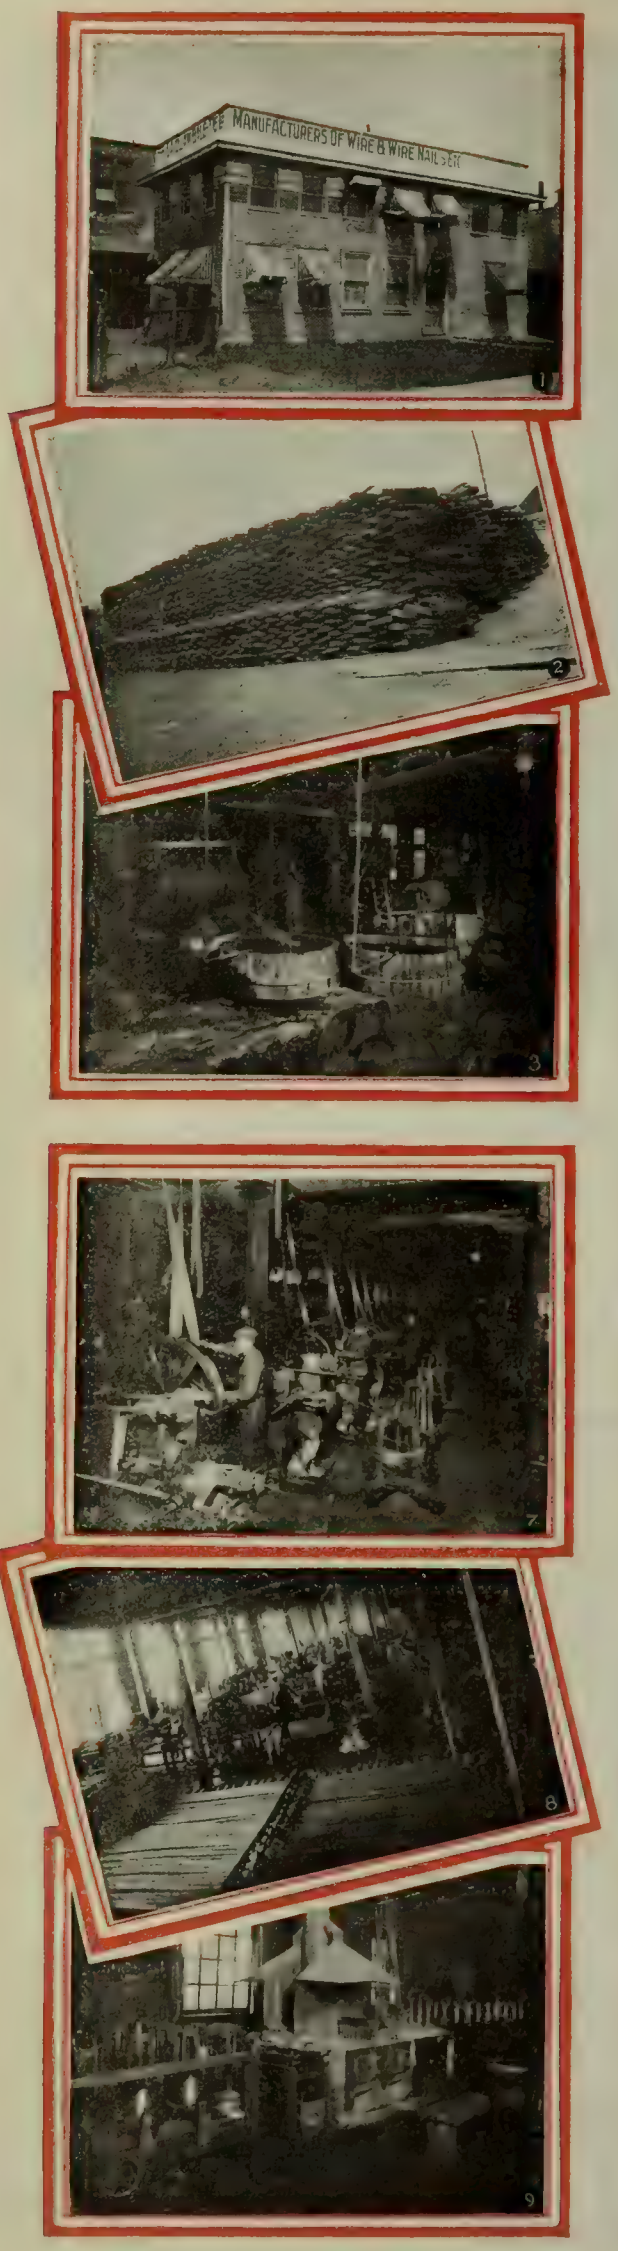
BEAVER HEATERS

are fitted with Roller Grates and an Ash Pan. The excellent Beaver heating qualities are well known everywhere. The **Marathon Oak Combination** for burning coal, wood or natural gas is much in demand.

The Thos. Davidson Mfg. Co., Limited

Toronto **Montreal** **Winnipeg**

A NEW ONE FOR "EX" VISITORS



THIS year a new face appeared at the "Ex." or rather a new exhibitor. At the right hand side of the main entrance of Machinery Hall, visitors were greeted with the exhibit and attendants of the Hoyt Metal Co., Toronto.

Most hardware dealers and manufacturers have for the past few years associated the Hoyt people with the manufacture of babbitts, solders, leads, etc., but few realized that their line consisted of the wide range of products which their display disclosed.

One of the main features of the Hoyt Metal Co.'s exhibit was "United" Lined Products—lead-lined, tin-lined, brass and copper-lined pipe and fittings, lead and tin-covered pipe and fittings, acid valves, centrifugal acid pumps, lead-lined chemical apparatus. This is a comparatively new line for Canada, but one which is in demand in the local market. Many were the interested visitors who stopped to inquire into the "United Process" of lining pipes, fittings and chemical equipment.

Another noteworthy line exhibited here was "Ulco" hard metal, a hard bearing metal of comparatively high tensile strength, with relative immunity to corrosion. It may be used in place of high-grade alloys such as those made of nickel, copper, bronze and tin, etc., and costs considerably less. "Ulco" hard metal can displace brass for many purposes where high tensile strength of brass is not an important factor. Beside these lines Frost King and other grades of babbitts, solders, etc., were shown in a most complete range. The Exhibit was attractively gotten up and the attendants gave courteous attention to all enquires and distributed literature and catalogs bearing on the various lines on display.

There is no doubt the work done here will impress users of the above mentioned lines and result in good future business for the company. The best jobbers in all parts of Canada carry full stocks of Hoyt Metals and will be able to supply hardware dealers with all information regarding "Ulco" hard metal. Information re any of the above lines will be gladly sent direct on request.

Laidlaw

Bale Ties, Baling Wire

A TRIP THROUGH

LET us take a spin out Barton Street, Hamilton's main artery, leading to the many big East-end manufacturing plants for which this "Birmingham of Canada" is noted. Out along Barton, past factories and plants of many kinds and sizes until we come to Lotteridge and then east to Birmingham St.—factories, factories, factories, everywhere tall chimneys, railway sidings, big motor trucks, everything reminds one of Birmingham in old England.

A few minutes south from Barton and we come to the Laidlaw plant, by no means the largest in this factory city, but a regular beehive of industry—the neat office building in the front and the plant in the rear covering a goodly area and served by railway sidings and every facility for quick transportation.

It's when we get inside that we really see the Laidlaw plant. From department to department we go following the roll of rod, thousands of which are seen piled in the rear of the factory (Illustration No. 2).

We follow the rod through the several processes, the cleaning, the drawing, spooling, making bale ties, making nails, annealing, tinning, and galvanizing, right through to where the finished product is shipped out on large motor trucks or railway cars.

A brief description of the processes of drawing wire will be interesting to wire users.

Steel wire rods as obtained from the rolling mills are first steeped in a hot solution of Sulphuric

THE LAIDLAW PLANT

Acid to remove the scale, then dipped in a vat of hot lime. The lime-coated rods are placed in an oven at 400 degrees heat for several hours, and then allowed to cool slowly. This removes the brittleness of the wire. Next, each rod is drawn through a steel die and through successive smaller dies until it is drawn to the required size. The dies are carefully watched to keep them in proper condition and the proper size of holes. With each draft through a smaller hole the wire becomes longer and smaller—it is stretched out.

The drawing process makes the wire hard if continued long enough, but when the bundles of wire are put through the annealing process in the ovens again it becomes soft and ductile. Hard wire, or un-annealed wire, is less expensive than soft or annealed wire.

The thing which impresses one mostly in the trip through the Laidlaw plant is the perfect organization—the short-cuts in production, the care taken producing Laidlaw products whether they be wire nails or the finest quality steel wire.

At the Canadian National Exhibition recently held in Toronto, Laidlaw Products were prominently displayed in the Industrial Building and attracted the attention of thousands of users of these goods.

Hardware Merchants should take advantage of the interest created at the "Exhibition" by showing Laidlaw Products in their stores during the fall season. Laidlaw Bale Ties have made a reputation for themselves among the hay-pressing trade.

Send for the Laidlaw catalog which is just off the Press.

"HERCULES" SASH CORD

Manufactured in Canada

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

ENCOURAGING reports from practically all parts of Canada indicate that fall trade is likely to break all records. Orders for fall delivery are heavy and spring booking orders are coming in freely. Encouraging reports from Western Canada of heavy orders indicate that conditions in the West are not nearly as bad as had been reported from some sections. Heavy orders continue to reach Winnipeg from sections which were reported to have been affected by poor crops. The outlook for the next six months is exceedingly good in all branches of the trade. Prices, generally, are holding firm. Attention is at present directed to the United States, where the prospect of a strike of steel workers is causing some uncertainty. Among the price increases this week higher quotations are being made on padlocks, curtain stretchers, warehouse trucks, molasses pumps, food choppers, coffee grinders, sash balances, curtain stretchers.

Lower prices are quoted on fence hooks, linseed oil, some lines of hack saw blades, pipe taps.

There is an active demand for heating equipment of all kinds. The near completion of thousands of houses is also causing a heavy demand for many lines of finishing hardware and also for paints, varnishes, glass, etc.

MONTREAL MARKETS

MONTREAL, Sept. 18—Some important advances in leading commodities have been recorded this week. Sash balances are increased in price about 10 per cent. Molasses pumps are marked up considerably. Food choppers and coffee grinders, too, are on an advanced price basis to the extent of 10 to 15 per cent. Mason and chalk lines are also higher, it being more difficult for manufacturers to maintain supplies of necessary raw materials. All cotton goods are very strong and it will not be surprising to see advances in cordage, cord, etc. Curtain stretchers are marked up about 10 per cent. Door knobs of the porcelain and mineral variety are up 5c a dozen. Warehouse trucks are 10 per cent. higher. Pig lead is one-quarter of a cent per pound higher. New net prices are announced on rifles and shotguns.

Declines this week are announced for bar solder, the change being half a cent per pound. Pipe taps are also reduced in price. Victor hack saw blades are lower. Antimony is slightly reduced in price. Tin is firm and may be advanced. Altogether the condition of trade is reported very satisfactory.

Curtain Stretchers 10% Higher; Rifle Prices

Montreal.

STRETCHERS, RIFLES, GUNS.—Jobbers' prices on curtain stretchers are advanced, approximately, 10 per cent.

Net selling prices to the trade on Remington and Winchester lines of rifles and shotguns, and of which announcement was made last week, are as follows: Winchester, thumb trigger, each, $8.60; Model 1903, $40.80; 1906, $26.10; 1890, $28.70; 1892, $32.50; 1894, $30.60; 1907, $56.10; 1910, $56.10; shot guns, No. 97, each, $44.60; No. 98, $18.50; 99, $76.50; 1911, $59.90, and 1912, $53.55.

Remington, 10A, 12 ga. shotguns are, each, $47.25; and 4x22 rifles, each, $13.20; and 6x22, $9.15.

Pipe Taps Are Now On Reduced Basis

Montreal.

PIPE TAPS.—Somewhat lower prices are effective for the Butterfield line of pipe taps. Right hand type up to 1 in. are quoted at 55 per cent. off; 1¼ to 2 at 50 per cent.; 2¼ to 3 at 40 per cent.; 3¼ to 4 at 30 per cent. For left-hand pattern the respective discounts are: Up to 1 in., 45 per cent.; 1¼ to 2 in., 40 per cent.; 2¼ to 3, 30 per cent.; and 3¼ to 4, 20 per cent.

Sash Balances Higher; Molasses Pumps; Lines

Montreal.

BALANCES, LINES, PUMPS.—Increased prices are effective for Caldwell sash balances. The increase is equal to about 10 per cent.

Chalk and mason lines are also higher, the various grades and sizes being increased 10 per cent.

Enterprise molasses pumps, No. 97, are now selling at $13.50 each, this representing a substantial increase over the recent market prices.

Food Choppers Advance; Knobs, Too; Blades Down

Montreal.

CHOPPERS, KNOBS, BLADES.—Food choppers, coffee grinders, etc., of Enterprise manufacture are on a new price basis, the change being that of an advance of from 10 to 15 per cent.

Porcelain and mineral rim and mortise knobs are also higher. This increase is small, 5c per dozen.

Victor hack saw blades have declined. The reduction is not uniform, being from 5 per cent. to 10 per cent.

Warehouse Trucks up 10% Padlocks Soar Again

Montreal.

TRUCKS, PADLOCKS.—An advance of ten per cent. has been made effective for warehouse trucks. This applies to the various kinds. An increase has again been applied to padlocks of various well-known makes such as Miller, Yale, Slaymaker, Eagle, etc. The in-

crease amounts, approximately, to 10 per cent.

Rope Trade Quiet But Change Unlikely

Montreal.

ROPE AND CORDAGE.—While there is a quiet condition, hard fibres are not moving to any marked extent, manufacturers state that there is nothing to justify lower prices. Exchange rates and labor cost increases are two factors which make change improbable, and, they say, certainly not justifiable. Soft fibres are constantly advancing and it is not an easy matter to procure available supplies of jute products. Seine twines, too, are reported scarce. The present base quotations are: Pure manila, 32c; British manila or Beaver, 28c; sisal, 25c.

Very Active Selling Of Wares and Stoves

Montreal.

WARES AND STOVES.—Decided activity is manifest in the stove and ware trade. This applies to all lines of sheet metal manufacture usually ordered at this season, and for which standing orders have been in the manufacturer's hands for some time. Declines are not anticipated on any of these lines.

Coal Oil and Gasoline Steady; In Good Demand

Montreal.

COAL OIL, GASOLINE.—A steady and active market, season considered, obtains for both commodities. The price of oil is held at last week's change and the grades are selling at 22 to 25c per gallon.

Gasoline consumption is really heavy and the price basis is maintained without change at 33c per gallon.

Nail Prices Held With Many Sales

Montreal.

NAILS AND WIRE.—The movement of wire nails to the country buyers has been maintained right along and jobbers are all pleased with the tonnage shipped each week. Firm and steady markets obtain here. The basis for both cut and wire nails is held unchanged at $4.75.

No change has been made in wire basis, the price for smooth steel gauges 0-9 being $5 per 100 lbs.

Steel and Iron Have Moved Out Actively

Montreal.

IRON AND STEEL.—Rolling of bar steel and iron has kept the mills busy and the outgo to country points, in particular, has been a heavy one. Jobbers have had a large volume of business. The market is steady in most centres and no changes have been made here.

Iron finish machinery steel	3 80

Sheets and Plates Movement is Light

Montreal.

SHEETS AND PLATES.—There has been little activity during the week in sheets or plates. There is a waiting condition and this is likely to be of short duration for the fall is fast approaching and dealers will soon be busy with fall contracts. Canada plate deliveries are said to be satisfactory, but considerable of this stock has already gone forward.

Half a Cent Drop In Price of Solder

Montreal

LEAD PRODUCTS.—Bar solder prices have been reduced half a cent per lb., this applying to all grades. There is no quotable change for lead pipe, sheet lead or other products in the list. Trading is reported quiet, and this is, in part, chargeable to the present strike of plumbers. The outlook promises better for the near future, for it is not expected that the plumbers will remain idle long.

When Sales Made Metal Prices Good

Montreal.

OLD MATERIALS.—While there is still a waiting attitude on the part of many, the old metal market is still maintained, as prices go. One dealer reports that, when a manufacturer requires supplies he will pay the price, but few are buying ahead, or not at all. The quotations this week are without change of any kind.

Lead Took a Jump; Antimony Shaded

Montreal.

INGOT METALS.—Trading conditions are reported quiet and there is a tendency to lower levels for antimony, the price being shaded in one quarter to 9¾c per lb. Pig lead firmed one quarter cent.

COPPER.—The market is featureless here and buyers are not making much request for any but limited quantities. Price is held at 25½c.

TIN.—The basis is firm, but no change is made in a quotable way, the market ruling steady at 61c per lb. London cables are higher.

SPELTER.—Decided quiet prevails and there is no demand to speak of locally. Prices remain at 10c per lb.

ANTIMONY.—Local prices have eased a little and 9¾c per lb. is quoted. The movement is restricted.

LEAD.—Trust interests advanced their prices this week in the States and 7½c per lb. is quoted here, an increase of ¼c for the week.

ALUMINUM.—Without change at 35c per lb.

PIG IRON.—At $50 per ton there is a little business transacted.

TORONTO MARKETS

TORONTO, Sept. 18—Very few price changes have been noted this week. Business is brisk and local jobbers are loaded with orders. Prices on most lines are firm. There is a big demand for cold weather necessities. Collections are good and there is evidence of splendid fall trade available for almost all branches of the trade. Interest is being taken in the predicted strike in the United States steel trades and the effect such a strike would have on Canadian business.

Fence Hooks Decline in Price

Toronto.

A decline of 40c per 100 pounds has taken place in the price of galvanized fence hooks, making a new price of $6.35 per 100 pounds. Galvanized netting staples have advanced about 5 per cent.

Good Demand For Fall Goods

Toronto.

There is a heavy demand for fall lines, and orders from rural districts are exceptionally heavy for this season of the year. Heater accessories such as stove boards, coal hods, pipe, elbows, and other lines are in good demand.

Wire and Nails Unchanged

Toronto.

Quotations on wire and nails are holding firm. There is a good steady demand. Quotations on the wire nails are made at $4.70 per 100 pounds base, and the cut nails at $4.75, unchanged figures. Smooth steel wire, base, is still $5 per 100 pounds.

Cordage Prices Remain Unchanged

Toronto.

Trade is seasonably quiet in cordage lines at the present time. Prices remain unchanged as follows: Pure manila 32c per pound, base; Beaver or British manila, 28c; New Zealand hemp, 28c; sisal, 25c; sisal lath yarn, 25c per pound, base.

Staple Lines Firm And Unchanged

London, Ont.

No change is noted in wire nails and the quotation of $4.70 base is general.

Cut nails are quoted at $4.70 base. Sash weights are moving freely. Quotations are as follows: ½ lb., $4.50 per 100 lbs.; 1 lb., $4.00 per 100 lbs.; 3 lb. and larger, $3.25 per 100 lb.

Heating Equipment In Good Demand

London, Ont.

With the approach of cooler weather there is a stimulated demand for winter supplies. Some of the lines moving freely at present are as follows:

Coal Hods.—Japanned, open, 16 in., $4.75 doz.; gald., open, 16 in., $7.70; japd., open, 17 in., $6; japd., funnel, 17 in., $7.13; galvd., open, 17 in., $9.10; galvd., funnel, 17 in., $11.20.

Stove Pipes.—6 in. common, $15.93 per 100 lengths; 7 in., $17.63; 6 in., bright, $19.90; 7 in., $21.03.

Stove Pipe Elbows.—6 in., light pattern, $2 per dozen; 7 in., $2.15; 6 in., heavy, $2.45; 7 in., $2.76.

Stove Pipe Wire.—No. 18, $8.25 per 100 lbs.; No. 19, $8.75; small lots, 9c lb.

Paints, Oils, Turps Firm

London, Ont.

With many new buildings nearing completion there is a big demand for paints of all kinds. Prices are firm.

Linseed oil is quoted as follows: 1 to 2 bbl. lots, raw, $3.25 gal.; boiled, $3.28 gal. 3 to 5 bbl. lots, raw, $3.24 gal.; boiled, $3.27 gal. 6 to 9 bbl. lots, raw, $3.22 gal.; boiled, $3.25 gal. Less than barrels add 10 cts. gal.

Turpentine is very firm in price and is quoted as follows: 1 bbl. lots, $2.45 Imp. gal; 2 to 4 bbl. lots, $2.44 Imp. gal.; 5 gal. lots, $2.25 Imp. gal.

White lead in oil, pure is quoted in ton lots at $16.35 per 100 lbs., and $16.70 in less than ton lots.

LONDON MARKETS

LONDON, Ont., Sept. 18—Fall and winter lines are now being shipped freely by local manufacturers and jobbers. Business in the city and surrounding country is good. Prices are firm with some advances this week. There is a continued marked scarcity in many hardware lines. Collections continue good.

Cast Enamel Sinks Advance

London, Ont.

An advance of about 5 per cent. has been made on prices of cast enamel sinks, making new prices as follows: Size 16 x 24, 1 in. crate, $5.41 each; 2 in. crate, $5.35 each; 3 in. crate, $5.29 each. Size, 18 x 30, 1 in. crate, $6.21 each; 2 in. crate, $6.15 each; 3 in. crate, $6.09 each.

Many Miscellaneous Lines Advance

London, Ont.

Japanned harness rings have advanced and are now quoted as follows:

Harness Rings—¾ in., $1.10 gross; ⅞ in., $1.35; 1 in., $1.65; 1¼ in., $2; 1½ in., $2.80; 1¾ in., $2.90; 2 in., $3.25; 2½ in., $4.50.

Stanley Rule & Level Company's rules, levels, planes, etc., have been advanced locally about 10 per cent. New net prices are not yet available.

Compression bibbs, plain and hose, have advanced and the new price is 35 per cent. off list.

There is a good demand at present for rifles, shot guns, ammunition, alarm clocks and electrical devices.

Glass in Demand At New Price

London, Ont.

There is a good demand for glass at the present time. A revision has been made in the list and discount, which makes the first and third breaks in single diamond a little higher, and other breaks slightly lower. The new list follows and is subject to a discount of 30 per cent.

	Single case	Double case

WINNIPEG MARKETS

WINNIPEG, Sept. 18—Price changes for the week show several staple lines of interest to the hardware dealer, namely, Stanley planes, levels, squares, bevels, braces, etc., also Miller padlocks, tin plate and scythes, all of which show an increase of from 2½ to 10% over former quotations, linseed oil being the only line of interest to decline during the week, showing a drop of 10 cents per gallon.

Business in all lines continues to be brisk and as crops in many instances are turning out better than anticipated it is adding to the fall volume of business, which from present indications promises to be good.

Dealers would be well advised to anticipate their requirements early, as deliveries are daily becoming worse, owing to strikes and transportation difficulties.

Many New Prices During Week

Winnipeg.

As predicted in a recent issue of HARDWARE AND METAL, new prices have been announced during the week on Stanley Rule & Level Co.'s products, and shows a general increase of approximately 10% over former quota-

tions, due to increased cost of production. The following are the principal lines affected, together with to-day's selling prices:

BIT BRACES.—No. 946 x 10 in., $21.30; No. 956 x 10 in., $15.65; No. 935 x 10 in., $33.60; No. 966 x 8 in., $11.85; 10 in., $12.00; No. 921 x 10 in., $55.50; 12 in., $57.00; No. 923 x 10 in., $50.40; 12 in., $56.00; No. 975 x 10 in., $20.80; 12 in., $21.20, dozen.

SLIDING T BEVELS—No. 25 x 6 in., $7.00; 8 in., $7.85; 10 in., $8.20; No. 18 x 6 in., $10.80; 8 in., $13.80; 10 in., $15.00 dozen.

MARKING GAUGES.—No. 90, $7.20; No. 91, $13.95; No. 95, $17.60; No. 95½, $12.00 dozen.

PLANES.—No. 3, $4.45; No. 3C, $4.75; No. 4, $4.85; No. 4C, $5.20; No. 4½, $5.55; No. 4½C, $6.00; No. 5, $5.55; No. 5C, $6.00; No. 5½, $6.25; No. 5½C, $6.75; No. 6, $7.05; No. 6C, $7.65; No. 7, $8.15; No. 7C, $8.75; No. 8, $9.70; No. 8C, $10.40 each.

STANLEY BLOCK PLANES.—No. 9½, $2.30; No. 9¾, $2.80; No. 15, $2.50; No. 16, $2.60; No. 18, $2.80; No. 19, $3.00; No. 65, $3.10; No. 101, 44c; No. 102, 85c; No. 103, $1.15; No. 110, $1.15; No. 130, $1.70; No. 131, $2.80; No. 140, $2.95; No. 220, $1.70 each.

PLOW PLANES.—No. 45, $16.30; No. 55, $32.20 each.

BAILEY WOOD PLANES.—No. 22, $3.05; No. 24, $3.20; No. 26, $3.30; No. 27½, $3.85; No. 28, $4.20; No. 31, $4.50; No. 32, $4.80; No. 35, $3.70; No. 36, $4.20 each.

BEDROCK PLANES.—No. 603, $5.00; No. 603C, $5.40; No. 604, $5.40; No. 604C, $5.85; No. 605, $6.25; No. 605C, $6.70; No. 606, $7.65; No. 606C, $8.45; No. 607, $9.05; No. 607C, $9.80 each.

LEVELS.—No. 00, $13.55; No. 0, $15.10; No. 2, $21.60; No. 3, $26.40; No. 102, $7.00; No. 104, $10.15; No. 90, $42.50; No. 95, $91.50; No. 38½, $8.20; No. 39½, $9.90; No. 40, $1.75; No. 41, $1.85; No. 34V x 6 in., $18.85; No. 8, $25.35; No. 10, $28.75; No. 36 x 12 in., $33.90; No. 18, $40.40; No. 24, $46.00 dozen.

TRY SQUARES.—No. 20 x 4½ in., $6.15; No. 6, $8.20; No. 7½, $8.95; No. 9, $11.45; No. 12, $15.25; No. 2 x 6 in., $9.85; No. 7½, $11.30; No. 9, $13.65; No. 15 x 7½ in., $14.60 dozen.

CARPENTERS' MALLETS.—No. 2, $5.90; No. 6, $13.10; No. 10, $8.05; No. 13, $19.10 dozen.

Tin Plate Prices Move Upwards

Winnipeg.

Prices on tin plates, which have been declining slightly in the past few months, have shown a reaction during the week, prices moving up $1.00 per box on all lines, and even higher prices are anticipated by some owing to the fact that many of the mills are booked to capacity for some time to come.

To-day's prices are given as follows: Tin plate 1C, 20 x 28 in., $23.50 box; 20 x 33 in., $28.00 box; $14.50 half box; 20 x 39 in., $16.75 half box; Tin plate 1X, 20 x 28 in., $27.00 box; 20 x 33 in., $16.50 half box; 20 x 39 in., $19.25 half box.

Linseed Oil Prices Move Down

Winnipeg.

LINSEED OIL.—Prices register a decline of 10c per gallon during the week, following lower market quotations on flaxseed, and is selling to-day as follows: Raw linseed oil, $3.00 gallon; boiled linseed oil, $3.03 gallon.

Markets still hold very firm on turpentine and from present indications will likely continue so for some time, owing to the export demand at present. The local demand is reported very light, while stocks are adequate to take care of the business. To-day's prices are as follows: Barrel lots, $2.70 gallon; half barrel lots, $2.73 gallon; 5 gallon lots, $2.75 gallon; 1 gallon lots, $2.75 gallon, plus the usual extras for containers.

Booking Price on Scythes Higher

Winnipeg.

Bookings are now being taken by the Winnipeg jobbers for scythes of all kinds for spring delivery, based on latest quotations received from manufacturers, which show an increase of from 50c to 75c per dozen over last year. To-day's market prices are as follows:

BRAMBLE SCYTHES.—$16.25 dozen; Bush scythes, $16.25 dozen; Excelsior Grass, $17.75 dozen; Cast Steel Grass scythes, $15.75 dozen.

Padlock Prices Advance 10%

Winnipeg.

Following the advance made by manufacturers of Miller Padlocks of 10%, due to increased production costs, new prices are now in effect here. The following are the net prices on a number of the more familiar lines:

MILLER PADLOCKS.—No. 4, $14.80; No. 1, $17.15; No. 18, $2.95; No. 18B, $2.95; No. 21, $4.15; No. 21B, $4.15; No. 19, $3.40; No. 19B, $3.40; No. 55B, $3.70; No. 60, $12.40; No. 72B, $4.80; No. 76, $8.25; No. 105, $4.30; No. 125, $14.05; No. 500, $2.45; No. 500B, $2.45; No. 505B, $5.00; No. 555, $3.85; No. 700B, $5.05; No. 50, $8.85; No. 1805, $2.45; No. 1805B, $2.45; No. 1905, $2.95; No. 5438, $13.00; No. 5905, $3.00; No. 5905B, $3.00; No. 544, $10.30; No. 216, $7.20; No. 479, $2.40; No. 477, $2.30; No. 214, $7.55; No. 217, $10.40; No. 221, $10.85; No. 22, $5.55; No. 121, $4.90 dozen.

PADLOCK ASSORTMENTS.— D, $4.85; U, $2.70; No. 1-52, $6.50; B, $5.50 each.

PITTSBURGH MARKETS

PITTSBURGH, PA., SEPT. 16.—In last report the statement was made that the labor situation in the iron and steel industry was "greatly improved" and that "the universal opinion among manufacturers is that a general strike, such as was threatened, is out of the question." Since those opinions were expressed the "strike committee" of six, representing the 24 unions that have been attempting to organize the iron and steel industry, have called a strike for Monday, September 22. The calling of a strike came as a great surprise, but it would occasion no great surprise were the strike order rescinded, and this may be done if the committee find a good or easy way out.

Of course, there is a matter of "mob psychology" involved. It is not certain what a mass of men will do. They may be stampeded. There are various pieces of information, and various actions of the strike committee, all pointing strongly to the idea that the committee has been bluffing, first in hopes of securing the censent of Judge Gary to hold a conference with them, and next, when that failed utterly, in hopes of securing intervention by President Wilson. It is a common opinion that President Wilson became impatient of organized labor more than a month ago, but even if that were not the case, his announcement of a general conference of labor, to be held October 6, obviously precludes his taking a hand at this time. If the strike committee wants his assistance all it needs to do is to await the results of the conference.

Evidently that is precisely what the strike committee did not want to do. It had worked the men up to a certain pitch of excitement, and the excitement would die out if it were not continually fed. Whatever chances a strike call had of being effective would decrease day by day. The first threat was to call a strike the Saturday night before Labor Day, to occur the day after Labor Day, making a time interval of two and a half days. The strike call now actually issued involves an interval of 11½ days. It is presumed that the much longer time is set in hopes that something can occur meanwhile whereby the strike committee can "save their faces" and call off the strike call.

At a few plants large numbers of the common workmen, particularly the foreign born, were "organized," while at many plants there was no success at all. The process of organizing the ignorant foreign-born workmen was very simple. The organizers said in substance: "We are going to control employment at this plant in future. You can join now for $3 and save your job. Afterwards the initiation is going to be $25." It is understood that when the $3 was paid the organizer got $2 and $1 went into the treasury to pay general expenses, including the printing of membership certificates. Thus it is possible that there will be actual strikes at some plants and nothing at all at others. An-

other possibility is that there will be practically no strikes and another is that the strike call will be recalled.

The incident has had little effect upon the iron and steel market, which pursues the even tenor of its way, with no great amount of activity as to open market sales because the mills are comfortably sold up. As a rule they have been indisposed for several weeks past to accept orders except from regular customers. There is only a moderate volume of new inquiry in the market, but with so much business being turned down the inquiries have to go the rounds and thus the apparent volume of business offered is magnified .

Steel Production

Steel production in August was at the rate of a shade under 80 per cent. of estimated capacity, against 73 per cent. in July and about 50 per cent. at the middle of May, showing a remarkably sharp recovery, but the rate of last January or February has not yet been attained. These percentages are based upon an estimated capacity of 49,000,000 of steel ingots a year, which is a conservative estimate, and the monthly reports of the American Iron and Steel Institute. The August report showed that 2,746,081 gross tons of steel ingots were produced in the month by 30 companies which in 1918 made 84.03 per cent. of the total of steel ingots produced by the industry.

It is very important, as throwing light upon the general situation, to note that while the actual production in August was about 80 per cent. of capacity, the capacity actually idle in the month was not 20 per cent. There was very little actual idleness. The common interpretation of this apparent discrepancy is that the works in operation did not produce the tonnage of which they are normally capable because labor is not at normal efficiency. This is a common complaint and covers not only men who are paid by the day or hour, but also men who are paid by the ton. The tonnage men, it appears, receive such high rates per ton that in many cases they do not bother to turn out the last ton of which they are capable.

Steel Corporation Tonnage

The Steel Corporation had in August a third very good month in the matter of booking business, chiefly of the contract variety. For six months, December to May inclusive, the corporation's unfilled obligations fell off quite steadily, and by an average of about 640,000 tons a month. Then the situation was suddenly reversed. While May showed a decrease of 518,375 tons in the unfilled obligations on books, June showed an increase of 610,545 tons. July followed with an increase of 685,806 tons, and last week's report showed an August increase of 530,442 tons. While the August increase was less than the June increase the actual bookings were larger, shipments in August having been about 175,000 tons greater than those of June. The Steel Corporation now has on books a total of unfilled obligations equal to six months of shipments at the present rate. The business is not equally distributed among the various department, but there is much less divergence than usual. The contract obligations of the corporation are not all specified against by the buyers, but the proportion is unusually high, probably considerably more than 50 per cent. of the total obligations being in actual orders of specifications, either on mill books for rolling or in shape for entering.

Pig Iron Prospects

Steel products being absolutely pegged at present prices, since in present circumstances mills regard advances as quite undesirable, and there is no possibility of declines, there is much more interest in pig iron prices, for there are possibilties there of fluctuations. Some of the furnaces are anxious to get the market up, and in fact, on foundry iron a number of districts record actual advances over the March 21 schedule. Many furnaces, on the other hand, are opposed as a matter of general policy to there being advances. There is likewise, a divergence of feeling among consumers. Some have been fearful that there would be advances for next year's deliveries, perhaps large advances, and in order to protect themselves they have bought, even paying slightly advanced prices. Such buyers have been much in the minority. Other buyers are looking for declines rather than advances. Others, and probably the majority, are neutral, preferring to take no action and being willing, if prices do advance, to pay the advanced price when the time comes. Western Pennsylvania and valley furnaces generally are maintaining former prices, those of March 21. Some small tonnages, for this year's delivery, have been sold at slight advances in the case of foundry iron, but not in the case of other grades.

The above view in the King St. store of the Wells Hardware Co., Ltd., Hamilton, Ont., shows how cutlery, shaving supplies, and other lines may be displayed to splendid advantage.

Spieler's Methods Applied to Paint

Observations at Toronto Exhibition—How the Barker Sells His Wares—Getting Your Locality Started at Painting.

THE writer was standing on the midway of Toronto Exhibition the other day watching the "Spieler" of a sideshow work. Now a spieler is a salesman of amusement, and believe me he works. If ten per cent. of the retail hardware paint and varnish salesmen worked half as hard as the sideshow barkers, there would certainly be some paint and varnish sold throughout the country.

There isn't a trick in the bag of their salesmanship that those boys overlook. They trot out everything they've got to sell their goods, and then some. The way they can picture and describe what is to be seen inside leaves the English language void after they have extracted all the adjectives and descriptive words that can be applied to their show.

Then comes the closing of the sale with the invitation to come inside, "The show is just starting—step up lively—there's room for all—come right along, ladies and gentlemen," etc. Then there commences a pushing from the rear. People at the back are coming forward and like all others in a crowd you move along, buy your ticket, go inside and the sale has been made complete. The pushing of the "ringers" at the rear was in reality what did the trick.

Starting a general painting movement in any locality is not unlike the team work of the "spieler" and the "ringer" in principle, though perhaps it is worked out a little differently in detail.

All paint men are familiar with the fact that the painting of one house in a locality is the starting point for others doing the same. John Jones paints his house. William Brown next door perhaps had no idea of painting until he saw Jones at it, then Brown gets busy. Smith, on the other side of Jones, may have been hesitating between two opinions, whether to do so, or not to do so. Jones decides the matter for Smith and so Smith gets busy.

Jones is not unlike the "ringer," he started the movement and the others, through pride, or neighborhood jealousy, or in an attempt to "keep up with the Joneses," do likewise.

The retail paint merchant need not necessarily stand on a soap box outside his store and "spiel," as the midway man does, but he can make his advertising, window displays, arrangement of stock and selling helps do it for him. Suggestions from his clerks, circulars, circular letters, enclosures of pamphlets in parcels and statements can "bark up" paint sales just as effectively.

"Ringers" can be planted very much the same as the midway show plants them, except for the fact that you must not let them know that you are using them for the purpose and they must be led to act the part unconsciously.

Pick out the districts in your locality most in need of paint. In these districts pick out the men most likely to start painting and concentrate advertising and personal influence on them till you get them painting their property. Then like the crowds in front of the sideshow, others will move along in the same direction and in a short time the place will take on a different appearance and paint sales will commence to come in.

It is surprising the number of merchants that take a conscious or unconscious attitude of, "Well, here's my store, if the public wants my stuff they can come and get it; if they don't want it, all right, let it go at that."

Imagine, if you can, a sideshowman setting up his tent at the fall fair, or next to the "big top" at a circus, then sitting down inside contented to wait till the crowd comes. Not he; the last peg is scarcely driven before he's out in front making all the noise he possibly can to attract the nickels and dimes into his little box office.

The same principle applies to every form of selling. The manufacturer, the retail merchant, anyone that has something to sell puts out advertising in some form or other to attract the public interest in his goods. Some do it better than others, it is true. A poor sideshow with a good spieler is much more likely to succeed than a good show and a poor spieler. And the crowds like to be spieled to. They also like to be advertised to. If you don't think so, watch the progress of the store that keeps up attractive displays of its goods, both inside and in the windows. Watch the man who uses circulars and newspaper space. Watch the mail order house. They are not afraid to proclaim far and wide through advertising that they have something to sell. Their catalogues are their spielers. And if they're making inroads into your community, it's probably because the merchants of your town are not spieling about what they can do as well.

Another pointer from the sideshow spieler. If the "freak" in his tent has any possible thread of value from

The McDonald-Baker Co., 818 8th Ave., W., Calgary

an educational standpoint, you are bound to hear about it from him. All the imagery of what you'll miss if you don't see his show is conjured up to attract you. Besides playing on the curiosity of the crowd, he is sure to surround his subject with ideas that arouses desire to see what value they have. To-day's ideas of advertising, especially standardized goods, are not to dwell so much upon the article itself as to implant ideas of what that article will do for the possessor. The spieler incorporates this idea in his talk in a primitive fashion. The advertiser of a useful, serviceable commodity can do the same thing in a more extended fashion and on a higher plane. The power to serve, is the underlying and basic principle.

The retail paint and varnish dealer has unlimited scope for advertising his line in this manner. Paints and varnishes can be used in so many ways in promoting the comfort and welfare of mankind that buying motives for advertising use are not a difficult thing to dig up and use.

Since the sideshow spieler has been used in an attempt to illustrate the point of this article and while the fall fairs are on, watch these salesmen at their work and see if some advertising lessons cannot be learned from them.

It's a safe wager that not a paint and varnish salesman in Canada is as hoarse one day in the year as the spieler is every day he is working. One could count on their fingers the number of retail merchants whose advertising cries as loud and as continuously as this vociferous crier of doubtful amusement.

Compare the service that paints and varnishes can render humanity in contrast to the benefit derived from viewing a sideshow freak and then ask yourself if as a legitimate seller of serviceable merchandise you are advertising and selling with a whole-heartedness that is commensurate with the value you have to offer.

Everything taken into consideration there are a lot of sideshow barkers that can put away a merchant to shame when it comes to right down solid effort in salesmanship.

As suggested, watch them work at the first opportunity, and considering the goods offered, see if you are putting the effort into your salesmanship that the comparative value of your own line to mankind should demand.

ENGLISH LEAD TO BE AVAILABLE

It is stated by the representative of a British firm that English pig lead will be procurable within the next few weeks. For some time this lead has been scarce. During the war its use was so great in the home market that little or none came to Canada. It is now expected that supplies will be available within the next two or three weeks.

Chatham, Ont.—Fire destroyed the spring department of the Dowsley Spring and Axle Works, causing a loss estimated at $50,000.

Is There Profiteering in Turpentine?

Assistant Secretary Minnesota Retail Hardware Association, Thinks the Market Has Been Cornered

D. M. ANDREWS, assistant secretary Minnesota Retail Hardware Association, is of the opinion that the turpentine market has been cornered by United States distributing companies, who are responsible, it is suggested, for present high prices. As Canada's supply comes from the United States, Mr. Andrews' observations will be interesting. He states as follows:

"In our good old United States of America at present there seems to be just one topic of general conversation—namely, the "High Cost of Living." There have been probes and investigations without number, the "butcher, the baker and the candle stick maker" have all testified and been testified against. In spite of federal, state and local remedies, the general post war condition known as the "High Cost of Living" is still with us.

Through a perverted or misplaced sense of righteous indignation on the part of the general public, the retailer, especially the grocer and butcher, are coming in for more than their share of abuse. The average consumer seems to think that because the retailer gets their money that he is the one who is wholly responsible for the high cost of things. In order to cater to popular opinion some pettifogging politicians and newspapers have set up a cry of "Let's investigate the retailer." But show us a single retailer in any line who is profiteering at the expense of the consuming public. Are you in your own store making exorbitant profits?" Did you buy the goods you needed or did you speculate?

Considering spoilage and change of styles in other lines of merchandising the hardware retailer probably has the best opportunity of any to speculate and buy in anticipation of his needs. But we have yet to meet the retailer who was enough of a gambler or sure enough of the future to hazard and vast sums in overstocking. As a matter of fact the retailer is making a much smaller percentage of net profit on his investment to-day than he did five years ago.

Just for instance, let's take the item of turpentine and see if we can locate the man who is profiteering. Before the war in Europe the retailer paid about forty cents a gallon for turpentine and sold it for fifty, making a twenty per cent. gross profit. Now he pays a dollar ninety and sells for two dollars—a gross profit (?) of five cents. After taking out the overhead what is left?

And what makes the difference? There is apparently no shortage because you can buy turpentine in unlimited amounts if you pay the price. The jobbers are not carrying very big stocks. but they can obtain all they want at exactly nine cents per gallon less than the retailer pays. Not much profiteering in it for the jobber either, is there?

Turpentine

Practically all the turpentine used in the United States is handled through twenty or more distributing companies. Ninety per cent. of the turpentine in the Northwest comes through one of these companies. This company when it buys more turpentine pays approximately $1.70 per gallon f.o.b. some mill in Georgia in tank car lots. On top of that price there is about three cents per gallon freight and about six and a half cents expense in barreling, leaving only about two cents per gallon difference between the total cost and the price asked of the jobber. That doesn't look like profiteering either, does it?

But here is something to remember While the distributing company only makes a profit of two cents per gallon on the turpentine it buys now it isn't buying very much. The large bulk of its stock on hand was purchased last November and December when the price ranged from 45 to 65 cents per gallon. Is that merely foresight or is it speculation and profiteering?

If you ask one of these big distributing companies what makes the high price of turpentine they answer by telling you, "The Savannah, Georgia, Board of Trade." It is quite true that at three o'clock every afternoon the Savanah Board of Trade sends telegraphic quotations all over the country giving the price "at the close of the market." But it is folly to presume that that is all there is to the fixing of the price of turpentine.

Another explanation is that there is an unprecedented demand for turpentine in devastated Europe. The demand may be there alright, but evidently Europe is not buying a great deal for the same Savannah Board of Trade reports sales of only three to six cars per day.

Then there is the explanation that there is a big demand in this country. Have you noticed much of a run on turpentine? And we have already pointed out that the big distributors have bought very little since last winter and there is the Board of Trade's sales report to prove it. Sounds like a rather lame excuse.

The high cost of production can hardly be blamed for it is whispered, that while production cost is higher than it has ever been it is still held down to less than fifty cents per gallon. Considerable difference between fifty cents and the price to the retailer.

Again there is the story that there is a general shortage because of the abnormal amount of rainfall in the Southern states. Can you imagine rain holding up the work of production for over

A COMPLETE LINE

A STRIKING exhibit of brushes by the Boeckh Company, Ltd., interested thousands of visitors to the Canadian National Exhibition. The firm's display, as will be seen from the accompanying illustration, included brushes for every purpose. In Boeckh's painters' brushes the bristles simply cannot come out as their construction embodies the two greatest advances in modern brush making, "Steel Grip" and "Rubber Set."

Only the finest of materials and the best workmanship go into Boeckh's brushes and they have won their popularity and steadily expanding sale because they are quality goods and render real service.

It is becoming increasingly difficult to obtain high grade bristles owing to conditions. A very large percentage of the world's supply formerly came from Russia. With that country's demoralization and scarcity of food supplies all the hogs were slaughtered and now the world is dependent upon China for bristles.

For more than sixty years now the Boeckh Company, Ltd., has been manufacturing brushes that have made a record for performance and durability against all comers. The importance to the hardware dealer of having goods of this kind to handle is inestimable. He can stand behind Boeckh's brushes to the limit and assure customers that they are getting goods which will give them lasting satisfaction. This means the corner stone in the building of a permanent trade. There is no better advertisement for any dealer than a satisfied customer. He not only comes back again, but he brings his friends. Boeckh's brushes make for this kind of business.

nine months—the approximate period of the rising prices? Wouldn't you think that a pine tree in order to be alive at all would contain just about so much sap, rain or shine? If there is a shortage why is it possible that the retailer can buy in unlimited quantities if he has the price?

Checking it all over it would look as if someone had bought up and was holding not only the available supply, but also the result of future production, and that is what the federal law defines as profiteering. Who is doing it? It is certainly time for one grand and glorious Government investigation of the turpentine situation, but let's save time and get results by starting in on somebody besides the retailer.

Plate Glass Rates

May Be Revision Later, Owing to World Shortage of Glass

Canadian plate glass insurance companies have not yet decided, according to "FINANCIAL POST," to increase their rates to keep pace with American companies, who have declared a general increase for the whole United States ranging from 10 per cent. to 33 1-3 per cent. Insurance men state, though, that the question of revising the rates will probably be taken up shortly as there is no prospect of the world shortage of plate glass, and consequent high prices, showing any signs of improvement. Canadian rates were last adjusted in August, 1918, when increases averaging 15 per cent. went into effect.

As practically all plate glass insurance is written on a replacement basis, the price of glass is naturally the governing factor in determining rates. During the war the price of plate glass has increased from 100 to 150 per cent. in Canada, and there is a shortage even at the higher rates. Before the war practically all Canada's glass was imported from Belgium, Northern France and England. This supply has been cut off for the past five years, as the Belgian and French plate glass factories were nearly all destroyed by the German invader, and English plate glass factories have been kept busy replacing windows shattered by German air raiders. It is estimated that it will take several years to replace all the glass windows broken in England during the war. Of late, Canada has had to depend almost entirely on the Pittsburgh glass makers for its supply. With a shortage of glass in the States and high prices being bid, the American manufacturers have not been anxious to market their goods in Canada and have been very lax in their attention to Canadian orders.

The increases put into effect by the American companies will not affect Canadians insuring through the local agents of the American companies, as the local rates is always taken as the premium basis. Canadian companies are unanimous in stating that there is no profit for them in plate glass insurance at present rates. One agent reported having collected $256 in policies last year and paying out $3,500 for breakages. They have merely been carrying the insurance at a loss in the hope that a return to normal conditions will aid them to make up their losses.

AN INTERESTING QUESTION

Take a suppositious circumstance. Let there be a department store, states "Associated Advertising," that does not advertise and which 10,000 probable customers visit within a given period. Let there be another department store that does advertise and which is visited by the same number of probable customers within the given period.

Can the store that does not advertise handle the 10,000 with the same expedition in the same selling volume, sales forces and all other things being equal?

Academic though it be, discussion of this proposition would not be uninteresting. To the store that advertises come a host of customers who, absorbing the information contained in the advertisements, know what they want and what they wish to pay for it. This tends to expedition in buying, which results in time to look about, which, in turn, leads to further buying.

To the non-advertising store come 10,000 customers uneducated by advertising. They have thousands of questions to ask that have already been answered by the other store in its advertisements. They complete their purchases less expeditiously, and so have less time and energy for further inspection of the store and for additional purchases.

Assuming that each of the 10,000 visiting the non-advertising store asks but two questions made necessary by an uninformed condition, and also spends five minutes longer in making a purchase for the same reason, how much larger would the sales force have to be to equal the efficiency of the sales force in the store that advertises? And would the cost of additional sales force to overcome this handicap be greater or less than the charge for advertising?

In other words, does department store advertising defray its own cost in saving on sales force expenses?

WHITE LEAD AND PUTTY BASIS EXTENDED

The present basis for white lead in oil, and putty, has been extended to December 15. This means that orders placed for delivery now will be filled on the existing price schedule. Some state that the manufacturers are going the limit in doing this, for, as pointed out for some time past, the increasing cost of linseed oil has made production costs very high.

In view of the fact that the supplies of linseed oil have been light, and will probably so continue, it is pointed out that there will be little probability of securing more than moderate supplies of either commodity. The placing of orders early will serve to avoid disappointment later.

LET MONEY IN THROUGH SHOW WINDOWS

Continued fro mPage 48

In placing a window display, special attention should be given to the background and setting, so that it will conform to the class of goods that are being displayed. At some seasons of the year the display man can elaborate in his methods for such trims as June Bride, Thanksgiving, Christmas, or any other special occasion.

Window displays are arranged for one purpose only, viz., to sell goods. It makes no difference how attractive a window display may be, unless it accomplishes this function it is wasted effort. The sales producing power of a window display is not gauged by the number of articles displayed, but by the arrangement and appearance of the articles, no matter whether they be few or many in number.

A Few Points

Keep the window and store front bright and clean. This statement seems almost needless, yet it is a fact that there are too many stores in which this first law of cleanliness is ignored.

Possibly these are the stores which reflect the characteristics of the owner. Change the display ordinarily once a week. Exception may be taken to some special display, which may be left longer, but at the most not more than two weeks. The frequent changing of displays is not such a serious proposition as it appears; get the habit of changing often.

Change Often—Specialize

Some merchants with limited window space feel that a number of his lines should have a representation at one time and this leads, in most cases, to more or less crowding or mixing of the display. This should always be avoided. If the window is small, change it often and specialize with one line of goods and better results will follow.

A seasonable window display will often suggest to the passer-by many wants that might be otherwise overlooked.

Give the Prices

Price is one thing that naturally suggests itself to the person who sees an article he or she would like to possess. See that your price tickets tell the price plainly and boldly.

There can only be one good reason why price tickets are omitted from a display and that is the price is too high.

The show card tells the story about the goods or the stores policy; it should be brief and so lettered that it can be quickly read.

No longer an experiment, the show window is an important factor in business success and it should have the same careful study and attention that other branches of the store receive.

With such attention, it will pay you a good profit and you will be convinced that there is money in your show windows.

Varnish Selling

It is no trouble to sell any varnish once, but the one permanent salesmaker is quality.

The universal recognition of Berry Brothers label as a guaranty of quality is the reason why Berry brands require no sales arguments.

Liquid Granite Floor Varnish, Luxeberry White Enamel, Luxeberry Wood Finish, and Luxeberry Spar Varnish are a few of the many products that have made the name of Berry Brothers a household word.

It pays to buy "Berry" Finishes.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Sept. 18.—Linseed oil has declined 8 cents per gallon during the week and is being offered to the trade in single barrel lots at $2.92 for raw. There is not a great deal of relief, as yet, for while seed markets have eased within a week to the extent of 36c per bushel, making October delivery price $4.44 at this writing, the crusher, when he requires seed, cannot get it without paying a premium.

Turpentine is still very firm at $2.65. There is a little relief in the matter of delivery, but the price basis is still high. Single barrel lots may be had at the above price.

Putty and white lead in oil basis are being continued until Dec. 15th and orders will be accepted at the figures being quoted. There is a continued demand for supplies from the retail trade and fall operations have been reported fully satisfactory.

Linseed Oil $2.90; Lower Seed Markets

Montreal.

LINSEED OIL.—While there has been a considerable decline in the price of flaxseed during the past week, this has been of little relief to the crushers, although prices have declined in some quarters eight cents a gallon. Those wanting seed have to pay a premium for their requirements when they go to buy. It will be several weeks before there is a measurable relief in seed supplies, new crop being late this season and its arrival unlikely, say the crushers, until near October first. None are offering oil in larger than single barrel lots.

Raw—	Imp. Gal.
Single barels	$2 92 $3 02
5 to 9 barrels	....
10 to 25 barrels	....
Boiled—	**Imp. Gal.**
Single barrels	2 94½ 3 04½
5 to 9 barrels	....
10 to 25 barrels	....

NOTE.—Owing to fluctuating seed markets jobbers, generally, are not quoting. The basis is decidedly nominal.

Turpentine is Freer But Holds Its Price

Montreal.

TURPENTINE.—Several paint firms have expressed a freer movement of turpentine, but state that they can only augment stocks by paying well for what they require. Single barrel lots are again available at $2.65 per gallon, but large quantity orders are hard to fill. There is a fair and a seasonable movement to the trade.

Turpentine—	Imp. Gal.
Single barrels	$2 65
Small lots	2 65

(Packages extra.)

Putty Prices Held; Will Rule Steady

Montreal.

PUTTY.—It was decided this week that the present price schedules for putty should be maintained until December 15th next. One manufacturer points out that there will be a strong demand for the available supplies, for the present difficulty of securing linseed oil makes it impossible to manufacture large quantities in anticipation of later demand. The undertone continues to be decidedly firm.

	5 ton	1 ton	Less Quanty.
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases	7 15	7 40	7 75

Pure linseed oil putty, $2.50 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days, net 60.

White Lead in Oil To Hold Its Price

Montreal.

WHITE LEAD IN OIL.—The present basis for standard white lead in oil will be extended to December 15th next, the prices appearing below applying. While the greater cost of linseed oil suggested the reasonableness of an advance, and which many paint manufacturers looked for, the above decision was arrived at on Wednesday of this week.

Present quotations for standard brands are: For five ton lots, per 100 lbs., $15.50; ton lots, $16; and smaller quantities, $16.35.

Still Good Movement of Paints; Specialties

Montreal.

PAINTS, ETC.—Despite the fact that business has been heavy all through the season, orders are still coming to hand for shipment at once. This presages an active fall painting movement and the activity is quite marked. Prices are naturally very firm. Announcement of the price basis for the season of 1920 will probably be made in the not distant future.

TORONTO

TORONTO, Sept. 18.—There is a continued demand for paints, varnishes, glass, putty, and other materials. Several paint manufacturers still have large quantities of paint on back order. With thousands of houses in Toronto and other places nearing completion, there is a heavy demand for all paint lines, with prospect of a continued heavy demand for some time to come.

Turpentine Again Reacts; Up 10C

Toronto.

Turpentine has reacted again, and an advance of 10c per Imp. gallon has gone into effect over last week's quotations. It will be recalled that last week there was a decline of 10c from previous levels. New prices are as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$2 45
2 to 5 barrels (barrel included)	2 44
5 gallon lots	2 55

Linseed Oil Unchanged Locally

Toronto.

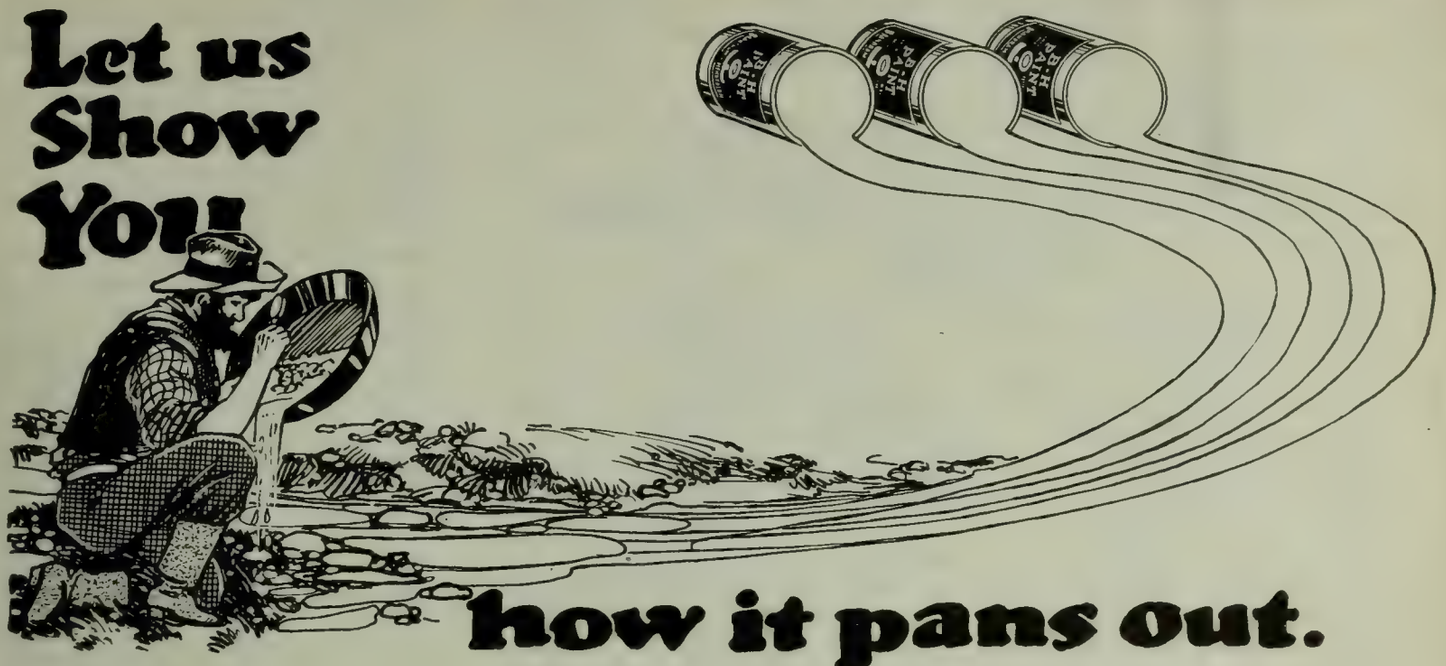
No change has taken place locally in linseed oil prices, the statement being made that spot stocks are low and that a scarcity will continue during the immediate future. Crushers report a great scarcity of seed with a good demand for oil. Prices are quoted as follows:

Linseed Oil—	Raw	
1 to 2 barrels, gal.	$3 25	$3 30
3 to 5 barrels, gal.	....	....
10 barrels and over	....	....
	Boiled	
1 to 2 barrels, gal.	$3 28	$3 33
3 to 5 barrels, gal.	....	....
10 barrels and over	....	....

Prices shown are those ruling on Thursday of current week and subject to daily fluctuation of the market.

White Lead in Oil Remains Unchanged

Toronto.



There is no change in white lead in oil quotations. The demand continues good. Prices will probably remain at following figures: Five ton lots, $15.85 per 100 pounds; one ton lots, $16.35, and in smaller quantities, $16.70.

Glass and Putty In Good Demand

Toronto.

There is a good demand for glass and putty. Glass is quoted at 30 per cent. off the list adopted September 1, and shown in last week's issue. Putty prices

Let us Show You

how it pans out.

Our offer to you of the B-H Agency is a golden opportunity for the improvement of your business. From the day you accept this Agency you will observe a steady increase in the business coming your way. Just as a miner judges a "placer" stream by the amount of gold it leaves in the bottom of his pan, so you should judge the value of a Paint Agency by the amount of profit it leaves in your hands. If the Paint line you now represent does not seem to be "panning out" right, consider seriously a change to B-H—the value of which line you can safely estimate by the manner in which it has "panned out" for others.

We can tell you of merchant after merchant, who had found his business "made over" by the linking-up of his store to our splendid proposition.

Not only are the B-H Products of a quality calculated to attract the best trade of your community—but allied with that quality feature is a most remarkable degree of co-operation. We look upon our relationship with our Agents as a partnership arrangement—and we do all in our power to aid them in getting the maximum of gold out of the stream of business which the B-H proposition sets flowing their way.

If we are not represented in your locality, write us for particulars of our attractive agency proposition.

It is certain to pan out well for you

PRACTICAL POINTERS FOR PAINT SELLERS

THE last few years have brought about very radical changes in the character of many materials of first importance to civilization, which earlier periods had come to look upon as fixed for all time. This can be truly said of structural and tool steel, of leather, of gasoline, and of many other materials employed in the arts. A number of these changes have been brought about by increased difficulty of securing adequate supplies of the raw materials for manufacture, some doubtless from the desire to produce cheaply, others, that a large market might be obtained through lessened prices. But most of these changes have been due to actual improvement in the final product or the special adaptation of certain varieties of that product to definite ends.

No single article illustrates this latter point better than paint. Whilst basic lead carbonate to a large extent remains the most characteristic component of paint, it by no means follows that, for all purposes to which paint is put, that a lead pigment is best. Paints are now largely manufactured with special reference to their use, and any standardization of paints which will be just and reasonable must take this fact into consideration. A paint is not necessarily fraudulent because it has not lead as its base. It is fraudulent if it misrepresents either what it truly is or what it can effect.

With this idea of paint clearly understood we can now go further and explain the use of the principle basic raw materials and why they are, or are not used.

Basic carbonate white lead, or ordinary white lead, is a chemical substance made up of lead, carbon, oxygen, and the elements of water. It is produced by three processes, the products of each process differing somewhat in physical qualities but are essentially the same chemically. Carbonate white lead has very high opacity or hiding power and is easy to work. It gives paint or enamel "body" or "covering capacity," by which is meant hiding power.

It, however, lacks the best spreading power, and has a tendency to "chalk" or dusting off early; it also darkens readily in the presence of certain atmospheric gases, especially hydrogen sulphide.

White lead combines readily with linseed oil and increases the drying properties of the oil.

Basic sulphate white lead. Like all pigments produced by sublimation process, sublimed white lead possesses in its ultimate particles a fineness far superior to that of pigments otherwise produced. On account of the extreme fineness of its particles it does not settle out of liquid mixtures. It resists the discoloring action of hydrogen sulphide and other harmful gases in the atmosphere longer than any other lead pigment. It is uniform in composition, is non-poisonous, and has no destructive effect on the paint vehicle. Paint manufacturers early recognized these characteristics, and the paint manufacturing industry consumes practically the entire production. When used alone, it "chalks" rather more freely than carbonate white lead.

Sublimed blue lead is a "fume" product, with spreading power in oil very high. Its percentage of lead is as high as in other lead pigments. It remains well in suspension and brushes well, having better tooth than most lead pigments. It is practically inert in linseed oil and is not affected by atmospheric gases. U.S. Government bureau tests place it high among the class of rust-inhibitors for use on metal work.

The accompanying window display was recently put in for the Mills Hdwe. Co. of Hamilton by Chas. Byford, who describes the layout as follows: "The background of the cutlery display was made of wallboard finished with flat paint, cream and dark green. The wall pockets on the background were also made of wallboard. The floor was covered with wallboard and painted in eight-inch squares, cream and green, to match the background. This makes an excellent floor covering for window displays and can easily be taken out and re-painted. Black velvet was used to drape the pedestal, etc., and for covering the cork discs on which pocket knives and scissors were shown. The centre display of pocket knives was made on a six-inch ball of cork (which was gilded) and supported by four large jack knives. The four display panels in the background used for showing butcher knives, etc., were made of wallboard and painted cream and green. The knives were shown up to advantage on these panels. The use of manufacturer's advertising together with a show card and numerous price tickets completed the display." Read of the result obtained from this display on the next page.

Turn-overs Instead of Left-overs!

WHEN you figure it up at the end of the year, the line that fattens your profits is the line that makes a quick turn-over — and *does it often!*

When a small dealer takes on a new line for the first time, and inside of a year re-orders from three to four times, exceeding his initial order each time — *he's handling a live one.*

Hundreds of Pratt & Lambert Dealers are doing this every year because "61" Floor Varnish is a varnish with a million friends. For 30 years people all over this continent have been buying "61" and telling their friends how good it is! This Fall a lot more people will know about "61" through a big, hard-hitting series of full-page advertisements in the magazines going to millions of householders.

Hundreds, perhaps thousands, of these readers are right in your own community and they're going to spend money for "61" *somewhere* in your town!

You are going to buy varnish of *some kind* before Fall and your stock will make a quick turn-over if you're prepared to sell your customers the kind of varnish they'll want! The money you spend for "61" Floor Varnish will return to you quickly with a nice profit and you'll have a clear conscience about it because "61" will stand hard knocks and water without cracking or turning white.

It's a varnish with the good-will of a million people and a quality reputation of over 30 years' standing. Cash in on it now! Just a postal will bring the details!

Consider the Advantages of a Complete Line of Paint

ONE product will often sell another, so a pleased user of paint will frequently return for varnish, enamel, etc. of the same brand. There is one complete line, the introduction of which will show increased sales.

CANADA PAINT

The Paint of Merit

This is a really complete line of paints and varnishes, backed up by the most aggressive advertising methods. There is a perfect finish for every surface. Nothing has been overlooked. Whatever the surface may be, the perfect finish for its protection and for beautifying it, is to be found in the Canada Paint line.

Write us to-day for a copy of our free booklet "Paint and Varnish as a profitable investment for a merchant" which also describes in detail the full C. P. Agency Proposition.

The Canada Paint Co.

HALIFAX MONTREAL TORONTO
WINNIPEG CALGARY

The Canadian Who Bullied the Bolsheviks!

WHEN war broke out, Colonel "Klondyke" Boyle took across, at his own expense, 200 staunch Yukon volunteers. He was sent to Southern Russia, and in six weeks turned the transport system there from chaos into efficiency. He fed the starving Russian and Roumanian armies. He arranged temporary peace terms between Bolsheviks and Roumanians. Aided by twenty Chinese murderers and a brave Canadian girl, he bluffed the Bolsheviks and Austrians, in a tremendous exploit which won for him the title "Saviour of Roumania," and the personal thanks of the Roumanian royal family.

Read this story of "Klondyke" Boyle, by Arthur Beverley Baxter, in September MACLEAN'S—it starts on page 13.

"Growing Under Gouin"

—tells the amazing story of development of Quebec Province during the past fourteen years —in road-building, finances, industries and education.

"Meet Mr. Habitant"

—What does the rest of Canada know about the Habitant of to-day? Does he talk like Drummond's poems? This article, by Thomas M. Fraser, forcibly depicts the assets Canada has in French-Canadian stability and thrift, and will go far to remove any lingering prejudices which may exist in some minds.

Other Big Features

The Crowning of the King—By J. K. Munro, the pungent, pithy, political pundit.

Nuorteva's Propaganda—By C. H. Cahan, K.C., recently Director of Public Safety.

The White Eagle at Niagara—By Major C. R. Young, late adjutant Polish Army Camp.

The Problem of Our New Canadians—By Nellie McClung.

His Majesty's Well-Beloved—By Baroness Orczy.

Canada's Great National Asset—By D. B. Hanna, president Canadian National Railways.

Teddy Bear—A wonderful, poignant, Robert W. Service poem.

On Leave—A light, frolicsome story by Harry Bailey.

Evil Spirits—Another Bulldog Carney story, by W. A. Fraser.

Ebb and Flow—A new story by C. W. Stephens, who wrote "Man and Wife."

SEPTEMBER ISSUE *Now On Sale At All News Dealers* *20c*

If there are no newsdealers in your town, or if your newsdealers cannot supply you, send 20 cents for a sample copy or $2.00 for a whole year's subscription to MACLEAN'S MAGAZINE, 143-153 University Ave., Toronto, Can.

How Much Is It Worth To Have No Complaints?

If the wringer or washer you sell does not give satisfaction, you get the complaints. You are blamed, although it is not your fault. You lose a customer perhaps more than one, because women compare notes on such things.

Sell **ARROW BRAND** Wringers and our dependable line of Hand and Power **WASHING MACHINES**. You can consistently recommend them, and we will stand back of you to the limit.

DOWSWELL, LEES & CO., LIMITED

HAMILTON, CANADA

Makers of every type of hand or power washing machine of merit. Also ARROW BRAND Clothes Wringers.

Western Representative:
HARRY F. MOULDEN & SON

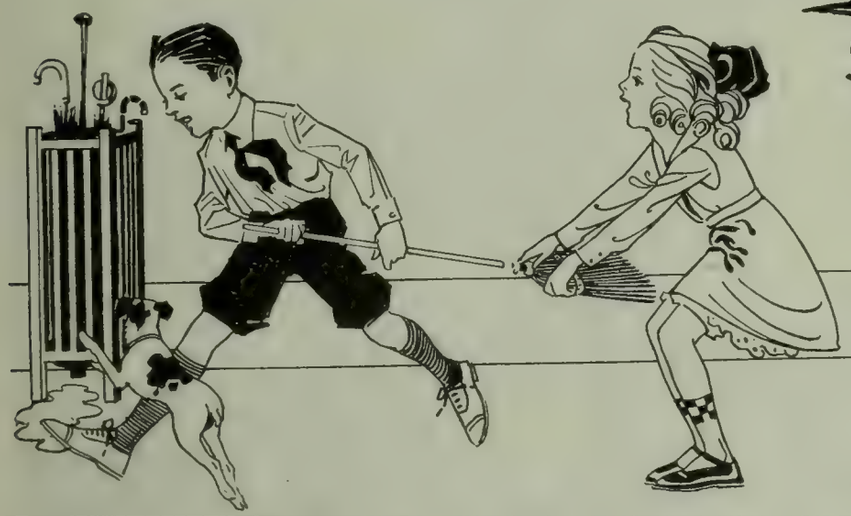
THE varnish that gives floors a hardwood finish—brings out the natural grain perfectly.



Specially made for the hard usage to which floors are subjected.

—impervious to water—even boiling water won't hurt it;
—elastic—don't show tell tale heel marks;
—durable—don't show white marks when scratched.

The Floor Varnish that Satisfies the Customer.

BRITISH AMERICA PAINT CO., LTD.

VICTORIA VANCOUVER CALGARY EDMONTON REGINA

The Paint Man's Best Friends

BOWSER Paint Oil Storage Outfits

They prevent evaporation and gumming; leakage and spillage. Keep the oils pure and clean; keep the oil room clean and free from fire hazard.

Measure oils accurately, quickly, without loss and in a clean satisfactory manner.

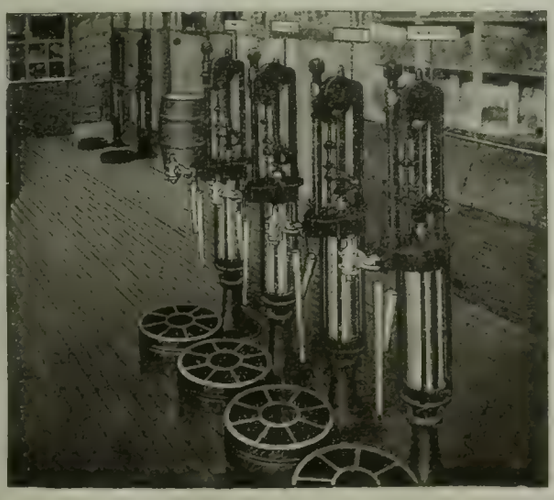


Fig. 115 Pumps on Sales Floor. Tanks anywhere in basement.

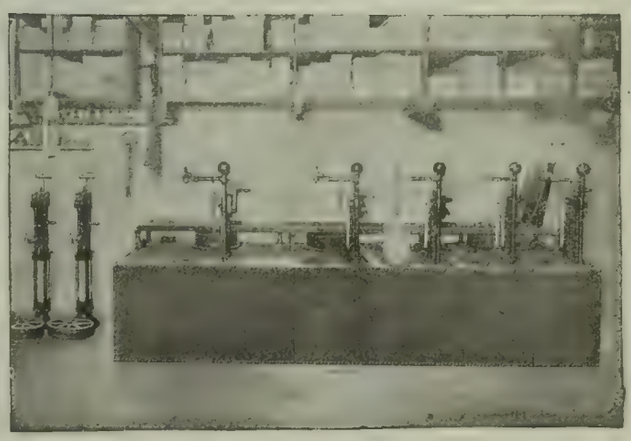

Fig. 109 First Floor Outfits.

May be installed where most convenient: require but little floor space.

BOWSER Storage Is: Systematic—Clean—Saving Sanitary—Practical—Safe

It makes the handling of paint oil a pleasure and profit instead of a burden and loss.

CARTER'S

Carter's Genuine Red Lead Means Good Business for You

It is needed constantly by your painter-customers, by railways, ironworks, shipbuilders.

Carter's Genuine Dry Red Lead

is pure, uniform, economical. Mixed with pure linseed oil, it is the best protection for metalwork, steam pipes, etc. It is highly oxidized, ground very fine, made from the highest grade of Canadian pig lead.

We also make Carter's Genuine Orange Lead. Dry White Lead and Litharge.
Make sure you have ample stock on hand.

The Carter White Lead Company of Canada, Limited, 91 Delorimier Ave., Montreal

They See The Can—
Recall The Brand—
And You Record a Sale

Stephens REGISTERED TRADE MARK has already impressed many minds favorably. An average display is all that's necessary to start a train of thought in the customer's mind that leads from your store to an unpainted home. Your cash register becomes the closing link in the series of events suggested by your display of **Stephens'** Paints. This doesn't happen once---it happens many times. Are you making the most of such opportunities? Have you the right brand of paint? If not your paint turnover is not all it might be.

Suppose you write us about an agency. There's money in it.

THE BIG MARKET
—*IS AT HAND*—

In the big demand for Labor Saving appliances that has been developed by the education of the housewife to a realization of the fact that she need not be a household drudge —

THE EDEN DOMINATES ITS MARKET

Because its construction is time tested.

Because it has twenty-five inimitable and exclusive features.

Because it is nationally advertised.

Because it is sold on a Golden Rule Policy.

Because it does what it is built to do—it washes clothes and washes them to snow whites, quickly, easily and economically.

THEREFORE:—YOU SHOULD SELL THE EDEN and reap the harvest of prosperity that is in sight.

The Trade Mark behind the "Hardware House of Quality"

DIAMOND A BRAND — A — ASHDOWN'S GUARANTEE

The Largest Wholesale Hardware Dealers in Canada

Diamond "A" Spark Plugs

Our Offer

These complete assortments are accompanied by attractive advertising matter of unusual pulling power. We have added display features that move these goods even more speedily.

This assortment includes only the most popular sizes that move readily. The assortment includes 100 plugs packed in metal display cabinet together with circulars, size lists, metal counter signs and outdoor tacker display.

This year we make more than an offer. It is a merchandising proposition designed to actually move the goods for the dealer to the consumer. This is characteristic of our Diamond "A" co-operation policy.

Diamond "A" Junior Spark Plug Assortment

consists of 100 plugs packed in metal display cabinet, with circulars, size lists, metal counter signs and outdoor tacker display, weight complete, 35 pounds.

Each assortment in a carton.

RUBBERSET
TRADE MARK
BRUSHES

This is the trade mark that identifies *each brush* made by us, in Canada, under the *original* RUBBERSET process.

It means that every bristle is gripped *everlastingly* in hard, vulcanized rubber.

It means that the brush is *our* product.

It means that the brush *must* make good—or WE WILL!

Best to sell—because best to use!

RUBBERSET CO., LIMITED

Factory—3 Sullivan Street

TRY US AND BE CONVINCED

BULLDOG
Power Tool Grinders
designed to meet the demand for a small power head grinder. Two vitrified corundum wheels for general use, and tool rests. The ideal wheel for steel grinding.
Bull Dog Grinders cost less and give satisfaction. Get catalogue No. 1. Write your jobber.

WESTERN HARDWARE MFG., COMPANY, LIMITED
MILWAUKEE, WISCONSIN

LOCKS, BOLTS AND BARS
These and all articles pertaining to the Builders', Joiners' and Carpenters' requirements are our specialty.
We are in touch with the most noted and remote manufacturers in the trade.
Do not stand and wonder where you can procure any particular line in hardware. That's ours!
We shall assemble all your requirements and dispatch in one consignment.
Let us have your enquiries at once. Delays are dangerous on a rising market.

Address your envelopes B Dept.

Easy Money for You

With paper at $10 to $24 per ton there is a lot of easy money that many thoughtless people are actually throwing away. The highest prices are paid only for paper properly compressed and baled.

ALL STEEL CLIMAX FIREPROOF

Steel Baler

Comes in 12 sizes. Its use not only saves and makes money for you, but it keeps the store neat and orderly. It reduces insurance rates.

With no obligation to you we will send particulars and prices of our Steel Paper Balers. (Your name and address on a Post Card to-day will do.)

Climax Baler Company

Hamilton, Ontario

Hunting Time Is Gun Cleaning Time

The big hunting season is at hand. More hunters will want cleaning implements than ever before. The Marble's line includes everything needed. Stock up now with a supply of these "tools" and get your share of this good business.

MARBLE'S Jointed Rifle Rods

Made of brass, with steel joints. Can't wabble, bend or break. More convenient than a one-piece rod. Swivel in end section prevents joints from unscrewing when in barrel. Gives whirling movement that cleans thoroughly. Wood handle. Each rod complete in cloth bag. All calibres from .22 ta .50. List price, each $1.10

MARBLE'S SOLID RODS in brass and steel with wood handle. All lengths and calibres. List price, each $0.85

Marble's Pocket Rod

Made of solid brass with steel joint connections, same as Marble's Jointed Rod. Handle is steel—can be screwed to any section. Complete with pocket carrying case. List price $1.65

Marble's Rifle Cleaner

Made of softest brass gauze washers on a spirally bent spring-tempered steel wire. They follow the twist, reach every angle of the entire rifle and speedily remove all lead, copper, rust and powder residue. All calibres—for rifles and revolvers. Price ..... $ .55

MARBLE'S SHOT GUN CLEANER—Construction same as rifle cleaner. List price, each $0.85

Any Canadian Jobber Will Fill Your Order. Write for Complete Catalog of Marble's Specialties for Sportsmen.

DU PONT CANADIAN INDUSTRIES

Those dealers who handle Du Pont Powders and Shells loaded with Du Pont Powders will find the Fall of 1919 a busy one.

There are more shooters in Canada now than ever before —and the quantity of dependability of Du Pont products was never higher in all the years since this famous powder was made and marketed. Is your stock up?

E. I. Du Pont de Nemours & Co.

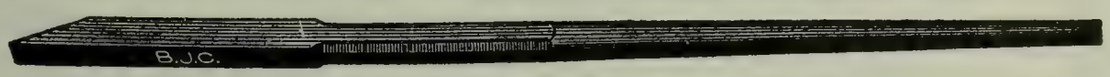
DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

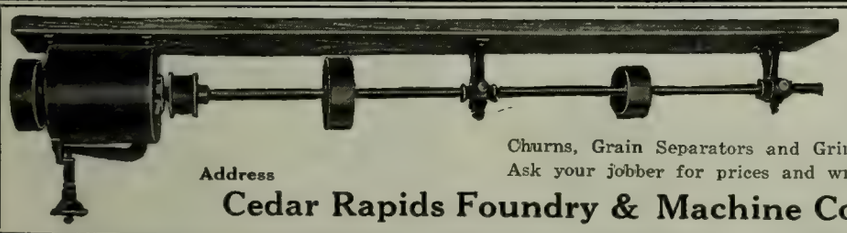
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

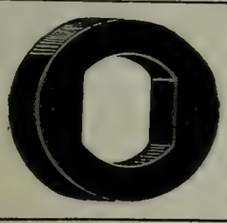


B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

Awnings Tents Flags Tarpaulins

We were optimistic for good business this year but trade has exceeded our expectations. Our many customers are participating in this good business by carrying our lines for immediate delivery. The season is on. Sort up your stock to be ready. Catalogue on request.

J. J. TURNER & SONS, LIMITED, PETERBOROUGH, ONTARIO



We invite all Canadian Implement and Hardware dealers to investigate the strong selling merits of this line of machines.

This Speed Governor and Line Shaft outfit will make the gas engines you sell more valuable to your farmer trade. They operate Cream Separators, Washing Machines, Churns, Grain Separators and Grind Stones, without vibration.

Ask your jobber for prices and write us for catalog and information.

Address **Cedar Rapids Foundry & Machine Co.,** 720 1st Ave. W., Cedar Rapids, Iowa, U.S.A.

Valves Never Leak

but work with efficiency and dependability, withstanding the strains of high pressures and superheated steam, when

STRONG'S I. O. P. HIGH PRESSURE VALVE DISCS

ate used. The best high-pressure valve disc on the market, with a wonderful record for performance and long life under severe service conditions. **Make your Dealer get them for you**

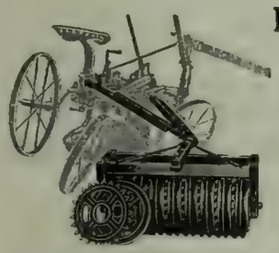
CHURCHILL'S "ICE GRIPPER"

Our "Ice Gripper" is made with an equalizing strap which adapts itself to shape of heel. It cannot slip off. It is made in three sizes which fit all sizes of shoes and overshoes.



We are sole manufacturers of the Featherweight Ice Creeper. This is a well known Ice Creeper and has a well established demand.

We are also manufacturers of Instep Creepers and Woven Straps for all purposes.

There are no Substitutes for Dairy Foods

You can't have a Speedometer on your arm

Even if you could, it would not make you turn at a certain speed every time you used a separator. Own a separator that you do not have to coddle by turning at a fixed speed or by using speedometers and other contraptions. Do the sensible, practical thing and buy a Sharples.

American ingenuity has perfected a principle in the Sharples that enables you to turn the handle fast, slow or "as you like it." You can loaf along, or speed it up—and you do not lose a cent's worth of butterfat nor change the thickness of your cream. From a straight, money-making standpoint alone, the Sharples is the only separator you can **afford** to buy.

AFTER READING THIS SHARPLES AD--- PUT YOURSELF IN THE FARMERS' PLACE

Would you buy a separator that was as contrary as a fixed feed separator—that had to be coddled? Or would you do what thrifty farmers **have done**—invest in the Sharples Suction-Feed that "Skims Clean At Any Speed?" Why not apply the same logic to the line of Separators you handle—and follow the line of least resistance—with the Sharples. Not all dealers can qualify for a Sharples Contract, but correspondence is invited from progressive dealers. Address nearest office.

Increase Your Trade With Motorists

Carry The Complete Imperial Polarine Line

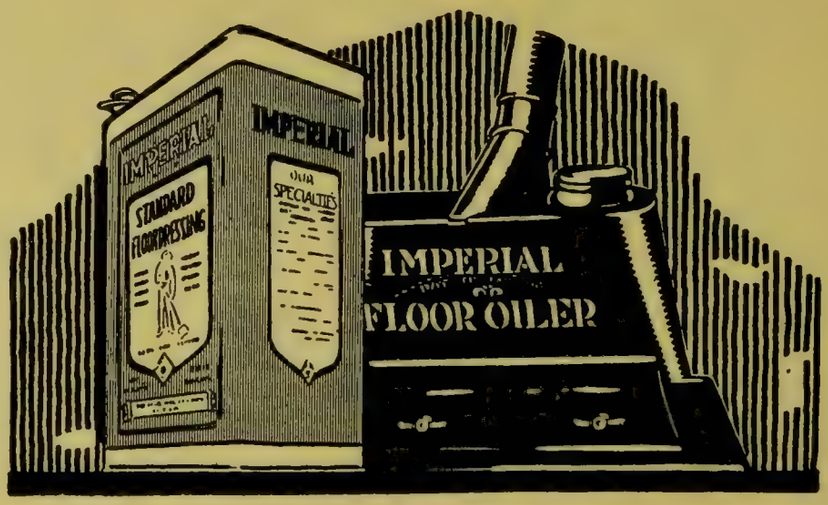
Most Canadian motorists prefer Imperial Polarine for automobile lubrication and deal regularly with dealers who carry the complete line. Imperial Polarine is a fast-moving line, offering a splendid profit to you and highest satisfaction to your customers.

In addition to the automobile trade there is the highly profitable tractor trade to be cultivated. Each tractor uses upwards of sixty-three gallons of lubricating oil annually—a few tractor customers provide a splendid addition to your oil business.

There is a minimum profit of 33 1-3% on every sale. When you give quantity orders you secure extra discounts and increase your percentage of profit. Give every customer the right grade of Imperial Polarine and he will come back for more.

Polarine
FRICTION REDUCING MOTOR OIL
"Makes a good car better"

Imperial Polarine is widely advertised — well and favorably known to most motorists. Link up your store to our advertising — display the Red Ball Sign prominently—carry the full Imperial Polarine line of oils and greases.



Imperial Polarine is suppplied in three grades—Imperial Polarine, Imperial Polarine Heavy and Imperial Polarine A for cylinder lubrication, also Polarine oils and greases for effective transmission and differential lubrication.

There are one-half gallon, one gallon and four-gallon lithographed sealed cans, also twelve and a half gallon steel kegs, half-barrels and barrels. A package to suit any customer—have the size they want.

Send to-day for our booklet "Polarine for Automobile Lubrication," if you have not received your copy. Secure our attractive dealer proposition.

Please Write to 56 Church St., Toronto, Ont.

Keeps Your Store Free of Dust

HOUSEWIVES, all customers, in fact, buy from those dealers who have the brightest stores.

If you believe in clean hands and shining windows, you will want to keep your goods free from dust—you can, by using—

STANDARD Floor Dressing

the non-evaporating, sanitary wood preservative which cleans the surface of wood, linoleum and oil cloth, and prevents dust from rising. Dust cannot rise from floors treated with Imperial Standard Floor Dressing.

One gallon of Imperial Standard Floor Dressing, when applied with the Imperial Floor Oiler, will cover between 500 and 700 square feet of floor space with a dressing which will last for several months.

Merchants, public buildings, office buildings, churches and apartment houses should use Imperial Standard Floor Dressing. Display a few cans on your shelf and draw the attention of your customers to its good results on your floors.

Sold in one gallon and four-gallon cans, also half-barrels and barrels.

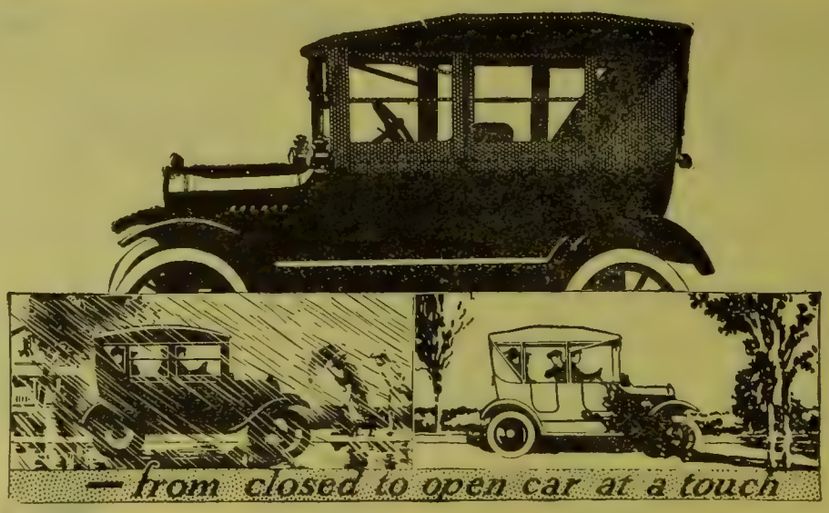
Dealers Everywhere Speak Well of ROYAL OAK Tires



BEFORE you place your order for Spring delivery would it not be well to ask us first for a demonstration of the quality that makes Royal Oak Tires the cheapest cost-per-mile? Aside entirely from the question of money profit, there's a double advantage for you in handling Royal Oak Tires — that which you derive from the good-will of your customers, and the comfort you experience in comparative freedom from complaints. To these may be added our promptitude and accuracy in filling orders. Inducements enough surely to warrant your investigating carefully what we have to offer.

USTUS *Limousette* FOR FORDS

For Big and Profitable Business

At last—an honest-to-goodness all-season attachment for Ford Cars. The "Ustus Limousette" gives every Ford Touring Car or Roadster a closed car appearance and protection when needed. It is invaluable in Winter, Spring, and late Fall, but it is not necessary to remove any part to enjoy open car freedom during the warm weather.

After the initial attachment the Ustus Limousette becomes a permanent part of a Ford Car. Adjustments to suit weather conditions, for ventilation, entrance or exit, are accomplished by the raising or lowering of the side piece on special spring rollers. These rolling side members can be operated conveniently and easily from outside or inside the car. The action of these rollers is identically the same as the way in which the window shades in your own home are raised. When in the raised position they are entirely concealed from view by the overhanging position of the Ford Top. But they are at all times ready for instant use.

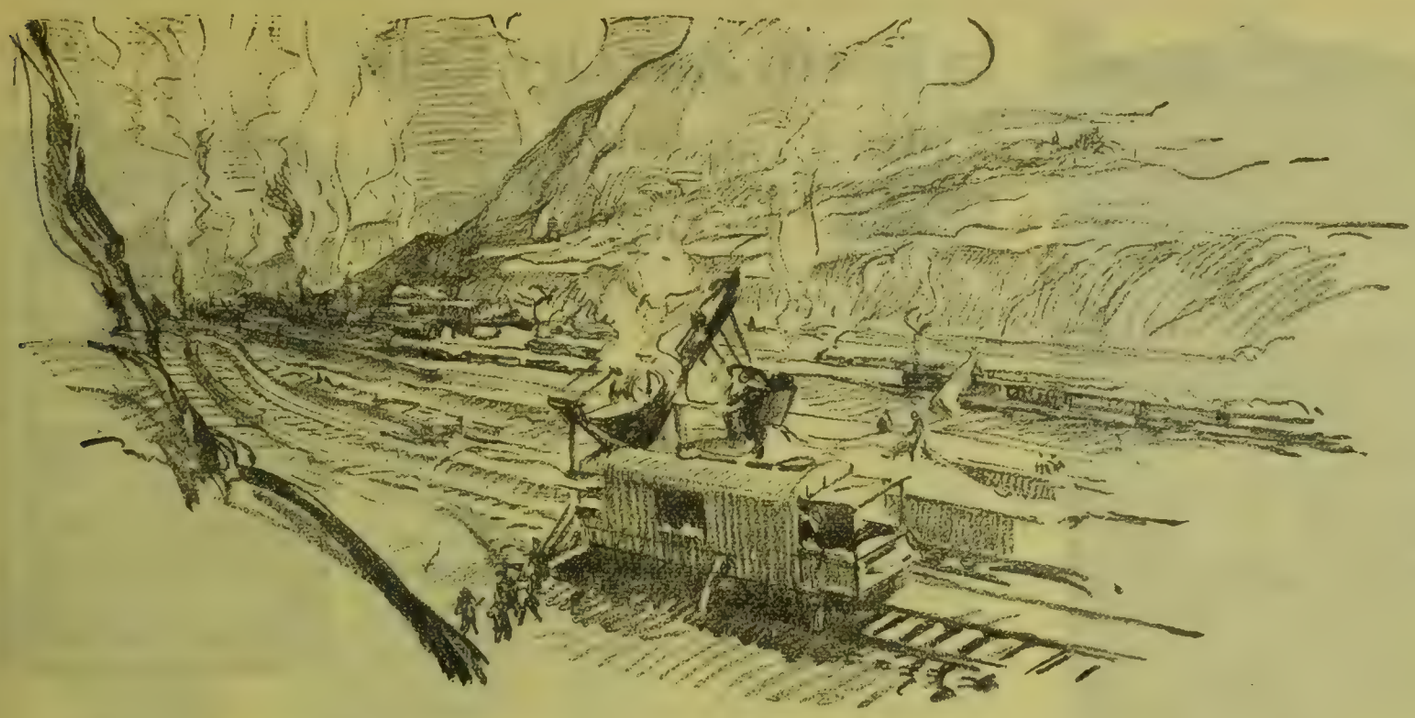
Not only does the Limousette give open car freedom when weather conditions are suitable, but it gives practically the identical appearance of an open car. Even the parts that are necessarily in full view when open car freedom is desired, add to the appearance of any Ford.

If for any reason it is desired to detach the Limousette it can be readily removed, folded, and placed under the seat. It folds into a bundle only 31½ inches overall. It weighs but 40 lbs.

Here are ten of the most interesting and important features of the Ustus Limousette:

1. It improves the looks of the car.
2. It is light in weight.
3. Gives clear vision front and sides.
4. Permits easy and quick entrance and exit
5. Gives closed car comfort in bad weather.
6. Instantly convertible into an open car.
7. Eliminates inconveniences of awkward side curtains in summer.
8. It wears well.
9. No rattling or vibration.
10. No alteration of standard Ford equipment required.

Every Ford Touring and Roadster in Canada is a live prospect for an Ustus Limousette.



The practicability and convenience of the Limousette, plus our advertising efforts, practically assures an immediate wide-spread demand for this new addition on Ford Cars. We have a real, live selling proposition to offer you. Write or wire for our proposition.

Every dealer with half an eye can see the selling possibilities in this line.

It makes good on the big jobs

Ordinary Woven Lining

Notice the loosely woven texture.
Wears down quickly and unevenly.
Loses its gripping power as it wears.

Thermoid Hydraulic Compressed Brake Lining

Notice the compact texture.
Wears down slowly.
Gives uniform gripping surface until worn wafer thin.

PERHAPS the best tribute to Thermoid Brake Lining is its selection by leading engineers for use on industrial machinery doing the big jobs.

It is the brake lining of responsibility which always makes good.

The machinery that so successfully accomplished the digging of the Panama Canal was equipped with Thermoid Brake Lining.

The machinery that built the great Woolworth Building and the New York subway was equipped with Thermoid Brake Blocks and Brake Lining.

The 100% brake lining

Thermoid is made according to definitely proved scientific prineiples. It gives utmost length of wear, resists moisture and has the proper co-efficient of friction. Thermoid has proved the most effective brake lining made in the laboratory as well as by actual use on machinery where it has been subjected to unlimited wear and tear under every conceivable condition.

Why engineers select Thermoid

There are three reasons why Thermoid is always the choice of engineers who "know":

1—Over *40% more material* and 60% more labor are used in Thermoid than in any woven brake lining. This gives longer wear. 2—Thermoid Brake Lining is *Grapnalized,* an exclusive process which resists moistures, oil and gasoline. 3—Thermoid is *hydraulic compressed.* It wears down slowly and evenly and can be used until it is cardboard thin.

Every foot of Thermoid is protected by our guarantee:

Thermoid will make good---or WE WILL.

Manufacturers:

SPHINX MFG. COMPANY

BIRMINGHAM, ENGLAND

'SPHINX'

England's most Durable Plug

The Signal of Distinction

An ornament and a double signal. Made in styles and sizes to suit all makes of cars.

WARNS

BUT DOES NOT OFFEND

This improved signal says "car coming," but not as a harsh command to "Get out of my way." It calls attention rather than gives an order. It does not startle.

"LIBERTY BELL"

DEFINITE AND DISTINCTIVE

The clear bell tone carries through all the sounds of traffic. Its warning is positive and in addition a red light is flashed from a semaphore lens located just above the bell.

GETS THE RIGHT OF WAY

This signal, combining both sound and sight warning, is amply protected by patents. We will vigorously prosecute makers of infringing devices and dealers who handle them.

A POLITE SIGNAL

We have an attractive proposition for you. Write for prices.

COLT'S FIRE ARMS

fit the requirements of every man. The Sportsman, the Expert Marksman, the Householder. Each knows that for the use to which he desires to put this firearm he has the utmost dependability, accuracy and safety in a Colt.

Now that the great Colt factories are practically manufacturing on a peace-time basis, dealers are satisfying their customers by supplying them with the best—COLT'S.

COLT'S PATENT FIRE ARMS MFG. CO.
HARTFORD, CONN.

LANE'S HANDY AUTO RATCHET TOOLS

FORD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 1 Extension Bar, 6 inches in length; 6 Sockets to fit all nuts and bolt heads on Ford cars, including the cylinder head. Put up in strong leatherette case. Weight, 22 ounces.

STANDARD SET

Contains—1 Handle, 7 inches in length; 2 Screw Driver Bits; 7 Sockets to fit all size nuts in U.S. Standard from ¼ inch bolt to ½ inch bolt; S.A.E. Standard from 5-16 inch bolt to 11-16 inch bolt. Cap screws from 5-16 inch bolt to ⅝ inch bolt. Put up in strong leatherette case. Weight, 18 ounces.

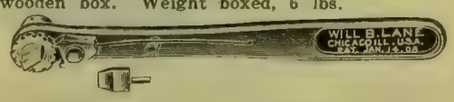
The **"Standard"** and **"Ford"** Sets of the Lane **"Unique"** Ratchet Wrench and the Lane **"Super-Unique" Ratchet** Wrench Set, together with the Lane **"Unique"** Off-Set Ratchet Screw Driver, present unusual selling opportunities for the dealer.

All Lane's Ratchet Tools are durable products. Machine-made, sockets turned from Grade "A" cold rolled steel, case hardened, Pawl and Ratchet Wheels milled, handles drop-forged and case hardened.

Their ability to perform tasks, where other wrenches fail, make them easy to sell.

Your jobber has them.

Manufactured by



WILL B. LANE

180 N. Dearborn St.
CHICAGO, ILL.

SUPER-UNIQUE SET

Contains—1 Drop Forged Handle, 9 inches in length; 1 Extension Bar, 8 inches in length with thimble attached; 15 Hexagon Sockets to fit all size nuts within 7-16 to 1¼ inches **broached opening.** The sockets fit all S.A.E. standards from ¼ to ⅞ inches. U.S. standards from 3-16 to ¾ inches (bolt). Cap screw sizes from ¼ to 1 inch. Put up in strong wooden box. Weight boxed, 6 lbs.

OFF-SET RATCHET SCREW DRIVER

Consists of—1 Six-inch Drop Forged Handle, polished and case-hardened; 2 Size accurately milled Screw Driver Bits made from the highest grade screw driver steel and oil tempered. Bits are interchangeable and can be removed and replaced in one second. This article is fully warranted. Weight, in paper box, five ounces.

McClary's Schoolmaster

Seventy-two years ago McClary's started into an unexplored field. The manufacture of stoves was new—there were few skilled stove-makers, fewer stoves that were carefully built.

McClary's started at the beginning. The first McClary's product was a wood stove—a wood stove to-day that appears crude and impossible—but in those days it was a master achievement, McClary's principle of nothing but the best in workmanship and construction was founded in that stove.

With each new stove McClary's learned a lesson. Experience was the school in which McClary's industry was built up. Time was the schoolmaster that taught each lesson thoroughly.

To-day, McClary's is a leader in the world of stove and cooking utensil makers—first in the British Empire. McClary's industry has grown until now every type of stove from wood range to electric range is made in McClary's factories.

The principle of construction, founded with the first stove has been carried down through the years. McClary's always have used the best materials and best workmanship obtainable in their products, they always will.

The

Double Grip Victor

A MODERN GAME TRAP for all around use, but particularly desirable for skunks, muskrats and mink. The high-catching, double-faced jaws eliminate losses through animals twisting or gnawing out.

These traps have all the desirable features of the regular Victor, including the humped cross and direct pan-fastening.

SPECIFICATIONS

No. 91.	
Spread of jaws, 4⅞ in.; weight per doz.	8½ lbs.
In barrels, 35 doz.; shipping weight	310 lbs.
No. 91½	
Spread of jaws, 5⅝ in.; weight per doz.	12 lbs.
In barrels, 23 doz.; shipping weight	307 lbs.

Record-Breaking Fur Prices

FUR DEALERS in every section of the country are crying: "MORE FURS." Conditions point to an unsatisfied demand even for this country—and European buyers are flocking to North America in an attempt to secure enormous quantities of fur for export.

There never has been as great a demand for furs of every kind as there is to-day—at prices that will pay small fortunes to the man or boy who will trap this fall. Every farm-paper, trapping magazine and most of the country newspapers are carrying big space advertisements of dealers urging trappers to help fill the ever-increasing demand for furs.

This points to but one thing—record-breaking game trap sales. Do you want your share of this business? Get in on the big game trap clean-up.
